I got a better idea...lets all go to Phasing SSB generation. Only suppress
the carrier about 20db. And operate on Double Side Band.

Wouldnt that act similar?

That is correct -- The only devices supported by the web page are:

KAM-98
KAM-XL
KPC-3+
KPC96/12

The KAM+ is no longer discussed or supported on their web page. I
left an email with their tech support to see if they have the latest
firmware or hardware for the KAM+.

We'll see if they even respond.

Dan, Dan, Dan ...

Question: Is phasing worse? Are you sure? Carrier suppression wouldn't be nearly as important as unwanted sideband suppression. Check out some of the QST articles over the past few years. The reality may well be that with digital processing, that quadrature phasing may well be held more tightly with DSP than with analog components. The RF quadrature (at least for one frequency, or a small frequency spread) would be easy. It may turn out that we could get better suppression with phasing. Then again, the two methods might just be combined. Folks who think they have a broadcasting license and want to pass 10 KHz audio are simply out on a weekend pass. The Friendly Candy Company will reel them back in, in time. Just a thought :)

I didn't quite get that statement, either.

If there was problems with carrier suppresion in old rigs, it was due
to the tubes (and their warm-up time) rather than whether the rig
was phasing or filter. Sure, a filter rig places the carrier
on the slope of the filter, but a balanced modulator should be
able to get rid of enough carrier, given enough care.

Looking at schematics of phasing rigs, most of them had low
pass filters in the audio chain. It was there to limit
bandwidth, and likely to put less requirements on the audio
phase shift network. If the PSN only had to see a limited bandwidth,
it did not have to be as broadband.

Except for in recent years, phasing was pretty much dead forty years
ago, and definitely by thirty years ago. That was a whole different
time ago. Likely harder to get precision components, and few had
the test equipment the average ham has now to match components.
So really simple PSN's were used. They used tubes, and likely
that made some problems with getting good balance, because of
the size of the components.

The phasing rigs of today are more complicated, taking advantage
of recent advances, and likely are better than those simple
phasing rigs of the fifties.

The entries I see in there are directories, each named for an interface (in my case, ax0 ... ax3). That implies to me that you have to attach the soundcard interface before you will seen an entry.

Thanks, for all the input. Upon more research, I found an older radio
that is still receiving grand reviews....The YAESU FT-51R. I realize
it don't have all tha bells and whistles of the newer models, but what
I have read about this one is that folks even go back to this model
after buying the latest and greatest.
I read so many negative reports on the mini HT's as far as 2meter is
concerned.
All of my local towers are 2meter.
Anyway, just got a FT-51R on Ebay. Should be here even before my
callsign gets assigned.
Thanks again, Bill C.

Dont forget about an award to given at Dayton this year too!

Do you know that person on 20 and 75 meters, that does his best to make his mark on the world? Is he not getting the recognition he deserves? Well, here is an upcoming award for him/her/it!

Nominate your favorite ham radio op for the "Ham Radio's most wanted"!

This award give the proper recognition for outstanding QRM'ing! Wheather the QRMing be for 75 and 20 meters, 30 meter CW or 2 meter repeaters, this is the one!

We will take things for, but not limited to:

Wide SSB
Music
Starting bulletins services on top of QSO's
no call signs
roger beeps
just plain being annoying!

people from the past and Present are welcome!

e-mail your nominations to lloyd_vfp@msn.com

You have till the monday before Dayton Hamvention. I will announce via newsgroup post who the winners are, at high noon on Friday of the Dayton Hamvention.

The winner gets a certificate, sutiable for framing in his shack.

This seems rather silly to me on their part. To put up a scanned copy of the manuals in PDF format, and the last firmware that they made available for the KAM/KAM PLUS would be a reasonable thing to do, even if they declare there is no support from them for any of the documentation or firmware.

As I return to packet radio and look at their new products, it leaves me with a rather bad taste in my mouth to know that they will not do anything whatsoever to help olde customers when they have all the software and manuals right there to assist people. I find it to be a very arogant point of view for them to take. Now maybe if they get enough requests they will change that, but at this point I emailed someone; somehow they came to the conclusion that they did not want to support KAM or KAM PLUS.

How about writing some additional add on external server programs
for my HamServ program.

It's an attempt at a modern tcp/ip but windows based, it's a long way
from completion, but you can get it at www.gb7abc.net along with
the source code in C for REQDIR, REQFIL, and a few others.

Plenty of scope there for additional servers to be written, such as callsign
look up, auto 7plus correction etc...

IF that's how one gets a soundcard interface attached, then yes. I don't have experience with soundcards as TNC's. The problem is with your driver.

Stuart,

It sounds like you probably have not correctly configured soundmodem.
See section 6.1.5 of the AX25-HOWTO for details on how to do this.

Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.equipment,rec.radio.amateur.misc

FYI, I made a decision with Pacterm for Windows to support the KAM-E and KAM PLUS with 7.0 firmware or later. Current release 1.7 does that.

In version 2.0 of Pacterm for Windows, due later this year, I still plan to support the KAM-E and KAM PLUS with 7.0 firmware or later.

I even decided to contine to support the KPC-1 with 5.0 firmware. That's almost a 20 year old TNC. :)

> N3GWG

I fully agree, Stuart. They have not responded to the message I left
on their tech support email address, so I guess the KAM+ is an orphan.
Mine has Version 6.1 firmware and no enhancement board. All I have
ever used it for was packet, aprs, & rtty. I have since moved to the
sound card audio & interface for rtty, mfsk, psk, so all that is left
on the KAM is packet/aprs. Actually, with AWGPE, those can be done
with the sound card interface, also - just haven't gotten around to
it.

The only digital modes I'm interested in that require a modem is
PACTOR II & III. That's so I can do Windowlink/airmail. I got my
KAM+ used, at a hamfest for 60 bucks. I'm glad I didn't pay more for
it -- and I'll not buy another.

Good luck.

I'm soon moving to Sao Paulo Brasil from Los Angeles and am interested
in determining what HF bands would work well for communcating back with
L.A. and, will i be besieged by stateside DXers [:

additionally, does anyone know how much VHF activity there is in SP, will
it be worth my while to bring my Yaesu FT51R (2m/440) HT.

oh and do i need to apply for a license (reciprocity with US?) in Brasil.
thanks in advance. kb6cun

Need to replace the lithium battery in my KW570D. It's on a board behind the front panel. That panel is attached by 4 clips that don't seem to wanna release the it. Anyone dealt with this b4? I just don't wanna break the clips, so if there's a specific sequence or something I'd appreciate hearing it...

This should make little David Tolassi and Mike butt-buddies. After all, they've both gotten several letters from Riley over the past years. I wonder which one will have his license pulled first?

.....
.....

FCC Alleges Michigan Ham Engaged in Deliberate Interference, Made Threats

NEWINGTON, CT, Apr 25, 2003--The FCC alleges that a Michigan ham engaged in deliberate interference and broadcasting and threatened other amateurs, and it has sent Michael Guernsey Sr, ND8V, of Parchment a tape recording to back up those assertions. Since late 1998, Guernsey has been the recipient of seven letters from FCC Special Counsel Riley Hollingsworth, including two warning notices. In 2000, the FCC threatened to designate Guernsey's license for a revocation and suspension hearing. Guernsey subsequently agreed to a nine-month suspension of his HF privileges in 2001.

"The operation of your station over the last several years raises questions about your qualifications to remain a Commission licensee," Hollingsworth wrote Guernsey on April 7. The latest flap primarily involves complaints from other amateurs of deliberate interference on 20 meters.

The recorded transmissions were made on March 26, 2003. Hollingsworth said the transmissions included threats to another amateur, deliberately calling CQ atop ongoing QSOs--even while Guernsey acknowledged that he was able to hear the other stations--broadcasting, and deliberate interference.

In his letter, Hollingsworth noted that some of the interference apparently sprang from on-the-air personal disputes or from what Guernsey perceived as deliberate interference to his transmissions. Even so, he said, Guernsey has apparently ignored the Commission's written and verbal warnings to not retaliate with similar behavior.

Hollingsworth advised Guernsey that the alleged deliberate retaliatory threats and transmissions on top of the communications are contrary to FCC rules "and indicate that the numerous warnings to date have little, if any, effect in regarding to bringing your operation into compliance with Commission rules."

Hollingsworth requested that Guernsey review the tape recording and respond in writing and in detail within 20 days. He said the FCC will use the information Guernsey submits to decide whether to designate Guernsey's license for a suspension and revocation proceeding or to lift voice privileges from Guernsey's license for the remainder of his license term, which ends in 2012.

In a related letter, Hollingsworth issued similar words of caution to George Zardecki, N9VTB, of Chicago, with whom, he says, Guernsey has squabbled on the air. While Hollingsworth indicated that he would review and take action regarding Zardecki's deliberate interference complaints, he advised Zardecki that "in several instances, your own conduct was as bad or worse than the party about whom you complained." He cautioned Zardecki against retaliatory interference, slander and name calling.

He also told Zardecki that his claim of a "Polish calling frequency" on 20 meters was "without foundation" in FCC rules or in any band plan.

Typical psychotic rantings from Roger Wiseman. The sick little gnome pops his misshapen head up from under his bridge and spews his tired and predictable filth.
His grubby little fingers are pounding away at his keyboard as the veins on his neck stand out due to an increase in blood pressure.
Better watch it, Rog. You could anger yourself into another of your "cardiac events", only this time Chief Stenger won't be there to call the medics.
You know what happens when you don't take your Thorazine...you end up back in the mental institution for another 14 days.

Amateur Radio Newsline™ Report 1341 April 25, 2003

(Note: This is the first ever Amateur Radio Newsline report anchored from outside of the United States. It was recorded in Auckland, New Zealand by Jim Meachen, ZL2BHF)

**

The following is a Closed Circuit. Newscast 1341 follows immediately. Here is Amateur Radio Newsline Support Fund administrator Andy Jarema, N6TCQ.

--

Amateur Radio Newsline is still on the air. It's still on the air because staff members paid the bills out-of-pocket. This obviously, cannot continue. These people are not Bill Gates, Warren Buffet, or even Michael Jackson. These are your everyday working people who believe so strongly in the mission of Newsline, that they will support it with hard-earned dollars.

We at Newsline need for you, our listening audience, to believe in that mission, too. To believe enough to help keep these newscasts on the air. To show your thanks to the volunteers that keep the latest in Amateur Radio news coming your way.

The address for the Newsline support fund is: Newsline, PO Box 660937, Arcadia, CA 91066.

Again, as always, thank you for your belief, and for your support.

--

Thank you Andy.

**

Amateur Radio Newsline report number 1341 with a release date of Friday, April 25 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Bad news for United States hams who like high fidelity single sideband, good news for New Zealand hams worried about restrictive R F exposure laws and the Dayton Hamvention says that it plans to stay where it is. Find out the details on Amateur Radio Newsline report number 1341 coming your way right now.

(Billboard Cart Here)

**

A CLASH OF IDEALS: BE CAREFUL IF YOU RUN WI-FI

A sour note for hams running what some call high fidelity single sideband. It comes in a regulatory advisory letter from the FCC. Amateur Radio Newsline's Paul Courson, WA3VJB, reports from Washington D.C.

--

The letter from FCC enforcement counsel Riley Hollingsworth went out to a list of licensed hams who favor what some call enhanced SSB, which is sometimes nicknamed upper wideband and lower wideband, characterized by extended low end response, a clean mid-range, and expanded treble or high-end crispness.

While their passion is to experiment toward exceptional audio quality with their voice transmission and reception, the experiments have been a flop with some other hams near their frequencies of operation.

Hollingworth said the Commission has received a number of complaints, and that his advisory letter is intended to inform them that the complaints claim the bandwidth of these stations is wider than necessary and contrary to good engineering practice.

The FCC letter did not cite these stations for any violations, and acknowledged that a precise measurement can be somewhat complex. But he encouraged each operator to be aware that it can be "extremely inconsiderate of other operators" to employ what Hollingsworth described as wide-band overly processed audio, especially when, in his words, such audio is combined with high intermodulation distortion generated by certain amplifiers.

Two of the hams who received the letter quickly responded to Hollingsworth. John Anning, NU9N, told the FCC that single sideband does not have to sound like a tin-can anymore, and cited the enhanced audio available from the latest manufactured transceivers from Kenwood and Yaesu, as well as the popularity of external audio augmentation marketed to the amateur community from Heilsound and W2IHY. Anning said his station does not splatter, has low distortion, and is not overly processed. He suggested the problem of splatter and excessive bandwidth from distortion products is far more common on the phone bands during any contest weekend.

The other hi-fi ham sharing his response to the FCC advisory letter is Paul Christensen, W9AC. He told Newsline he is puzzled by the letter since he's been off the air the past six months. Christensen said the letter may have been prompted by a group he characterized as "a half dozen tightly-knit, pandering individuals."

Both men who spoke with Newsline compared the experiments with wideband SSB to the activity of AM, which itself has enjoyed rising popularity and has been getting favorable press in QST, Electric Radio, and Popular Communications. By contrast Hollingsworth has reportedly expressed his belief single side band was developed as a mode with spacesaving advantages, with necessary tradeoffs in audio quality as a presumption with its use in the amateur service.

Again, the advisory letter carries no enforcement sanctions. But Hollingsworth told the stations such complaints can trigger petitions for rulemaking asking for constraints on such activity that the recipients of the letters had better keep in mind.

Reporting for Newsline, this is Paul Courson, WA3VJB, in Washington

--

In preparing his report WA3VJB did contact the FCC’s Riley Hollingsworth. Hollingsworth told Courson that he honestly does not think these letters have any bearing on those hams who operate AM stations altho he admits thart he is getting that question. But he says that in his view, there is no need whatsoever for A-M'ers to be concerned. (ARNewsline™, WA3VJB)

**

RADIO LAW: RF EXPOSURE LIMITS DOWN-UNDER

Some good news for hams down-under. This as the Palmerston North City Council favors Amateur Radio on a proposed plan to change local Radio Frequency exposure limits.

According to Mike Newman, ZL1BNB, the Palmerston North council has declined to accept the recommendation of the New Zealand Department of Health to adopt its testing and reporting proceedures. The Council instead adopted the less stringent emission exposure levels set out in an earlier New Zealand standard as being the maximum levels which can be generated by transmitting equipment within the Palmerston North City boundaries.

In taking this action the Palmerston North city council declined to support the government recommended approach which would have required local radio amateurs to carry out the expensive R F exposure evaluation process. Numerous amateur operators and representatives of the nations national Amateur Radio Society -- the N-Z-A-R-T -- testified in support of the measure that was adopted. (NZART)

**

RADIO LAW: CANADA NEW TOWER LAW REVIEW COMMITTEE

Back in North America, Canada’s Minister of Industry, Alan Rock, has announced the appointment of a National Antenna Tower Review Committee. The Committee will be made up of municipal officials, as well as industry, health and academic experts.

The new committee will be chaired by David A. Townsend. Townsend is a Professor of Law at the University of New Brunswick and has authored a previous study on antenna support structures.

And while the announcement outlines the composition of the new Canadian tower committee it does not give the target dates for the submission of inputs or the method by which information can be provided. Radio Amateurs of Canada, that nations national Amateur Radio society says it plans to participate in any policy review affecting Canadian ham radio operations. (RAC)

**

Break 1

From the United States of America and Auckland New Zealand, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the N9AKN

repeater serving Milwaukee Wisconsin.

(5 sec pause here)

**

ENFORCEMENT: RADIO STATION DINGED FOR $9000

A $9,000 fine against WRKQ - AM in Madisonville, Tennessee, has been affirmed by the Federal Communications Commission. The regulatory agency says that WRKQ allegedly failed at least once to identify itself by call sign. Also that it operated at night with daytime power and failed to adequately attenuate its second harmonic.

The harmonic is a rather interesting issue here. WRKQ operates on 1250 kHz. The FCC says that it's second harmonic falls squarely on WWV's authorized frequency of 2.5 MHz. The FCC says that it measured WRKQ's second harmonic down at only -55 dB per centimeter whereas -70 dB is required by the rules.

You can read more on the web at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1033A1.doc (CGC)

**

ENFORCEMENT: YOU CANT SAY THAT ON THE AIR - IN ANY LANGUAGE

The FCC is looking into what a California ham may have said on the air. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "Julio Cedeno, N2GRM, of Hollywood California has 20 days to respond to an inquiry concerning both Spanish and English communications from his station operation on 14.322 MHz on March 5th and March 9th of this year. The transmissions contained threats to another amateur as well as language prohibited by the Commissions rules."

--

In its letter the FCC noted directed that N2GRM specifically address the threats in the transmissions as well as the language. The regulatory agency says that threats made against other licensees are viewed very seriously by the Commission. It also told N2GRM that his response will used to determine what enforcement action the FCC may take in this matter.

**

ENFORCEMENT: YOU CANT SAY THAT ON THE AIR

An Eastlake Ohio ham has also heard from the FCC. On March 18th the regulatory agency issued Dave K. Childers, N8QGI, a warning letter regarding transmissions purportedly made by him last December on 27.115 MHz.

For those of you not aware, 27.115 MHz is also known as Class D Citizens Band channel 13 in regions governed by the FCC. In its note, the government agency did explain its position -- upheld by the courts -- regarding its ban on the

type of language Childers is alleged to have used.

The agency also ordered Childers to respond within 20 days from the date of its letter to him. The FCC also told him that his response will be used to determine what enforcement action to take in this matter.

**

HAMVENTION 2003®: WE PLAN TO STAY AT THE HARA

The Dayton Hamvention hopes to stay at the HARA Arena well past 2003. So says the event's General Chairman, Pat Neff, N8IGS. He tells RAIN's Hap Holly, KC9RP that the rumors of a move are simply not true:

--

Neff: "I can't tell you where the rumor is being propagated from but I can tell you that we are in negotiations for future years at HARA Arena and the only difference is that we are really not looking to have a long multi-year contract anymore. We want to be able to have a shorter length contract so that it could be better advantageous to us from a bottom-line aspect."

--

Rumors of a move away from the HARA Arena or that the HARA had been sold seem to pop up every year. Newsline even heard one being circulated at the recent N-A-B show in Las Vegas. And like all before it over the years, this rumor was as phony as the rest.

But the real bottom line is what Pat Neff says -- and we quote: "As much as the city of Dayton is associated with the Hamvention, HARA is associated with Hamvention." And to paraphrase another very famous ham -- thats the way it is! (RAIN)

**

HAMVENTION 2003®: HEAR MORE ON RAIN

By the way. You can hear more about the plans for Hamvention 2003 with Pat Neff, N8IGS, on this weeks RAIN Report. Its on-line right now in streaming audio at www.rainreport.com. Or, if you are Internet deprived, you can dial in on your phone to listen. The number in Chicago is area code 847 827 RAIN. Thats 847 827 7246. (RAIN)

**

HAMVENTION 2003®: DAYTON REMEMBERS THOSE WHO HAVE PASSED ON

Still with Hamvention related news, last week its planners announced the major award winners for 2003. And from time to time the Hamvention also recognizes the contributions of hams who have passed on but left their mark. Roy Neal, K6DUE, reports:

--

Dating back to the days when we hams talked in Morse code and used keys instead of microphones to talk, we hams call our friends who have passed on as Silent Keys'. The term is one of endearment and respect for those radio amateurs who have lead the way. And in keeping with this long tradition, the planners of the 2003 Dayton Hamvention have paused to salute a number of special people whose lives have helped to make ham radio a little bit better.

The first being saluted by Dayton is Joseph Carr, K4IPV, of Falls Church, VA. Carr became a Silent Key on November 25, 2000. During his lifetime K4IPV authored over 85 books and nearly 700 articles covering electronics and technology. He also contributed monthly columns and articles to many popular Amateur Radio magazines.

Al Gross, W8PAL, of Sun City, Arizona became a Silent Key on December 21st, 2000. For those not aware, Gross brought the world such indispensable wireless communications devices as the walkie-talkie, the pager and cordless telephone.

A name that many Amateur Radio Newsline listeners will remember is that of Bill Orr, W6SAI. Bill became left us on January 24, 2001. He was best know for his voluminous publications for radio amateurs, including "The Radio Handbook", "The Beam Antenna Handbook" and many more. He was a good friend to me and to many other hams.

Raymond Ortgiesen, WF1B, was another major contributor to today’s ham radio way of life. He authored “RTTY,” the leading contest software for digital modes.

Ernie Hudson, KI8O, of Dayton, OH became a Silent Key on 8/2/2002. Hudson was a member of the Dayton Red Cross and acted as the Montgomery County Emergency Coordinator and Assistant Coordinator for a number of years. Hudson’s passion was helping people. His efforts focused on public service and disaster relief while also introducing many young people in Amateur Radio.

Finally there are the Columbia Astronauts who perished earlier this year. Three of them were hams. David Brown, KC5ZTC, Kalpana "KC" Chawla, KD5ESI and Laurel Clark, KC5ZSU, who died along with crew-mates Rick Husband, Willie McCool, Michael Anderson and Han Ramon when Columbis disintegrated over Texas during re-entry.

The Dayton Amateur Radio Association says that through the Space Amateur Radio Experiment and the Amateur Radio on the International Space Station programs, ham radio has enjoyed a special relationship with the Astronaut Corps. It is for their dedication, their role in scientific advancement, and their love of their dreams that the Dayton Amateur Radio Association and the Hamvention have made this very special award this award to the crew of the space ship Columbia on its STS-107 last mission.

For the Amateur Radio Newsline, I’m Roy Neal, K6DUE, reporting

--

The announcement of these special remembrances is on the events website at www.hamvention.org (Hamvention 2003®)

**

HAM HAPPENINGS: T-HUNT TIME

And speaking about things that happen in the spring, its T-Hunt time again. Here’s Joe Moell, K0OV, with the latest:

--

Are you looking for some new outdoor ham fun for the spring and summer months? Join your fellow hams who are tuning up their radio direction finding (RDF) equipment in preparation for the hidden transmitter hunting season.

The CQ Magazine National Foxhunting Weekend will be May 10-11, a time when foxhunters from around the country go on their favorite kind of RDF adventure. It could be a mobile T-hunt. When you set out in your RDF-equipped vehicle, you never know where you'll end up and you don't know what you'll find.

Other hams prefer their foxhunting to be all on foot in a big park. They call it foxtailing, radio-orienteering or ARDF. There's an internationally recognized set of rules for this kind of hunt, which takes place in about 30 countries around the world. Stateside hams will host competitors from some of these countries at the Third USA ARDF Championships in Cincinnati, Ohio beginning July 31.

Of course your club can make up its own transmitter hunting rules. The important thing is to make plans now for transmitter hunting on May 10 and 11, the National Foxhunting Weekend. There are more foxhunting opportunities coming up, and I'll be telling you about them in another report soon. You can read about foxhunting and the National Foxhunting Weekend at my Web site: www.homingin.com. That's one word "homingin" --- homingin.com.

From southern California, where there's some kind of transmitter hunt almost every weekend, this is Joe Moell, Kay-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Again Joe’s website is www.homingin.com. And homingin is one word. (ARN ewsline™, K0OV)

HAMS HELPING HAMS: DISTANCE LEARNING - AMATEUR RADIO STYLE

The Nacogdoches Amateur Radio Club, in Nacogdoches Texas recently solved a big problem using what it calls typical ham radio ingenuity. This, when John

Fullingim, the person who was supposed to talk at their meeting could not get a ride out from Dallas about 180 miles away

Fullingim¹s program was a Power Point Presentation consisting of a series of slides accompanied by live commentary. Rather than cancel the April 2nd meeting, Fullingham e-mailed the Power Point to Army Curtis, AE5P, in Nacogdoches. Curtis loaded it onto his laptop computer for showing at the meeting.

Next, a communications link was then established between Nacogdoches and Dallas using both the Internet and Amateur Radio courtesy of Jeff Clark, K5NAC and Kevin Anderson, KD5CCH. And on the meeting night Curtis ran the slide show in Nacogdoches as Fullingim in Dallas provided commentary using the specially installed system.

The two way link also allowed questions to be asked from the live audience. This remote program lasted almost 90 minutes, and was very well received by everyone present at the meeting. (KD5ING)

**

NEW HAM TECHNOLOGY: RIMIGATE VER 0.2 NOW AVAILABLE

Sean Jewett, KG4NRC, of Antioch, Tennessee has announced the availability of version 0.2 of his RIMiGate application program. This is a freely available Linux based APRS I Gate server.

Version 0.2 is quite a bit different from the earlier release. Users no longer need to have a Linux system to build RIMiGate. RIMiGate is now distributed as a disk image that can be written to disk using freely available tools for Linux, Windows, and Macintosh. In addition, the configuration files now reside on an M-S DOS based file system so users can easily edit configuration files.

The minimum requirements for RIMiGate is a 486 system with a minimum of 12 megs of ram. You can download the program from the http://www.rimboy.com/rimdistro/rimigate/ (KG4NRC)

**

HAM RADIO IN SPACE: AN AO-40 UPDATE

The AMSAT Oscar 40 satellite is continuing to drift downward as was predicted by its controllers. Unfortunately, this makes for bad satellite conditions that are less than favorable for passband use.

Also, the solar angle is worsening and will soon exceed 45 degrees. This will limit satellites available power while warming the spacecraft considerably as the sun swings across it.

Because of these factors, AO-40’s passband transmitters were be turned off on Saturday, April 19th. They will remain off for about 4 weeks or until conditions improve. (ANS)

**

INTERNATIONAL -GERMANY: DEUTSCHE WELLE GOES DIGITAL

Germany's international broadcaster, Deutsche Welle, has announced that as of June it will transmit digitally on shortwave to Europe and the Middle East using the Radio Mondiale broadcast system. This makes Deutsche Welle the first international broadcaster to commit to a start date for regular D-R-M transmissions on the shortwave bands. (ASWLC)

**

OUR HERITAGE: INTERNATIONAL MARCONI DAY

Saturday, the 26th of April, was 'International Marconi Day'. International Marconi Day is a 24-hour on-the-air event held annually to celebrate the birth of Guglielmo Marconi in 1874. Its also an opportunity for amateurs around the world to make contacts with historic Marconi sites to gain an award for working a specific number of participating stations.

At least 35 special event stations were to be on the air for International Marcoini Day 2003. This included the famed W1AA slash MSC Marconi Radio Club representing the Marconi 1901 Siasconset Station on Nantucket Island in the USA. There were also around 15 United Kingdom sites slated to be on such as Poldhu in Cornwall and Alum Bay on the Isle of Wight and Chelmsford in Essex. Other historic stations include VO1IMD from Signal Hill, Newfoundland, and IY4FGM from Marconi's birthplace near Bologna Italy. (MSC ARC, GB2RS)

**

DX

In DX, the RSGB reports that the International Short Wave League's VHF club callsign, MX1SWL, is being used by Tom Read, M1EYP, through the end of April. Tom will be activating several hilltops, particularly in the Pennines, for the Summits On The Air awards program. (GB2RS)

And F0 slash F8CFU planned to be on from the Tuamotu Archipelago in French Polynesia and Tubuai Island in the Austral Islands through the 16th of May. QSL as directed on the air. (GB2RS)

Also, the former 7Q7DC, has now moved to Nairobi and has been given the call 5Z4DE. Don is the first United States citizen in 12 years to obtain a Kenyan license and will be active as soon as he puts his antennas up. (OPDX)

Lastly, word that 4Z4DX, will be active on 160 to 6 meters CW and digital modes as 9N7DX from Nepal through the 12th of May. Again, Q-S-L as directed by the operator. (OPDX)

**

THAT FINAL ITEM: HAM RADIO ADVENTURE TO THE SOUTH PACIFIC

And finally this week, how about a ham who has decided not to let age stand in the way of her passion to sail and to operate from rare places. Amateur Radio Newsline’s Bruce Tennant, K6PZW, reports on a truly amazing lady:

--

Susan Meckeley, W7KFI, is 69, loves ham radio and loves to sail. And she recently told the Ohio-Penn DX Newsletter that she is headed to the South Pacific on as three-year DX'pedition odyssey.

Meckeley left Oakland, California, in January and has been slowly working her way south. At that time she spore with OPDX Meckeley was in Mexico and soon to sign W7KFI slash maritime mobile. She has already been to Ensenada, Mexico, for a month, but set sail on April 16th, for San Jose, Punta Cabras.

Heading south, Meckeley told OPDX that she would be operating from the Isle San Martin. She was heard April 17th at 24:41 UTC as XE2/W7KFI on 14.249 MHz from the island. The length of her stay is not known.

Her next stop will be at Bahia de Torguga and from there to Magdelina Bay, Cabo San Lucas, and finally La Paz. Then it is off to the islands in the Sea of Cortez for operating and into Guymas for the hurricane season. Come fall she will go down the mainland coast ending in Costa Rica. In April 2004, Meckeley is off to Galapagos Islands and into the South Pacific.

When she's on the air its with a Yaesu FT-847 and a pair of pop-up masts. She runs all modes except ATV from her 1932 Challanger called the S/V Dharma. She tells OPDX that -- and we quote -- "this size boat I can handle all by myself." And it sounds as if Susan Meckeley, W7KFI, is making her dream come true.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

One last note. Meckeley told OPDX that she has room on board for a crew-member if anyone wants to go. If interested, let OPDX know and the newsletter will forward the message. The e-Mail address is kb8nw@arrl.net (OPDX)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2003 amateur Radio Newsline Young Ham of the Year is now open. No significant changes from last year. Nominees must be 18 or younger. Full rules and an application is on our new special website at www.yhoty.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, in Auckland, New Zealand saying 73 and we thank you for listening."

Ah yes, AAAAAUUUUUUUUDDDDDIIIIOOOOO!!!

Doncha just luv it :)

73 from Rochester, NY
Jim
ps - the complaints are likely from contest operators who also believe they 'own' all of the frequencies. Should be even funnier than 3 stooges re-runs :)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter and Web Site, K1XN & GoList, K2FF, K2PF, KF2HC, NG3K, W3UR & The Daily DX, K4VUD, KP4ARN, N4AA & QRZ DX, N4GN, N5VL, W5EW, W5UE, WA5PAE, KG6AR, KK6T, N6CW, AD8J, K8YSE, K9OT, Iveria IARC-4L1W, 9V1YC, CS1CRE, DF5AU, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-POST, E21EIC, F5NQL & UFT, FJ5DX & La Gazette du DX, I1JQJ & IK1ADH - 425 DX NEWS, IK2SAI, JI6KVR & JA-IOTA Islands News, JR3TVH, OH2BH, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, TI2DLL, UA9ORQ and VA3RJ & ICPO for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for May 5th, because I have to travel to Martin, Tennessee, next weekend to help move my daughter back from college. However, if everyone sends their info before I leave or if there is a special announcement, there "MAY" be a bulletin late (very late) May 5th. PLEASE continue to send your DX info to me (you never know!).

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/April, through Sunday, 27th/April there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VK9X, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN,

YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4A, MEXICO. Alejandro, XE2BSS, informs OPDX that a group of Mexicans and one U.S. amateur radio operator will be activating the callsign, 4A2Q, from Imuris in the State of Sonora, Mexico (grid DM40). Operations start at 0300z on May 3th and will end at about 2200z May 4th. Modes of operation will be: CW, PSK31, RTTY and SSB. For this occasion, they will also be active for all passess on UO-14, FO-20 and FO-29 satellites; on the two last passes they will operate CW also. The group will also operate on all bands on HF from 160-10 meters. Operators mentioned are: Gerardo C. Varela/XE2Q, Marco Antonio Soto Gutierrez/XE2TG, Vicente Uriel Martinez/XE2VAS, Marco Antonio Gamboa/XE2SNG, Patrick E. Stoddard/ XE2/WD9EWK, Jesus Meraz/XE2VJM, Manuel Rios/XE2ABB, Alejandro Pereida Mendoza/XE2BSS, Rafael Valdez Ley/XE2PVX, Enrique Romanillo Lopez/XE2SER and David Alonso Rivas Perez/XE2RDA. QSL via WD9EWK, Patrick Stoddard. More information about this special event operation can be found at: http://www.qsl.net/wd9ewk/4a2q.html

BALLOON EXPERIMENT. The Italian Amateur Radio Society - Milano Chapter (Associazione Radioamatori Italiani - Sezione di Milano) is proud to announce ARBE: Amateur Radio Ballooning Experiment. A special team will apply APRS technology for balloon ground position monitoring. During the same time a radio operator will fly onboard calling on the amateur radio VHF band (voice, USB) from the Mantova Airport. A special QSL card will be issued for all stations joining the event. QSL Manager will be given during the operations. The callsign used will be IQ2MI/p, and please check on 144.300 MHz +/- QRM USB starting at about 0800-0900z on May 10th. Flight should be 1-3 hours long. Due to weather conditions, the flight may be rescheduled for May 17th, same time. In order to get up-to-date information about the ARBE event progress, you can visit the ARI Milano Web site at: http://www.arimi.it/rubriche/arbe.html
(This page will be activated early May) ARBE is sponsored by the most important Milan Ham Radio Center: EP-Elettroprima srl, Aeronord Balloons & Airships, and the Space Engineering Department of Politecnico di Milano University.

CASTLE ACTIVITY. Members of the "Clube Radioamadores do Entroncamento", will use the special callsign, CS7AL, and will be active May 31st from Castel Alcanede (DCFP reference C-112, DMHP reference SR-012 and DMP reference 1416 for the Portuguese Castles Award). Operation will be on 40 and 20 meter SSB. Castel Alcanede is located in the Province of Ribatejo. QSL via CT1BXE, direct or bureau.

CY9, ST. PAUL ISLAND. The CY9 DXpedition team is now complete. The operation will take place from July 24th to August 2nd, with an entry in the IOTA Contest. The team members are Robert/N0RN, Vance/N5VL, Igor/W0IZ, Joe/KO4RR, Andrea/K5AAH (YL), Alan/K5AB and Dale/VE7SV. They will be taking with them a Battle Creek Special and will operate on the low bands during all openings. Callsign will be given either at the beginning of

the operation or shortly before. QSL via N5VL. Visit the following Web page for updates: http://www.hometown.aol.com/vlepierre/myhomepage/index.html

DAYTON HAMVENTION HAPPENINGS. The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. This year's Hospitality Suite will be dedicated to the memory of one of NODXA's "Silent Key" club members Jim Hire, W8ZET. Jim loved ham radio and enjoyed meeting his friends from around the world each year at Dayton. He was also a NODXA "Honorary Life Member" and was very involved with NODXA and the Hospitality Suite. This year Jim's wife, Janeen (now a new ham - KC8BRS) has decided to keep the tradition going and will provide some special memorabilia of Jim at the Hospitality Suite. Please stop by and visit. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

FP, ST. PIERRE AND MIQUELON. Paul/K9OT and Peg/KB9LIE (YL op) are planning their third annual low-power DX vacation as FP/K9OT and FP/KB9LIE to Miquelon (NA-032) from July 27th-August 5th. This will include an entry by FP/K9OT in the CW North American QSO Party. They will operate both CW and SSB and concentrate on 160, 80, 40, 30, 17, 12, and 10 meters, which are in the greatest demand. Special attention will again be given to QRP stations, mobiles, and VK-ZL-JA-JT-Oceania. QSL via homecalls; bureau cards will be accepted. For direct cards, please include SASE or SAE with one GS or IRC (old or new style). Visit the following Web page for updates at: http://www.mhtc.net/~k9ot

HS0, THAILAND. Charles Harpole, K4VUD, will once again activate his Thailand callsign, HS0ZCW, for the period of April 28th to about June 15th. He states, "Please note... WARC band operations in Thailand are NOT ALLOWED at the present time. Local hams are working on permissions." He also mentions that 80/160 meters operations are only during some contests and only then in small 3 kc windows, CW and SSB.

IOTA NEWS.....
AS-079. Taka, JR3TVH, will be active as JR3TVH/6, from Miyako Island (Miyako-gun, Sakishima Island, Okinawa-ken) from May 1-4th. Activity will be on 40-6 meters AM/CW/FM/RTTY/SSB. He will set up a 6m beacon on 50.138 MHz looking for 6m DX stations. For skeds, E-mail Taka at: jr3tvh@arrl.net
QSL via his homecall via the bureau or direct (QRZ.com).

EU-125. Mirko, DJ1AA, was active and scouting out the Island of Romo, located in the North Sea Coast Group (QTH of this Island is between Sylt [DL] and Mando Island [OZ]), last week. He plans to possibly be active from here for the upcoming IOTA Contest in July. Mirko is the Team Leader for a new IOTA contest group.

EU-136. There has been a slight change in plans!. Boro/9A3KB and Den/9A3FO, members of the IOCAGroup (The Islands of Croatia Activators Group) and the CTC (The Croatian Telegraphy Club),

are planning to be active from five Croatian islands in the EU-136 group as homecall/p, between May 31st and June 4th. Their first island will be Sveti Marko (IOCA CI-117) May 31st. From May 31st to June 1st; they will be active from Krk Island (CI-046) and Voscica lighthouse (CLH 188, Loc: JN75HF); June 2nd and 3rd from Susak Island (CI-108) and Garba Lighthouse (WLHA LH-0444, CLH-031, Loc: JN74DM); June 3rd from Losinj Island (CI-058); June 3rd and 4th from Cres Island (CI-012, Grid JN74). Look for them on 80-10 meters, CW only. QSLs via the individual's home callsign, direct or bureau. No e-QSLs, please!

EU-148. Operators/Members of the Castres DX Gang (F5AUB, F5XX, F5BJW, F4CLO, F5JBR, F5UOE, F5BLP and F6DBX) will be active once more from the Fort Brescou Island (French Departments Award: Herault/34; French Provinces Award: Languedoc-Roussillon, DIFM ME-001, WLH0500, French Forts and Castles Award DFCF34001), from May 22-26th. Activity is planned for HF + 6 meters bands, SSB, CW, RTTY and PSK31. Ther will be at least 4 stations with beams, wires and amps (two on the air using SSB, one using CW and one using PSK31/RTTY/CW). The callsign will be F5XX/p. Two members of the crew (namely Bernard F5XX and Andre, F5JBR) will sign TM5B during the WPX Contest. QSL via F5XX, either direct (envelope + postage) or via the French bureau. More information about the Castres DX Gang is available (in French) at: http://castres.dx.gang.free.fr/

OC-NEW. Operators Wen/YB2DGR and Rivai/YB2MTA will activate the Karimata Island Group (YB7 west) from July 24-30th (minimum operation is 5 days, which includes the IOTA Contest).
IOTA reference number: OC-new (confirmed by G3KMA)
WLH reference number: LH-new (until population of island is known)
Their time of activity will be 12 hours a day as following the LH powered up (evening). Band activity will be on 15m (mainly SSB) and 20m (mainly CW). They will have two Icom 720 radios with 120 watts output max. QSL Manager will be EA7FTR, Fransisco Lianez Suero. Visit the Karimata Group, YB7 west DXpedition (OC-New) Web page at: http://www3.ocn.ne.jp/~iota/newpage45.htm

KH9, WAKE ISLAND. Jake, N6XIV/KH9, became active from Wake Island at 0740z on April 22nd. He came up on 14260 kHz and operated until after 0900z. This was his first operation since arriving on Wake, however, N6XIV/KH9 has been spotted on the internet DX Clusters on April 20th just before 1000z on 30 meters. Jake has confirmed that this station was definitely NOT N6XIV/KH9. There has also been spots on 40 meters CW. His QSL Manager advises that Jake DOES NOT work CW. DO NOT waste your time working and especially QSLing N6XIV/KH9 if heard on CW...it is NOT Jake. He will be on the air as work permits, roughly between 0700z to 0900z, most likely around 14260 kHz. Jake may attempt other bands, but that will be dictated

by his very limited operating hours. Also, Jake states he will be on SSB only this trip. QSL via K2FF.

KP2, U.S. VIRGIN ISLANDS. Ann/W2AZK and Brian/KF2HC from the North Jersey DX Association (NJDXA) will sign homecall/KP2 from St.Croix, June 12-19th. SSB and CW activity will be on 160-10 meters. QSL via direct or via the bureua to the call worked. Confirmed QSOs are good towards the "NJDXA Award" See NJDXA's Web page for award details at: http://www.njdxa.org

LIGHTHOUSE ACTIVITY. Look for Jean Claude/F6HDH and Francis/F6HKS to be active from the following lighthouses which count for the Onshore French Lighthouses (DPLF) Award Program:
On May 2nd, starting 0700z from the Cap Ferret Lighthouse, PB049, FRA226.
On May 3rd, starting 0700z from the Hourtin Lighthouse, PB055, FRA105.
Jean-Claude, F6HDH, will use SSB on 40 and 20 meters. Francis/F6HKS, will use only CW on 30 meters. QSL via their home callsign, direct or via the French Bureau.

LX, LUXEMBOURG. Johannes, DF5AU, will be active as LX5A during the CQ-MIR-DX-Contest weekend, May 10-11th. Activity will be on CW/SSB and on 160-10 meters. QSL via LX1RQ either direct or through the bureau. Visit the Web page at: http://www.qsl.net/lx5a/activities.htm

M, ENGLAND. John Getz, AD8J, will be active as M/AD8J from England during the CQ WPX-CW Contest, May 24-25th. QSL to AD8J.

MJ, JERSEY. Operators Ekki/DF4OR, Tilman/DJ5BX and Rainer/DL1ZBO will be active from IOTA EU-109 from June 3-9th. They will be signing homecall plus the MJ prefix on CW, RTTY and SSB on 80-10 meters. On June 7-8th, with the callsign "MJ/DJ5BX", they will be participating in the ANARTS WW RTTY Contest. QSL via DL1ZBO, direct or Bureau.

OOOPPPSSS DEPARTMENT. The was a slight error (actually misunderstanding) in OPDX.607 under "3 YEAR DXPEDITION (Amazing Lady!)". Thanks to Terry, KK6T, for pointing it out. The "1946 Brewer" was a Brewer 46, which is 46 ft. Also, the "1932 Challenger" was a Challenger 32, which is 32 ft.

QSL INFO AND NEWS.....
James, 9V1YC, informs OPDX that he has a QSL Manager now. QSL 9V1YC via N5ID.

Ralph, K2PF, would like to remind readers that the correct QSL route for AP2ARS is via K2PF. Some are continuing to send via S53R, and due to Robert's travels, he is not able to respond to QSL requests.

Champ, E21EIC, was active this past week (April 23-35th) from Si Chang Island (IOTA AS-107) as E21EIC/P. QSL via direct or by the Bureau. Visit his Web page at: http://www.qsl.net/e21eic

Francois, F8DVD, has just returned from his DXpedition to Spitsbergen Island (EU-026) as JW/F8DVD. He would like to thank every ham radio who called him, especially all Japanese stations. Francois has made 2400 QSOs during his 5 days stay. QSL is OK via the Bureau or direct

with a SASE + IRC or USD to: Francois BERGEZ, 6, rue Liberte/SPAN>,
F-71000 MACON, FRANCE.

Randy, W5UE, reports that the QSLs for the recent trip by the Magnolia DX Association to NA-082/MS002S (Cat Island, MS) as K5C are due from the printer any day now. Direct requests sent to K2FF will be answered promptly upon receipt of the cards. Please check out their web page for the operation at: http://mdxa.org/k5c_03.html
It includes statistics, photos, on-line log checking and a story of the trip.

Silvano, KB5GL, was active as KB5GL/5 from the Breton Islands (NA-089) this past week (April 25-26th). QSL via his home callsign (Silvano Amenta, 5028 Hearst Ave, Metaire, LA 70001, USA) or, for Europe only, via IZ8CCW (Antonio Cannataro, P.O.Box 360, 87100 Cosenza - CS, Italy).

The S05X multi-national team went QRT around 1030z on April 20th, after some 31,000 QSOs. Logs are available at: http://www.pagus.it/s05x/
The log search facility is up and running, however there might be problems in accessing it due to the browser that is being used. Discrepancies in QSO data should be reported to the QSL Manager following the instructions that will be published on the Web site.

Ray, W5EW, reports that he is QSL Manager for J79T (1989), VK9EW and VK9WB (1990) and V63BW (1992). Requests may be sent to W5EW at: Ray Husher, 202 Washington Ave, Thibodaux, La 70301. SASE is necessary or SAE and IRCs or one (1) USD. Ray will not respond to BUREAU cards. Ray states, "I only seek enough to cover the expense of mailing the QSL nothing extra is necessary."

XQ6ET QSL CHANGE. George, W8UVZ, reports, "XQ6ET (Bob) jumped the gun and changed his QSL route to my callsign without the process being complete - not my desired method but not much I can do at this point." George, W8UVZ, does state that he is in the process of taking over QSL chores for XQ6ET, all dates (But, "in the process"). He currently does not have logs nor any cards. Although, he understands the logs will be on their way soon. Also, XQ6ET was out of QSL cards, so they will have to be ordered. Ultimately, when George gets going, he will need a minimum SASE from U.S. stations, and SAE from DX stations with one new IRC or one greenstamp. George states, "It's going to be 6-8 weeks before cards for XQ6ET will flow from W8UVZ."

Terry, N6CW, would like to remind everyone that the QSLs for the current operation by ZD8A are via N6CW. Terry accepts direct, Bureau and/or E-mail requests for bureau cards at: qslvian6cw@aol.com
ADDED NOTE: QSL ZD8R via N6ND.

SPECIAL EVENT. Members of the Georgian ARC "Iveria" will activate the station 4L1W to commemorate the club's 5th anniversary, May 6-7th. Their activity will be on 20/17/15/10 meters CW/SSB. Check out their Web page at: http://www.qsl.net/4l1w

SPECIAL EVENT. Members of the Crimea Contest Club will activate the special event station, EO58JM, from the Ukraine between May 5-11th. Their activity is to celebrate 58 years since World War II. QSL will be via KG6AR.

SPECIAL EVENT. Wilfredo "Junior" Aviles, KP4ARN, reports that the members of the Caribbean Amateur Radio Group will celebrate their "Hamfest and Old Timers Recognition Day" on May 4th. The group will use the special callsign, K4C, for the event during May 3-17th. Look for them on the following suggested frequencies: 28370, 21370, 14270 and 7270 kHz. QSL via KP4ARN (please SASE).

SPECIAL EVENT. Between May 24th and June 1st, look for the special event station TM0AR to be active from the International Festival of Arts and Technologies in the Department of Sarthe (DDFM 72). Activity will be on the following HF bands: 10/12/15/17/20/40 meters SSB. QSL is via F5TJC, either via the Bureau or direct to: M. Briere-Lecomte J-L,
18 Le Petit St Louis, Route de Theligny, 72400 CORMES, France.

SPECIAL EVENT. The Siberian radio amateurs correspondence club "Radio-Prim" was created on May 15, 1993. Look for special event stations using the callsigns UE9OWQ and UE9ORQ to be active between May 10-18th to celebrate the 10th anniversary of the RPC, and between June 28-30th for the 110th anniversary of the capital of Siberia - Novosibirsk. For more details and on how to receive a special diploma, visit the Web page at: http://www.nsk.su/~rpc/eh.htm

TE75, COSTA RICA. In celebration of 75 years of amateur radio in Costa Rica, look for Costa Rican stations to operate using their callsigns with the special prefix TE75 from May 1-31st (2003). This will take place on all authorized bands and modes. The official list of authorized TE75 stations can be found at the Radio Club of Costa Rica (RCCR), Web site at: http://www.ti0rc.org
QSL routes: All TE75 stations share a common QSL route, which is the Radio Club of Costa Rica (TI0RC). QSL cards are welcome both via direct mail and via the IARU bureau service. Diplomas and awards: The official list of diplomas and awards available will be published by RCCR once the operation has concluded. A minimum of six authorized TE75 stations as well as the official station TE75RC will be required for any diploma.

TX4, MARQUESAS ISLANDS. The Italian group is now active from OC-027 as TX4PG until May 9th. Activity will be on all HF bands, including 6 meters, and on CW/SSB/PSK/RTTY. Please refer to OPDX.597, OPDX.602 and OPDX.606 for more details and Web page.

XY, MYANMAR (AS-167 THANKS!). Frank, DL4KQ (aka XY4KQ), has just returned home from his AS-NEW DXpedition to Myanmar (AS-167 THEBYUKYUN), and he wants to send out his thanks especially to all JA hams for a lot of very nice contacts. He states, "I really enjoyed the famous JA QSO discipline in pile-ups!!! THANK YOU !!!!!" However, Frank states, "Activation was unfortunately permitted only for 24 hours by local authorities but I was able to make 1750 QSOs during that short time. I hope to go back again to Myanmar next year (there exist still some other AS-NEW..) possibly

with a bigger group to give a better service and a higher number of contacts."

YA, AFGHANISTAN. A few stations have been active from here over the past couple of weeks. Last week, Roberto, YN1BB, showed up as YN1BB/YA from Kabul on 15 meters (usually around/between 21260-21275 kHz after 1145z as last as 1630z). Also, active last week was Nick, G4KUX, as YA4F on 6 meters CW/SSB. Watch around 50.108-50.111 MHz between 1445-1630z. He will be here until April 2004. QSL via his home callsign. Hiro, JA1CQT, was heard the week before as YA1CQ on 17/15/12 meters. Watch around 18153, 21320 and 24955 kHz after 0730z and as late as 1600z. QSL via JA1CQT. "The Daily DX" reportedly states, Hiro, is in Kabul as part of the Basic Human Needs (BHN) contingent. He has been granted temporary permission to operate as YA1CQ until the end of May, but expects to be in Afghanistan for 12 months. The BHN is a nongovernmental organization (NGO) that helps with humanitarian relief efforts. Others associated with the BHN team include Ito "Dan" Sadao, JA1PBV. YA1JA is the BHN club callsign.

YI, IRAQ. The "ARRL Letter" reports that several radio amateurs, which include some of the world's top operators, are among the United Nations World Food Program (WFP) "Fast Intervention Team" (FITTEST). The personnel is already in Iraq or poised nearby. FITTEST is responsible for building a technical infrastructure to ensure WFP can move relief food supplies rapidly and safely. FITTEST also has a mandate to install or build basic technical networks, including such systems as VHF repeaters, satellite communications and HF fixed and mobile stations. The team also will set up radio rooms, rework administrative procedures, and assign call signs for all UN humanitarian-aid workers and non-governmental organizations (NGOs) --other international aid organizations. However, any ham radio operations would be secondary to the WFP's efforts in Iraq. Operators mentioned are: Peter Casier/ON6TT (who's expected in Baghdad sometime this week), Robert Kasca/S53R, Mark Demeuleneere/ON4WW and Mats Persson/SM7PKK. Others who are ready to go to Iraq include Ed Giorgadze/4L4FN (aka P5/4L4FN), Patrick Pointu/F5ORF and Mark Tell/VK4KMT, who are just among several other FITTEST team members who are radio amateurs. ADDED NOTE: Peter, ON6TT, states in the ARRL Letter that Diya Sayah, YI1DZ (one of the primary operators at the Baghdad Radio Club's YI1BGD and the WFP's Baghdad telecommunications officer) is safe and well in Iraq. For more details, please read "The ARRL Letter", Vol 22, No 17.
Meanwhile, Willie, KV4EB, near Baghdad, was quite active over the past weekend as KV4EB/YI on 20/15 meters SSB, SSTV and PSK31. Watch the DX Clusters for QSNs at various times throughout the day.

ZA, ALBANIA. The following press release is from Martti, OH2BH:
ALBANIA ACTIVITY AS PART OF A 2003 DEVELOPMENT PROJECT
(Friday, April 25th through Monday, May 5th)
Following the November fact-finding mission, it is time to put some plans in place. A follow-up project will be formulated with Albanian Ministry of Transport and Telecommunications officials to secure and further develop amateur radio in Albania.
Contributing to these valuable activities, a four-man team will once

again visit Albania and activate ZA1B on several bands using the regular
DX frequencies.
Operators are Teemu/SM0WKA, Pekka/OH2TA, Pertti/OH2PM and Martti/OH2BH.
They will now have a beam antenna and two Yaesu stations - FT-1000MP and
FT-897 with Finn-Fet amps. QSL via OH2BH.

.............The Voice of Atlanta..........

He lives in Mableton, Ga.

He is the "King of Assholes"

I was sent a retainer several montha ago to run a background check on him. He has quite a checkered past.....he was know at one time as the "Wacko of Scranton" , when he was still living in Scranton, Pa. He would pester the people in the downtown area of Scranton to the point that the local police had to restrain him and tell him to stay away from the downtown shopping area. He has a history of mental problems. And he should have been imprisoned for making those atrocious tapes for the "Stumpjumpers"

That "letter" he wrote to Riley Hollingsworth is almost hilarious, as his "audio" is pitiful!

This proves what a farce the ARRL OO program
is! Obviously the ARRL appoints OOs without
doing any background check whatsoever.

Was he ever held responsible for the Stumpjumper
QRM tapes he authored and which were used for
malicious QRM on 3901?

Bob

Hello folks,
after the IC90 Clone Management Utility, I have written the IC90
Memory Management Utility, that gives full access to edit (w/ cut copy
and paste) the 500 memories of the HT. Version of the software is
1.0.20, and I am adding new features for the next release. Should you
be interested, please visit

http://thenetfather.dyndns.org/ic90memmgt

ps: feedbacks are more than welcome!

cheers

Thanks. That's a start because the radio seems to be deaf. We
figured out enough of the keypad so he could test it. If it
wasn't for my scanner, he would not have heard the repeater.

2631. Great site for ALL 75 Meter goofballs and code-less geeks

I am trying to locate a couple of DTMF chips to repair a repeater tone panel. It is using Mitel's MT8860P, MT8865P and MT5087P. Might anybody out there in radio land have a couple of spares? I have tried to locate them from the different suppliers without success. I have found MT8960 and MT8965's but cannot find any info on their replacement possibilities. Will consider any other numbers that will work. Thanks Don Smith KB6GQA

You should have heard him in the HEYDAYS of
the original 14.313, the "texas-terd" has mellowed-out considerably since
those days!

KJI on the other hand is still as goofy as he was
10 Years ago. That's what we like about the
"Evansville Engine" - he's always CONSISTENT
albeit missing a cylinder-or-two at times...
since then.

2650. Indiana QSO Party

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-02 00:02:37 UTC
From: Scrounger <brian@iquest.net>
Message-ID: <mqisa.32$T4.2064@news.iquest.net>
Source record: 67744

Indiana QSO Party

On Saturday May 3, from 1300Z to 0500Z (May 4) hams in Indiana will reach out to the rest of the world in the Indiana QSO Party. Beside trying for awards for fixed and mobile stations inside and outside Indiana, a lot of county hunters will be on the air trying to collect needed Indiana counties.

For the first time, we expect to be able to hand out contacts from all 92 counties. We even expect to have an aeronautical mobile!!! Since the MARAC CW county hunter contest and the New England QSO Party overlap with the Indiana QSO Party, expect a lot of activity on the bands. It would be great if Indiana stations would listen for MARAC and New England mobiles and work them whenever they change counties (just as we have asked them to listen for Indiana mobiles). You can even keep logs for MARAC and NEQP contacts and enter those contests as well.

For more information on HF frequencies and operating plans, and logging software files, see the INQP web page at www.hdxcc.org/inqp.

Plans are already underway for INQP 2004, when we'll merge with the Indiana Buffalo Stampede to create even more Hoosier Hospitality with a special event station representing the Indiana Radio Club Council. That's 2004.... But until then, please try to get on the air next weekend and make Indiana visible. If you don't have HF operating privileges, consider working with another ham as a "multi-op" to put your county on the air.

See you then?

Hoosier DX and Contest Club
Sponsors of the Indiana QSO Party

How many cw ops are using farnsworth? Has ANYBODY encountered farnsworth cw coming at them? I have read up on it but still don't understand it--I understand how the spacing works at speeds of 16 wpm and less, but what about faster speeds? Is the spacing still 16 wpm between letters and words--just not between characters within letteers? I think that must be what it is. Let me know if you have any knowledge on this. Bill Morrow W7RTS <mccallmorrow@hotmail.com>

2653. wanted phono oscillators, home broadcasters electronic babysitters and your memories about using them!

Ok the latest tangent for a future display are:

Home Broadcasters, Phone Oscillators and Babysitters!

looking for the actual items of course, but to go along with that, advertisements, and some first hand oral history about your early experiences and fun and trouble you got into etc etc regarding these devices!

It would be interesting to now how many folks that enjoyed these went into some form of broadcasting.....

Three that I remember myself were the

knight kit little blue unit with the 50c5's in it (had loads of fun with one of these! This baby would be fun to play with again!)

the RCA Unit (I almost remember this having a pentode or a pentagrid tube in it.....

Lafayette unit... Did not have one but always looked in the catalog at it.

Was there also a heathkit unit? I seem to think so but a catalog check will fill in the details of it's existence.

a close brother to the home broadcaster was the 'baby sitter' and knew people when I was young that kludged extra inputs and preamps onto these.....

Yep want examples of all of them! cash, trade, free... whatever!

But most of all want some history of peoples involvement with them to add to the section on the web site.

please contact me off list.

As you increase speed the space between characters and words are compressed.
The faster the speed the closer things become.

As you reach speeds in excess of 30 wpm you will start copying words and
parts of sentences. As you continue you will hear entire phrases and
sentences at a time.

Sure, Per Dave Stewart (and I hope he doesn't mind):

Hi John, the correct way to replace the battery is:

1.remove the upper and lower covers

2.place radio on bench, speaker in up position.

3.remove the screws (2) on the top left and right side of the face panel.

4.Loosen, do not remove, the lower left and right screws on the side of the face panel.

5. carefully rotate the front panel down to access the battery.

Re assemble radio, perform reset and you are finished.

You can also go www.mods.dk and look up the procedure.
73, dave

Farnsworth isn't any set speed of characters and letters. It is simply the characters sent at a faster speed and spaced further apart to give an overall slower speed.

For example when I send, my character speed is equivalent to 20wpm but I space the individual characters so that the net effect is more like 15.

Some high speed operators will do it the same way when they are working a slow speed op. They will leave their keyer set at their normal speed, whatever it may be, and just put bigger spaces between the characters.

Farnsworth is any combination of speeds where the individual character speed is faster that the overall word speed.

Farnsworth examples:
Character speed = 15, net speed of words = 5
Character speed = 25, net speed of words = 10
Net speed is achieved by increasing the space between characters.

The following is NOT Farnsworth
Character speed = 5, net speed of words = 5
Character speed = 16, net speed of words = 16
Character speed = 25, net speed of words = 25

2661. 4.9 GHz Public Safety Spectrum - FCC Release

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-03 03:07:12 UTC
From: N1 <N1crew@yahoo.com>
Message-ID: <3eb33257@snipnews.snip.net>
Source record: 67756
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

The FCC today released licensing and service rules for the 4940-4990 MHz band (4.9 GHz band) for public safety agencies

(Dkt No. 00-32).

http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-99A1.pdf
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-99A2.pdf
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-99A3.pdf
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-99A4.pdf

The rules are flexible enough to allow a variety of operating configurations and should suit public safety's needs in providing broadband data, voice and video applications, from signpost data uploads and downloads to ad-hoc microwave links at special operations scenes. Businesses and the general public will not be allowed here, unlike 2.4 GHz.

Presently, air-to-ground transmission, such as helicopter to field units is not allowed, but may be requested under certain conditions in a waiver.

The rules allow joint local/ federal law enforcement operations per recent Office of Homeland Security Multi-Jurisdictional and related FBI/BATF IntraState Task Force Operations.

'X-No-archive: yes'

Hey Irv, speaking of pirate radio stations emanating from Belgrade Lakes, Maine... I have a lot of questions about old man pecker-breath.

Why does the MAN constantly qrm whoever's on frequency when his stupid broadcast comes on? Are you telling me that he can't HEAR 4 or 5 people talking when they're running 1500 watts? He constantly fires up on top of their existing QSO's like the selfish old reprobate he's rumored to be.

And another thing. Does his broadcast NEED to have the worst audio on ham radio? He sounds terrible. Awful! The audio's all pinched up and nasty like a CB set operating off an HO scale model train power supply. Christ, is he really an engineer or is that a lie too?

I don't have anything against homosexuals per se, but can't his co-host tone it down a little? His campy little stories with all their homo-erotic content can be a little nauseating at times. Dinosaurs and K-Y jelly, or whatever it is he goes on and on about week after week... all I'm saying is, it's a little much for prime time, don't you think?

By the way, when did it become legal to broadcast on Amateur Radio. When he asks non-hams if they'd like to become hams, isn't that known as broadcasting to the general public?

And when he tells them to go to his website where you see all kinds of shit from ballcaps, to radio instruction courses, to credit cards and god-knows-what for sale... isn't that what the FCC calls 'pecuniary interest' and isn't that illegal on ham radio?

And what about this Solomon Islands "school" station on his so-called website. That's run by Sam Moron isn't it? Isn't he the dude who supplied all the radio gear to the terrorists in Somalia and Bougainville?

Then there was that bogus taped CQ he ran for hours on 20 meters to attempt to keep the frequency clear from any normal ham who wanted to use the frequency. Can't this guy afford to buy some time on a real short wave station? Why does he think he can bring his Jerry Springer shit to ham radio anyway? Does he really think we want to hear that crap on ham radio?

When is he gonna replace that crappy set of radio shack timers he uses? Did any one tell him that they fail constantly... that his

transmissions start and stop whenever they feel like it? I guess if he had a control operator at the station he'd realize that, huh?

Talk shows - kids shows - dinosaur programs - call-ins from CBer's - what his buddies did ten years ago - that's worthy of a bulletin? I don't thiiiiiiink so!! And WHY is he shamelessly shilling this Joel Farcecloth's whatever... Las Vegas teachers thing he rants about? Since when do we advertise our joint business ventures on ham radio... again, can you say pecuniary interest?

Is he still threatening hams with those stupid Felony Affidavit Complaints or did he finally realize the department of justice only kept them around in case they ran out of toilet paper one day?

Did he really pretend to be affiliated with the UN and get busted by the FEDS for pretending that? What else did he lie about?

I hear the FCC wrote him a long letter asking about all the illegal crap he does and he responded with a freedom of information request! Doesn't he realize there is a whole separate office designated for that and you have to specify what you want and that it COSTS MONEY to get that information!? It's not FREE dumbass! I sure hope my tax dollars aren't going to be paying for research about his unpaid notices of apparent liability.

In my humble opinion it's high time the Feds knocked this A-hole of his cardboard pony and took away his CB set. He's a menace to the hobby as well as anyone with a brain. No wonder a lot of foreigners think Americans are idiots! They must listen to the MAN.

-Chris

Kirsten Kaiser is not just "..another politically
correct woman giving Hate Crime speeches"
dear friend.

She is someone who was legally married to one of
the core-founders of organized hate groups in the United
States. Someone who has insider-knowledge of
the inner workings of the National Alliance and
their linkages to various "Militia/Patriot" groups, the
so-called "Christian Identity" movement and finally
the undeniable connections of Elohim City to
the Oklahoma City Bombing.

Not just another "politically correct woman" I would
think...!! Not by a country mile dear friend ;)

I look forward to hearing her as I will be in attendance
in Charlestown with law enforcement, to learn something
from her unique perspectives.

Dave

> My difficulty with Hate Crimes are as follows.

I guess you have never heard the stastics that
Corrections Populations are presently 90%
minority represented? True a lopsided tally
but hardly indicative of linkage to caucasian
perpertrated offenses. (most common caucasian crimes
statistics are misdeamenors and "light grade" felonies
committed by juveniles, mainly males from affluent
and/or middle-income households, larceny being the
greatest of these). It is also no mistake that when employment
and the economy takes a dive down, all crime stats shoot
upward. During the economic prosperity occuring during
the Clinton Administration, criminal activity took a across-the-board
drop, for all statistical ethnic classes, of over 20%. Unfortunatly

these statistical drops have almost dissappeared under the
"Law Enforcement" supporting GOP political leadership.

Quite curious is it not...?? This is one question(s) I will be asking
of the experts at the Conference ;)

Unique perspectives, are you interested in the unique perspectives of those that have abandoned the abortion industry and professed the "FACTS" of day to day life in the business of wholesale slaughter? I would speculate that you are not.

This is my point, the facts are there, but few people take the time to ingest them, or they know the facts and choose to ignore them.

Political correctness abounds, her unique perspectives are just other ways to exploit tragic situations to foist more ludicrous laws on an uninformed public.

Read the text in the context of which it was written. Address the issue of the application of "Hate Crime Legislation", don't meander into some side issue, a common ploy of liberals. Address the issue. Are HATE CRIME laws commonly applied to minorities that kill whites. Matter of fact, they aren't. Read the story of the young adults killed by the 2 blacks in Kansas, why didn't it receive national attention? Why did the dragging death of the black man in Texas warrant so much attention?

Rather than stirring up the racial aspect of crimes, why not just punish the criminals. It seems to me that this racial bickering just increases tensions among the races while the crimes are not being prosecuted appropriately.

If Hal Turner's wife would suddenly tour the nation declaring that Hal is indeed correct on all that he espouses, this would put her into the same niche of having a "unique perspective", yet I doubt that this would validate her experiences to you. You express infatuation with the beliefs of this woman because she is saying what you want to hear, not because her belief's are universally valid.

If you are in Law Enforcement, and desire to "enforce" aspects of "Hate Crime" laws, look at the following about another over zealous officer. These examples abound, we don't need new laws (hate crime laws) to cover crimes that already are covered by existing laws.

http://www.worldnetdaily.com/news/article.asp?ARTICLE_ID=32383

"A 12-year-old girl was wrestled to the ground and subdued with pepper spray by a Florida sheriff's deputy after the girl ignored repeated warnings to stop jaywalking, according to the Associated Press....."

"The girl, who is 5 feet 1 inch tall and 134 pounds, threatened to hit the deputy and rolled her hand into a fist....."

Though the girl exacerbated the incident by her response, I don't believe that pepper spray was warranted. I guess we are likely that he didn't shoot her.

This is the problem, more laws mean greater likelihood that law enforcement will use lethal force to enforce something as asinine as jaywalking. What if the girl had asthma, and her breathing was stopped by the application of pepper spray for something as stupid as jaywalking? Of course the usual response of law enforcement would be that she deserved it. Hardly. No one deserves to die in the enforcement of jaywalking laws.

In Pittsburgh, police cars chasing stolen cars are required to approximately adhere to the speed limit. This may sound stupid to those in law enforcement, as they become narrowly focused on the issue of apprehending the perpetrator (they call them actors on the radio here), but undoubtedly has saved many lives by eliminating the accidents that invariably follow prolonged chases, often killing people not involved in the theft. Chases are frequently called off by the commanders, and the police reluctantly obey, sometimes managing to start the chase again from a different area ;-)

The police in various cities and ATF have raided the wrong apartment on many occasions, so they break the door down without knocking, the home owner is startled by the unannounced intrusion, and fearing criminals, grabs his gun and goes to protect his home or his loved ones. The police (or ATF) see the man with the gun and shoot him dead. They later find out that they are at the wrong address, and the commanders "STILL" claim that the officers were justified in killing the man with the gun since he threatened his officers who had no right to be there anyway and had made an unannounced entry.

This is where this hate crime laws are going to go. We don't need no stinkin hate crime laws.

Peruse the internet for examples of Law Enforcement Abuse, they abound.

http://www-tech.mit.edu/V120/N10/col10reed.10c.html
"Like a firing squad, four plain clothes New York City police officers gunned down the unarmed and innocent Amadou Diallo with 41 bullets at the front entrance of his apartment building. "Self defense" was their excuse; the wallet he allegedly pulled from his pocket looked like a gun, or so they say. Now a jury has bought the claim of "self defense" despite medical testimony that several of Diallo's wounds resulted from being shot on the ground. These wounds included one bullet that went in his right foot and up his right leg to the knee, and another that went through his left toe and grazed up his left leg."

http://personal.riverusers.com/~raykeller/oops.htm
On March 25, of this year, 13 heavily armed Boston police wearing fatigue outfits smashed into the apartment of a 75-year-old retired minister, the Reverend Accelynne Williams. Williams ran into his bedroom when the raid began, but police smashed down the bedroom door, shoved Williams to the floor and handcuffed him. Williams may have had up to a dozen guns pointed at his head during the scuffle. Minutes later, Williams died of a heart attack. No drugs or guns were found in Williams' apartment. The police had carried out the raid based on a tip from an unidentified informant who said that there were guns and drugs in the building but did not give a specific apartment number. A policewoman simply took the informant's word, did a quick drive-by of the building, got a search warrant and then gave the go-ahead to her fellow

officers to charge. An editorial in The Boston Globe later observed: "The Williams tragedy resulted, in part, from the `big score' mentality of the centralized Boston Police Drug Control Unit. Officers were pumped up to seize machine guns in addition to large quantities of cocaine and a `crazy amount of weed', in the words of the informant."

We don't need no stinkin hate crime laws.

Search the above 2 examples by the names given in the paragraphs, not by the links to the sites provided. I know of these 2 stories, they will be listed at sites such as CNN, Washington Times, etc. This is where hate crime laws will lead us, more reasons for unjustified raids into innocent people's homes, and more deaths.

We don't need no stinkin hate crime laws.

P.S., I think that the Pittsburgh area officers have a high degree of Professionalism, and they, as with officers in other moderate to large cities, labor under an unending level of responsibility. Not only are there the usual stuff of being a cop, traffic, burglaries, robberies, but increasingly they are being burdened by failed applications of technology, such as endless false alarms on commercial and residential intrusion systems and On Star alarms from some car in a remote area. They spend their day serving PFAs (protection from abuse) and are called on to oversee some former lover's desire to remove personal property from their ex-lovers home. They get to see tragic circumstances of a parent or parents leaving 2 year old children to fend for themselves for the evening, oversee an ever increasing number of random shootings on the street, endlessly need to mediate situations of Pit Bulls roaming the streets, being torn between a desire not to kill a dog that they already have permission to shoot and a desire to protect the public from such dogs.

There is much more, enough that I wouldn't want to be a police officer in this city, giving them my admiration for what they manage to do despite being overwhelmed by work.

This is why they DON'T need to be burdened with enforcing Hate Crime legislation. Today's seemingly reasonable application for homicides will be tomorrow's unreasonable application of these laws to speech.

Never say never.
Nothing is absolute.

Hi!

Well,I did not say it is MORE stable than 3-500ZG
but superior in gain,and it is reality and can be seen in use
very easily,if anyone will do any comparations.

I have used same type tube in my homebrew linear amplifier many years,and
have had never ever any instability problems with YD1130.

My opinion is definitely it is better than 3-500ZG

2682. Tower Wanted in Holland

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-04 18:45:57 UTC
From: Martin <martinessex@telecom.net>
Message-ID: <b93ne9$eondg$1@ID-167701.news.dfncis.de>
Source record: 67777

Can anyone help with this enquiry.

I am looking for a second hand tower by Strumech, Versatower or similar, but I want
to export it to Ethiopia, where I live. I have a forty foot container coming out soon from Holland and I am thinking of sending the tower out in the container with
other business items.
Therefore, if anyone knows of any dealers or second hand sales in Holland I would be very interested in the information, or a way of getting a tower into Holland at a reasonable cost to meet up with my container.

I am looking for a 20 metre unit, winch up and tilt over in very good condition, with rotator cage if possible. I am not too bothered wether the design is the ground post type or base plate.

Any responses will be very much appreciated,

Thanks,

Martin

> Chris (Forger extraordinaire)

I don't think so. It's really tough to forge certain headers (for example, you can't really forge a path header, although you can obfuscate it a bit) and Google includes the NNTP-Posting-Host header as the valid IP address of the person using Google.

That IP address consistently points to Adelphia and traceroutes back to Monroeville, PA.

Sorry, Chris: You're busted.

2684. Newbie HAM looking for rig

Date: 2003-05-05 02:48:51 UTC
From: Greg <cputec@hotmail.com>
Message-ID: <nikta.10853$hT2.4867328@news2.news.adelphia.net>
Source record: 67779

I just passed my Technician test today, so in this time gap I thought I should starting looking for my first rig. Basically I'm divided between two options. I would like to either get a HT type radio or a mobile type. I would prefer the HT, but am a bit concerned about it's power, I'm not sure if it's going to be enough to hit the local repeaters. If it's possible I'd like to use the mobile station in my home. Does anyone know how this would work i.e. where the antenna should be placed for home use? I would also like to stay under the 50W requirement so I do not have to perform a station evaluation for RF safety. Any advice from experienced amateurs would be greatly appreciated!!

Thanks!

Greg

If somebody opened up the unit to transmit out of band, they may have retuned the front end. On VHF, the front end selectivity is fairly selective, so if it was retuned in the 155MHz range, this would make the 2M band deaf. On the UHF range, those tuned cavities are really selective. If they were retuned to the 460MHz range, you probably wouldn't hear too much on 440.

Colonel Robert "Buzz" Patterson
When he entered the Clinton White House, his gratitude and awe soon
gave way to shock, revulsion, and sorrow - as he saw first-hand the
cavalier and self-serving way Slick Willie and his henchmen went about
the business of running the country. In Dereliction of Duty: An
Eyewitness Account of How Bill Clinton Compromised America's National
Security, Patterson tells the whole story. Day in and day out in the
Clinton White House, he witnessed the President's contempt for the
military, his indifference to important issues except insofar as they
served his own political or personal purposes, and his reduction of
the Office of the Presidency to a playground for his own ambition and
thirst for sordid perks.

2695. Calling CQ on 10m

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-05 22:05:04 UTC
From: DWalker@sciconsd.com
Message-ID: <11c2153.0305051405.6e41eb7b@posting.google.com>
Source record: 67690

I called CQ on 10m phone band the other day. I listened for quite a while before I called CQ, and I asked beforehand if the frequency was in use.

I got a reply from a Ham who said "This is AK4---, what can I do for you?".

I gave my name, QTH, rst, etc, as usual. The ham replied, "What I'm looking for, son, is your numbers! Stop doubling with me!" The guy acted as if I were a telemarketer calling him during dinner.

I went back to 40m CW. So what the heck was that all about? I'm on 10m very
rarely, but haven't run into anyone that rude in quite a while!

2696. If it requires a license then you can't use it in a 2003 Toyota

I just got off of the phone with Toyota.
they told me that if a radio transmitter requires a license to operate,
then it's too powerful to use in a 2003 Toyota.

If you want to install a ham radio in your car without voiding your warranty,
then I guess you should not buy a new Toyota like I did...

You have apparently been talking to the Toyota Dept. of Morons, because
a license has nothing to do with power.

So does that mean that if you were a CBer with a 100W linear you would be ok
in a Toyota?
I think maybe whoever in Toyota doesn't really understand what they are
saying. I think maybe a talk with someone else in Toyota is in order. I
would almost guess (and it's only a guess) they're probably concerned with
interference with a computer somewhere in the vehicle, but wouldn't the
operating frequency be more of a concern that the power output?
I wonder what would happen if you were driving down the road in your
Toyota and someone was right beside you with a 2 meter rig and transmitted.
Would you car all of a sudden become erratic?

I'll stand to be corrected but I believe and understand that all
vehicles must meet FCC part 15 requirements.

I'd check with a better authority at Toyota.

This isn't the first manufacturer that has said this.. right in the owner's
manual of our new Chevy Tracker it says not to install any radio
transmitting equipment without consulting the dealer service facility.

:(

I'm a newbie HAM so if someone could fill me in here.......
We have a 2002 Toyota Sienna, are we talking that a HT with an output of around 6 watts could mess the car up, or are we talking full mobile radio with an output of 50W? (I'm sure my parents would not be happy if I messed up their new car :(

I know this is a newbie question, but if someone could fill me in I'd appreciate it!

Thanks,
Greg

Greg,

Good idea to contact a dealer service dept. Computers can be very sensitive
to RF, I know that my laptop tends to lock up if I use my HT in close
proximity to it.

Mercedes says not to use any transmitter with a built-in antenna inside the vehicle - and they apparently intend to even exclude handheld (600mW) cell phones. So long as you use an external antenna, then they're happy. They do provide an external cell phone antenna hidden in the bumper cover somewhere.

Obviously, they've painted the line a bit wide... I would think that an HF kilowatt with an external antenna would produce more EMI issues than a cell phone. And if a handheld cell phone really caused a problem, then we would have heard about it by now and they'd still have to fix the problem (due to market forces).

The automotive EMI issue is serious - in spite of the nonsensical boundaries quoted by the car makers. Modern cars have CAN bus, on-board diagnostics, as many as a dozen pyrotechnic devices, low voltage switching (signal, not power), sensors on everything, etc.

Even on my previous car, an old 1986 VW GTI, I could make various relays click when transmitting with 50watts on 10m with a rooftop antenna. I still wonder which relays were clicking... I just ignored the clicking. I wouldn't take such an approach today.

Next time buy a vehicle that doesn't decimate the US machine tool
industry from a company that hires U.S. engineers. Or uses the U.S.
as a source of cheap, compliant labor. Sort of like a third world
country.

Well 2m HTs and the low setting on most mobiles is equal or less than that used by a CB. So they are giving you the "short answer" just to get you out of their hair and to set up a CYA for themselves if you go ahead and put in a radio. Of course you could run into problems such as low voltage, alternator whine, your transmissions disrupting the car's systems but Toyota probably doesn't have the answers and so is taking the safe way out.

My Dodge Stratus manual says something to the effect that the car is
designed to accommodate radios BUT they will not guarantee that it will.
Putting a radio in is at the user's own risk.

Before I bought a new Highlander, I called Toyota corporate customer service and asked if they had any service bulletins regarding installation of two-way radios in their vehicles. Answer: No. Then asked if they prohibited installation of two-way radios in their vehichles. Answer: They didn't recommend it, but they didn't prohibit it. Asked the local service manager if he had any advice or experience installing two-way radios in Toyotas. Answer: I haven't got any idea...click. (Needless to say, the local service department won't be seeing me for routine service.)

I'm in the process of installing an Icom 706 w/ bumper mounted hamsticks for HF and an on-glass antenna for 2-m and 70-cm. Guess I won't run full power at first......

hi,

I can't find a non-amateur radio newsgroup on my server,
so I figured this would be the next best place!

I've got a Motorola PTX760 MPT trunked handheld whose warning
beeps and alert tones are ridiculously loud, compared to the
volume of the received audio. And I mean really, really loud.
Is there a way I can reduce the volume of the tones, without
having to pay a dealer to reprogram them?

http://ap.cgiss.motorola.com/products/ptx760.htm

thanks!

I purchased a Toyota in 1993. The service manual said that I could not use a transmitter in the car if it was over 10 watts I contacted Toyota customer support and they told me that I could use up to 50 watts and that they would change this in the 1994 service manual. I never did have a problem with my car from my radio. I just did not want them to be able to void my warranty based on the fact that I had installed a ham radio in my car.

I just purchased a new 4 Runner and while I was going through my paperwork for the old car, I came across the letter that Toyota had sent to me. This reminded me that perhaps I should ask again what the limit is now. I was stupid for not doing this bit of research before I paid for the car. When I contacted Toyota yesterday, the told me that "using any radio in the car that requires a license would void my warranty" and they would be happy to put that in writing and send it to me.

I am outraged because you could use a CB radio without a license. Output 4 watts into a mismatched antenna, and by their wording of this limitation this would not void the warranty. However I could use a 1 watt transmitter with a 1:1 match and I would technically be voiding my new car warranty.

Toyota's statement is way too harsh. It would exclude they use of any public service, ham, or even GMRS transceivers. Toyota needs to change their statement to be more realistic.

I know I was talking to a Moron at Toyota

I asked them if they wanted to reconsider making such a harsh statement
regarding their product. They said that they had already checked this out
with the department in charge of these things and that "any radio transmitter
that requires a license to operate is too powerful to use in their vehicle
without causing damage to the ECM because their engine uses so many
sensors." "the fact that Toyota changed their manual for me in 1993 did not
apply in this case because the ECM used in the 2003 4 Runner was more
sensitive than the 1993 model". They are going to send me a written statement
documenting this fact.

I guess I should not drive next to my local 1.5 Megawatt AM radio station or my
car might fail. Perhaps I should not slow down if a police car is behind me
because they might transmit a radio signal that will cause me to have an accident.
:-)

The people working at the Toyota Customer Assistance Center are complete idiots
that don't understand the first thing about radio frequency and radiated power.

Perhaps the car I just purchased is total junk if the sensors are so sensitive that
Toyota is afraid of a 500 mw GMRS HT.

Toyota, are you listening ???
You should clarify and change your rather harsh statement regarding this issue.

I am already sorry that I did.
However I think that this might go a bit further than one car manufacturer.

Are there any ham friendly car manufactures out there, U.S. or otherwise ?

Several weeks ago I read this message and thought, yeah I did all that! Now I reread the 6.1.5 section of the AX25-HOWTO and noticed a small note way at the bottom of the page stating that you have to not have the Linux sound drivers loaded when you try to use the packet modem! HMM! I am not sure if I "modularized" the sound drivers, and made sure they are not loaded. I am not sure if this will fix my problem, but if so I am going to write a small notation that I will ask to have added to the AX25-HOWTO in BOLD PRINT!

I do know that when I did an "ifconfig -a" the sm0 and such all showed up, but I could not "ifconfig sm0 up" it. I know that if it had "uped" properly, I would see it when I did a plain olde "ifconfig (enter)" and that never happened.

Thanks for the pointer, I will try it again in several minutes to see if this resolves the issue, and I see the sm0 device come up after doing an ifconfig sm0 up on it!

That is the point ! If the car electronics is so sensitive that any
transmitter
in the vicinity becomes a danger, the whole car is a danger because it
cannot
be used in the real world, where transmitters can be near at any
location, even
if they cannot be seen.

A number of years ago, a german manufacturer issued a statement that
any transmitter that had an output power of more than 5W would
void warrantee.

I don't know if this was a 'corporate' statement, or something that came
from one of their 'groups' without being blessed by home corporate,
but it caused quite a stink on CompUServe at the time.

Contact the ARRL with a copy of the letter you received.

Then write their home office a nice letter telling them that the car does
not have an expectation of servicability if they hold to that statement,
and ask them how you should procede, in case you want to refund
the vehicle. Be polite. I'm sure you'll get a polite response. And
maybe wake up more of their corporate as to what kinds of morons
are allowed to send out 'corporate policy' letters.

But GM (and Ford, Chrysler, and a lot of others) have SUGGESTED
installation guidelines for radio installation that DO allow, and even
assist you, in installing high power (over 100W) transmitters with
minimal impact to the vehicle.

I wonder... WHO did you call at Toyota? Someone really in a position
to make a statement like this? Or a low level moron that can't answer
without having someone else to blame?

Maybe you didn't really get a 'corporate statement of policy' just some
low level no-nothing trying to sound important.

THIS I would want in writing. With a name on the bottom...

Saturn, no warranty problems with an ICOM 706 installed! In fact, they advised compatibility up to 1000 watts.

Ford [Ranger], Sales/Service were advised prior to purchase and indicated no problem with 706 installation.

I believe that it is necessary to advise them that the radiating antenna is located OUTSIDE of the vehicle. The vehicle then becomes part of the rf shield for the sensors/computers etc.

I thought that Saturns were mostly ~plastic~ body panels around a 'Swiss cheese' metal frame. I suppose the openings are small in comparison to HF wavelengths...

PS:
:-) Saturn cars have nice seats - they're good for Uranus. :-)

Strange things can happen. When I tune up my 706 on 40m in my
1996 GMC pickup, the speedometer pegs at full scale whether
I am moving or not.

Saturn's, at least my SL-1, had metal roof, metal trunk lid, metal
engine bonnet, etc. All on the honeycomb frame with plastic side panels
and door panels.

Put 120,000 miles of HF mobile on that car before I gave it to my
daughter. BTW, it's still running great!

Just a case of a misunderstanding -- very rare to run into something like this. He wanted your 10/10 number -- see URL:
http://www.ten-ten.org/

Lots of 10 meter folks collect ten ten numbers. The 10/10 org was set up years ago to help stir interest in keeping the 10M band open.

So just change frequencies and try again. It is a great band for long haul DX as well as cross country if it is open.

I had a Pontiac Grand-Am of the same vintage and when I transmitted with 30 watts on 2 metres my speedometer moved up about 10 mph, however there was no effect on the cruise control, just seemed to be the meter.

A 1976 Honda Accord had a left turn signal which would flash at a fantasic rate when using the 2 M tx. But no effect on the right turn.

My 1998 GMC Jimmy had continuing problems with the elctronics and the dealer, made me remove my radios and aftermarket security/remote starter before they would debug it - turned out it was the vehicle's fault and not anything I was doing.

I would also send a copy of the letter to Consumer Reports. They might
be interested in RF susceptability. It would certainly get Toyota a lot
of publicity if they published something about it.

Hello to All,

I have a Few Collins stations for sale....

Collins (winged) 75S-3 receiver
Collins (winged) 32S-3 transmitter
Collins (winged) 516F-2 power supply
with manuals, and microphone.....$1200.00 plus shipping

Collins KWM-2 (winged) transceiver
Collins PM-2 power supply
manual, and microphone.....$800.00 plus shipping

Collins (winged) 30L-1 amplifier.....$550.00 plus shipping

All these units are in good to great condition with original condition. They
have been checked out by Wayne Spring W6IRD a Collins Collection Member.
They are presently at his home for viewing.

Thank You

Leo Fahmie KJ6HI

It's not just Toyota. The owners guide for the 1998 BMW motorcycle I
used to own said operating a transmitter on/near it might cause the
brakes to malfunction. A ham who worked for BMw said it might QRM the
anti-lock brake computer but that he'd used a 5W handi with no ill
effect.

OTOH my Dodge PU has 7 !! computers running everything from "engine
management" to dash displays and I have a 50W dual band feeding a mag
mount. No problems - but YMMV so ...

I received a similar letter in 1994 for my 1993 Toyota 4Runner.
Here is a link to that letter:
http://www.geekdude.com/toyota-rfi-1994/

I expected the same type of response this time.
The response I got yesterday was totally unacceptable.

I spoke with the Toyota Customer Assistance Center.
They will send me this statement in writing.
I will post the letter on my web site when I receive it.

This is the same department that I received a letter from in 1994
that said that I could use up to 100 Watts using certain installation guidelines
http://www.geekdude.com/toyota-rfi-1994/

So if I understand that article correctly...

Cars are not shielded properly and possibly un-safe
when exposed to RFI. As cars are mostly plastic these
days, I don't see how they would make a good faraday cage.

If a cell phone on an airplane is un-safe because it
might interfere with the on-board electronics, then
the same might be true about all modern cars. The car
manufactures must know how un-safe their cars are if
they are making statements like using any radio that
requires a license in your car will void your warranty.

I would like to think that my car would be safe from
cruse control malfunction if I drive by someone
operating a 2 way radio.

I am starting to doubt the safety of all modern cars.
Perhaps the car manufacturers should put in some shielded
wiring and lower their profit margins in order to ensure
safety when consumers use their products in a world of
wireless communication devices.

Modern cars have a life threatening design flaw
and they are trying to cover it up !

I doubt it would lower their profit very much, but these big outfits
want to max out every penny they can. I bet a few dollars per unit
would rfi proof the cars. I would like to see consumers report provide
a article regarding this or at least include it in the annual car
review. If it's an illuminating problem then and only then will they do
something about it. The old saying goes, the squeeky wheel gets the
grease, it still holds true.

By the way, I would have to think the police vehicles are rfi proofed??

Buy American maybe huh...

So does that mean that if you were an unlicensed CBer with a 100W linear you would be ok
in a Toyota?
I think maybe whoever in Toyota doesn't really understand what they are saying. I think maybe a talk with someone else in Toyota is in order. I would almost guess (and it's only a guess) they're probably concerned with interference with a computer somewhere in the vehicle, but wouldn't the operating frequency be more of a concern that the power output?
I wonder what would happen if you were driving down the road in your Toyota and someone was right beside you with a 2 meter rig and transmitted. Would you car all of a sudden become erratic?

i can remember when us mobile hams had to do troubleshooting to find
rfi sources from the vehicle that caused interference to the rigs,,
heheh. well, now i guess we can apply some of that troubleshooting
knowledge to protect the vehicles..
hell, maybe i'll throw a mobile hf kw together and slap it in my
toyota sequoia for grins :-)

So it is better to buy a car or truck made by Ford or GM that is assembled in Canada or Mexico than to by a Toyota or Honda that is assembled in Ohio, Kentucky, or Tennessee with US made parts?

A little further research should reveal that as long as the transmitting antenna is located away from the on board computers, there is no issue. As an example, The transmitting antenna should not be installed on the front passenger side on the 2003 Toyota Camry (Assembled in Georgetown KY with US labor) since the main engine computer in located in that corner of the passenger compartment.

Good points, especially about the assembled in USA stuff.

One more issue, and just trying to be a smart alec here. If real metal was used...even that issue would be reduced.

Ya but, if the warranty is voided by using rf producing equipment then
no matter what you do to reduce the problem will do you no good. Your
warranty is still voided.

I would buy from a car company which supplies to the police deptments
and has sheilded computers with rfi protection, make them say that.
Otherwise I'll just buy old used vehicles. lets face the facts, the
new cars and trucks out there are $30k, $40k ect and to spend that much
and to be told that you can't use your little old ham radio for fear of
voiding the warranty or recking the dumb computer thingystuff then I
would tell them to stick it where the sun never shines.

I had been thinking of buying a Toyota van, but now I think I'll just
pass.

Same thing goes for Subaru.

My owners manual for my 2002 Forester
clearly says not to install any kind of a
transmitter within the car as it will foul-up
operation of the Emissions Computer and
the Electronic Antilock Braking System
and Keyless Entry system.

Don't bother. Word is there will be limited bus transport between parking
lots so unless your
ready for a looooooooooooooooong walk
to get to the Arena, it will be a most discouraging
and visitor/patron un-friendly atmosphere as
it was when I went (and will never goto another
Hamvention, ever again, untill they move it to
another site. The Hara site is far-too undersized
and it's nothing short of a major pain-in-the-ass
to ge into, around and out of. It's NO fun at Dayton anymore)

Dale, has nothing to do with US made. I'm a ham, I run ham radios in all my Toyotas with zero trouble. I see plenty of hams come in with their Toyotas and they seem to come in on their own power. I have NEVER seen a ham radio make a Toyota fail.

- does the ECU self destruct ? I think not - they have to pass some pretty stringent tests against
RFI affecting their safe and proper operation.

My BMW manual makes note against TX over 10 watts, but my 100 watts on all bands HF through 2M and
50 W on 70cms has no effect on my car and cars around me don't seem to slow down as I pass them....

I would think most are still fairly good, except for maybe Corvettes
and some Saturns...If the bulk of the car body is metal, it's going to
make a decent cage, except for what comes thru the windows.
>

They all are aware of the problem. But I don't think it's something
high on their list when designing the car. I think this applies to
many U.S cars also.

>
> I would like to think that my car would be safe from

I would think it most certainly would be. The computer and most wiring
is pretty well shielded by the body if metal.
>
> I am starting to doubt the safety of all modern cars.
> Perhaps the car manufacturers should put in some shielded
> wiring and lower their profit margins in order to ensure

I don't think shielded wire would be a complete answer. Also ferrite
beads on every wire going in or out of the puter.
>
> Modern cars have a life threatening design flaw
> and they are trying to cover it up !

How are they covering it up if they are telling you outright that RF of any manly level is verboten operation in a new yota. They are telling you, watch your butt if you run rf. That is not a cover up. That is covering their butt. I really don't think the problem would be any more severe than any other similar car. They all can have problems. It's the nature of a partly solid state vehicle.
And the radio operation and the installation will have a huge effect on whether you have problems or not. A person running an antenna on the roof or trunk with a good ground underneath it would have much less problems than someone with a gutter mount, poor ground, and poor feedline decoupling. Or sitting in the passenger seat with a high power HT. Use common sense. The puter is 3 ft in front of your face, down by your feet. You "might" have a problem.
If you have RF problems in a car, the first thing to look at is the possibilty of common mode currents on the coax shield. The better the decoupling you have, the less likely you will be swamping the puter with rf. If I still had trouble, I'd make sure the puter was well grounded, and then I'd install ferrite beads on every lead going in and out of the box. Toyota will not do this. Heck, I had to show them how to check a wiring harness. All they wanted to do is quote me $1500 bucks for a new one without proving the old one was bad. It wasn't. I ohmed out every wire on the harness, and it didn't take me an hour I bet.
I'm sure the mechanics will vary per shop, but I doubt the ones I went to would be able to deal with it. They couldn't even fix the car. I ended having to do it myself. And in this case, I would fix the "rf" problem myself. I'm better able to do this than they are, being I fart with rf all the time. Or at least the ones I dealt with....MK

A nonsense term frequently uttered by a comic strip character named Smokey
Stover. He was a fireman and drove a small fire fighting vehicle noted for
having two wheels and only one axle. No one I ever knew could define Foo and
I believe this mysterious quality is what led to that eras military pilots
naming the mysterious WWll
UFOs Foo Fighters.

Except for the tires, the Crown Victorias bought by the police are virtually identical to what you or I can buy, assuming we get the handling package (which is pretty nice, actually). What happens to the cars after purchase depends on the individual department.

When I was car shopping last August, the CV was my other choice, besides the Tacoma, because my main concern was towing. (Actually, I would've preferred a Toyota sedan, but they're not much good for towing, with front wheel drive, and other factors). The CV came out the loser when I began reading about their exploding gas tank trick, and how Ford really didn't have a solution yet.

Remember, these data are provided by lawyers to protect their employers from the clueless. Obviously, you could safely operate "killerwat" rigs in any of these vehicles so long as none of the RF got into the computer(s). Start by either ensuring that your antenna has a good ground plane or use one that doesn't require one (eg, J-pole) and a very good match (low SWR). You might also put some ferrite beads on the coax to avoid shield currents and on the power leads for your rig. If problems persist, try shielding the computer(s) with aluminum foil and putting ferrite beads on the I/O and power cables.

Alternatives: restore an antique auto or have a kit-car built for you. IIRC 1955 Chevys and Shelby Cobras had no RF problems and prolly cost less to drive than a new Toyota after depreciation is factored in.

That's prolly typical. Unfortunately there are unethical dealers who will tell you that such-n-such isn't covered by warranty because of something you did or didn't do, then they collect from BOTH you and the manufacturer.

Realistically, nothing will happen 'till it hits the courts.
Loss of warranty is the least of your worries. Wrongful death suit
'cause YOUR radio, INSTALLED IN VIOLATION OF CAR MAKER GUIDELINES,
caused some other proximate car to malfunction. Or maybe your car
malfunctioned
due to your radio and killed someone else. Even better, your car
malfunctioned
because os some taxi radio and killed someone. Try proving that it
wasn't your
radio!!

Of course, they'll sue the car manufacturer too, but that won't keep
legal fees from bankrupting you whether you win or lose.

Interesting times...

Not true. The suspension on the Police package Crown Vic is tighter
(more firm). The electrical system is different also to accomodate the
additional load. There may be some other differences such as
transmissions, etc but I am not sure about that.

There's a transmission oil cooler which, according to the dealer, can be had
on a "civilian" car for towing purposes.
```

My wife had a Toyota Corolla

If she parked in any of 4 different parking spots at her place of employment, all kinds of weird things would happen.

The windshield wipers would cycle, the radio change channels, the service lights come on, the doors lock and unlock by themselves, etc. The list goes on and on.

It was traced to a paging tower by using a mobile scanner and fox hunt techniques until we found that each time a particular company sent out a voice page her car would do something weird.

It was not only her Toyota, but several other cars that parked in any of those 4 parking spaces also had some weird things happen, many resulting in a dead battery by the end of the work day.

The FCC was notified of the problem, but it wan't until the FAA became involved that something was done and the paging company replaced some components. I have no idea how the FAA became involved, but apparently they were messing up something on the airplanes also.

I do a lot of driving and have unexplained things happen also when near large or high power transmitting or cellular towers. But have not had any problems from any of my ham gear and the car.

There is a section along interstate 24 about 2 miles off of interstate 57 where my vehicle dies momentarily. The first time this happened I though it was the car. The second time I thought it a rare coincidence. After the third time I started making a note of the milage from highway 57 when it occurred and it occurs at exactly the same point on the highway each and every time I pass through if I'm in the outside lane. The car seems unaffected if I'm in the inside lane.

I'm sure it was some type of radio interferrence that I had not yet found on my scanners when the problem finally quit happening. But now I have a new problem. The hatch pops open in roughly the same area, give or take about 2/10 of a mile. At least the engine doesn't die!

You make a splendid case supporting my contention that cars need less electronic body controls. Lots of cars (an increasing number since the early 1990's) have a "body ECU" that controls just the non engine & transmission gadgets.

Hi all,

My friend is currently doing voluntary work as a maths teacher at a secondary school in Katete, Zambia, and has requested assistance in acquiring an FM Broadcast Transmitter for use by the school.

It would be great if someone could donate a transmitter. It would be fantastic if it was in working order, but we could consider something in need of repair, though preferably with service manuals. Spares would be a bonus.

I would be very grateful if anyone can help.

Regards,

Darren Long

==========

For the last 67 years I have been wondering about the meaning of "Foo".

The last time I recall seeing the word in print was in an American 1930's
comic paper.

In those ancient days pull-out comic papers were known as 'the funnies'.

The artist was Bill Holman.

One of his characters said in the balloon "All is not Foo that titters".

Replace Foo with Gold.

Replace titters with glitters.

A funny statement.

I am an Englishman. But what is Foo ?

Reg.

You mean that they are admitting that if say a police car (I don't think anyone is going to complain about them having a radio) or a truck with a CB keys up while driving by the BMW bike, and the brakes malfunction and the biker goes down, that they are at fault? How about radar?

This sounds like intelligent design on par with Audi's famous throttle control transistor debacle.

From the jargon file: http://catb.org/esr/jargon/html/entry/foo.html

[...]

For, it seems, the word `foo' itself had an immediate prewar history in
comic strips and cartoons. The earliest documented uses were in the
"Smokey Stover" comic strip published from about 1930 to about 1952.
Bill Holman, the author of the strip, filled it with odd jokes and
personal contrivances, including other nonsense phrases such as "Notary
Sojac" and "1506 nix nix". The word "foo" frequently appeared on license
plates of cars, in nonsense sayings in the background of some frames
(such as "He who foos last foos best" or "Many smoke but foo men chew"),
and Holman had Smokey say "Where there's foo, there's fire".

According to the Warner Brothers Cartoon Companion Holman claimed to
have found the word "foo" on the bottom of a Chinese figurine. This is
plausible; Chinese statuettes often have apotropaic inscriptions, and
this one was almost certainly the Mandarin Chinese word `fu' (sometimes
transliterated `foo'), which can mean "happiness" or "prosperity" when
spoken with the rising tone (the lion-dog guardians flanking the steps
of many Chinese restaurants are properly called "fu dogs"). English
speakers' reception of Holman's `foo' nonsense word was undoubtedly
influenced by Yiddish `feh' and English `fooey' and `fool'.

Holman's strip featured a firetruck called the Foomobile that rode on
two wheels. The comic strip was tremendously popular in the late 1930s,
and legend has it that a manufacturer in Indiana even produced an
operable version of Holman's Foomobile. According to the Encyclopedia of
American Comics, `Foo' fever swept the U.S., finding its way into
popular songs and generating over 500 `Foo Clubs.' The fad left `foo'
references embedded in popular culture (including a couple of
appearances in Warner Brothers cartoons of 1938-39; notably in Robert
Clampett's "Daffy Doc" of 1938, in which a very early version of Daffy
Duck holds up a sign saying "SILENCE IS FOO!") When the fad faded, the
origin of "foo" was forgotten.

One place "foo" is known to have remained live is in the U.S. military during the WWII years. In 1944-45, the term `foo fighters' was in use by radar operators for the kind of mysterious or spurious trace that would later be called a UFO (the older term resurfaced in popular American usage in 1995 via the name of one of the better grunge-rock bands). Because informants connected the term directly to the Smokey Stover strip, the folk etymology that connects it to French "feu" (fire) can be gently dismissed.

The U.S. and British militaries frequently swapped slang terms during the war (see kluge and kludge for another important example) Period sources reported that `FOO' became a semi-legendary subject of WWII British-army graffiti more or less equivalent to the American Kilroy. Where British troops went, the graffito "FOO was here" or something similar showed up. Several slang dictionaries aver that FOO probably came from Forward Observation Officer, but this (like the contemporaneous "FUBAR") was probably a backronym . Forty years later, Paul Dickson's excellent book "Words" (Dell, 1982, ISBN 0-440-52260-7) traced "Foo" to an unspecified British naval magazine in 1946, quoting as follows: "Mr. Foo is a mysterious Second World War product, gifted with bitter omniscience and sarcasm."

Earlier versions of this entry suggested the possibility that hacker usage actually sprang from "FOO, Lampoons and Parody", the title of a comic book first issued in September 1958, a joint project of Charles and Robert Crumb. Though Robert Crumb (then in his mid-teens) later became one of the most important and influential artists in underground comics, this venture was hardly a success; indeed, the brothers later burned most of the existing copies in disgust. The title FOO was featured in large letters on the front cover. However, very few copies of this comic actually circulated, and students of Crumb's `oeuvre' have established that this title was a reference to the earlier Smokey Stover comics. The Crumbs may also have been influenced by a short-lived Canadian parody magazine named `Foo' published in 1951-52.

Thanks for the complete and delightful history of this interesting word.

I observed what might be a second entry point into the lexicon. After returning from military service at the time digital technology was first really expanding, I chuckled to find the digicats using "foo-bar" (foo with a line above it, meaning NOT foo) as a dummy variable. The evolution to foo as the popular name of an arbitrary subroutine seemed to have come from this. I've always assumed that "foo-bar" was from the popular GI expression FUBAR, meaning "f**ked up beyond all recognition", which dates from WWII. The digital folks I talked to had no idea where "foo-bar" had come from, and hadn't heard the GI expression.

Dunno about England, but here it probably varies according to the
neighborhood you are in. I hear some people use it to mean about the
same as your examples.
IE: "Saiz woman, youzz a damn foo."
I hear that usage quite often.

A "foo fighter" is WW2 and later fighter pilot slang for a UFO.

I recently installed a 2 meter mobile rig in a 2003 Toyota
Avalon. So far, I haven't had any problems.
The rig is hidden in the compartment under the center armrest.
Power wiring is run directly to the battery main lugs with
a fuse in each wire (positive and negative) as provided by the
rig manufacturer (Yaesu).
The antenna (1/4 wave spike) is mounted on the rear trunk lid
lip, with the coax run down from the armrest compartment under
the carpet, along the drivers side of the car, up into the
trunk.
I tested the installation by parking the car with the engine
running and transmitting, starting with the lowest power
setting and working up to the highest power at different frequencies.
I stayed out of the car until I was sure that the air bags
would not activate. Then I got into the car and tested with
the doors closed.
After passing these tests, I drove the care on a street with no
traffic and retested. After gaining some confidence that the
impact air bags would not deploy and the brakes were working OK,
I took the car out into traffic. Several months have passed
and, so far, no problems encountered.
I also know that Toyota vehicles are used around the word by
police with various types of two-way radios installed. I
would advise that the use of power directly from the battery
is critical to the installation.
Good Luck with your installation,
Bill N0LAJ

Amateur Radio Newsline™ Report 1342 - May 2, 2003

Amateur Radio Newsline report number 1342 with a release date of Friday, May 2 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An all ham crew takes over the International Space Station, another new record on 136 Kilohertz and the FCC asks the Amateur Auxiliary to help clean up the 10 meter band. Find out more on Amateur Radio Newsline report number 1342 coming your way right now.

**

HAM RADIO IN SPACE: TWO-MAN EXPEDITION 7 HAM RADIO CREW ARRIVES AT ISS

A two ham Expedition 7 crew arrived at the International Space Station on April 28th to replace the crew currently on board. Amateur Radio Newsline's Roy Neal, K6DUE, has the rest of the story:

- -

There are five men in the crew aboard the International Space Station. Those numbers ARE different. Now that U S Space Shuttles are temporarily out of commission, the Russian Soyuz has been pressed into service as a ferry. Much of its space is filled with food and supplies and the crew size has been cut from 3 down to 2 for the time being.

Two men...cosmonaut Yuri Malenchenko, RK3DUP and astronaut Ed Lu, KC5WKJ, have arrived....the first teamever to get to the I S S aboard a Russian spacecraft. They will replace 3 men...Commander Ken Bowersox, KD5JBP, Don Pettit, KD5MDT, and Nikolai Budarin, RV3FB. That team is scheduled to fly back to earth on the third of May, using a Soyuz that has been docked in orbit since the Columbia shuttle disintegrated killing all seven people on board.

A NASA investigation apppears to be centering on a piece of foam insulation as the cause of disaster...foam that broke loose during liftoff, hitting the Shuttle's left wing.

A final report on the accident may be several more months in coming. Until then Russia's Soyuz is the only crew transport to and from the i s s and the International Space Program has slowed to a mere trickle of its former self. Space officials of the 9 countries directly concerned with building and flying the shuttle are optimistic, saying the delay gives them time better to prepare for the very complex missions of the next ten years.

Roy Neal, K6DUE

--

The two man Expedition 7 crew will spend the next six months on-orbit conducting scientific experiments. Because of the reduced workload they may also have more time for additional ham radio operations and especially school contacts from space. (ARNewsline™ from published reports)

**

ENFORCEMENT: AMATEUR AUXILIARY ASKED TO ASSIST FCC IN 10 METER CLEAN-UP

Back on Mother Earth, the FCC has asked the assistance of the ARRL' s Amateur Auxiliary as part of a clean-up of illegal users of the 10 meter band. In a memorandum issued on April 28th, FCC Special Counsel Riley Hollingsworth, K4ZDH, asks the Auxiliary's help for the next 6 months in identifying any unlicensed operation using the 10 meter Amateur spectrum.

From May through October Auxiliary members will be tasked with monitoring the band to determine whether interlopers are domestic business entities. This includes trucking companies, truckers or other individuals who are not licensed to be in the band or simply not licensed at all.

The FCC is not requesting that Auxiliary members provide direction finding. Hollingsworth does ask that where possible that Auxiliary members provide the names and cities of the operators, and license plate numbers and state if the interfering signal is coming from a vehicle.

The project has been assigned case number 2003-583 and Hollingsworth does ask Auxiliary members to use their best judgment as to whether to include tape recordings of what they monitor. Authority to use the ham radio volunteers in this investigation comes under the terms of long standing agreement between the FCC's Field Operations Bureau and the American Radio Relay League. (FCC)

**

ENFORCEMENT: 11 METER OPERATION BRINGS FCC WRATH TO IDAHO HAMS

Meantime, the FCC has let a trio of Idaho amateurs know that unlicensed operation outside Amateur Radio frequencies could lead to revocation of their ham tickets. Bruce Tennant, K6PZW, has more:

--
The ARRL Letter reports that FCC Special Counsel Riley Hollingsworth, K4ZDH, recently wrote three Boise amateurs, citing allegations that they had transmitted without a license on several frequencies near the 11 meter Blass D CB band.

Letters went out March 17 to Dave Every, KD7QAS; John F. Hail, KD7QAW; and Tom M. Sjoberg, KD7RCS. Every holds a General ticket, while Hail and Sjoberg are Technician licensees.

According to Hollingsworth, the Commission has information indicating that the three hams transmitted without a license on 26.350, 27.420 and 27.700 MHz using SSB and SSTV. These three frequencies involved are above and

below the 11 meter Citizens Radio Band.

Hollingsworth letter pointed out that in addition to the possibility of license revocation proceedings being undertaken, fines for unlicensed operation could also be imposed. These normally range from $7500 to $10,000.

For the Amateur Radio Newslione, I'm Bruce Tennant, K6PZW, reporting.

--

Hollingsworth says he understands that the unlicensed operations have ceased. (ARRL)

**

ENFORCEMENT: KANSAS STATION OWNER FINED

The FCC has fined Maria L. Salazar, licensee of Station KTCM - FM in Kingman, Kansas, and owner of an antenna structure near Spivey, Kansas, thirty-nine thousand dollars. This, for what the Commission says are willful and repeated violations of the Communications Act and of the Commission's Rules. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--
Specifically, the regulatory agency says that Maria L. Salazar operated a radio station from an unauthorized location and that she failed to maintain prescribed obstruction lighting on an antenna structure. But thats not all. Te FCC says that she also failed to install and maintain Emergency Alert System equipment at the station, failed to maintain a main studio at an authorized location and failed to maintain a public inspection file.

By way of background, on July 18, 2002, the Commission issued a Notice of Apparent Liability for Forfeiture -- better known as a fine -- in the amount of $39,000 to Salazar. Although she received a copy of the N-A-L, she never filed a response. So the FCC has now affirmed the fine and ordered Salizar to -- pay up.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

The FCC has instructed its Enforcement Bureau to do a follow-up investigation to determine whether Salazar has come into compliance. If not, further enforcement action will be taken. That could include the possibility of a license revocation proceeding. (FCC)

**

**

FCC BEGINS INQUIRY REGARDING BROADBAND OVER POWER LINES

The FCC has also launched an inquiry into the use of existing power lines to send and receive broadband data by carrier current as some old timers might call it.

According to Bob Gonsett's CGC Communicator, two different Broadband over Power Line or B-P-L techniques are being considered. "Access B-P-L" uses 1,000 to 40,000 volt power lines to bring Internet and other broadband data to homes and offices. "In-House B-P-L" uses existing electric utility wiring to network computers and printers - as well as smart appliances - within a building.

CGC notes that today's chip sets for this application are capable of generating RF out to at least 80 MHz using advanced modulation techniques and high data rates. The question of radio frequency interference to authorized spectrum users including Amateur Radio will be an important consideration as these systems are looked at by the FCC.

More is at the FCC's website at:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-233537A1.doc
and http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc
(CGC Communicator)

HAM RADIO TESTING: NCVEC REMOVES PSK31 QUESTION FROM POOL

The NCVEC Question Pool Committee has withdrawn the use of a test question has in the Technician pool scheduled for use starting July 1st. The querstion designated number T2B17 deals with PSK-31 communications technology.

Again, this is for the new Technician class exam that goers into service on July 1st. The committee says that it apologizes for any inconvenience. (NCVEC)

**

RADIO RULES: FCC REFUSES TO EXPAND THE NCE FM BAND

The FCC has declined to expand the Non-Commercial Educational FM or NCE broadcast. This, band beyond its current limits of 88.1 to 91.9 MHz.

Specifically, the FCC says that television Channel 6 which runs from from 82 to 88 MHz will not be used for NCE radio. Nor will the upper end of the current NCE band be expanded to 93.9 Mhz.

That said, the agency has indicated the expansion issue could be revisited in another FCC proceeding. (CGC Communicator)

**

RADIO LAW: CALIFORNIA PRB-1 LIKE LAW ON TRACK

ARRL Southwestern Division Director Art Goddard, W6XD, reports that the California limited antenna structure protection measure passed the state Assembly on a vote of 67 to nothing on April 10th. Writing in the division electronic newsletter, Goddars days that the bill, patterned after the ferderal P R B One, was then sent to the state Senate where it received its first reading. It now awaits assignment to a Senate committee and further action. (ARRL SW Div. Newsletter)

**

HAM RADIO IN CYBERSPACE: MIZUHO WEBSITE BACK UP

KU4QD says over the VHF Reflector that the unofficial English language Mizuho website is back up. This site is dedicated to Mizuho built ham radio gear and contains a wealth of reference material that's hard to find anywhere else.

For those of you who don't know about Mizuho, it is a family run business started by a former Trio engineer over 30 years ago. The company is best known for its HF and VHF SSB and CW monoband handhelds. These were manufactured from 1981 until 2002. The company also made some VHF base and portable SSB/CW rigs.

KU4QD says that some of the manuals and schematics haven't been uploaded yet, but everything else is there, including more new pictures and specs for various Mizuho gear. And , oh yes. You will find the website at www.mizuhoradio.com (VHF Reflector)

**

NAMES IN THE NEWS: K8JE TO SPEAK AT MURRAY STATE UNIVERSITY ARC

ARRL Great Lakes Division Director Jim Weaver, K8JE, will visit the Murray State University Amateur Radio Club at the club's May 6 meeting. Weaver will talk on Amateur Radio today and as it will be in the future and all radio amateurs in western Kentucky are invited. The venue is the Freed Curd Auditorium of the I & T Building on the Murray State campus at 7 p.m. local time. Murray State University is located in Murray Kentuckey. For directions contact Ron Ladd by e-mail to UBX@Webtv.net or visit campus.murraystate.edu/org/msuarc (Via e-mail)

**

CONVENTIONS AND HAMFESTS: COLORADO IN MAY

The 2003 ARRL Rocky Mountain Division Convention is slated for May 30, 31 and June 1st at the Holiday Inn Estes Park Conference Center. League President Jim Haynie, W5JBP, is slated to be the featured speaker at Saturday Night's Banquet. For more information take your web browser to www.hamconcolorado.org (Via e-mail)

**

HAPPENING AT HAMVENTION 2003r - THE AMSAT FORUM

This years Dayton Hamvention AMSAT Forum will place special emphasis on the status of new satellite projects such as Phase III E and the Eagle ham satellites which are currently being designed. The speakers list so far includes Rick Hambly, W2GPS, Bdale Garbee, KB0G and Gould Smith, WA4SXM, to name only a few.

This years AMSAT Forum will be on will be on Saturday, May 17th from 8:15 to 9:45 EDT in HARA Arena Meeting Room 1. The session is always standing room only. More is on the web at http://www.amsat.org/amsat/activities/dayton (AMSAT)

**

HAPPENING AT HAMVENTION 2003r - THE ANNUAL TOWN MEETING

And Amateur Radio Newsline is again teaming up with the Hamvention to bring you another in its ongoing series of Ham Radio Town Meetings. Ken Lock, N8PJN, has the details:

--

This years topic is how to make Amateur Radio more friendly for kids so that they will stay in the hobby. Our keynote speaker is Mr. Audio himself -- Bob Heil, K9EID. Bob has been a ham since he was a youngster and has some definite ideas on this subject.

Other presenters include New York Educator Carole Perry, WB2MGP, Philadelphia KYW Radio personality Mark Abrams, NT3V and his son - 2002 Young Ham of the Year award recipient Josh Abramowicz, KB3GWY. Josh will cover scouting and its relationship to ham radio youth.

From Florida Richard Paczkowski, Jr., KF4BIA, will be joining us. Richard was our 1998 Young Ham of the Year award winner. He will talk about ways the Internet can be used to interest kids in the hobby.

Others on the speakers roster are Gary Pearce, KN4AQ, of the ARRL's Public Relations Committee and Keith Glispie, WA6TFD, of Suite Sixteen Post in Burbank California. Glispie is a true Amateur Radio success story that took him from a teenage ham to the co-owner of one of televisions most sought after editing facilities.

Also joining us will be John Creel, WB3GXW, who is the outgoing Chairman of the NCVEC and 2003 Radio Amateur of the Year Larry "Tree" Tyree, N6TR, talking about the ham radio children's holiday he created called Kids Day.

And as always there will be door prizes. This year the goodies include an 2 meter HT courtesy of Alinco and a mini-bom-box AM, FM, Cassette radio from Jensen.

So, please join us at Hamvention 2003 for this special session dedicated to making ham radio a friendlier world for the younger set. Rember, kids are the future of the hobby.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

The Ham Radio Town Meeting is from 1 to 3 P.M on Saturday May 17th. The venue is the HARA Arena in Dayton Ohio in meeting room 3. We hope to see you there. (ARNewsline™)

**

HAM RADIO MOVIES: FIELD DAY `71 - REDUX

Two weeks ago we told you that the famed Palisades Amateur Radio Club movie "Field Day 1971" had surfaced after almost two decades in hiding. Now, Southern California hams can get to see it again on Wednesday evening, May 14th. This, in a special screening hosted by the Santa Clarita Amateur Radio Club and Amateur Radio Newsline.

"Field Day 1971" was produced by George Hively, W6GRH, -- then WA6YEA -- over thirty years ago. His half-hour movie is a tongue-in-cheek look at the way one of the regions most famous radio clubs of the 20th century held forth annually to conquer the vagaries of the Ionesphere while having a jolly old time. Or, was it just having a jolly old time with some radios thrown in as an excuse for a hilltop party? Only this movie knows for sure!

The venue chosen for the screening is the City Council Chambers in the City of Santa Clarita California at 7 p.m. Pacific Daylight time. Talk in will be on the 146.79 W6JW repeater. The repeater uses an access tone is 123.0 Hz.

There is only room for about 190 people, so seating will be first-come, first served, with one expeption. If you are a former Palisades Amateur Radio Club member and want to reserve a seat please e-mail wa6itf@arnewsline.org. For more information on the Santa Clarita Amateur Radio Club and the meeting, take your web browser over to www.w6jw.org and click on the word "announcements." (ARNewsline™)

**
BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

RADIO RECORDS: FIRST GM TO YU ON 136 KHX

Another new record has been set on 136 Kilohertz. This, as a ham in Scotland contacts his counterpart in Yugoslavia. Jeramy Boot, G4NJH, has more:

--

Simon Lewis, GM4PLM, completed the first Scotland to Yugoslavia LF contact on the 20th of April. At 2228 UTC on Sunday, Simon had a two-way contact

with Teo, YU7AR, on 137.7kHz.

Simon was using equipment left behind by David Bowman, G0MRF, when the UK 73kHz record was broken, as reported on GB2RS two weeks ago.

GM4PLM is currently the only known GM active on the 136kHz band and at present is using a 125-metre long wire antenna. He plans to improve the antenna system over the summer in preparation for trans-Atlantic tests next winter.

Jeramy Boot, G4NJH

--

After completeing the QSO, Lewis paused to thank G0MRF and G3GRO for their help, and for the donation of equipment to allow him to become active on the 136kHz band. (GB2RS)

**

ON THE AIR: SPECIAL EVENT - 58 YEARS SINCE WW-2

On the air, members of the Crimea Contest Club will activate special event station, EO58JM, from the Ukraine between May 5th to the 11th. Their operation is to celebrate the 58 years since World War II. QSL's via KG6AR. (OPDX)

**

ON THE AIR: CELEBRATING SIBERIA

And keep an ear out for special event stations using the call signs UE9OWQ and UE9ORQ to be active between May 10th to the 18th. This to celebrate the 10th anniversary of the Radio Prim Correspondence club in Siberia. The two stations are also expected to be on between June 28th to the 30th for the 110th anniversary of the capital city of Novosibirsk Siberia. For more details and on how to receive a special certificate, visit www.nsk.su/~rpc/eh.htm (OPDX)

**

ON THE AIR: THE OREGON QSO PARTY 2003

The 2003 Oregon QSO Party will take place on Saturday, May 10 beginning at 14:00 UTC. Sponsored by the Central Oregon DX Club, the object is to work stations in Oregon, and for Oregon stations to work the world. For full information select the Oregon QSO Party link on the Central Oregon DX Club web page at www.codxc.org (K2DI)

**

DX

In DX, CT1CPP is active as S92UN from Sao Tome and Principe for the next three months. Suggested frequencies are 14.270, 21.270 and 28. 470 MHz on SSB. QSL as directed on the air.

And thirteen members of the F6KOP club station will be active as TM7R from Groix Island through the 12th of May. The operation will be on the HF, VHF and UHF bands using CW, SSB, PSK 31, RTTY and Slow Scan TV.

Lastly, the visit by Bill Burton, T88BA, to the South-West Island of Palau, scheduled been postponed until next month, The reason: A lack of money for fueling the government ship that was to carry him. (DX via OPDX and GB2RS)

**

THAT FINAL ITEM: TALKING TO A NOT SO SILENT S.K.

And finally this week, have you ever talked with a Silent Key? Believe it or not we have. His name is Ray Ortgiesen, WF1B, and last week he was named as an honored Silent Key by the planners of this years Dayton Hamvention. But as you will hrear, Ray is very much alive, well and and delighting the honor:

--

Ortgiesen: "I'm enjoying it so far. Its been quite a gas to get phone calls and e-mail's from so many people concerned about my health."

--

Why is the not so Silent Key recieving all these health and welfare inquiries? Well, heres the story in a nut-shell.

Back in the 1980's, in the Neanderthal days of home computing, Ray wrote RTTY. This program soon became the leading contest software for computerized radio teletype. And last week the Dayton Hamvention decided to honor him by nameing him as one of a group of Silent Key Award recipients. But Ray as we already know, Ray is still very much among the living and his first chore was letting everyone know he was still here.

--

Ortgeisen: "Its been fun. I did send out some e-mails as soon as I found out that it was publicized. I sent out e-mails on the of the major reflectors grearting them from the other side and leetting them know that I was fine, and obviously there was a mistake made."

--

Mistake or not, Ray is now an official walking, talking and breathing Silent Key. So we asked him if he had any special wish for the future of the hobby:

--

Ortgeisen: "I hope with the coming of digital and especially computerization that we can keep people interested in radio."

--

And as to the award itself? WF1B, had these -- er -- parting words:

--

Ortgeisen: "Its nice to know that folks considered me for this award, and I am happier to know it being alive, than not ever having known this fact had I indeed been a Silent Key."

--

How the mistake nameing Ortgiesen as a Silent Key Award winner is not clear. But no matter. Ray says that he' kind of enjoying the honor of being this years Dayton Hamvention -- not so silent -- "Silent Key." (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline™. Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's™ only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline™, P.O. Box 660937, Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2003 Amateur Radio Newsline™ Young Ham of the Year is now open. No significant changes from last year. Nominees must be 18 or younger. Full rules and an application is on our new special website at www.yhoty.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline™ is Copyright 2003. All rights reserved.

Hambone?,

I had the opportunity to visit Hamvention for a few years now, and anything this large will have it's share of problems.
I left the hotel early, parked right across of Hara in one of the pay lots, and did not have that far to walk.
When I did make a purchase, I flagged down one of the people driving around in those Golf Carts,
and got a ride back to my vehicle.

This year, at the last minute, myself and some friends decided it would be nice to have a Flea Market space.
We have a lot of items on our "Want List", and would welcome to opportunity to sell some items we have to generate funds.
Last year, we noticed there were quite a few open spaces, and with the economy the way it is this year maybe someone out there
wants to sell there space for what they have into it.
So.. I am still looking.. Hamvention has not answered any of my email inquires yet and it has been over a week.

If anyone has an available space, and want to sell it, please send a note to my address below.

k4kal at arrl dot net

Thanks,
Keith

Hi,
I am trying to reprogram an icom u12. I know it required a little soldering, but not sure what diodes need to be moved? Can anybody help me?

It is currently on 460 and I was hoping to either put it in the ham band, or GMRS?

I will be going back to see some family in Iowa this weekend. Will be listening to 20 and 75 meters on the FT-817. I will be using my ATS 909 and my Tiny-Tenna at the house to listen to the Liberty Net on.

I will taking I-65 through Nashville to I-24, then I-24 to I-64 in Illinois and then on to St Louis. I will then take US highway 61 up into Iowa. I will be monitoring 52.525 6 meters and 50.125 USB and 146.520. I will be travelling on Friday and coming home next Wendsday.

Anyone is welcome for QSO with me.

> If you want to install a ham radio in your car without voiding your warranty,
> then I guess you should not buy a new Toyota like I did...

So Toyota is saying 'no commercial 2-way radios' (i.e. business radios), and no cell phones either? Remember that cell phones do require a license and are on the carrier's FCC license grant as the mobiles licensed with the carrier's fixed cellular sites.

Yes, I agree. I really do miss Art. I started listning to the program a year ago when I had paracarditis which kept me up most of the night and I would find comfort listning to Art on my R8A. I don't miss the paracarditis but do miss Art Bell, he had some good guests. One I remember from Areceibo which was very interesting and kept my mind off the pain for the whole program.

Thanks for the memories Art Bell.

Hi Philip

Dig this.

I had my alternator go out the day before yesterday. Had a new one put in last night. The mechanic disconnected the battery of my car without using a backup battery in the cigarette lighter.
This reset the computer and all sorts of things back to factory default.
More importantly, the EGR valve was reset somehow and the 'service engine soon' light, that has been on for over a year, after several trips to the service center finally went out and has stayed out.

I had to get an emissions test today for new tags for the car. The inspection station rather than hooking up the tailpipe sniffer, plugged a cord somewhere under the dash. The car passed with flying colors.
Prior to the alternator going out, I was told I needed to replace the EGR valve and have some spyder thing in the carburetor replaced.
Running the same diagnostics on the engine this afternoon showed everything to be A-OK.

Wonder if it's built in, pre-programmed error codes to make one have parts replaced that don't need it?
I know RCA TVs used to have a Thermistor in them, connected in such a way they could not easily be bypassed. The only purpose was the Thermistor is like a candle, it only lasts so long and goes out.
I figure it was either a ploy to keep RCA repairmen in business or to sell more TVs, other manufacturers did not have them.

If one only knew how to replace a few pincushion caps (that dry out) in monitors and TVs, they would run for years without any other problems.

I have disconnected the battery in my Jeep several times to
clear out trouble codes and other goofyisms. Seems heavy
doses of HF at idle change the programmed settings and
it takes too long to reset by itself. I have also disconnected
sensors to see what they are by what code comes up. That
requires a reset! YMMV.

Hi Bruce

I had a car that the gas pedal would stick to the floor.
The manufacturer said it was totally impossible.
After several other people had the same problem and it appeared in the newspapers, they began looking into it.
Two causes were determined - the first was simple, the factory installed and affixed rubber pad under the gas pedal on the carpeted floor would somehow move forward and catch under the edge of the pedal, least common and only in the hot summer months.
Most common was the cable from the carburettor to the gas pedal would fray on vehicles with certain options and snag.

But like the fellow with the Crown Vic, rather than an electrical problem, many Crown Vic's had a problem with a broken motor mount.
If you hit the accelerator to hard, the motor would lift, pulling on the throttle linkage, causing them to accelerate more quickly.
But if you were parked, like up against a small curb and the car could not move forward, the engine would lift right away and pull the throttle to wide open while doing so.

Ironically, we had a Crown Vic run through the front of the Creve Coeur, Missouri 63141 post office only a few months ago. Problem, broken motor mount caused the vehicle to accelerate over the curb, over the sidewalk over the planter box and into the post office.
The driver said all they did was put the car in gear and it took off like a skyrocket, even with their foot planted firmly on the brake pedal.
At first it too was deemed as driver error. Everyone thought she had her foot on the accelerator, thinking it was the brake. But the police could clearly see the skid marks from the braked wheels, vs the burned rubber marks from the driving wheel.

That stupid thermistor was in the degaussing circuit. It's claim to fame
was that it would allow the magnetic field decay slowly. When the thing
died, it usually burned off the plastic covering, unbonded the two
leads, and arced harmlessly. Lots of noise, some smoke, and a guaranteed
service call. With the thermistor missing, the degaussing coil would

remain active longer and cause wavy. colored lines on the screen. My cure in the field was to pick out all the pieces and twist the two leads together. Even though this removed the degausing feature, it made the TV work. And degausing every time you turn on the TV is usually a waste of time.

CTC-30, CTC-31, etc., had them, but I think by the time they came out with the CTC-100 they had eliminated the thermistor...

Paracarditis is one of my afflictions.... a secondary symptom of
polymyositis. Lasix and digoxin do a good job of keeping excess water
from accumulating within the paracardium and minimize the arrhythmias,
respectively. Art filled in for George a couple of weeks ago. He'll
still host once in a while. Stay tuned! LOL

Some years back, I bought a new Ford Ranger (1984). One (of many
many) bulletin that came out concerned erratic spark knocking during
night time driving and/or when the wipers were running. Seems the
EEC-IV fuel system (an electronic controlled 2 bbl carburetor at the
time) was getting erroneous signals from the TFI module in the
distributor and errant EGR signals. Well, as Ford built it orginally,
the wiring harnasses for the distributor and EGR sensor were bundled
together and looped part way around the ... alternator. You guessed
it. Induced magnetic field especially when the alternator was
producing a lot of amps. Took Ford a year or two to figure that one
out. Solution was to reroute the harnass some 6-10" away and secure
with zip ties.

2797. South Brevard Amateur Radio Club (Melbourne, FL) Field Day

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-09 02:39:13 UTC
From: Bill Newkirk <wnewkirk@bellsouth.net>
Message-ID: <IoEua.7454$Wq.732@fe03.atl2.webusenet.com>
Source record: 67592

(fwd from KG4DSD)

Greetings,

This is being sent to the friends and members of South Brevard Amateur Radio Club.

Field Day 2003 is just around the corner so I would invite and encourage all to participate this year or just stop by to say "Hello" to your old and new friends.

We'll be at the Police Foundation Park, Circle Dr. Melbourne (again) off U.S. 192 behind Sam's Warehouse.

For those of you who already plan to attend please let me know by direct email at dclemente@bellsouth.net (rather than clutter up the SBARC-L group mail). (If its easier -- call (321)727-2794). Please tell me if you have a specific interest or capabilities such as psk31, packet, qrp, satellite, or whatever -- you know the list goes on and on. If someone has time to transcribe the ARRL message (bonus points), that's always a help. Also, I'll may need a little help in the logistics (aka planning, transportation, and muscle dept.)

It's just about impossible to get hold of everyone at the same time -- I'm hoping this will help.
Please let me know either way. Your thoughts, ideas, and constructive criticism are always welcome.

Don't just sit there -- Come on down !

73
Dan KG4DSD

Ps. If anyone has questions about this year's rules -- I can send them to you or you can get them at the www.arrl.org site

2800. WB4GDP Gone

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-09 11:46:47 UTC
From: QRM Billy <QRM@BillyBARFgone.net>
Message-ID: <b9g4g0jtj0@pita.alt.net>
Source record: 67595

In another sorry footnote to ham radio history,
another BARF wacko is gone. Qrz.com shows
the call sign WB4GDP has not been renewed and
expired over a year ago. Billy was one of Herb's
favorite errand boys and would follow virtually any
order given to him by Herbie. Herb must be behaving
himself, since no one has heard him on 14313 in a while.

Plenty of Toyota taxi cabs in my city. Who exactly were you talking to at Toyota? Doesn't sound to me like they have a clue what they are talking about.

Source record: 67598

Yes it is a reasonable example of a CW QSO.

You really need to get a receiver and check out the W1AW (ARRL) code practice.

Billy was gone as soon as they had to wire his mouth back together. Another one bites the dust.

As for Herb. Im glad of that. I never did understand why he hung around such trash.

He really is a good operator and a fine CW man.

Amazing what an attitude adjustment does for an alligator mouth. Billy was an excellent example for birth control.

Yep, Herb has finally seen the light and I hope he continues.

I received a more reasonable response from Toyota on this issue.
Looks like the same letter I received in 1994.
I am happy again ...

--
KC6SOZ

Response (Sara)05/09/2003 09:06 AM Thank you for contacting Toyota Motor Sales, U.S.A., Inc.

We appreciate the opportunity to address your inquiry.

The installation of a mobile two-way radio system in your vehicle could affect electronic systems such as multiport fuel injection system/sequential multiport fuel injection system, cruise control system, anti-lock brake system, SRS (supplemental restraint system) air bag system and seat belt pretensioner system.

Vehicle electronic components could be damaged, and/or the proper and safe operation of the vehicle might be compromised if, for example, any of the following situations (and potentially others) existed:

* The transceiver is not "type-accepted."

* The power and/or antenna cables radiate RF current

* Routing of the power and/or antenna cables results in inductive or capacitive coupling

* Transmitter, feedline and/or antenna inefficiencies result in an unacceptable level of RF radiation exposure to the ECM's

* The standing wave ratio is unacceptably high

* The antenna ground plane is inadequate

Installation of a 2-way radio in Toyota vehicles should not present issues under the following conditions:

* The transceiver must be type-accepted by the FCC, and not modified in any way

* Maximum output power complies with FCC regulations (100 watts)

* All installation and operating instructions provided by Toyota and the equipment manufacturer must be followed closely

* The antenna must be installed as far away as possible from all
vehicle electronic control modules (ECM) or other onboard
computer/sensors

* The antenna cabling must be routed no closer than 20 cm (7-7/8
inches) to any ECM or other onboard computers/sensors

* Antenna and power cabling must not be routed along side or in
conjunction with the vehicle's wire harness
o It is always preferable to cross vehicle harness at right
angles when possible
o Antenna and antenna cabling should be properly adjusted to
obtain the lowest possible SWR (standing wave radio)

Disclaimer: The basic installation guidelines provided may be of
assistance to you. Although they may not fully answer all your
specific requests, Toyota must take reasonable precautions to limit
our potential legal liability, because the full range of possible
variables noted earlier could never be fully anticipated. Also, more
detailed information that would provide the operational details of
Toyota's electronic system is considered proprietary.

We do not recommend modifying our vehicles from their original factory
specifications. Modifications could affect the vehicle's performance,
safety or durability, and may violate government regulations. In
addition, damage or performance problems resulting from the
modification may not be covered under warranty.

It must be emphasized that, under the terms of Toyota's new vehicle
warranty, damage caused by RF energy from a higher power mobile radio
is specifically excluded from coverage because it is not the result of
faulty materials or workmanship. Accordingly, the owner assumes all
such responsibility.

We recommend that you contact your local Toyota dealership for any
additional clarification regarding the installation process that you
may need.

Your email is documented at our National Headquarters under file
#200305090234. If we can be of further assistance, please feel free to
contact us.

Hi Gary,

Thanks, I've seen other engines do this too with that same problem, front wheel drive in particular. So far, there has been no otrher info on the accident here. It will be interesting to see what they have to say, if anything.

SB QST @ ARL $ARLB033
ARLB033 FCC Declares General Communications Emergency for Oklahoma
Area

ZCZC AG33
QST de W1AW
ARRL Bulletin 33 ARLB033
From ARRL Headquarters
Newington CT May 9, 2003
To all radio amateurs

SB QST ARL ARLB033
ARLB033 FCC Declares General Communications Emergency for Oklahoma
Area

The Federal Communications Commission has declared a general
communications emergency for the Oklahoma area. Effective
immediately, amateurs are required to refrain from using 3900 kHz,
plus or minus 3 kHz, unless they are taking part in the handling of
emergency traffic.

The declaration was announced May 9, 2003, in cooperation with ARRL
Oklahoma Section leadership and under the authority of Section
97.401 of the FCC's Amateur Radio Service rules and regulations [47
CFR Part 97].

The FCC said the declaration is to support amateur communications on
behalf of The Salvation Army's tornado relief efforts. The order,
signed by Technical and Public Safety Division Chief Joseph P. Casey
of the FCC's Enforcement Bureau, remains in effect until rescinded.

While I have *no problems whatsoever* in FCC declaring
a "communications emergency frequency" in a situation
such as this, I think it will be VERY curious to see what
happens tonight as both the 3.898 Group and the "3.903"
Century Club both operate on, and seem to be "quite
possessive" of these freqs.

It would have been much better IMHO if the FCC had
declared 3.990 to 4.000 as the declared emergency
channel(s) in the 75M band.

Agree 100% - however, my sources told me some time
ago that GDP status was that of a "Ward of the State Mental
Health System", within a Southeastern USA Jurisdiction which
will remain un-named.....although some of you may know of
where and what SMH Facility which I am speaking of.

:) :) :)

(it's a durn-shame that more of the "old fruitcake guard"
of 20 and 75 Meters didn't also go this way....)

It's right in Toyota and Subaru Owner's Manuals in "black-and-white".

Says all extended warranties will be VOID if a "RF Emitter"
of greater than *10 watts output* is installed in their vehicles.
Better save that old low RF power vintage Yaesu FT-723R
Memorizer! (it's rated at 10 Watts)

It said -extended- warranties, not the standard, from-the-factory warranty.

Extended warranties are a waste of money anyhow.

Yes, that is a typical QSO. This looks like PSK31 text to me but would look
like CW copy as well for the most part. A voice QSO would be different.
More natural sounding.

A mobile rig would be fine, maybe an Icom 2100 which is a great rig and
not expensive at all, it'll run at 5,10 and 55 watts. Antenna at least
above your roof. Roof mounted, chimney mounted, whatever. You'll need a
power supply for the rig, an Astron will be fine a RS20M would be good. A
run of coax of coarse, make sure you measure how much you'll need from the
shack to the antenna carefully. Best to have too much than too little.

Congrats and welcome to a great hobby!

The exact language will be interesting to read.

My Icom 706 MKIIg is installed in my vehicle[s][Ford Ranger or Chrysler
LHS]. But it is NOT an 'RF Emitter' IN the vehicle! ... The RF emitter
is the antenna and that is located outside the vehicle!!

What is the exact wording? Read it like a lawyer!!

It should be the 3905 century club, unless they changed names and freq, but anyway 3.903 is 3 kc away from the wx net. They have no problem. The ones on 3.898 will have to scram for a while or drop to 3.897. It's that simple. Possessive won't mean too much with Riley lurking over their shoulders. And I bet he will be just to see what is happening. The FCC takes that wx net stuff dead serious. Anyone that interferes with it, and the fcc hears them, can expect a serious letter coming in the mail. :(Why would they need 10 kc? It's only one net. Not three. MK

Lots of long haul truckers use 3898 at night in my part of
the country. This will not set well with them. In fact, I just
checked 3898, and the truckers, many not licensed, said,
"Screw the FCC." Riley has a fair record of nailing people
who use call signs but a dismal record of doing anything
about unidentified stations. Just heard chatter on 3898 telling
everyone to make sure they do not use call signs.

> 3898 Observer

I wasn't aware there was a group of unlicensed truckers using 3.898. A
new one on me...But no matter. They are "sick-bird" ops, IE:
ill-eagle, and their views don't count. No one cares what they think.
I hope Riley takes a big dump on them. And yes, they generally don't
have time to go after unlicensed ops's unless they start causing a
noticable ruckus. But getting 2 kc away from a wx net will bring the
heat down on them mucho fast. The FCC has the ability to easily find
these guys IF they really want to. MK

2827. Earpiece for scanner

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-10 18:56:07 UTC
From: Devang Devani <gdevani@sympatico.ca>

Anyone know where I can find a single earpiece that the newscasters and secret service wear for my hand held scanner? Don't need a mic attached to it ... just the earpiece.

Thanks

2828. Re: Kirsten Kaiser Press Release

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-10 19:24:30 UTC
From: Castle Communications <brianbentsworth@castleplamet.com>
Message-ID: <1065903428.670656@news3.bigplanet.com>

Kirsten Kaiser tried on numerous occasions to give her three children (all under the age of six) up for adoption; locked them out of the house; and was twice institutionalized -- not just for being suicidal, as she claims, but for planning to murder her children! And, believe it or not, these are just a few of the things she's done -- all pre-divorce days.

Quite a far cry from the wonderful, caring, concerned, mother the media paints her as, eh?

But wait; there's more. Post-divorce:

In her "care," one child was struck by a car (while Kaiser partied inside a club) another suffered serious burns (playing with the oven unsupervised) and the autistic one -- who barely knows his own name -- wandered a mile down a major highway by himself (after Kaiser had locked him outside so she could take a nap). The same child (of course unsupervised) also drove the family vehicle into a storage shed. Not to mention, all three children were left alone on numerous occasions inside a car while Kaiser shopped in the local mall. Again, these are just a few of the things she's done. Keep in mind, some of this has happened within the last year.

Records of the above -- and much, much more -- can be found at the Rochester, Minnesota, Olmsted County Courthouse, file #55-F5-97-000915.

That's all a matter of public record -- one that I wish more people would hear about. But, no, the public hears Kevin is a vegetarian because Hitler was (I guess Hitler was reincarnated as the blonde named Sue Kevin met in the 70's), they hear he wouldn't let Kaiser watch an unedited version of "Jurassic Park" (Funny, we had no idea movie theaters edited out Jewish actors), and they hear that he wouldn't allow Kaiser to work outside the home (It seems her failed career as a realtor must've been a mad hallucination that bunches of people had).

Should I continue?

Maybe not. I mean, if you haven't gotten the picture yet, undoubtedly you wouldn't be able to spot her lies, hypocrisy, and inconsistency, in the media either. However, for those of us who still have to deal with this crazy, freapin' idiot, reading things she's said like "I never knew a racist before I met Kevin" in one interview and "My second husband Joe was a racist" in the next don't

go unnoticed.

Just a standard earphone should suffice. You can get those at Radio
Shack. I however prefer a monaural headset or a Walkman-style headset
with a monaural adapter attached to it for my personal scanner listening.

Not really. The commission cannot "easily" find someone, even
when they want to. Example. We had some nut case get on
air traffic control frequencies here for weeks! Yes weeks. FCC
had several people in town and could not locate the guy. The
nut case's radio signals were finally tracked down by another agency,
using techniques the commission does not possess. Sorry, I know
I am being vague on purpose. I don't want some nut to read details
here in a public forum and make it that much more difficult for the
authorities to locate him next time. Bottom line, the commission
tried for weeks to locate the guy and failed. No FCC news release
this time. They were just as glad to sweep the whole thing under
the carpet. And the outfit that found the guy is not in the habit
of putting out news releases for any reason.

"Dave Shrader" <david.shrader@attbi.com> wrote in message
news:3EBC575A.5070800@attbi.com...
> The exact language will be interesting to read.

I asked Toyota this question directly by email:
"I would like to know if there are any restrictions (output power, antenna gain and/or location, frequency band, modulation type, etc.) on the installation of 2-way radio equipment in the 2003/2004 model year vehicles, and if so, what those restrictions are."

Here is their response, edited only to remove HTML tags.

Subject
Inquiry regarding limitations of 2-way radio equipment installed in 2003/2004 Toyota vehicles

Discussion Thread

Response (Sharon) 05/09/2003 03:42 PM
Thank you for contacting Toyota Motor Sales, U.S.A., Inc. We appreciate the opportunity to address your inquiry.

The installation of a mobile two-way radio system in any Toyota vehicle could affect electronic systems such as multiport fuel injection system/sequential multiport fuel injection system, cruise control system, anti-lock brake system, SRS (supplemental restraint system) air bag system and seat belt pretensioner system.

Vehicle electronic components could be damaged, and/or the proper and safe operation of the vehicle might be compromised if, for example, any of the following situations (and potentially others) existed:

The transceiver is not "type-accepted."

The power and/or antenna cables radiate RF current

Routing of the power and/or antenna cables results in inductive or capacitive coupling

Transmitter, feedline and/or antenna inefficiencies result in an unacceptable level of RF radiation exposure to the ECM's

The standing wave ratio is unacceptably high

The antenna ground plane is inadequate

Installation of a 2-way radio in Toyota vehicles should not present issues under the following conditions:

The transceiver must be type-accepted by the FCC, and not modified in any way

Maximum output power complies with FCC regulations (100 watts)

All installation and operating instructions provided by Toyota and the equipment manufacturer must be followed closely

The antenna must be installed as far away as possible from all vehicle electronic control modules (ECM) or other onboard computer/sensors

The antenna cabling must be routed no closer than 20 cm (7-7/8 inches) to any ECM or other onboard computers/sensors

Antenna and power cabling must not be routed along side or in conjunction with the vehicle's wire harness

It is always preferable to cross vehicle harness at right angles when possible

Antenna and antenna cabling should be properly adjusted to obtain the lowest possible SWR (standing wave radio)

Disclaimer: The basic installation guidelines provided may be of assistance to you. Although they may not fully answer all your specific requests, Toyota must take reasonable precautions to limit our potential legal liability, because the full range of possible variables noted earlier could never be fully anticipated. Also, more detailed information that would provide the operational details of Toyota's electronic system is considered proprietary.
It must be emphasized that, under the terms of Toyota's new vehicle warranty, damage caused by RF energy from a higher power mobile radio is specifically excluded from coverage because it is not the result of faulty materials or workmanship. Accordingly, the owner assumes all such responsibility.

We recommend that you contact your local Toyota dealership for any additional clarification regarding the installation process that you may need.

I got a world band radio so I can listen to Morse Code (while I learn it).
But for the life of me I can't find any.

I tried using:
http://www.timfy.freeserve.co.uk/hambands.htm
Which just lists the Priveledges of different classes.
All I find is super fast, strange sounding, data. Perhaps it's rtty.

So what bands/freq do the Morse Coders primarily go to.
In other words, what feq can I tune and be pretty sure to find
some morse code?
Or, does no one use that anymore?

It's in the lower end of the bands, there is plenty of CW going on.
Hearing it also depends on your radio,antenna,propagation,etc.

Fcc came in town here looking for college students operating
an unlicensed FM station. Fcc's arrival was announced and
tracked on CB, ham repeaters, FRS, etc. for the entire time
they were here. How? The Fcc people wore hats and other
clothing with Fcc logo and used government credit cards while
they ate breakfast at local motels, gathered in motel lobby, local
restaurants, bars, etc. Fcc's own comms were monitored, both
their electronic comms and their conversations in local
businesses. Fcc vehicles were easily identified and tracked,
despite not having any markings. When Fcc returned to their
motel for the night, the FM station came on the air taunting
them. As one local said, it made you wonder if the Fcc was

here to do some serious hunting or just to collect perdiem
and overtime pay while having an out of town fling.

Try the following ranges (these frequencies are in megahertz):

3.500 through 3.750
7.000 through 7.150
10.100 through 10.150
14.000 through 14.150
18.068 through 18.11
21.000 through 21.200
24.890 through 24.930
28.000 through 28.300

The greatest activity in each range is at the lower end of the range. Note the last couple of weeks propagation has been extremely poor on the frequencies 18.068 through 28.300. Sometimes the higher end has not been open at all.

I would've _thought_ that, in a situation like that, FCC would make
that call after less than 48 hours of failure; agency pride getting in the
way?
And why would FAA put up with it?

This 'world band radio' you have. Does it have a product detector or a BFO
? This is required to properly receive CW (Morse code). If your not
sure...try tuning in a 'normal' amateur radio SSB (Single sideband) signal.
If it receives that, then you can receive CW.

Just a thought.

When a special event station has let it be known what frequencies they will be operating on, and you tune to that frequency and you hear nothing, is it okay to try calling that station? Or should I just assume that since I can't hear them they are either away from the station or that propagation has put them out of range for the moment?

Thanks,
KE4RCA

2847. Re: Question about special even stations

Source record: 67540

I would tune plus and minus 5kHz or so to see if they moved slightly to
avoid interfering with another station -- i.e., +/- QRM

Then ask if the posted frequency is in use or send QRL on CW.

If not in use -- sure give a directed call to the special event station --
they may be on break but listening. Or maybe operating on a different band.

Hi, Kevin!

This is a poor attempt by Kevin Alfred Strom to post nasty things under my name. I (Castle Communications) did not
post this, so he is guilty of (among other things) forgery and fraud. He's cheating on his taxes (which will probably bring him down) and he has an illegal immigrant for a wife.

Strom abandonded his children in Jan., 2001 and he does not pay the child support that he has been ordered to (which he also agreed to do in court). Add deadbeat dad to the list of bad stereotypes that aptly apply to him and we get one hell of
a weenie coward!

Any more namecalling Kevin, or should we talk about it on the phone?

Brian Betsworth

Yes, it has BFO. (Good question!)
It's a DX-440 "Voice of the world" by Realistic.
It only has a 6 foot antenna though, but it does
have a way to add an external one.

2850. Ohio/Penn DX Bulletin #610

Ohio/Penn DX Bulletin No. 610

The Ohio/Penn DX PacketCluster
DX Bulletin No. 610
BID: $OPDX.610
May 12, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K2FF, W2CE, W2LO, NG3K, W3HC, W3UR & The Daily DX, K4SV, N4AA & QRZ DX, WB4PVT, WW5L, K6RIM, KI6T, N7CW, K8JE, K8YSE, N8RKA, W8CNL, W8KL, W8UVZ, W9DC, 9M2/G3TMA, 9M2TO, CS1CRE, CT1EEB, CT1EEN, DJ7ZG, DL/VE3ZIK, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-POST, DL8YR, ES1FB, F5NQL & UFT, F6AJA & Les Nouvelles DX, FJ5DX & La Gazette du DX, GACW, G4OBK, HK3JJH, I1JQJ & IK1ADH - 425 DX NEWS, IK2SAI, IV3SKB, JA3MCA, JI3DST, JI6KVR & JA-IOTA Islands News, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PY2ZX, PY7AB, RW6HS, SP9JPA, SP5UAF, SP5XSD, UR3GM, VA3RJ & ICPO, VE3EXY, VE7DP, VK2UW, VK8NSB and YV4GMG for the following DX information.

** A NOTE FROM TH EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention next weekend, there will not be a bulletin on May 19th (unless something major is announced). Since I missed an issue last weekend and will miss an issue next week, this week's bulletin is extra long to make up for it. Please continue to send your information ("you never know"), and I hope to see you/meet you at the HamVention or the NODXA Hospitality Suite (see Dayton Happenings below).

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Monday, 5th/May, through Sunday, 11th/May there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9U, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FO/m, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG,

TI, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2V, VP5, VP8/h, VQ9, VR, VU, XE, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

7P, LESOTHO (Update). A sixth operator has joined July's week-long 7P8 Lesotho DXpedition. That will give the group even more expertise on CW and digital mode operations. The newest operator to join the group is Igor Zdorov, W0IZ, of Minneapolis, MN. Look for 7P8CF and 7P8TA to be the main phone ops, while 7P8MJ, 7P8NK, and 7P8DA, 7P8IZ will be mostly CW and digital modes. This all modes, all band operation is under the aegis of the Texas DX Society < http://www.tdxs.net/ > and the Lone Star DX Association < http://www.dxer.org/lsdxa >. QSL routes for July 18-25th 7P8 DXpedition are as follows:
7P8CF--K5LBU--Frosty 7P8NK--VA7DX--Neil
7P8TA--WW5L--Tom 7P9DA--K4SV--Dave
7P8MJ--W5MJ--Madison 7P8IZ--W0IZ--Igor
QSL each call individually since there won't be a main DXpedition callsign. A web page will be announced later. ADDED NOTE: K4SV and VA7DX will also be operating from 3DA after 7P8, but callsigns have not been issued yet. AGAIN NOTE (Please): This is a different operation from the "African Double Jump" at: http://www.qsl.net/xu7aay/africa/

AL1, ALASKA. Operators Corliss/AL1G, Francis/KL7FH, William/KL7Z and Kyle/AL7J will be active in the CQ WPX CW Contest as AL1G. The entry is Multi/??. QSL via AC7DX.

BALLOON EXPERIMENT RESCHEDULE (Update from OPDX.609). The Italian Amateur Radio Society - Milano Chapter (Associazione Radioamatori Italiani - Sezione di Milano) has rescheduled their ARBE (Amateur Radio Balloning Experiment) to May 17th due to weather conditions. Look for IQ2MI/p, on 144.300 MHz +/- QRM USB starting at about 0800-0900z. Flight should be 1-3 hours long. If delayed again, they will try again on May 18th. For the latest updates about the ARBE event, please visit the ARI Milano Website at: http://www.arimi.it/rubriche/arbe.html

C6, BAHAMAS. Operators Frederick/K9VV and Calvin/K6CT will be active as C6AKU during the CQWW WPX CW Contest (May 24-25th) as a Multi-Single entry. QSL via K9VV.

CANADIAN SPECIAL PREFIXES. Just a reminder that Industry Canada has authorized the use of "Special Event Prefixes" to celebrate the 50th Anniversary of the National Library of Canada between May 24th and July 27th. This means that the special prefixes will be available for use in the upcoming CQ WPX CW Contest (May 24-25th). The special prefixes are as follows: CK for all VE's, CJ for all VA's, CY for all VO's and CZ for all VY's.

CASTLE ACTIVITY.....
EUROPEAN CASTLES DAY will take place on May 18th. Look for a lot of castle activity on all HF and VHF bands from France, Italy, Belgium, Spain and Portugal. All contacts will count for the National Castles Awards.

(Update to OPDX.609). Members of the "Clube Radioamadores do Entroncamento", who are expected to be active as CS7AL on May 31st from Castel Alcanede, will now be active on 40/20 meters CW/SSB/DIGITAL. QSL via CT1BXE.

Francois, F5JNE, will be active from the French Castle of Maligny. Reference number DFCF 89226 (contacts also count for French Department Yonne - 89 and Province Burgundy). Activity will be on 40 and 20 meters SSB, starting about 0600z. QSL via bureau preferred.

On Sunday, May 18th, members of the Association des Radio Amateurs des Cotes d'Armor (ARACA 22) will be active from the Cap Frehel Lighthouse as F6KBO/p. Activity will be between 0630-1600z on the HF and VHF bands. References numbers are: WAZ 14, ITU 27, French provinces - Brittany, French Departments - Cotes d'Armor/22, and for the Onshore French lighthouses Award (DPLF) - PB087. QSL via F6KBO through the French Bureau.

CU, AZORES. Goran, SM4DHF, will be active as CU2/SM4DHF in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (20m) entry. QSL via SM4DHF.

DAYTON HAMVENTION HAPPENINGS.....
DX FORUM. Moderator Jay, K4ZLE, states, "This should be one of the better DX forums in recent history." The scheduled speakers and presentations are as follows:
Bernie McClenny, W3UR, on the AH3D story
Al Hernandez, K3VN - ZL7C story
Wayne Mills, N7NG - ARRL DXCC update
Tedd Mirgliotta, KB8NW - Northern Ohio DX Association Award presentation (2002 DXpedition of the Year)

The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. This year's Hospitality Suite will be dedicated to the memory of one of NODXA's "Silent Key" club members Jim Hire, W8ZET. Jim loved ham radio and enjoyed meeting his friends from around the world each year at Dayton. He was also a NODXA "Honorary Life Member" and was very involved with NODXA and the Hospitality Suite. This year Jim's wife, Janeen (now a new ham - KC8VRS, not KC8BRS as first reported and soon to be W8ZET ...) has decided to keep the tradition going and will provide some special memorabilia of Jim at the Hospitality Suite. Please stop by and visit. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers and Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

DXCC NEWS.................
Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operations have been approved for DXCC credit:
Afghanistan: YA1BV, YA1CQ and YA1JA -- (November 14, 2002 through March 31, 2003).
Uganda: 5X1CW -- (License renewed through March 1, 2004).
Nepal: 9N7DX -- (April 22, 2003 through June 19, 2003).
Market Reef: OJ0/OE1ZKC, OJ0/JH1ARJ, OJ0/AH7X and OJ0/JR4PMX (July 12-16, 2001)

Looks like the ARRL 2002 DXCC Yearbook is out. Many have begun to receive them. Be watching the mailbox for it (Your editor has not received his yet!). The DXCC yearbook is sent free if you are or were a member of ARRL as of September 30, 2002, and made a DXCC submission between October 1, 2001, and September 30, 2002. If you did not submit anything, you will still get one free if you are on the DXCC Honor Roll. If you are NOT a member of ARRL and would like to have one, we believe details are available on the ARRL Web page on how to order one. Yearbook is 5 USD plus shipping.

INTERESTING NOTE: Gary Stilwell, KI6T, reports: "At the Visalia International DX Convention this past weekend (May 3-4th), the DXCC QSL card checkers processed 85 DXCC applications which included 8,660 QSL cards.

DXING/CONTESTING WEB SITE/NEWLETTER. Zrinko, DL/VE3ZIK (4N1DX), informs OPDX that he is administrator of the Web site at: http://www.contesting.info He states, "We publish fresh DX/Contest news and QSL infos EVERY DAY. Also, at the end of the month we send QSL info bulletin to our subscribers." If one wants to subscribe to their QSL info Bulletin... please send an E-mail to: zik@contesting.info

FS, ST. MARTIN. Look for Craig, AH8DX, will be active as FS/AH8DX during the CQWW SSB Contest as a Single-Op/All Band entry. QSL via CBA.

HC, ECUADOR. Andy, NP3D, will be heading back to HC-Land on May 18th to celebrate his birthday. He will be there until May 26th. Also, he will be joined by Alexandro/HC1AJQ and Taka San/JA2JPA. They will try to activate SA-033 at this time. They will have a generator, ICOM-706MKIIG and dipoles. The schedule is as follows:
May 18th - Celebrating Andy's 44th birthday.
May 19-20th - HC1/NP3D and HC1/JA2JPA QTH on the Mountain at 11,000 ft ASL near Quito.
May 21-23rd - IOTA SA-033 as HC4/Homecalls.
May 24-25th - CQ WPX CW as HC4/NP3D on 80 meters.

IOTA NEWS.................
AF-018. Look for OL5Y to be active from Pantelleria Island during the CQ World Wide DX CW Contest (November 29-30th), either as IH9/OL5Y or IH9P and as a Single-Op/Single Band (40m)/ High Power entry. QSL via OK1MG.

AF-083. Look for Francois, F8DVD, to be active from Djerba Island, Tunisia, using the callsign of the Djerba Scouts Radio Club, 3V8SM, from June 23rd to July 4th. Activity will be on the HF bands, SSB. By special permision of Mustapha, DL1BDF, who's the coordinator for Scout Radio Clubs organization in Tunisia, all the cards for Francois' QSOs will go to him, either direct or via the French Bureau. Please write "via F8DVD/71" on the cards going through the bureau. For direct cards please send a SAE and the correct return postage. All the direct cards with insufficient return postage due will be answered by the bureau. Send direct cards to: Francois Bergez, 6 rue Liberte, 71000 MACON, FRANCE.

AS-024. Operators Kaoru/JA3MCA, Aru/JA0KNM, Jun/JJ1EQW and Kai/JE3NJZ will be active as homecall/JR6 respectively from Hateruma Island, Yaeyama Archipelago, Okinawa, from June 6-9th. Their activity will be on CW/SSB and on 40-2 meters. Please QSL via their home callsigns by the Bureau or direct. Hateruma Island is known as the inhabited island in the south end of JA-land.

AS-073. Tex, 9M2TO will be active as 9M2TO/P from Perhentian Island, May 15-18th. Using an IC-706 plus a G5RV, Tex will be active on 40-10 meters, including the WARC bands. QSL 100% AUTOMATICALLY through the Bureau via JA0DMV.

AS-074. Ian, 9M2/G3TMA, will be operating from Pulau Ketam from May 14-18th. Operations will be on CW and some SSB. Callsign will be 9M2/G3TMA. QSL address is: Ian Buffham, Bekay Court, Lorong Enau, (off Jalan Ampang), 55000 Kuala Lumpur, Malaysia.

AS-107. Champ, E21EIC, will be active as E21EIC/P in the RSGB IOTA Contest in July from Si Chang Island. He will use a dipole antenna and 100 watts. QSL via E21EIC

AS-147. Takeshi, JI3DST, will be active as JI3DST/8 from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) starting at 0700z, July 25th through 0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the Bureau ONLY.

EU-004. Peter, DL8YR, will be active as EA6/DL8YR/p from Mallorca Island, May 14-28th. Activity will be mostly on CW on all bands including an entry in the WPX Contest on CW.

EU-008. Bob/N5ET with XYL Linda/KE5TF and Peter/GM3OFT are expected to be active on May 31st as MM/N5ET/P from Raasay Island (IOSA NH-10, SCOTIA CN-24, Loc. IO67xi). Activity will be for 5 hours starting around 0900z. Activity will be on 40/20/15 meters, following propagation. Send direct QSLs (EU-only) via GM3OFT, all other areas via N5ET or bureau.

EU-080. A multi-national team (CT1APE, CT1CJJ, CT1EEB, CT1ILT, CT2GLO, EA1CA, EA1DKV, EA4ABE, EA4ST, EA5FX and N5KO with the close help of EA1MC) will be active during the IOTA Contest from

Ons Island as ED1ONS. The Team will be on Ons from July 25-27th. A Web page will be set up very soon (online logs will be available) at: http://www.qsl.net/ed1ons Also, the team wants to know your needs for EU-080 so they can set an operating plan for outside of the contest hours. Send your feedback to: ct1eeb@mail.telepac.pt QSL via ED4URJ: Seccion Comarcal Ure Jarama, P.O. Box 123, 28700 San Sebastian de los Reyes (MADRID), SPAIN. Cards can be send Direct or via Bureau. PLEASE NOTE: A station will also be active on 50, 144 and 432 MHz.

NA-057. Raymound, WQ7R, will be active as HQ9R from Roatan Island, Honduras, in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/Low Power entry. QSL via N6FF.

NA-067. Ken, W8KL, will be active from the North Carolina State East Group between May 18-22nd. This will be a "Mobile Operating Position" using a FT-100D/Hamstick Mobile Antenna. Look for him on SSB on 14260 kHz +/- QRM during the afternoons/evenings (East Coast Time), if band conditions are good. He will also try during the mornings for JA/VK stations. Ken states, "If Bands Are Dead There's A Nice Beach There!!!" QSL via the Bureau or direct (QRZ.com OK).

NA-144. Tom, WA6WPG, will be active as WA6WPG/P from San Miguel Island, July 25-27th. Activity will be on 40-10 meters and include the RSGB IOTA Contest (July 26-27th) as a Single-Op. Tom will have a solar panel in addition to his battery and plans to be operating at least 24 hours. QSL via his home callsign.

OC-NEW. Members of the Mediterraneo DX Club (YC3DIK, YC3MM, YC3BDJ and YC3BCS) and possibly others plan to activate Pisang Island, a new IOTA in the Sumatra's Coastal Islands South Group. All operators will sign homecall/5 and activity will start around 1200z May 11th and end May 17th. Activity will be on 80/40/15/10 meters SSB. QSL all callsigns via IZ8CCW, direct or bureau. Their web page is at: http://www.mdxc.org/southsumatra/

SA-024. Members of the LABRE/SP (Liga Amadoristica Brasileira de Radio Emissao in Sao Paulo's) will activate Comprida Island (DIB 021), May 17-18th. Their callsign will be PV2AA. Activity will be on 160-2 meters CW/SSB/FM. QSL via PY2AA: Caixa Postal 22, Sao Paulo/SP, CEP 01059-970, Brasil. "The main objective of the PV2AA Comprida Island Expedition is the educational approach, with University - Ham integration. Teachers and students of journalism from UNICID (Universidade Cidade de Sao Paulo) will be following the expeditionaries, making one institutional video, interviews, and stay more closed with basic ham radio DX activitie."

SA-042. UPDATE to OPDX.599. Operators PT7BI/Daniel, PT2GTI/Stuckert, LU1YU/Helmult, PY8BI/Marcelo, CT1EEN/Samuel and PY8EA/Rocha,

will be active from Mexiana Island, May 21-25th, using the
callsign ZW8M. QSL via CS1GDX. For more details, visit the
Web page at: http://geocities.yahoo.com.br/mexianaisland

SA-082. Pedro, HK3JJH, will be active from Morro Grande from June
3-8th. There was no callsign provided, but activity will be
on all the bands (mostly 20m). He also mentions that there
is a lighthouse (WLH- LH-0404) on the island. QSL cards are
only by direct to: P.O. Box 81119, Bogota, Colombia, SA
(Postage is 2 USD, any help is welcome)

IU3, ITALY. Operator Andy, IV3SKB, informs OPDX that he will use the
special callsign IU3X in the CQ WPX CW Contest as a Single-Op/Single
Band (40m)/High Power entry. His Web page is at: http://www.qsl.net/iv3skb

J75, DOMINICA. George, K5KG, will be active as J75KG between May 20-29th.
Activity is planned for the HF bands CW/SSB and an entry in the CQ WPX
CW Contest (May 24-25th) using the J75A callsign. QSL via KU9C. George
is currently working to help local hams get on the air. A request has
gone out, asking for donations of small rigs or HTs. You can contact
George via E-mail at: k5kg@arrl.net

KH9, WAKE ISLAND. This may be the last week to work Jake on Wake as
N6XIV/KH9. He has been active on most days on 20 meters (around 14265 kHz
between 0730-0915z. His QSL Manager Glenn, K2FF, informed OPDX that Jake
was expected to install a Force-12 tribander C3SS last week which was left
behind by Chuck Brady (N4BQW/KH9) and will be used by both operators when
there.

LIGHTHOUSE ACTIVITY.....
Members of the Michigan DX Association (MDXA) will activate both Grand
Havens South Pierhead Inner (USA-1077) and Outer Lighthouses (USA-1078),
August 16-17th. They will use their club callsign W8DXI. The lighthouses
are located in Ottawa County, Michigan, Loc. EN63ub. More details are
forthcoming.

Members of the Michigan DX Association (MDXA) will activate the Historic
Grand Haven (Main) Lighthouse (USA-327) on the shores of Lake Michigan
(Ottawa County, Loc. EN63ub), August 17-18th. More details are forth-
coming.

Operators Klaus/DF3GL, Gregor/DL1BFE and Uwe/DL3BJ will activate the
offshore Lighthouse "Roter Sand" (red sand), July 10-14th, using the
the club callsign DA0LRS. The lighthouse carries the amateur radio
related numbers FED 019 for the ARLHS, and WLH 0396 for the World
Lighthouse Award and DLD/GLA 44. Activity will be on all bands CW/SSB.

The Tandil Radio Club (LU2EE) announced that the next operations for
commemorating the start of "Mistongo DX Tandil Group (GMDXT)", will
be from the Lighthouses of CLAROMECO and SEGUNDA BARRANCA:
From May 31st to June 1st, they will activate Lighthouse CLAROMECO
(ARG 014), on all bands and modes. Operators are: LU5DIT/D, LW5EE/D,
LU6DLB/D, LU8EXJ/D, LU8ERH/D and LU3DR/D. QSL via direct to LU2EE

with SASE, or via the Bureau operator's home callsign.

Between June 13-16th, they will activate (first time ever) the
Lighthouse SEGUNDA BARRANCA (ARG 067), on all bands and modes.
Operators are: LU5DIT/D , LW5EE/D, LU6DLB/D, LU8EXJ/D, LU8ERH/D,
LU8EGS/D and LU3DR/D. QSL via direct to LU2EE with SASE, or via
the Bureau operator's home callsign.
Visit the following Web sites at:
http://www.qsl.ne/lu2ee
http://usuarios.tripod.es/mistongo

NCDXF PRESS RELEASE. Al Burnham, K6RIM, V.P. Northern California DX
Foundation, reports: Effective immediately, the Northern California DX
Foundation (NCDXF) has a new and greatly improved web site. Check it out
at: http://www.ncdxf.org/index.html

P4, ARUBA. Scott, K0DQ, will be active from Jacky's, P43P, QTH during
the CQ WW WPX CW Contest (May 24-25th) as P41P and as a Single-Op/All
Band/High Power entry. QSL via Mario, I2MQP. Look for some P40Q operations
before/after contest.

POLISH SPECIAL EVENTS.....
Special event station HF6UE will be active now though June 10th. This
station is active to celebrate the signing of the European Community
Accession Agreement by Poland. The suffix UE means UNIA EUROPEJSKA
(European Union in English). This activity is organized by the SP6ZDA
club station. QSL via SP6ZDA, via the bureau (the best) or direct to:
Scouts Radio Club SP6ZDA, P.O. Box 41, 51-673 Wroclaw 9, Poland.

Special memorial operation will be taking place in the coming months
to commemorating Ignacy Lukasiewicz, the Polish petroleum pioneer who
distilled crude oil and designed kerosene lamps to light up the
operating theatre in the hospital in Lvov on 31 July 1853. He is the
founder of the petroleum industry (Award: http://www.ot5.cq.pl).
"This lotion is the future wealth of this country, it's the welfare
and prosperity for its inhabitants, it's a new source of income for
the poor people and a new branch of industry, which shall bear
plentiful fruits." -- Ignacy Lukasiewicz, 1854
Look for the following special event stations:

Now thru June 30th - HF8IL (via SP8PJG) Ignacy Lukasiewicz:
founder of the petroleum industry

July 1st-August 15th - HF150IL (via SP8PJG) Ignacy Lukasiewicz:
distilled kerosene, designed lamps and
illuminated an operating theatre in a
hospital (1853)

July 25th-August 4th - 3Z0IL (via SP8ZBX), SN0IL (via SP9PEE),
EN3WLL (via UR4WXQ) Ignacy Lukasiewicz
memorial stations (Award: www.ot5.cq.pl)

August 20th- September 10th - HF8IL (via SP8PJG) Ignacy Lukasiewicz: founder of the petroleum industry

QSL INFO AND NEWS.....
8TH AREA QSL BUREAU ADDRESS CHANGE: Great Lakes Director Jim Weaver, K8JE, informs OPDX that effective May 1st, the address for the 8th Area Incoming QSL Bureau will be changed to:
W8 QSL Bureau, PO Box 307, W Chester, OH 45071-0307.
Also, Jay Slough, K4ZLE, has been named to replace Ed Gassman, N8HTT, who has managed the 8th Area QSL Bureau for several years and is retiring.

9K2ZZ OPERATIONS. Ray, W8CNL, reports he received the following from Bob, 9K2ZZ. Ray states, "He (Bob) is going to be spending the majority of his time in YI and A9. I ask about logs, cards, etc. He informed me that all requests for confirmations go to the LOTW. This includes the past K4CY/P and K4CY/M operations from Iraq. These are his wishes. I am starting to get cards for K4CY/M. Do not waste your money as I do not have logs or cards. I do have all the 9K2ZZ and 9K9Z logs and plenty of cards. Direct only to me with SASE or SAE and postage. Some countries tell me they can not get IRC's. I accept a ruble, franc, lira, mark, etc." Ray's address is: Raymond H. McClure, 5 McKenzie Circle, North Augusta, S.C. 29841-4319

Memebers of CW-Philippines Club were active from Mindoro Island (OC-244) on May 1-3rd as DX1CW. QSL via VE7DP.

Frank, VE7DP, provides OPDX with the QSL info for the recent IOTA activations from the Philippines:
4G6A OC-125 via VE7DP 4H1LC OC-244 via VE7DP or DX1CW
DX4CN OC-202 via VE7DP
Frank states he has several listed addresses, but the preferred one is: General Delivery, Winfield B.C. Canada V4V 1M6

Special event station EO58G was active from May 5-11th to commemorate the 58th anniversary of the end of World War II. QSL via UR3GM, via the Bureau (Box 56, Kiev 01001, Ukraine) or direct to: Igor Pulin, Box 23, Kherson 73022, Ukraine.

Phil, G4OBK, has recently returned from his GD4OBK/P Isle of Man operation (Saturday, May 3rd) and made 1159 QSOs in 20 hours of operating. A log search and report is available at the following Web page: http://www.qsl.net/g4obk
QSL route is via his home callsign G4OBK. His address is: Phil Catterall, Wayside, Lendales Lane, Pickering, YO18 8EE, England.

K1B QSL STATUS. Dave, K4SV, "K1B North America QSL Administrator", reports: "So far we have processed ~11,000 QSOs and ~2300 cards. Please contact Stephen, K4YL, at < K4YL@arrl.net > if you have any special requests (Please note his new E-mail address). Stephen will do all he can to help in obtaining K1B QSL cards. Please remember Stephen only handles DIRECT requests, NO bureau cards please.
Stephen Grose, K4YL (ex W4SMG)

PO Box 183
Flat Rock, NC 28731-0183
Our goal is to get everyone QSLed for K1B who has not received their cards. Any small donations will be gratefully accepted towards printing cards, printing supplies and postage. Please remember: USA send SASE, DX send SAE, one Green Stamp preferred or one LARGE IRC accepted."

COLLECTION OF OLD QSLS. Jean-Michel, F6AJA, from Les Nouvelles DX informs OPDX that more than 1000 old QSL in five different galleries are waiting your visit on the web site: http://LesNouvellesDX.free.fr

It was announced that Mac, W3HC, will handle the cards for the PT5T operation of November 2001 conducted by CT1BOH. Cards are being designed now.

QSL RA3AR (ex-RV3AKU) via: Dmity K. Darkov, 115211, Moscow, ul. Borisovskie prudy 10-1-108, RUSSIA.

T9 CALLBOOK. Nenad, VE3EXY, reports that a T9 (Bosnia-Herzegovina) callbook is available online at: http://www.t93y.com

June, VK4SJ, has been active as ZK1AYL for about two weeks from the Aitutaki Group (OC-083), Southern Cook Islands, as ZK1AYL. QSL to her home callsign VK4SJ. By the way, she was heard on 10 meters begging for QSOs as this was being typed up Sunday.

XQ6ET UPDATE. George, W8UVZ, provides OPDX with an update mentioned in issue OPDX.609 regarding Bob, XQ6ET, and his becoming his QSL Manager. George has now ordered the QSL cards and expects them in 4-5 weeks. Bob is loading all his QSOs into a logging program which they hope to soon transfer to George. Also, Bob has been without high power on the low bands - particularly 160 meters. A small group in Battle Creek (ala the "Battle Creek Special" guys) are in the process of shipping an amp to XQ6ET. In addition, to the cost of the amp, they will have air freight expense to Chile and will have about 600 USD total into the project when Bob receives the amp. So, if you would like to help out in the cost, any donations are accepted no matter what the amount is with or without QSL requests, to help fund the amp for XQ6ET. W8UVZ would be glad to receive your donations and confirm good QSOs with XQ6ET.

XY1M QSL STATUS. OPDX was asked to find out if anyone has received their QSL cards for Hiroo's operation in Myanmar last November. If you received one let us know.

Wayne Carroll, W4MPY, wants it to be known that he will furnish QSLs at no charge to Military personnel deployed to Kuwait and Iraq if the quantities are reasonable and there is a stateside shipping address. Wayne states, "I feel they have sacrificed a lot for all of us and that is the least I can do to say THANK YOU!"

Z32AF NEW QSL MANAGER. Please note Arthur, N8RKA, is the new QSL Manager for Venci, Z32AF. His address is: Arthur Barbetta,

2395 Liberty Rd, Stow OH 44224, USA. E-mail: n8rka@yahoo.com

RL1, RUSSIA (Special Prefix). Radio amateurs from Sankt Petersburg, Russia, are celebrating the 300th anniverary of their city. Look for 21 stations to be on the air from Sankt Petersburg now through May 31st.
R300SP via RU1AE (RZ1AWT) RL1N via RA1ABC
RL1A via RA1AG RL1O via RZ1AWO
RL1B via RU1AB RL1P via RZ1AP
RL1C via RV1CC RL1Q via RV1AQ
RL1D via OH5ZZ (UA1DJ) RL1R via RA1ALA
RL1F via RU1AS RL1S via UA1AES
RL1G via RA1AR RL1T via RX1CQ
RL1J via RZ1AWF RL1U via RA1AOL
RL1K via UA9KG/1 RL1W via RW1AI
RL1L via RZ1AYA RL1X via RX1AX
RL1M via UA1ANA

S9, SAO TOME AND PRINCIPE. Duarte, CT1CPP, is now active as S92UN. He is now active on 12/15/17/40 meters with dipole antennas. Watch around 7067-7074, 14260-14270, 18126-18130 and 21260-21270 kHz starting around 2100z. Duarte asks to please be patient with his answering of the QSL cards, because he can only answer them when he returns to Portugal. QSL via CT1CPP (QRZ.com): Antonio Duarte Prates Bebiano, Estrada dos 4 Marcos No. 17, Sarilhos Grandes, 2870 Montijo, Portugal. Duarte is expected to be here for about 3 months.

SOMETHING OF INTEREST ON THE WEB. There was a story on NPR's "Talk of the Nation" on April 30th about Ham Radio. Visit the following Web page at: http://discover.npr.org/rundowns/segment.jhtml?wfId=3D1248508

SPECIAL EVENT. Special event station HF25KVW is active until July 31st in commemoration of the 25th anniversary of the SP5KVW Radio Club in Ostroleka. QSL via SP5KVW, either via the bureau or direct to: Radioklub SP5KVW, P.O. Box 56, 07-410 Ostroleka, Poland. Their Web page is at: http://www.sp5kvw.prv.pl/

SPECIAL EVENT. For the next 2003 French Mills Day, on June 15th, look for Andre, F5PEZ, to be active using the callsign TM1JNM. Activity will be on the HF bands, mainly SSB. QSL via Andre, F5PEZ, either direct or via the French Bureau.

SPECIAL EVENT. The year 2003 is the European Disabled Persons Year. Look for operators Domi/F5PTI, Alain/F6ANA and Joel/F8DCZ are now active using the special callsign TM5I until May 17th. On May 18th, they will use the same special callsign TM5I, for the 2nd European Castles Day, from the Oisellerie Castle (JN05BN). Look for them on CW/SSB, 80-10 meters and on 2 meters (144.316 MHz). QSL via F5PTI, either direct or via the French REF Bureau.

SPECIAL EVENT. Look for the special event callsign VC3RCS to be active between June 1-30th to celebrate the 100th anniversary of the formation of the Royal Canadian Signals Corps. QSL via the operator's instructions.

SPECIAL EVENT. The special callsign W2H continues to be active until May 15th. Activity is for the anniversary of the crash of the Airship Hindenburg. This is the 66th anniversary. Operations, hopefully, will take place each year using the same callsign. They plan to be active on as many bands as possible. QSL only direct to W2CE (no bureau cards).

TA, TURKEY. Andy, G3AB (ex-G4ZVJ), will be active as TA3/G3AB in the CQ WPX CW Contest as a Single-Op (possibly Single Band) entry. QSL via G3AB.

TO5, MARTINIQUE. Jack, RW3QC, will be active as TO5AA, in the CQWW WPX CW Contest (May 24-25th) as an All Band/High Power entry. Activity will be from FM5BH's QTH. The QSL Manager has not been chosen yet.

V63, MICRONESIA. Operators Funaki/JA7ZP, Takao/JA7AGO and Sho/VA7HMZ will be active from Pohnpei (OC-010) May 12-15th as V63ZP, V63GO and V63DX respectively. Activity will be on 40-10 meters CW/SSB. QSL via their home callsign (Bureau OK).

VI8, AUSTRALIA (Special Event). The Darwin Amateur Radio Club of the Northern Territory, Australia, will be operating a special event station with the callsign of -- VI8NT -- to celebrate 25 years of self government. The station will be opened officially on the 1st of July 2003 (Northern Territory Day) and run until the 31st December 2003. This special Amateur Radio callsign -- VI8NT -- is allowed to be used by any licenced VK8 Amateur. Only one Amateur will hold the callsign at any one time, meaning only one station on air at a time. They have many VK8's who are interested in operating one week periods on all bands and modes and the Darwin Amateur Radio Club will partake in all major contests with this special callsign. A special QSL card is being made up by the QSL Manager Neil, VK6NE. All QSLs will be accepted directly or via the Bureau.

VP2, MONTSERRAT. Three members of the Florida DXpedition Group are on the "Road Again"! Operators Bill W4WX/VP2MHX, William/N2WB and Bob/K9MDO (both waiting on VP2M callsign) will be here July 22-29th. They will have three Kenwood TS-570D stations and will be active on most bands and modes. This is a "Little warm up for the upcoming San Andres trip in October". QSL via their homecalls, CBA. N2WB via QSL Manager N2OO.

VP9, BERMUDA. Merv, N6NO, will be active as N6NO/VP9 from May 14-21st. His activity will be on 80-10 meters, possibly 160, with a 100w and a focus on CW. His operating times will favor the difficult Asia/Oceania path. QSL via N6NO.

VQ9, CHAGOS ISLAND. Larry, VQ9LA, has been very active on 20 meters RTTY. Watch around 14083-14090 kHz beginning around 2200z. Larry will be there for about year.

XU, CAMBODIA. Jaak, ES1FB, informs OPDX that he will once again return to Shianoukville, and operate as XU7ACE for about 10 days starting May 11th. Activity will be on 40-6 meters, mostly SSB. He plans to activate IOTA AS-133 on May 17-18th, but this depends on the weather condition (It is the rainy season now...). QSL via his home callsign, ES1FB, either by the CBA or by the bureau (but this will take more time). ADDED NOTE:

Previous XU7ACE bureau cards are answered about 70%, direct cards on
a weekly basis..

XW, LAOS. Champ, E21EIC, will be back in Laos around June 3-23rd and will
be active as XW1IC. His activity will be on 160-10 meters, including the
WARC bands using only 100 watts. He states the modes he will use are
CW/SSB/RTTY and 2 meter FM (Maybe 6 meters if possible). Champ will also
be active in the All Asian DX Contest as a Single-Op/All Band/Low Power
entry. QSL via E21EIC.

YO, ROMANIA (ed. I don't mean YAO!). Jean-Michel, F6AJA, will once again
be YO/F6AJA (10th year consecutively) from Suceava (450Km north of Bucarest)
from May 19-28th. He will be on the air when time permit from the Silviu
station YO8FZ.

YV4, VENEZUELA. Dario, YV4GMG, in Santa Cruz, informs OPDX that he is active
on 160 meters and 6 meters (on 50110 kHz), as well as 20/15/10 meters. On
HF, he can also be active on PSK31/SSTV/RTTY/MMT63/AMTOR. QSL via his home
callsign. Also, active from the same station is Hector/YV4GMH and
Maria/YV4GMB.

Z38, MACEDONIA. Lothar/DJ7ZG and Babs/DL7AFS will once again be on tour.
This time they will be active from here using the callsign Z38Z. They
hope to be active starting on May 15th for about 10 days. Activity will
be on 160-6 meters, mainly on RTTY, PSK and SSB. They will travel through
the country to reach Z3-land. They ask you to cross your fingers that
the ride will be without problems. Lot informs/states to OPDX, "Due to
the request of many Hams from America and Japan we want to work these
countries particularly." QSL via DL7AFS. Their homepage and online
log will be at: http://www.qsl.net/dl7afs

ZF, CAYMAN ISLANDS. The team of John/K6AM, Ned/AA7A, Lee/KY7M and Bud/N7CW
will activate ZF1A (IOTA NA-016) in the 2003 CW WPX Contest. This will be
a multi-single operation with limited operation before and after the
contest. Please QSL via W5ASP.

2851. Re: Don't buy a Toyota if you want to install a radio transceiver

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-11 20:59:13 UTC
From: Dave Shrader <david.shrader@attbi.com>
Message-ID: <3EBEB94B.6000704@attbi.com>
Source record: 67544
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc

I've responded to Travis Jordan's post by inserting comments into the Toyota response. I don't see any problems assuming a good engineering installation. My comments are based on Engineering management principles, good installation practice, and commercially available transceivers.

If the reader still has reservations [s]he is advised to review Toyota's response with a contract attorney.

Deacon Dave, W1MCE

> Vehicle electronic components could be damaged, and/or the proper and safe operation
> of the vehicle might be compromised if, for example, any of the following situations
> (and potentially others) existed:
>
> The transceiver is not "type-accepted."

COMMENT: ICOM, Yaesu, Kenwood, Alinco, etc. are ALL type accepted. So,
NO PROBLEM here.

>
> The power and/or antenna cables radiate RF current

COMMENT: Power in Twisted #12 AWG from battery is suitable and ferrites
on coax should deal with this 'concern'. A proper installation is
required. So, NO PROBLEM here.

>
> Routing of the power and/or antenna cables results in inductive or capacitive
> coupling

COMMENT: A proper installation is required. So, NO PROBLEM here.

>
> Transmitter, feedline and/or antenna inefficiencies result in an unacceptable level
> of RF radiation exposure to the ECM's

COMMENT: This puts burden an manufacturer to define what is acceptable
level of RF Exposure [field intensity as a function of frequency, AKA a
susceptibility plot] as a function of frequency. This is a hole big
enough to drive 10 KW through!!

>
> The standing wave ratio is unacceptably high

COMMENT: High VSWR does not contribute to radiated field intensity or to
stray currents. This requires a burden of proof on the manufacturer to
prove the assertion.

>
> The antenna ground plane is inadequate

COMMENT: With today's plastic cars this may be a point to address. I ran
100 watts on HF in a Plastic Saturn SL-1 with adequate ground plane. The
trunk hood was bonded to the frame with multiple 1 inch wide straps.
This is a red herring issue. Good installation will eliminate this concern.

>
> Installation of a 2-way radio in Toyota vehicles should not present issues under the
> following conditions:
>
> The transceiver must be type-accepted by the FCC, and not modified in any way

COMMENT: AGREE

>
> Maximum output power complies with FCC regulations (100 watts)

COMMENT: DISAGREE. MAXIMUM POWER OUTPUT IS 1000 WATTS IAW FCC REGULATIONS.

Note: In the preparation of contract language the party composing the
language is responsible for accuracy in requirements, errors, possible
multiple interpretations, misinterpretations, or any interpretation that
favors the non-composing party. This claim is not binding due to errors
of fact.

>
> All installation and operating instructions provided by Toyota and the equipment
> manufacturer must be followed closely

COMMENT: FINE. Ask Toyota to provide installation instructions for all
past, present and future 2 way radios. I'm sure they will love doing
that! <grin>. They made the assertion so they are bound to provide the
instructions!

>
> The antenna must be installed as far away as possible from all vehicle electronic
> control modules (ECM) or other onboard computer/sensors

COMMENT: REASONABLE.

>
> The antenna cabling must be routed no closer than 20 cm (7-7/8 inches) to any ECM or
> other onboard computers/sensors
>
COMMENT: REASONABLE. Since ECM components are generally mounted in or
around the engine/exhaust subsystems and antennas are typically mounted
at or near the rear of the vehicle this should be a non issue.

> Antenna and power cabling must not be routed along side or in conjunction with the
> vehicle's wire harness

COMMENT: REASONABLE

>
> It is always preferable to cross vehicle harness at right angles when possible
>
COMMENT: REASONABLE

> Antenna and antenna cabling should be properly adjusted to obtain the lowest
> possible SWR (standing wave radio)
>
RED HERRING. BUT GOOD INSTALLATION PRACTICE ANYWAY.

> Disclaimer: The basic installation guidelines provided may be of assistance to you.
> Although they may not fully answer all your specific requests, Toyota must take
> reasonable precautions to limit our potential legal liability, because the full
> range of possible variables noted earlier could never be fully anticipated. Also,
> more detailed information that would provide the operational details of Toyota's
> electronic system is considered proprietary.

> It must be emphasized that, under the terms of Toyota's new vehicle warranty, damage
> caused by RF energy from a higher power mobile radio is specifically excluded from
> coverage because it is not the result of faulty materials or workmanship.
> Accordingly, the owner assumes all such responsibility.

COMMENT: THERE MAY BE DESIGN/WORKMANSHIP ISSUES IN THAT EM
SUSCEPTIBILITY HAS NOT BEEN ADEQUATELY ADDRESSED IN THE DESIGN PHASE.

>
> We recommend that you contact your local Toyota dealership for any additional
> clarification regarding the installation process that you may need.
>
>
>

CONCLUSION

I don't see anything that prohibits the proper installation of a typical
HF/VHF/UHF commercial radio in Toyota vehicles.

If you have further concerns take the Toyota text and ARRL Mobile Radio
booklet to your attorney for an opinion.

RESCUE RADIO: TORNADOES SWEEP THE NATIONS MID-REGION

Ham radio has again come to the aid of America. This time as a series of killer tornadoes rip across the Central and South-Eastern states. We have the details in this report:

--
Blackouts, water shortages and desperate searches for the missing. This is the situation confronting tornado battered residents of the central United States as the death toll rises to 40 from the most violent weather in four years.

Beginning on Sunday the 4th and continuing through most of the week, swarms of violent thunderstorms and tornadoes crashed through the United States midsection. They caused devastation in three states and are spawning problems in several others.

Kansas, Missouri and Tennessee suffered the worst damage in the initial Sunday onslaught. Kansas listed seven people killed, Missouri had seventeen fatalities and Tennessee sixteen. The storms also disrupted electrical power and telephone service with debris from fallen structures blocking roads in some areas.

One of the hardest hit areas was Madison County, Tennessee where ten people were killed. There, power blackouts were widespread and it was not known when telephone service can be restored. Several of the regions A-R-E-S groups were reported activated as was the Missouri Traffic Net operating near 3 point 960 MHz in the 75 meter band.

In Missouri, ARRL Section Emergency Coordinator, Don Moore, K-M-Zero-R, reports that amateur operators are continuing damage assessment duties. An ARRL bulletin says that the Amateur Radio Emergency Service, Radio Amateur Civil Emergency Service and SKYWARN groups were active across the affected area. Hams are also assisting the American Red Cross and Salvation Army relief operations.

A bit to the West, in Kansas, Section Manager Ron Cowan, K-B-Zero-D-T-I, says that one tornado touched down in Leavenworth County. It remained on the ground before crossing the border into Missouri. There the storm brought havoc to Platte and Clay counties before falling apart just North-East of Kansas City. But during its trek, Wyandotte and Leavenworth Counties sustained severe damage. Cowan says that homes were destroyed and utilities knocked out along the twisters path.

The tornadoes were believed to be a part of a huge weather system that rolled across the Midwest and parts of the South. It also spawned twisters in Arkansas, South Dakota and Nebraska. Storms on Tuesday and Wednesday accounted for funnel cloud sightings in Alabama, Illinois and here in Louisiana. In all, nine states are affected and the National Weather Service credited ham radio operators with dozens of storm related reports over the weekend and they are continuing into the week.

As we go to air, hundreds of people are still being housed in temporary shelters where Amateur Radio volunteers have become an important ingredient in relief efforts.

This is obviously an ongoing story and we will have an update in next week's Amateur Radio Newsline report.

From New Orleans, Louisiana, I'm Don Wilbanks, AE5DW.

Jim.

--

Thanks Don. (ARNewsline™ from various sources including ARRL bulletins)

RESCUE RADIO: TORNADO DESTROYS K0ETC BEACON

There is an ironic side to this story directly affecting ham radio. The K0ETC beacon North of Joplin Missouri in grid square EM27 was aparently destroyed when one of the twisters blew down the building housing it. An Internet posting by the beacons owner Jay Rupar, K0ETC, shortly after the incident said that there were no injuries at the former beacon site but two people were killed by the same storm about 30 miles away. Rupar says that the present location of the beacon itself is unknown but that it will be replaced. (KC6WFS/7)

HAM RADIO HEROES: NOAA HONORS "ALERT" VOLUNTEERS

The National Oceanic and Atmospheric Administration has selected ALERT -- the Alabama Emergency Response Team to receive one of this years NOAA Environmental Hero Awards. This award recognizes ALERT for its outstanding efforts in support of the NOAA National Weather Service Forecast Office in Birmingham.

NOAA says that under the leadership of ALERT president Chuck Arthur, KF4SSX, team members have spent hundreds of hours using ham radio to coordinate storm reports throughout the Birminham office's warning area. The agency goes on

to say that over the years they have proven to be an invaluable resource during such major events as an F 4 tornado that struck Tuscaloolsa County on December 16th of 2000 and the tornado outbreak of November 24th 2001.

NOAA took special note of ALERT's work following last years Veterans Day severe weather outbreak that included to F 3 catagory tornados that killed 12 people. NOAA says that the ALERT volunteers stayed with their Amateur Radio stations relaying critical storm reports to meteorologists and relaying storm information to Emergency Manasers across the central and northern tiers of the state. NOAA says thart the steady flow of reports were crucial to the issuance of new warnings and the office's ability to quickly get the word out to the publiic.

Presented in in conjunction with Earth Day celebrations, the award honors NOAA volunteers for their tireless efforts to preserve and protect our nation's environment. It was presentede to ALERT on Satyrday, May 3rd. More on ALERT is on the web at www.alert-alabama.org. (NOAA)

**

THE VEC SYSTYEM: A PROBABLE E-FILING LICENSING RECORD SET

Before a ham can respond to an emergency, he or she first has to become licensed. And a Wisconsin college may have set a new Amateur Radio record in that area. Would you believe 81 new hams in less than 24 hours? Well its true and Amateur Radio Newsline's Roy Neal, K6DUE, is here with the rest of the story:

--

It happened in Wisconsin. Picture this. 81 students sat for and passed their amateur radio tech class license exams in one day. What's more, they received their license grants within 24 hours! This became the largest test session ever to employ the new technique of on-line submission of test results and applicant data to the FCC. They are the students of Dr. John Weiss, WD8KLO of U W Stouts' College of Technology, Engineering and Management

Weiss gave his students the option of earning their radio licenses in partial fulfillment of class requirements. The examination team was coordinated by John Burningham, WB8PUF, of UW-Stout's communication, Education and Training Department. It included Weiss; Jon Fuller, W9JHF, Student Life Services; and UW-Stout students Andy Wagner, KB9TAC and Scott Littfin, N0EDV.

The University of Wisconsin-Stout has a reputation for firsts. In 2001, the college, which is located in Menomonie, became the first to receive the prestigious Malcolm Baldrige National Quality Award. It was presented by none other than President George W. Bush.

The rapid license grants were made possible by using newly available VE-to-VEC-to-FCC electronic submission technology developed by the W5YI Volunteer Examination Coordinator. Using password-protected electronic forms posted to the W5YI VEC website, John Burningham, WB8PUF began keying in the test results right after the exam session.

All 81 applications were waiting at the VEC Office when it opened the following morning. After routine screening, the applications were electronically retransmitted to the FCC. Within an hour, the FCC issued the licenses and call signs. These were immediately forwarded over the Internet to Burningham who informed the waiting students of the new calls while at the same time probably setting a new electronic licensing record for ham radio in the United States. 81 new hams in one day at one licensing location.

Go Wisconsin Stout!

For the Amateur Radio Newsline, Roy Neal, K6DUE.

--

Weiss is an Associate Professor at UW-Stout specializing in advanced telecommunications technology. Additional information on the school's telecommunication systems program is available on the web at http://tcs.uwstout.edu. (W5YI)

HAMVENTION 2003®: FCC TO BE A NO-SHOW

Don't look for any major ham radio regulatory announcements at next weeks Dayton Hamvention. That's because the agency will not be there. David Black, KB4KCH, reports from Amateur Radio Newsline's South-East Bureau on the what and the why:

--

Hamvention producer Garry Matthews, K-B-8-G-O-L says conflicting commitments will keep regular FCC presenters Riley Hollingsworth, K4ZDH, and Bill Cross, W3TN from attending. Matthews says the Hamvention tried to find suitable replacements, but none were available.

Speculation suggested that FCC officials might use the Hamvention's Forum to release news of a so-called omnibus Amateur Radio Notice of Proposed Rule Making expected out in May. The notice would consist primarily of outstanding rules change requests and pending petitions for reconsideration. With the Dayton FCC forum canceled, what venue, if any, the Commission might use for its release is not clear.

And what about the two hours on Saturday morning May 17th the FCC was supposed to fill? Matthews says it's being offered to other session leaders who might not like their current time slots and want to change. He says the FCC hould be back in 2004 with Hollingsworth, Cross and perhaps others representing the

Commission.

From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH.

--

We will have more Hamvention 2003® happenings later on in this weeks Amateur Radio Newsline report. (ARNewsline™)

**

RADIO RULES: FCC TAKING COMMENTS ON PLC NOI

And speaking about the FCC, e have a follow up on last weeks story about the agency releasing its Notice of Inquiry on the deployment of ''Broadband over Power Line'' or B-P-L technology. Now comes word that the complete Notice of Inquirey which was released on April 28th is available on the FCC Web site. Also that the FCC now is accepting electronically filed comments via its Electronic Comment Filing System ECFS Express page.

But what about the actual affect of B-P-L on ham radio. An ARRL Bulletin, explains that ''Broadband over Power Line'' is really a form of carrier-current communication better known around the world as power line carrier or P-L-C.

B-P-L would couple high-frequency RF to parts of the power grid and use existing power lines as the transmission medium to deliver broadband and Internet access. This is the same technology refused for use in Japan becuse tests showed signifigant interference to consumer electronic products including Amateur Radio on the high frequency bands. And in the Notice of Inquirey the FCC does acknowledge the signifigant interference risk from B-P-L.

ARRL Lab Manager and RFI-guru Ed Hare, W1RFI, also has concerns. A noted expert in the field, Hare cautions that deployment of B-P-L could affect every amateur in communities where it's employed. This, by causing a significant increase in noise levels. Obviously, this is one isssue that a lot of hams will be filing comments on with the FCC. (ARRL)

**

ENFORCEMENT: UNAUTHORIZED OPERATION BRINGS $5000 FINE

The FCC has issued a $5000 fine to Blue Ridge Erectors, Inc. of Bangor Pennsylvania. This, for operating radio transmitting equipment on 467.250 MHz without Commission authorization.

According to the FCC, back on August 27, 2002, the agency’s New York Field Office issued the forfeiture notice to Blue Ridge but the company has not filed a response to the N-A-L. After waiting almost three-quarters of a year the FCC has affirmed the fine and has ordered Blue Ridge Erectors to pay the $5000 within 30 days of the release of its Order.

For more information on this one take your web browser over to the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1366A1 (FCC)

**

ENFORCEMENT: FCC ALLEGES MICHIGAN HAM ENGAGED IN DELIBERATE INTERFERENCE, THREATS

The FCC claims that a ham has engaged in deliberate interference, broadcasting and that he threatened other amateurs. And now the agency is sending Michael Guernsey Sr, ND8V, of Parchment Michigan a tape recording to back up those assertions. Amateur Radio Newsline's Blair Alper, KA9SEQ, has the details:

--

According to the ARRL Letter, since late 1998, Michael Guernsey, Sr., N-D-8-V, has been the recipient of seven letters from FCC Special Counsel Riley Hollingsworth. This includes two warning notices. And in 2000, the FCC threatened to designate Guernsey's license for a revocation and suspension hearing. Guernsey subsequently agreed to a nine-month suspension of his High Frequency operating privileges in 2001.

But on April 7th of this year Hollingsworth again wrote to Guernsey. This time Hollingsworth said that the operation of Guernsey's station over the last several years raises questions about the Michigan hams' qualifications to remain a Commission licensee.

According to Hollingsworth, this time there is audio to support the claims. The recorded transmissions were made this past March 26th, and are said to back up complaints from other amateurs of deliberate interference on 20 meters. In his letter, Hollingsworth noted that some of the interference apparently sprang from on-the-air personal disputes or from what Guernsey perceived as deliberate interference to his transmissions. Even so, Hollingsworth said, Guernsey has apparently ignored the Commission's written and verbal warnings to not retaliate with similar behavior.

Hollingsworth advised Guernsey that the alleged deliberate retaliatory threats and transmissions on top of other QSOs are contrary to FCC rules. He also stated this indicates that the numerous warnings issued to date have little, if any, effect in regarding to bringing Guernsey's operation into compliance with Commission rules, indicating that other, harsher enforcement action may be needed.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ, reporting.

--

Hollingsworth told Guernsey review the tape recording and respond in writing and in detail within 20 days of reciept of its reciept. He said the FCC will use the information Guernsey submits to decide whether to designate ND8V's license for a suspension and revocation proceeding or to lift voice privileges from Guernsey's license for the remainder of his license term, which ends in 2012. (ARRL, FCC)

HAMVENTION 2003®: MEET THE MAN BEHIND QRZ.COM

Want to meet the man who makes possible the famed QRZ.COM website? If you're going to the Dayton Hamvention this year, be sure and make it a point to stop

by the W5YI booth in the main building and say hello to Fred Lloyd, AA7BQ, the founder of QRZ.COM. Fred says that he will be there throughout the show and will have some nice QRZ.COM name badge souvineers to hand out to everyone who stops by along with the latest QRZ Ham Radio CD-ROM at a special show price. (QRZ.COM)

**

HAMVENTION 2003®: THE DX HOSPITALITY SUITE

The Northern Ohio DX Association and WVNO Radio will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. The suite will be open on Friday and Saturday evenings in Suite 1011 of the Crowne Plaza Hotel. The Crown Plaza is the old Stouffers located in downtown Dayton.

And in a tribute to one of the areas best known hams, the association is dedicating this year's Hospitality Suite to "Silent Key" Jim Hire, W8ZET, who was a Northern Ohio DX Association Honorary Life Member.

Hire’s wife, Janeen, KC8BRS, has decided to keep the tradition going. She will be providing some special memorabilia of Jim at the Hospitality Suite. (NODXA)

**

HAMVENTION 2003®: RAIN - NEWSLINE BOOTH

And by the way, if you are one of those planning to attend Hamvention 2003, please be sure to pass by the RAIN, Newsline and WA0RCR combined booth to say hello. Its in the Silver Arena area of the HARA Arena complex in space number 358. We hope to see you there. (ARNewsline™)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org heard on the W7SP repeater in Salt Lake City Utah and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: ED JUGE, W5EJ, - S.K.

Some sad news to report. Word thar well-known amateur Ed Juge, W5EJ, has passed away.

Aaccording to longtime friend and colleague Bob Miller, K2RM, Juge, the former W5TOO, was an executive at RadioShack for many years and one of the people who kept ham radio on the company's radar. Outside the world of ham radio, W5EJ was a well-known and well-respected figure in the computer industry.

Ed Juge also had served on the ARRL No-Code committee in the late 1980s, chaired the ARRL Digital Committee in 1992 and was particularly active in QRP. He is survived by his wife, Jo, KA5ABC, by two children and three grandchildren. (CQ)

**

EMERGING TECHNOLOGY: COGNITIVE RADIO - IT LIVES

Believe it or not there a movement underway at the FCC to increase spectrum efficiency through the use of a new technology being called cognitive radio.

What is cognative radio you ask? This is radio gear and antenna systems that could adapt to their operating environments by automatically identifying vacant spectrum, switching to that spectrum and carrying out a specific communications mission.

Cognitive radio will also be the subject of an upcoming workshop at FCC headquarters. More information is at the http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-233615A1.doc (CGC)

**

ON THE WEB: HOW STUFF WORKS

Want to find out how something works? Try taking your web browser over to www.howstuffworks.com. The site is a wealth of information on just about anything in life including ham radio. In fact, if you want a good laymens explanation of our hobby, the direct U-R-L is http://electronics.howstuffworks.com/ham-radio.htm (AE5DW)

**

SPECIAL EVENT: AMATEUR CROSS BAND COMMUNICATIONS TEST

Iin celebration of the 54th anniversary of Armed Forces Day, the United States Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military and Amateur Radio Communication Test for 2003. These tests provide hams and short wave listeners an opportunity to demonstrate their individual technical skills while receiving recognition from the Secretary of Defense along with the appropriate military radio stations.

According to an Internet post by N6DDF, although the actual armed Forces Day is celebrated on Saturday, May 17th the crossband communications test was to be conducted one week earlier on May 10th. This, so that it would not conflict with the Dayton Hamvention

QSL cards will be provided to those stations who made contact with the military stations. Also, a special commemorative certificate will be awarded to anyone who receives and copies the digital message from the Secretary of Defense. (Via Internet)

**

DX

In D-X, members of the Clube Radioamadores do Entroncamento will use the special callsign, CS7AL, and will be active May 31st from Castel Alcanede for the Portuguese Castles Award. Operation will be on 40 and 20 meter SSB. Castel Alcanede is located in the Province of Ribatejo. QSL via CT1BXE, direct or via the bureau. (OPDX)

Also look for W2AZK and KF2HC from the North Jersey DX Association portable on St.Croix from June 12th to the 19th. Operation will be SSB and CW on 160 through 10 meters. QSL direct or via the bureau to the call worked. Confirmed QSOs are good towards the North Jersey D-X Association award. See www.njdxa.org for details. (OPDX)

**

THAT FINAL ITEM: ROYAL HONORS

And finally this week, a radio amateur has received royal honors in the Netherlands. Hans van de Groenendaal, ZS6AKV, of the SARL news service has the story of Lou van de Nadort PA0LOU:

--

Lou van de Nadort PA0LOU, retired Chairman of the International Amateur Radio Union Region 1 was recognised by Queen Beatrix of the Netherlands for his outstanding contribution to Amateur Radio. He was decorated with Member of the “Order of Oranje Nassau”.

Lou was one of the 3594 people who were recognised this year by the queen when the Royal Recognition awards were announced on April 30, in Holland known as “Koningine dag”, the queens birthday .

Lou van de Nadort retired from the IARU Region 1 Executive in October last year after having been almost 28 years at the helm of the organisation. In his farewell editorial in Region 1 News he called it retirement from active duty and wrote “I will always have IARU and its work at heart and will continue to support the cause"

The medal was presented to Lou at his home in Zundert in Holland when the Major and a delegation of civics and members of the VERON Council arrived there on April 30. Lou said it took my totally by surprise, I never expected it.

Hans van de Groenendaal ZS6AKV

--

ZS6AKV adds that the award is an acknowledgement for PA0LOU’s outstanding contribution to the community. (SARL News Service)

Good deal..with the propagation these days you need to hang some sort of
external wire on it. Just a random wire running around the room would help.
But better outside of course.

The frequency suggestions are valid. Have fun.

Sangean ATS-803 clone. Same mods work. Do the anti-chuffing mod.
Not the most sensitive radio. String up some wire. It helps.

Coax mantle currents caused by high VSWR?

Obviously something controversial ....

I own a Toyota too.
The best car you can get for money.
Not a single repair necessary for 7 (seven) years now.

HF equipment restrictions apply for ALL car manufacturers,
read the small print.

Helmut, High VSWR is not a problem of circulating or coupled currents.
That's a simple fact.

My center fed doublet on 75 meters has a VSWR of more than 30:1 with
negligible currents on the feed system. [open wire feeders and a tuner].

Dead battery behind front panel. Replacement is not
for the meek. It's not a level one kit job. <:
If in doubt, seek a more skilled person.

I had a 1989 Camry, it was no doubt the best car I ever owned. The
engine ran like a wrist watch, you could put a cup of coffee on top of
the running engine and barely see a ripple and get this, I bought it
used from Hertz with 27000 miles already on it and after a couple of
years of ownership and a thousands more miles on it I noticed a little
paint peeling off on the passenger door. Someone told me to take it to
a Toyota dealer and have them look at it so I did and they fixed it
..... no charge. I almost fell over.

After all is said and done, when I get ready to buy and if I decide on a
model I would not let that legal disclaimer stop me from installing a
radio in MY car just as I have done in my 94 Dodge Caravan and have had
no problems.

Can any one help with the software for the ICOM IC-F20 F3,
Can reciprocate with software for the IC-40s , IC -f4s or IC-R2
even a working link would be much appreciated.

Announcing the 2003 NECG Baltic Sea VHF/UHF expedition

Hello fellows,

after enjoying our grid square expedition as LY2AAM and SO4TEC last year we decided to do another trip to make as many of you as possible lucky once again. ;-)

As all planning is finished, ferries are booked, Baltic friends informed, etc. it'
s now time to let you know some more details.

From 25 May '03 till 6 June '03 we will be activating quite some rare water squares in the Baltic Sea as well as some of the Most Wanteds on the Baltic mainland. The group will consist of DF2EA (Ernst), DH8BQA (Olli), DL1EJA (Oliver),
DL3BQA (Uwe), DL5UH (Moritz) and DL5YYM (Guenter). All are experienced contest operators and VHF freaks.

Our main interest will be operating HSCW-MS, WSJT, EME, Tropo and hopefully some
Aurora and Sporadic-E on 50 through 432 MHz besides enjoying the holiday and beautiful landscape overthere.

Used callsigns will be HC/mm on the water (JO75, 85, 95, etc.), YL1A (KO07) and LY2AAM (KO06). Besides this we will try to do some side trips to KO05 and/or KO16
using LY/HC/p then.

The used equipment will consist of good power amps as well as gainy antennas so be
aware that the big signal on the band is not your neighbour but rather seldom DX.
;-)))

Operating frequencies used:

50.183 MHz (all modes)

144.183 MHz (HSCW), 144.283 MHz (TROPO, ES), 144.383 MHz (WSJT)

432.183 MHz (all modes)

By now this year's expedition time table looks as follows:

24.05.03: starting from Rostock (JO64) in the evening - permission to do VHF from
the ferry

25.05.03: QRV from the ferry passing JO75, 85, 95, KO06 and maybe surrounding squares as well

25.05.03: arrival in Liepaja (YL) late evening then travelling into KO07 and settle down

26.05.03: KO07 building up all equipment, hope to be QRV early noon

27.05.03: participating in 50 MHz NAC / LYAC

27.05.03 + 28.05.03: KO07 QRV all time all modes

29.05.03: travel down to KO06 in LY and set all up

30.05.03 - 04.06.03: KO06 QRV all time all modes

30.05.03 - 04.06.03: side trips to KO05 and/or KO16 planned

03.06.03: participating in 144 MHz NAC / LYAC, maybe two stations from two squares
(side trips)

05.06.03: take all down and go back to Liepaja (YL) to catch the ferry (maybe QRV
again for some hours from YL -KO06)

06.06.03: QRV from the ferry again passing JO95, 85, 75, etc.

07.06.03: reaching Rostock (JO64) and travelling back to JO73 to participate in the Microwave contest signing DF0TEC/P as usual.

Please do NOT send any sked requests, we will operate random only. We may be reachable on GSM phone over there. To be sure there's coverage to be reached we will spread the telephone number when over there and finally logged in to the local GSM network. If this works we might also have internet access from over there so will try to keep you informed about any news through the mailing lists,
DX cluster and our website at http://www.necg.de.

Please do NOT call us on any known German GSM number from any of the crew members,
thanks.

There will be one QSL route for all calls. So please send your card for ALL HC/mm,
LY/HC/p, YL/HC/p, YL1A and LY2AAM to: DH8BQA, either via buro (preferred) or direct to: Olli Droese, Auguststrasse 12, D-16303 Schwedt, GERMANY.

For any further questions, donations or sponsoring (very welcome) please contact
us by e-mail at: dl3bqa@necg.de

Hope to hear YOU during the expedition!

73's de DF2EA, DH8BQA, DL1EJA, DL3BQA, DL5UH, DL5YYM

Sounds more like the local agents incompetence rather than the fcc as
a whole. They don't seem to have as much trouble here. We had a couple
of squirrels jamming a repeater here, and they did it from mobiles.
The fcc sure had no trouble locating them. They came up and tapped on
his window while he was talking sitting in a parking lot. I wasn't
there, but I wouldn't be surprised if he made a mess on his seats.
They also had no trouble tracking an "11m freebander" friend of mine.
Didn't take them long at all. I know "myself", I wouldn't have any
trouble tracking these people. If I can do it, the fcc should be able
to do it better. Being the air bands are VHF, and line of sight, if
they couldn't find that guy, they need to go back to "tracking
school". That should have been a piece of cake, as the other agency
apparently showed them. I would have been embarrassed too...:/

And your "story" sounds like wishful thinking on your part,
a fairy tale. It doesn't take much to see how you deliberately
left out any verifiable details. 11m freebander? Yeah right,
like they're going to waste their time. Ditto with amateur
repeaters, they don't waste their time. Post proof. How
about a news release reference for starters. And where did
all this supposedly happen? Nice try, but your "story" is
just a truck load of Bullshit.

Henry

I thought it sounded like bullshit too. The FCC is so undermanned they don't
have time to wipe thier own asses.....pretty much like all the government
agencies that W and Rummy don't favor.

Q: What is your policy on cross-posting? (REVISED 12/3/2001)

A: Cross-posting ability is not to be used by customers for the purpose of
"cascading", "flaming", or "trolling". We may disable the cross-posting
ability of a customer if we believe they are cross-posting with one or more
of these purposes

Oh but they do go after repeater interference.

March 24, 2003

Mr. Anthony L. Basile
RD 2 Box 164C
Cherrytree, PA 15724

RE: Warning Notice: Amateur Radio license N3HFB
Case #EB-2003-566

Dear Mr. Basile:

Monitoring information before the Commission indicates that you have been deliberately interfering with the N3HAO (147.39 MHz), KE3DR (146.655 MHz) and N3QC (146.865 MHz) repeater systems in your area. The interference has consisted, among other things, of keying the repeater repeatedly without communications.

Continued incidents of such interference to the above repeaters, or to any other Amateur communications, will subject you to revocation and suspension proceedings, as well as a monetary forfeiture. Fines normally range from $7,500 to $10,000.

We note that your license is due for renewal in September 2003. Until this matter is resolved, your license will not be routinely renewed.

Please call me at 717-338-2502 if you have any questions about this matter.

CC: Northeast Regional Director, FCC

And are going after any unlicensed operation in the Ten Meter Amateur Band

TO:
Chuck Skolaut, Field & Regulatory Correspondent
American Radio Relay League

FROM:
W. Riley Hollingsworth, Special Counsel
Enforcement Bureau

SUBJECT:
Unlicensed incursion into the Ten Meter Amateur Band

DATE:
April 28, 2003

This referral is made pursuant to Section 4(f)(4)(B) of the Communications Act of 1934, as amended, 47 U.S.C. 154(f)(4)(B), and the "Amended Agreement Between the Field Operations Bureau of the Federal Communications Commission and the American Radio Relay League, Inc. Regarding the Use of Amateur Volunteers.

We request the assistance of the ARRL Auxiliary in identifying, over the next 6 months (May through October), any unlicensed operation in the Ten Meter Amateur Band, whether from business entities including trucking companies, truckers or other individuals operating domestically. We do not request direction finding, but would appreciate, where possible, the names and cities of the operators, and license plate numbers and state if from a vehicle.

Please use your best judgment as to whether to include tapes, and please use case number 2003-583

Thank you

Yup. The Commission reacts strictly to "Safety-of-Life"
situations. Probably 99% of the clowns in this forum think that
means interference to amateur radio repeaters and Riley's
warning letters. Not up to me to educate the fools either, and
it's more fun to see them post stupid statements. It was once
estimated to a fairly accurate degree that 94% of all amateur
radio operators believe the FCC's sole mission is to regulate
amateur radio. Talk about tunnel vision and a limited view of
life!

Hmm.... how then do I produce currents on the outer
shield of a coax?
Say, we want to do that for experimental reasons.
What is the mechanism.
Unsymmetry at the antenna side?

(Actually I was reluctant to install an FT100 in my Toyota.
I know I must have very good grounding etc).

So, if I want to have a radiating coax feed line,
how do I proceed.
Build an EH or CFA antenna on the roof of my car?

2880. PA-SitRep.com - PA Amateurs Radio Volunteers Wanted

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-13 12:55:19 UTC
From: kb3fxi@yahoo.com
Message-ID: <3ec0e977.1114186203@news.verizon.net>
Source record: 67578
Cross-posted to: rec.radio.amateur,rec.radio.amateur.misc

PA-SitRep (Pennsylvania Situation Report) is developing
a group of PA-SitRep Contacts, most of whom (51)
are Amateur Radio Operators. We are currently seeking
additional Amateur Radio volunteers. Here is our
current list of PA-SitRep Contacts (the lists are divided
by Western, Central and Eastern PA Regions):

http://www.pa-sitrep.com/contact.htm

PA-SitRep Contacts are asked to monitor emergency
situations from their local areas and post emergency
situation reports to the PA-SitRep Discussion e-mail
list which is used, in part, for monitoring developing
emergency situations. If warranted, PA-SitRep
Administrators move the emergency situation reports
to our main emergency alert PA-SitRep list where the
alert is distributed to over 600 subscribers throughout
the state of Pennsylvania.

Our ultimate goal with PA-SitRep is to build a significant
enough network of Contacts throughout Pennsylvania in
order to provide timely and accurate Emergency Situation
Reports, free of charge, to those subscribed to our
emergency alert e-mail distribution lists and any other
interested groups or agencies - much in the same way that
SKYWARN provides weather situation reports for the
National Weather Service.

If you're interested in volunteering as a PA-SitRep,
please visit the website to learn more:
http://www.pa-sitrep.com

-David Kleber, KB3FXI
PA-SitRep List Owner and PA-SitRep.com Founder
www.PA-SitRep.com

PA-SitRep website and mail lists are
100% non-commercial / non-profit.

2881. Re: A warning to "Q"

It appears that this doofus has now morphed into "Stagger Lee." Duh.
I have no great use for net cops either, but given how pathetic he is,
I think he should be put out of his cross-posting misery at the
source.

The good news is that the fine posters of the radio groups have
treated this buffoon with the degree of "respect" he deserves--zero
responses to his posts, which is really unusual even for braindead
trolls like him.

Feed a monopole *without* any ground plane and the shield will become the other half of a dipole. Often happens when a vertical monopole is installed on a vehicle without a 1/4 wavelength of metal on at least 4 sides below it.

Or lack of equipment and/or manpower. 15 years ago the Army had
man-portable (backpack) scanner/DF rigs (AN/PRD-12). Put out 3 of them
and they'll automatically DF and triangulate to give you the
transmitter's coord's in seconds. No doubt they have even better now.
Does FCC have any? ????

It could if we made it that way. Tar and feathers were not uncommon in my youth but practical jokes were preferred at Compton High (Between LA and San Pedro): pouring a tablespoon of gasoline down the miscreants crack and lighting him off worked wonders. After all, FCC keeps telling us to police ourselves, right? (c:

Mis-feeding the antenna will do it: feeding a balanced antenna with an
unbalanced transmission line will do it: feeding a balanced antenna with
a transmission line at less than 90 degree relative angle will do it, etc.

>

I'm not qualified to discuss EH or CFA antennas. From my reading of the
newsgroups I understand that they may be better than the MFJ 250.

Due to family and other constraints, I can only be on the air in the night time hours, and can really only afford to buy a radio that will work on one band. So what is the best band to do DX on, that is fairly consistent, and is open at night?

Thanks,
KE4RCA

>
> Thanks,
> KE4RCA

No such thing....all HF bands offer DX capabilities of some degree. I don't think a single band radio exists that could be a reliable DX rig anyway. In most cases at least 400 watts is needed to be consistant. Assuming you want SSB mode that is.

Most one band rigs are low power jobbers. In anycase look for a used multi-band HF rig. A good older Yaesu or Kenwood are plentyfull on the market. 300 to 500 bucks would be reasonable.

Best nighttime band would be either 40 or 20. Unfortunatly with the foreign broadcast in the phone section of 40 you will need to work split. 20 would be your best choice MOST OF THE TIME for a reliable night band. But as the sunspots drop so will that band.

As you can see this is not a easy question to answer.

Might I suggest you just get a rig, multiband, throw up a simple dipole and have fun?

Let the DX come as it does. And later on, after you have a better feel for things, you can improve from there.

I left out his name because it's none of your damn business or anyone
else on here. BTW, this person was world famous when this happened.
Everyone and his sister heard about it. So fuck you, and the gimp
queer horse you rode in on. Don't get rectal with me. I'll slap the
shit of you. Your teeth will rattle around your skull. I hate a
fucking smartass like I would a case of herpes.

Ditto with amateur
> repeaters, they don't waste their time. Post proof. How
> about a news release reference for starters. And where did

> just a truck load of Bullshit.

Post proof? Again, crouch down and nurse my lizard you smartass
cocksucker. All the cases I've mentioned are in the F.C.C logs, RAIN
report, and every other frigging report on the net concerning fcc
busts. Do your own homework, you poster child for smartasses. I would

have posted links for these , if you didn't have such a smartass attitude. But being you do, fuck you and the horse you rode in on. I don't post lies, fibs, and other assorted horseshit on these NG's. If I say something like that, you can take it to the frigging bank. MK

Eric -- see ARRL Prop Charts URL: http://www.arrl.org/qst/propcharts/

With Solar conditions not the best at the moment -- 10, 12, 15, 17M are
pretty much Day Bands.
20M may be open till a few hours after dark.
30M (CW only) may be open well thru the day and night.
40M is a short haul band during the day, but ranges out for DXing later at
night

You can always listen to the NCDXF Beacons -- URL:
http://www.ncdxf.org/beacon/index.html
But only covers these Ham Bands:
14.100 18.110 21.150 24.930 28.200

These are real time assessments - not predictions.

And you can always check for DX spots on the DX packet clusters, URL:
http://www.k6pbt.net/pbt/telnet.html
Just be sure the spotter is in your part of the country (filters can be set
to do this)

Being you are here in town, just go over to the 145.47 repeater and ask them about the "supposed phony" repeater squirrels I previously mentioned. Then come back and let these people in on what they told you. Also the 11m freebander I mentioned is here too. I almost bet $$$ you've heard about it. BTW, he did have a legal ham call, although the infraction was in the freeband and in between "channels" in the regular "CB" band. BTW, I could give a twinkled shit what the fcc does. But I do give a shit when a bunch of twinkle toed cocksuckers call me a liar. If I'm a liar, prove it first, before spouting horseshit. "this mainly to the other smartass that I've already replied to". And BTW, I do not fall in your "94%" bracket. I don't need the fcc to do my dirty work. Amateurs are for the most part "self policing". The only time the fcc needs to be involved is when we catch one, and need them to verify, and then an agent and a federal Marshall to serve the warrant. Going around to peoples houses trying to shut down squirrels is a good way to get shot if you don't use "legal" methods to do so. MK

If you can only afford one band, 20 would be the best choice. It gets the most traffic, and will work well when you have a chance in the daytime too.

True, during some conditions 40 will work better, but even then 20 won't be horrible. And, a simple 20 meter dipole won't take up a huge amount of real estate.

There is a lot of activity on the 75/80 meter band at night, but it's mostly stateside not DX (although there is DX to be found!)

73s and good luck,

Robert / N4IXT

And if you have almost NO realestate, I used to stick this out the
window on a broom stick. http://www.spiderantenna.com/spec.html
Look down to the second picture. It works "no bull" I have talked from
Alice Springs to New Deli. It is now on top of my garage.
I have no interest in the company, I simply use there antenna's.

Hey, it's not only possible, it's *likely* that'll you'll make lots of QRP QSOs! QRP presents challenges to any ham tired of push-button contacts (literally true in the case of Echolink). There are even 'Fox Hunts' organized for the winter and summer months (a 'Fox Hunt' has one or two stations on 40 meters (winter) or 20 meters (summer) somewhere in the US and Canada and the object is to work 'em. Sounds easy, but the din of competing stations during the brief time the Foxes are on and battling the ionosphere takes time and talent. If you're around an area with a bunch of QRPers who have formed a club, I understand the meetings are loads of fun; I'm out here in the boonies, alas, and don't have such a club nearby.

The Elecraft K1 is a very good rig to get started in QRP -- though you might want to get the 4-band option instead of just 2 bands; in any event, there's usually a lot going on on 40 and 20, so they're a good choice. Between the Elecraft support and that of list members (on elecraft-L), you'll never be alone. In addition, there are plenty of older QRP rigs out there, from the spartan Heathkit HW-7 to the Ten-Tec Argonaut (505, 509, 515, and two more recent models). And there are a ton of single-banders you can build or homebrew.

You might want to take a look at the QRP mailing list -- it's pretty active and very informative and you can ask anything (but be prepared for possibly contradictory answers, all of which are right!). It's at http://qrp.lehigh.edu/lists/qrp-l/join.html and you're welcome to join right now.

Welcome to the ranks! Have fun...that's what it's all about.

One way to go would be to find a nice older full power rig, like the Kenwood TS-520 someone here has for sale. You can run those QRP, or at full power, and they are really nice radios, and tough as the day is long. I'm sorry sometimes that I got rid of my 520, I haven't had anything with as nice a receiver in it since.

I worked VK9NS, Norfolk Island, while running 1 watt on SSB.
Got a 55 report.
Jim was running 2 watts and was 57 here.
This was on ten meters.

When conditions are good you can work almost anywhere on the
planet with QRP. A reasonably good antenna helps a LOT.

40M CW is a very good band for QRP work, I've had a lot
of fun while running from 5 to 30 watts to simple wire antennas.

One word. "Quickfix".

Usually deployed on Blackhawk helicopters to simultaneously track and / or jam radio sources in the battlefield. Very fast, linked to AWACs aircraft. Worked on them during conception, build and deployment in the late '80's - early '90's. I imagine they have much better stuff now.

The 520 was a great rig in it's day, but this guy wants to travel and go camping with his rig. A 520 would not be a good choice for that. Besides, there's only a 2-3 "S" unit difference between 5 watts and 100 watts. When the bands are open, it makes little difference...

Hi everybody,

I bought a Standard TX-200-S VHF and I do not know how to use it. It
seems that this vhf is not current or perhaps too old or both because
I did not manage to find a documention.
So if you have any information about it please sent me.

Thanks for your help

2918. FS FIAMM 12 Volt, 24 Ah Batteries

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-14 14:54:40 UTC
From: Charles Hugg <chashugg@earthlink.net>
Message-ID: <QMswa.71353$4P1.6524410@newsread2.prod.itd.earthlink.net>
Source record: 67514

I have for sale FIAMM 12 Volt, 24 Amp Hour Sealed Lead Acid Batteries. These batteries have never been put into service
and they have been kept charged to maintain their capacity. They are great for portable use. I am running a 2 meter rig off one and my Icom 703 off another. At 24 Ah capacity they last a long time. I have several up for auction on e-Bay and I also sell them directly. The price is the same: $15 plus shipping of $12.75 in the lower 48.
You can see them at:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2729188247
Thanks, Charlie Hugg, K5MBX

All service managers hear "the voices". They say (ghostly voice) "It's the customers fault" or "RF or lightning? doesn't matter cuz both are excluded from warranty. Bwoooo"

And some people like you *are* fairy tales. I'm just curious. If I proved you, and the other little keyboard hiding chickenshit wrong, who would be the spinner of tales then? You might notice, I use my real name. Any dumbass can get my address in about 15 seconds using a callsign server. I'm not a coward like you two. To sum, you worms make me sick to my stomach, and your damn lucky I can't reach through my display to slap your asses. But thats ok. I can just as easily slap you pikers around here on the internet. It may not hurt as bad, but I'll make you look like dribbling idiots none the less.

Well, I'll tell you what, I'll make it easy for you. Here are the FCC enforcement logs for the two squirrels that qrm'ed the repeater. I'm going to leave my freebander friend out of it, as he's had enough trouble as it is. But you can bet your goofy little asses, if these two are real, then the other is also.

FORFEITURE ORDER

Adopted: May 2, 2000 Released: May 3, 2000

By the Chief, Enforcement Bureau:

I. INTRODUCTION

1. In this Forfeiture Order (``Order''), we issue a monetary forfeiture in the amount of eight thousand dollars ($8,000) against Paul E. Holcombe, licensee of amateur radio station K4TOF, Houston, Texas, for willful violation of Section 333 Communications Act of 1934, as amended (``the Act''),1 and Sections 97.101(d) and 97.119 of the Commission's Rules.2 The noted violations involve the operation of an amateur radio station so as to willfully or maliciously cause interference to radio communications and the transmission of unidentified amateur radio communications.

2. On January 13, 2000, the Commission's Resident Agent Office in Houston, Texas, issued a Notice of Apparent Liability (``NAL'') for a forfeiture in the amount of eight thousand dollars ($8,000) to Mr. Holcombe.3 Mr. Holcombe filed a response on February 4, 2000.

II. BACKGROUND

3. Between 1993 and 1999, the Commission's Houston Resident Agent Office received numerous complaints alleging intentional interference to users on the Memorial Emergency Repeater Association's 145.470/144.870 MHz amateur radio repeater in Houston (``MERA repeater''). The interference was allegedly caused by stations transmitting unidentified tones, inflammatory or derogatory remarks, and unmodulated signals, none of which were identified with an FCC-assigned call sign.

4. On May 25, 1999, an FCC agent from the Houston Office, using a mobile automatic direction finding (``MADF'') vehicle to monitor the MERA repeater, observed a radio signal consisting of unidentified tones and remarks being transmitted on the input frequency of the MERA repeater. The agent simultaneously monitored the output frequency of the MERA repeater and observed that this signal would transmit immediately after other stations began transmitting, resulting in interference to communications already in progress on the MERA repeater. At about 8:08 p.m., using the MADF equipment and direction-finding techniques, the agent determined that the source of the unidentified interfering transmissions was a silver Toyota bearing Texas license plate DVZ74F. This vehicle was registered to Paul E. Holcombe, licensee of amateur radio station K4TOF. Immediately thereafter, the Commission agent conducted an interview with Mr. Holcombe and inspected the vehicle. Inside the vehicle, the agent found an amateur radio transceiver which was tuned to the MERA repeater frequency pair and was capable of transmitting on the MERA repeater frequency pair. Although Mr. Holcombe admitted that he owned the vehicle and the amateur radio transceiver and that he was the licensee of amateur radio station K4TOF, he denied intentionally making any radio transmissions that day.

5. On June 2, 1999, the Houston Office issued to Mr. Holcombe an Official Notice of Violation (``NOV'') for willful and malicious interference to radio communications in violation of Section 333 of the Act and Section 97.101(c)4 of the Rules and for transmitting unidentified amateur radio communications in violation of Section 97.119 of the Rules. In his June 4, 1999, response to the NOV, Mr. Holcombe stated that his amateur radio station may have been inadvertently activated on May 25, 1999, but he denied any intent to interfere with other stations. Mr. Holcombe also stated that he suffered from a nerve disorder in his hands which makes it difficult for him to manipulate the controls of the amateur radio transceiver in his vehicle.

6. On January 13, 2000, the Houston Office issued the subject NAL, citing Mr. Holcombe for willful violations of Section 333 of the Act and Sections 97.101(d) and 97.119 of the Rules. In his February 4, 2000, response to the NAL, Mr. Holcombe denies that the violations occurred. Mr. Holcombe asserts that there was a passenger in his car on May 25, 1999, Dennis Rogers, who is willing to testify that the alleged violations did not occur. Mr. Holcombe states that Mr. Rogers told the FCC agent at the time that the alleged violations did not take place, but the agent discounted his statement. In addition, Mr. Holcombe asserts that the NAL unfairly holds him responsible for violations dating back to 1993. Mr. Holcombe maintains that he is being charged for any and all violations occurring during the period from 1993 to 1999 as a ``convenient target.'' Finally, Mr. Holcombe argues that he has been denied a fair hearing of the facts and the right to due process.

III. DISCUSSION

7. As the NAL explicitly states, the forfeiture amount in this case was assessed in accordance with Section 503 of the Act,5 Section 1.80 of the Rules, 6 and The Commission's Forfeiture Policy Statement and Amendment of Section 1.80 of the Rules to Incorporate the Forfeiture Guidelines, 12 FCC Rcd 17087 (1997), recon. denied, 15 FCC Rcd 303 (1999) (``Policy Statement''). In examining Mr. Holcombe's response, Section 503(b) of the Act requires that the Commission take into account the nature, circumstances, extent and gravity of the violation and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other such matters as justice may require. 7

8. Section 333 of the Act and Section 97.101(d) of the Rules both prohibit willful or malicious interference to radio communications. Section 97.119 of the Rules prohibits the transmission of unidentified amateur radio communications. While Mr. Holcombe generally denies that any violations of

these provisions occurred, his denial is contradicted by the observations of the FCC agent. On May 25, 1999, using MADF equipment, the investigating FCC agent observed a radio signal consisting of unidentified tones and remarks which would transmit on the MERA repeater input frequency immediately after another station began transmitting, resulting in harmful interference to communications already in progress on the MERA repeater. The agent positively identified the source of the interfering transmissions to be Mr. Holcombe's vehicle. On inspection of Mr. Holcombe's vehicle, the agent found an amateur radio transceiver which was capable of transmitting on the MERA repeater frequency pair and was in fact tuned to the MERA repeater frequency pair. We conclude that this evidence is sufficient to establish that Mr. Holcombe willfully and maliciously interfered with radio communications in willful violation of Section 333 of the Act and Section 97.101(d) of the Rules. As stated in the NAL, the interference was both willful and malicious because Mr. Holcombe timed his transmissions to commence just after other stations had begun transmitting. Mr. Holcombe also willfully violated Section 97.119 of the Rules because he failed to transmit the required FCC identification during the transmissions.

9. While Mr. Holcombe asserts that there was a passenger in his car on May 25, 1999, Dennis Rogers, who is willing to testify that the alleged violations did not occur, Mr. Holcombe failed to provide a sworn statement or statement under penalty of perjury from Mr. Rogers. Even so, the credibility of such a statement would be questionable in the face of the substantial evidence that the violations occurred. Furthermore, while Mr. Holcombe claims that Mr. Rogers told the FCC agent at the time that the alleged violations did not take place, the agent's contemporaneous written notes of his May 25, 1999, interview with Mr. Holcombe and Mr. Rogers do not reflect that Mr. Rogers made any such statement.8 Thus, there is no evidence in the record to support Mr. Holcombe's claim that the violations did not occur.

10. Moreover, contrary to Mr. Holcombe's assertions, he is not being held responsible for violations dating back to 1993. The reference in the NAL to prior interference complaints was background information intended to show the basis for the investigation that led to issuance of the NAL. The NAL only cited Mr. Holcombe for the violations personally observed and documented by the FCC agent.

11. Finally, we reject Mr. Holcombe's argument that he has been denied a fair hearing of the facts and the right to due process. Mr. Holcombe is not entitled to a hearing as a matter of right because Section 503(b)(3)(A) of the Act, 47 U.S.C. ï¿½ 503(b)(3)(A), explicitly states that such hearings

may be held ``[a]t the discretion of the Commission.'' (emphasis added). In lieu of holding a hearing, the Commission may proceed as it did in the instant case, using the NAL procedures set forth in Section 503(b)(4) of the Act, 47 U.S.C. ï¿½ 503(b)(4). See also 47 C.F.R. ï¿½ 1.80(e). These procedures do not deprive Mr. Holcombe of his right to due process because any forfeiture issued in accordance with these procedures is ultimately subject to a trial de novo in federal district court pursuant to Section 504(a) of the Act, 47 U.S.C. ï¿½ 504(a), should Mr. Holcombe not pay prior to such time.

12. We have examined Mr. Holcombe's response to the NAL pursuant to the statutory factors above, and in conjunction with the Policy Statement. As a result of our review, we conclude that Mr. Holcombe has failed to justify cancellation or reduction of the proposed forfeiture. Therefore, we affirm the forfeiture of eight thousand dollars ($8,000).

IV. ORDERING CLAUSES

13. Accordingly, IT IS ORDERED THAT, pursuant to Section 503(b) of the Act,9 and Sections 0.111, 0.311 and 1.80(f)(4) of the Commission's Rules,10 Paul E. Holcombe, IS LIABLE FOR A MONETARY FORFEITURE in the amount of eight thousand dollars ($8,000) for willful and malicious interference to radio communications in violation of Section 333 of the Act and Section 97.101(d) of the Rules and for transmitting unidentified amateur radio communications in violation of Section 97.119 of the Rules.

14. Payment of the forfeiture shall be made in the manner provided for in Section 1.80 of the Commission's Rules11 within 30 days of the release of this Order. If the forfeiture is not paid within the period specified, the case may be referred to the Department of Justice for collection pursuant to section 504(a) of the Act.12 Payment may be made by credit card through the Commission's Credit and Debt Management Center at (202) 418-1995 or by mailing a check or similar instrument, payable to the order of the Federal Communications Commission, to the Federal Communications Commission, P.O. Box 73482, Chicago, Illinois 60673-7482. The payment should note the NAL/Acct. No. X3254-002. Requests for full payment under an installment plan should be sent to: Chief, Credit and Debt Management Center, 445 12th Street, S.W., Washington, D.C. 20554.13
15. IT IS FURTHER ORDERED that a copy of this Forfeiture Order shall be sent by Certified Mail Return Receipt Requested to Paul E. Holcombe at 15103 Mira Vista Drive, Houston, Texas 77083-4208.

FORFEITURE
ORDER
Adopted: May 2, 2000 Released: May 3, 2000
By the Chief, Enforcement Bureau: I.
INTRODUCTION
1. In this Forfeiture Order (``Order''), we issue a monetary forfeiture in the amount of eight thousand dollars ($8,000) to Robert L. Meyers, licensee of amateur radio station N5WLY, Houston, Texas, for willful violation of Section 333 of the Communications Act of 1934, as amended (``the Act''),1 and Sections 97.101(d) and 97.119 of the Commission's Rules (``Rules'').2 The noted violations involve the operation of an amateur radio station so as to willfully or maliciously cause interference to radio communications and the transmission of unidentified amateur radio communications.
2. On January 13, 2000, the Commission's Resident Agent Office in Houston, Texas, issued a Notice of Apparent Liability (``NAL'') for a forfeiture in the amount of eight thousand dollars ($8,000) to Mr. Meyers.3 Mr. Meyers filed a response on February 4, 2000. II.
BACKGROUND
3. Between 1993 and 1999, the Commission's Houston Resident Agent Office received numerous complaints alleging intentional interference to users on the Memorial Emergency Repeater Association's 145.470/144.870 MHz amateur radio repeater in Houston (``MERA repeater''). The interference was allegedly caused by stations transmitting unidentified tones, inflammatory or derogatory remarks, and unmodulated signals, none of which were identified with an FCC-assigned call sign.
4. On February 24, 1999, an FCC agent from the Houston Office, using a mobile automatic direction finding (``MADF'') vehicle to monitor the MERA repeater, observed a radio signal consisting of unidentified derogatory remarks being transmitted on the input frequency of the MERA repeater. The agent simultaneously monitored the output frequency of the

MERA repeater and observed that this signal would transmit immediately after other stations began transmitting, resulting in interference to communications already in progress on the MERA repeater. At about 6:45 a.m., using the MADF equipment and direction-finding techniques, the agent determined that the source of the unidentified interfering transmissions was a red Jeep Cherokee bearing Texas license plate C39CYK. This vehicle was registered to Robert L. Meyers, licensee of amateur radio station N5WLY.

5. On June 1, 1999, two agents from the Houston Office visited Mr. Meyers and conducted an inspection of his red Jeep Cherokee. Mr. Meyers admitted that he owned the vehicle and that he was the licensee of amateur radio station N5WLY. Although the agents found a whip antenna similar to the type used for transmissions in the 144 MHz frequency range sitting on the floor of the vehicle's rear cargo area, the antenna was not connected to any other equipment and the agents found no radio transmitting equipment in the vehicle at that time. The agents issued to Mr. Meyers an Official Notice of Violation (``NOV'') for willful and malicious interference to radio communications in violation of Section 333 of the Act and Section 97.101(c)4 of the Rules and for transmitting unidentified amateur radio communications in violation of Section 97.119 of the Rules.

6. On June 8, 1999, the Houston Office received Mr. Meyers' response to the NOV. In his response, Mr. Meyers denied the violations and asserted that his radio equipment had been located at his residence, not in his Jeep Cherokee, during the entire year of 1999. Mr. Meyers also stated that he would take precautionary steps to ensure that no accidental transmissions would occur from his station.

7. On January 13, 2000, the Houston Office issued the subject NAL, citing Mr. Meyers for willful violations of Section 333 of the Act and Sections 97.101(d) and 97.119 of the Rules. In his February 4, 2000, response to the NAL, Mr. Meyers states that the NAL included only one of the five violation dates listed in the NOV -- namely, the February 24, 1999, violations -- and failed to state where his Jeep Cherokee was supposed to have been at the time of the alleged violations on that date. In addition, Mr. Meyers asserts that he never had a radio transmitter in his Jeep Cherokee and that he did not use the frequencies 144.870 MHz and 145.470 MHz during the entire year of 1999. He further asserts that he could provide statements from numerous persons attesting that there was never a radio transmitter in his vehicle. Mr. Meyers also questions why it took until June 1, 1999, to perform an inspection of his Jeep Cherokee if his vehicle was identified as the source of the interfering transmissions on February 24, 1999. Mr. Meyers claims that if an immediate inspection of his Jeep Cherokee had taken place, it would have

verified that he had no radio transmitter in the vehicle on that date. Finally, Mr. Meyers contends that the reference in the NAL to the interference complaints received by the Houston Office between 1993 and 1999 unfairly suggests that he is responsible for those violations and was intended to prejudice the Commission. III. DISCUSSION

8. As the NAL explicitly states, the forfeiture amount in this case was assessed in accordance with Section 503 of the Act,5 Section 1.80 of the Rules, 6 and The Commission's Forfeiture Policy Statement and Amendment of Section 1.80 of the Rules to Incorporate the Forfeiture Guidelines, 12 FCC Rcd 17087 (1997), recon. denied, 15 FCC Rcd 303 (1999) (``Policy Statement''). In examining Mr. Meyers' response, Section 503(b) of the Act requires that the Commission take into account the nature, circumstances, extent and gravity of the violation and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other such matters as justice may require.7

9. Mr. Meyers' suggestion that the NAL is flawed because it included only one of the violation dates listed in the NOV and did not specify the location of the Jeep Cherokee at the time of the February 24, 1999, violations is without merit. Four of the five violation dates listed in the NOV were based on observations of and evidence provided by Commission informants. The NAL only cited Mr. Meyers for the violations that occurred on February 24, 1999, which were personally observed and documented by the FCC agent. Furthermore, it is immaterial that the NAL did not specify the location of Mr. Meyers' Jeep Cherokee at the time of the February 24, 1999, violations. Nevertheless, we note that the case file indicates that Mr. Meyers' Jeep Cherokee was parked outside of his place of business at 8825 Salon Road in Houston, Texas, at the time the FCC agent observed the violations.

10. Mr. Meyers' assertions that he never had a radio transmitter in his Jeep Cherokee and did not use the MERA repeater frequencies during 1999 are contradicted by the observations of the FCC agent. On February 24, 1999, the FCC agent followed Mr. Meyers' Jeep Cherokee from a location near Mr. Meyers' residence to his place of business at 8825 Salon Road. Immediately after Mr. Meyers' Jeep came to a stop and parked in front of 8825 Salon Road, the agent observed radio transmissions consisting of derogatory remarks being transmitted on the input frequency of the MERA repeater, resulting in interference to communications already in progress on the MERA repeater. While monitoring these transmissions, the agent observed that no FCC identification was transmitted by the interfering station. Using the MADF vehicle, the agent completely circled Mr. Meyers' Jeep and positively determined that the interfering transmissions emanated from that vehicle. At that time, no other vehicles

or persons were located near the Jeep. The agent also observed Mr. Meyers lower his head at the start of each interfering transmission, and then raise it back up at the end of each such transmission. Immediately after the interfering transmissions ceased, the agent observed Mr. Meyers exit the Jeep Cherokee and enter the business at 8825 Salon Road. The agent then drove by the Jeep Cherokee and observed a whip antenna similar to the type used for transmissions in the 144 MHz frequency range in the rear cargo area of the vehicle. We find that this evidence is sufficient to establish that Mr. Meyers willfully and maliciously interfered with radio communications in willful violation of Section 333 of the Act and Section 97.101(d) of the Rules. As stated in the NAL, the interference was both willful and malicious because Mr. Meyers timed his transmissions to commence just after other stations had begun transmitting. Mr. Meyers also willfully violated Section 97.119 of the Rules because he failed to transmit the required FCC identification during the transmissions.

11. While Mr. Meyers asserts that he could provide statements from numerous unidentified persons attesting that he has never had a radio transmitter in his Jeep Cherokee, he did not provide a sworn statement or statement under penalty of perjury from any such person. Such statements would be of doubtful credibility in light of the incontrovertible evidence that the transmissions were emanating from the Jeep Cherokee. Thus, there is no evidence in the record to support Mr. Meyers' claim that he has never had a radio transmitter in his vehicle.

12. Mr. Meyers also questions why it took until June 1, 1999, to perform an inspection of his Jeep Cherokee if his vehicle was identified as the source of the interfering transmissions on February 24, 1999. This three-month time lapse was based on allegations in the complaints and the FCC agent's own observations during the initial stages of his investigation that Mr. Meyers often acted in concert with at least one other unidentified amateur radio operator. The agent determined that it would be best to delay official contact with Mr. Meyers so as not to provide Mr. Meyers the opportunity to notify the other operator before he could be identified. The other interfering operator was identified on May 25, 1999.8 It is immaterial that no radio transmitting equipment was found in Mr. Meyers' Jeep Cherokee when it was inspected on June 1, 1999. As discussed above, the evidence in the record is sufficient to establish that the violations occurred.

13. Finally, we find no merit in Mr. Meyers' contention that the reference in the NAL to the prior interference complaints unfairly suggests that he is responsible for those violations and was intended to prejudice the Commission. The reference in the NAL to the prior interference complaints was

background information intended to show the basis for the investigation that led to issuance of the NAL. As noted above, the NAL only cited Mr. Meyers for the violations personally observed and documented by the FCC agent.
14. We have examined Mr. Meyers' response to the NAL pursuant to the statutory factors above, and in conjunction with the Policy Statement. As a result of our review, we conclude that Mr. Meyers has failed to justify cancellation or reduction of the proposed forfeiture. Therefore, we affirm the forfeiture of eight thousand dollars ($8,000).
IV. ORDERING CLAUSES15. .
Accordingly, IT IS ORDERED THAT, pursuant to Section 503(b) of the Act,9 and Sections 0.111, 0.311 and 1.80(f)(4) of the Commission's Rules,10 Robert L. Meyers, IS LIABLE FOR A MONETARY FORFEITURE in the amount of eight thousand dollars ($8,000) for willful and malicious interference to radio communications in violation of Section 333 of the Act and Section 97.101(d) of the Rules and for transmitting unidentified amateur radio communications in violation of Section 97.119 of the Rules.
16. Payment of the forfeiture shall be made in the manner provided for in Section 1.80 of the Commission's Rules11 within 30 days of the release of this Order. If the forfeiture is not paid within the period specified, the case may be referred to the Department of Justice for collection pursuant to section 504(a) of the Act.12 Payment may be made by credit card through the Commission's Credit and Debt Management Center at (202) 418-1995 or by mailing a check or similar instrument, payable to the order of the Federal Communications Commission, to the Federal Communications Commission, P.O. Box 73482, Chicago, Illinois 60673-7482. The payment should note the NAL/Acct. No. X3254-002. Requests for full payment under an installment plan should be sent to: Chief, Credit and Debt Management Center, 445 12th Street, S.W., Washington, D.C. 20554.13
17. IT IS FURTHER ORDERED that a copy of this Forfeiture Order shall be sent by Certified Mail Return Receipt Requested to Robert L. Meyers at 7358 Crownwest Drive, Houston, Texas 77072, and to his counsel, Thomas E. Edmondson, Esq., at 7322 Southwest Freeway, Suite 525, Houston, Texas 77074.

> immediately after other stations began transmitting, resulting
> in interference to communications already in progress on the
> MERA repeater. At about 8:08 p.m., using the MADF equipment
> and direction-finding techniques, the agent determined that
> the source of the unidentified interfering transmissions was a
> silver Toyota bearing Texas license plate DVZ74F. This
> vehicle was registered to Paul E. Holcombe, licensee of
> amateur radio station K4TOF. Immediately thereafter, the
> Commission agent conducted an interview with Mr. Holcombe and
> inspected the vehicle. Inside the vehicle, the agent found an
> amateur radio transceiver which was tuned to the MERA repeater
> frequency pair and was capable of transmitting on the MERA
> repeater frequency pair. Although Mr. Holcombe admitted that
> he owned the vehicle and the amateur radio transceiver and
> that he was the licensee of amateur radio station K4TOF, he
> denied intentionally making any radio transmissions that day.
>
> 5. On June 2, 1999, the Houston Office issued to Mr.
> Holcombe an Official Notice of Violation (``NOV'') for willful
> and malicious interference to radio communications in
> violation of Section 333 of the Act and Section 97.101(c)4 of
> the Rules and for transmitting unidentified amateur radio
> communications in violation of Section 97.119 of the Rules.
> In his June 4, 1999, response to the NOV, Mr. Holcombe stated
> that his amateur radio station may have been inadvertently
> activated on May 25, 1999, but he denied any intent to
> interfere with other stations. Mr. Holcombe also stated that
> he suffered from a nerve disorder in his hands which makes it
> difficult for him to manipulate the controls of the amateur
> radio transceiver in his vehicle.
>
> 6. On January 13, 2000, the Houston Office issued the
> subject NAL, citing Mr. Holcombe for willful violations of
> Section 333 of the Act and Sections 97.101(d) and 97.119 of
> the Rules. In his February 4, 2000, response to the NAL, Mr.
> Holcombe denies that the violations occurred. Mr. Holcombe
> asserts that there was a passenger in his car on May 25, 1999,
> Dennis Rogers, who is willing to testify that the alleged
> violations did not occur. Mr. Holcombe states that Mr. Rogers
> told the FCC agent at the time that the alleged violations did
> not take place, but the agent discounted his statement. In
> addition, Mr. Holcombe asserts that the NAL unfairly holds him
> responsible for violations dating back to 1993. Mr. Holcombe
> maintains that he is being charged for any and all violations
> occurring during the period from 1993 to 1999 as a
> ``convenient target.'' Finally, Mr. Holcombe argues that he
> has been denied a fair hearing of the facts and the right to

> due process.
>
> III. DISCUSSION
>
> 7. As the NAL explicitly states, the forfeiture amount in
> this case was assessed in accordance with Section 503 of the
> Act,5 Section 1.80 of the Rules, 6 and The Commission's
> Forfeiture Policy Statement and Amendment of Section 1.80 of
> the Rules to Incorporate the Forfeiture Guidelines, 12 FCC Rcd
> 17087 (1997), recon. denied, 15 FCC Rcd 303 (1999) (``Policy
> Statement''). In examining Mr. Holcombe's response, Section
> 503(b) of the Act requires that the Commission take into
> account the nature, circumstances, extent and gravity of the
> violation and, with respect to the violator, the degree of
> culpability, any history of prior offenses, ability to pay,
> and other such matters as justice may require. 7
>
> 8. Section 333 of the Act and Section 97.101(d) of the
> Rules both prohibit willful or malicious interference to radio
> communications. Section 97.119 of the Rules prohibits the
> transmission of unidentified amateur radio communications.
> While Mr. Holcombe generally denies that any violations of
> these provisions occurred, his denial is contradicted by the
> observations of the FCC agent. On May 25, 1999, using MADF
> equipment, the investigating FCC agent observed a radio signal
> consisting of unidentified tones and remarks which would
> transmit on the MERA repeater input frequency immediately
> after another station began transmitting, resulting in harmful
> interference to communications already in progress on the MERA
> repeater. The agent positively identified the source of the
> interfering transmissions to be Mr. Holcombe's vehicle. On
> inspection of Mr. Holcombe's vehicle, the agent found an
> amateur radio transceiver which was capable of transmitting on
> the MERA repeater frequency pair and was in fact tuned to the
> MERA repeater frequency pair. We conclude that this evidence
> is sufficient to establish that Mr. Holcombe willfully and
> maliciously interfered with radio communications in willful
> violation of Section 333 of the Act and Section 97.101(d) of
> the Rules. As stated in the NAL, the interference was both
> willful and malicious because Mr. Holcombe timed his
> transmissions to commence just after other stations had begun
> transmitting. Mr. Holcombe also willfully violated Section
> 97.119 of the Rules because he failed to transmit the required
> FCC identification during the transmissions.
>
> 9. While Mr. Holcombe asserts that there was a passenger
> in his car on May 25, 1999, Dennis Rogers, who is willing to
> testify that the alleged violations did not occur, Mr.
> Holcombe failed to provide a sworn statement or statement

> under penalty of perjury from Mr. Rogers. Even so, the
> credibility of such a statement would be questionable in the
> face of the substantial evidence that the violations occurred.
> Furthermore, while Mr. Holcombe claims that Mr. Rogers told
> the FCC agent at the time that the alleged violations did not
> take place, the agent's contemporaneous written notes of his
> May 25, 1999, interview with Mr. Holcombe and Mr. Rogers do
> not reflect that Mr. Rogers made any such statement.8 Thus,
> there is no evidence in the record to support Mr. Holcombe's
> claim that the violations did not occur.
>
> 10. Moreover, contrary to Mr. Holcombe's assertions, he is
> not being held responsible for violations dating back to 1993.
> The reference in the NAL to prior interference complaints was
> background information intended to show the basis for the
> investigation that led to issuance of the NAL. The NAL only
> cited Mr. Holcombe for the violations personally observed and
> documented by the FCC agent.
>
> 11. Finally, we reject Mr. Holcombe's argument that he has
> been denied a fair hearing of the facts and the right to due
> process. Mr. Holcombe is not entitled to a hearing as a
> matter of right because Section 503(b)(3)(A) of the Act, 47
> U.S.C. &#65533; 503(b)(3)(A), explicitly states that such hearings
> may be held ``[a]t the discretion of the Commission.''
> (emphasis added). In lieu of holding a hearing, the
> Commission may proceed as it did in the instant case, using
> the NAL procedures set forth in Section 503(b)(4) of the Act,
> 47 U.S.C. &#65533; 503(b)(4). See also 47 C.F.R. &#65533; 1.80(e). These
> procedures do not deprive Mr. Holcombe of his right to due
> process because any forfeiture issued in accordance with these
> procedures is ultimately subject to a trial de novo in federal
> district court pursuant to Section 504(a) of the Act, 47
> U.S.C. &#65533; 504(a), should Mr. Holcombe not pay prior to such
> time.
>
> 12. We have examined Mr. Holcombe's response to the NAL
> pursuant to the statutory factors above, and in conjunction
> with the Policy Statement. As a result of our review, we
> conclude that Mr. Holcombe has failed to justify cancellation
> or reduction of the proposed forfeiture. Therefore, we affirm
> the forfeiture of eight thousand dollars ($8,000).
>
> IV. ORDERING CLAUSES
>
> 13. Accordingly, IT IS ORDERED THAT, pursuant to Section
> 503(b) of the Act,9 and Sections 0.111, 0.311 and 1.80(f)(4)
> of the Commission's Rules,10 Paul E. Holcombe, IS LIABLE FOR A
> MONETARY FORFEITURE in the amount of eight thousand dollars

> ($8,000) for willful and malicious interference to radio
> communications in violation of Section 333 of the Act and
> Section 97.101(d) of the Rules and for transmitting
> unidentified amateur radio communications in violation of
> Section 97.119 of the Rules.
>
> 14. Payment of the forfeiture shall be made in the manner
> provided for in Section 1.80 of the Commission's Rules11
> within 30 days of the release of this Order. If the
> forfeiture is not paid within the period specified, the case
> may be referred to the Department of Justice for collection
> pursuant to section 504(a) of the Act.12 Payment may be made

> FORFEITURE
> ORDER
> Adopted: May 2, 2000 Released: May 3, 2000
> By the Chief, Enforcement Bureau: I.
> INTRODUCTION
> 1. In this Forfeiture Order (``Order''), we issue a
> monetary forfeiture in the amount of eight thousand dollars
> ($8,000) to Robert L. Meyers, licensee of amateur radio
> station N5WLY, Houston, Texas, for willful violation of
> Section 333 of the Communications Act of 1934, as amended
> (``the Act''),1 and Sections 97.101(d) and 97.119 of the
> Commission's Rules (``Rules'').2 The noted violations involve
> the operation of an amateur radio station so as to willfully
> or maliciously cause interference to radio communications and
> the transmission of unidentified amateur radio communications.
> 2. On January 13, 2000, the Commission's Resident Agent
> Office in Houston, Texas, issued a Notice of Apparent
> Liability (``NAL'') for a forfeiture in the amount of eight
> thousand dollars ($8,000) to Mr. Meyers.3 Mr. Meyers filed a
> response on February 4, 2000. II.
> BACKGROUND
> 3. Between 1993 and 1999, the Commission's Houston
> Resident Agent Office received numerous complaints alleging
> intentional interference to users on the Memorial Emergency
> Repeater Association's 145.470/144.870 MHz amateur radio
> repeater in Houston (``MERA repeater''). The interference was
> allegedly caused by stations transmitting unidentified tones,
> inflammatory or derogatory remarks, and unmodulated signals,
> none of which were identified with an FCC-assigned call sign.
> 4. On February 24, 1999, an FCC agent from the Houston
> Office, using a mobile automatic direction finding (``MADF'')
> vehicle to monitor the MERA repeater, observed a radio signal
> consisting of unidentified derogatory remarks being
> transmitted on the input frequency of the MERA repeater. The
> agent simultaneously monitored the output frequency of the
> MERA repeater and observed that this signal would transmit
> immediately after other stations began transmitting, resulting
> in interference to communications already in progress on the
> MERA repeater. At about 6:45 a.m., using the MADF equipment
> and direction-finding techniques, the agent determined that
> the source of the unidentified interfering transmissions was a
> red Jeep Cherokee bearing Texas license plate C39CYK. This
> vehicle was registered to Robert L. Meyers, licensee of
> amateur radio station N5WLY.
> 5. On June 1, 1999, two agents from the Houston Office
> visited Mr. Meyers and conducted an inspection of his red Jeep
> Cherokee. Mr. Meyers admitted that he owned the vehicle and
> that he was the licensee of amateur radio station N5WLY.
> Although the agents found a whip antenna similar to the type

> used for transmissions in the 144 MHz frequency range sitting
> on the floor of the vehicle's rear cargo area, the antenna was
> not connected to any other equipment and the agents found no
> radio transmitting equipment in the vehicle at that time. The
> agents issued to Mr. Meyers an Official Notice of Violation
> (``NOV'') for willful and malicious interference to radio
> communications in violation of Section 333 of the Act and
> Section 97.101(c)4 of the Rules and for transmitting
> unidentified amateur radio communications in violation of
> Section 97.119 of the Rules.
> 6. On June 8, 1999, the Houston Office received Mr.
> Meyers' response to the NOV. In his response, Mr. Meyers
> denied the violations and asserted that his radio equipment
> had been located at his residence, not in his Jeep Cherokee,
> during the entire year of 1999. Mr. Meyers also stated that
> he would take precautionary steps to ensure that no accidental
> transmissions would occur from his station.
> 7. On January 13, 2000, the Houston Office issued the
> subject NAL, citing Mr. Meyers for willful violations of
> Section 333 of the Act and Sections 97.101(d) and 97.119 of
> the Rules. In his February 4, 2000, response to the NAL, Mr.
> Meyers states that the NAL included only one of the five
> violation dates listed in the NOV -- namely, the February 24,
> 1999, violations -- and failed to state where his Jeep
> Cherokee was supposed to have been at the time of the alleged
> violations on that date. In addition, Mr. Meyers asserts that
> he never had a radio transmitter in his Jeep Cherokee and that
> he did not use the frequencies 144.870 MHz and 145.470 MHz
> during the entire year of 1999. He further asserts that he
> could provide statements from numerous persons attesting that
> there was never a radio transmitter in his vehicle. Mr.
> Meyers also questions why it took until June 1, 1999, to
> perform an inspection of his Jeep Cherokee if his vehicle was
> identified as the source of the interfering transmissions on
> February 24, 1999. Mr. Meyers claims that if an immediate
> inspection of his Jeep Cherokee had taken place, it would have
> verified that he had no radio transmitter in the vehicle on
> that date. Finally, Mr. Meyers contends that the reference in
> the NAL to the interference complaints received by the Houston
> Office between 1993 and 1999 unfairly suggests that he is
> responsible for those violations and was intended to prejudice
> the Commission. III. DISCUSSION
> 8. As the NAL explicitly states, the forfeiture amount in
> this case was assessed in accordance with Section 503 of the
> Act,5 Section 1.80 of the Rules, 6 and The Commission's
> Forfeiture Policy Statement and Amendment of Section 1.80 of
> the Rules to Incorporate the Forfeiture Guidelines, 12 FCC Rcd
> 17087 (1997), recon. denied, 15 FCC Rcd 303 (1999) (``Policy
> Statement''). In examining Mr. Meyers' response, Section

> 503(b) of the Act requires that the Commission take into
> account the nature, circumstances, extent and gravity of the
> violation and, with respect to the violator, the degree of
> culpability, any history of prior offenses, ability to pay,
> and other such matters as justice may require.7
> 9. Mr. Meyers' suggestion that the NAL is flawed because
> it included only one of the violation dates listed in the NOV
> and did not specify the location of the Jeep Cherokee at the
> time of the February 24, 1999, violations is without merit.
> Four of the five violation dates listed in the NOV were based
> on observations of and evidence provided by Commission
> informants. The NAL only cited Mr. Meyers for the violations
> that occurred on February 24, 1999, which were personally
> observed and documented by the FCC agent. Furthermore, it is
> immaterial that the NAL did not specify the location of Mr.
> Meyers' Jeep Cherokee at the time of the February 24, 1999,
> violations. Nevertheless, we note that the case file
> indicates that Mr. Meyers' Jeep Cherokee was parked outside of
> his place of business at 8825 Salon Road in Houston, Texas, at
> the time the FCC agent observed the violations.
> 10. Mr. Meyers' assertions that he never had a radio
> transmitter in his Jeep Cherokee and did not use the MERA
> repeater frequencies during 1999 are contradicted by the
> observations of the FCC agent. On February 24, 1999, the FCC
> agent followed Mr. Meyers' Jeep Cherokee from a location near
> Mr. Meyers' residence to his place of business at 8825 Salon
> Road. Immediately after Mr. Meyers' Jeep came to a stop and
> parked in front of 8825 Salon Road, the agent observed radio
> transmissions consisting of derogatory remarks being
> transmitted on the input frequency of the MERA repeater,
> resulting in interference to communications already in
> progress on the MERA repeater. While monitoring these
> transmissions, the agent observed that no FCC identification
> was transmitted by the interfering station. Using the MADF
> vehicle, the agent completely circled Mr. Meyers' Jeep and
> positively determined that the interfering transmissions
> emanated from that vehicle. At that time, no other vehicles
> or persons were located near the Jeep. The agent also
> observed Mr. Meyers lower his head at the start of each
> interfering transmission, and then raise it back up at the end
> of each such transmission. Immediately after the interfering
> transmissions ceased, the agent observed Mr. Meyers exit the
> Jeep Cherokee and enter the business at 8825 Salon Road. The
> agent then drove by the Jeep Cherokee and observed a whip
> antenna similar to the type used for transmissions in the 144
> MHz frequency range in the rear cargo area of the vehicle. We
> find that this evidence is sufficient to establish that Mr.
> Meyers willfully and maliciously interfered with radio
> communications in willful violation of Section 333 of the Act

> and Section 97.101(d) of the Rules. As stated in the NAL, the
> interference was both willful and malicious because Mr. Meyers
> timed his transmissions to commence just after other stations
> had begun transmitting. Mr. Meyers also willfully violated
> Section 97.119 of the Rules because he failed to transmit the
> required FCC identification during the transmissions.
> 11. While Mr. Meyers asserts that he could provide
> statements from numerous unidentified persons attesting that
> he has never had a radio transmitter in his Jeep Cherokee, he
> did not provide a sworn statement or statement under penalty
> of perjury from any such person. Such statements would be of
> doubtful credibility in light of the incontrovertible evidence
> that the transmissions were emanating from the Jeep Cherokee.
> Thus, there is no evidence in the record to support Mr.
> Meyers' claim that he has never had a radio transmitter in his
> vehicle.
> 12. Mr. Meyers also questions why it took until June 1,
> 1999, to perform an inspection of his Jeep Cherokee if his
> vehicle was identified as the source of the interfering
> transmissions on February 24, 1999. This three-month time
> lapse was based on allegations in the complaints and the FCC
> agent's own observations during the initial stages of his
> investigation that Mr. Meyers often acted in concert with at
> least one other unidentified amateur radio operator. The
> agent determined that it would be best to delay official
> contact with Mr. Meyers so as not to provide Mr. Meyers the
> opportunity to notify the other operator before he could be
> identified. The other interfering operator was identified on
> May 25, 1999.8 It is immaterial that no radio transmitting
> equipment was found in Mr. Meyers' Jeep Cherokee when it was
> inspected on June 1, 1999. As discussed above, the evidence
> in the record is sufficient to establish that the violations
> occurred.
> 13. Finally, we find no merit in Mr. Meyers' contention
> that the reference in the NAL to the prior interference
> complaints unfairly suggests that he is responsible for those
> violations and was intended to prejudice the Commission. The
> reference in the NAL to the prior interference complaints was
> background information intended to show the basis for the
> investigation that led to issuance of the NAL. As noted
> above, the NAL only cited Mr. Meyers for the violations
> personally observed and documented by the FCC agent.
> 14. We have examined Mr. Meyers' response to the NAL
> pursuant to the statutory factors above, and in conjunction
> with the Policy Statement. As a result of our review, we
> conclude that Mr. Meyers has failed to justify cancellation or
> reduction of the proposed forfeiture. Therefore, we affirm
> the forfeiture of eight thousand dollars ($8,000).
> IV. ORDERING CLAUSES15. .

> Accordingly, IT IS ORDERED THAT, pursuant to Section
> 503(b) of the Act,9 and Sections 0.111, 0.311 and 1.80(f)(4)
> of the Commission's Rules,10 Robert L. Meyers, IS LIABLE FOR A
> MONETARY FORFEITURE in the amount of eight thousand dollars
> ($8,000) for willful and malicious interference to radio
> communications in violation of Section 333 of the Act and
> Section 97.101(d) of the Rules and for transmitting
> unidentified amateur radio communications in violation of
> Section 97.119 of the Rules.
> 16. Payment of the forfeiture shall be made in the manner
> provided for in Section 1.80 of the Commission's Rules11
> within 30 days of the release of this Order. If the
> forfeiture is not paid within the period specified, the case
> may be referred to the Department of Justice for collection
> pursuant to section 504(a) of the Act.12 Payment may be made
> by credit card through the Commission's Credit and Debt
> Management Center at (202) 418-1995 or by mailing a check or
> similar instrument, payable to the order of the Federal
> Communications Commission, to the Federal Communications
> Commission, P.O. Box 73482, Chicago, Illinois 60673-7482. The
> payment should note the NAL/Acct. No. X3254-002. Requests for
> full payment under an installment plan should be sent to:

Sorry, it was just exciting. Worked PY2TO in Sao Paulo with my Radio Shack HTX-10 and a dipole strung up in the bushes around the house. Had zero hope of raising him when I started calling him, but the atmosphere was on my side tonight and I was able to raise him all the way from the midwest on 10m.

That does it, I'm addicted.

Now I have to find a log program :)

Congrads Eric -- good catch. 10M is a very exciting band -- low power and a modest antenna will do it when the propagation is in.

Hope u have Many more DX contacts.

For logging see URL:
http://ac6v.com/logging.htm

Logger by K4CY is a great one and its free URL:
http://www.qsl.net/kc4elo/

Well, I can't take any more of this tripe.

Problem is that you demolib anti freedom folks are finally seeing up close and personal just what is involved in defending your freedom. It ain't pretty, sometimes. It takes a lot of pain, a lot of time, and a lot of blood. You don't like to face up to what it took in the past so that you could sip your lattes and piss and moan about the way things are.

Got a surprise for you. The world is at a crossroads. If civilization is to survive, we have to take a stand, and things in the world have to change. Some people aren't going to like that. Some people will be hurt. Some people are going to rant and rave and cry about lost fredoms and leaving other countries alone. But if action is not taken, the forces of chaos will win, and if they win, it will mean a long dark age of terror, one from which humanity may not rise again.

So pick your side. Are you with the forces of civilization or the forces of chaos?

I have a Cushcraft X7 antenna which was installed for a year. It is in excellent shape except for some bird do-do. Original boxes and all hardware. $400 and prefer local pick-up in the Memphis, TN area, but will ship if you pay shipping.

thanks,

Given the time he has (So Damn Insane) had to hide stuff and the size
of the country (about the same as California) I could hide something
and you would never find it either
! Mobile labs, buried in bunkers in the desert, dumped into the
rivers and sea's, and so on. We might never find it, or if so then it
might be just bits and pieces of the stuff. But the graves, people
there had a good idea where they were so it is esier to find them.
Now I wish that you bitching liberals would shut the hell up! For
just the things that we know and have found out about, it justifies
this monster to be taken out, not including the rest of the things he
has been doing and reported to have done! So get over it all ready
you whiners, sheesh what babies you all are, take your bat and ball
and go home, the rest of us are tired of your BS. Oh and by the way
this is a warez group, not a I HAVE NO BRAIN AND WANT TO BITCH
group!!!!!!!!!

Last week "Q" posted a message with a subject like "How can Ben and
Jerry be wrong?"

It was a forwarded message with one set of ">". The end of the
message was a typical "You got this because you subscribe to our
stuff" paragraph. It started:

This message was sent to w4jle@charter.net ...

Someone in a rush to generate tons-o-political spam might forget to
remove their email from the body of the text.

The message was canceled.

QRZ says w4jle is Frederick G Hambrecht.

Fred has an interesting history on usenet.

Congratulations Eric!

I remember my first "real DX." I had worked Canada and Mexico before but my first REAL one was Japan. JH1WIX, Taroh Yagi (RIP). I just about fell out of my chair. I was a Novice at the time and my code wasn't the greatest. At first I thought it was WH1WIX, I was thinking "Where the heck is WH1?" Then he sent his call again. I was hooked! This was back in the 70's so continental US W calls were either WN, WA, WB or just plain W.

This is from ARRL bulletin just received. (ARLB035)

Dan/W4NTI

The granting of just five spot frequencies--5332, 5348, 5368, 5373, and 5405 kHz--at 60 meters was less of a surprise given opposition expressed last fall by the National Telecommunications and Information Administration (NTIA). The NTIA had cited a possible need for the requested band by federal government users and proposed the five specific frequencies for amateur use on a secondary basis. The FCC has granted operation on USB (2K8J3E emission) only, with a maximum effective radiated power limit of 50 W relative to a 0 dB gain antenna--a half-wave dipole. The channels--each with a maximum permissible bandwidth of 2.8 kHz--will be available to General and higher class licensees.

''While the new amateur privileges at 5 MHz are not as flexible as we had hoped, we recognize that much has changed since the ARRL petition for rulemaking was submitted to the FCC in the summer of 2001,'' Sumner said. ''Federal agencies with homeland security responsibilities have renewed interest in HF radiocommunication.''

2938. Free - Morse Code Trainer for Visual Basic 6

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-15 21:15:22 UTC
From: sure@yeayea.not
Message-ID: <n608cvk97gpeni46urpeu0aqr40h4hju4h@4ax.com>
Source record: 67532

Free - Morse Code Trainer for Visual Basic 6

Morse Code Madness - Helps you learn Morse Code. Morse Code Trainer, Morse Code Translater, Morse Code QSO Practice, Morse Code Transceiver. Sharpen your Morse Code skills.

This program is in Alpha (some parts done, some parts still being written).
It is written in Visual Basic 6 and source code is feely avaiable.
The Trainer portion of the code works great, as well as the translater.
The QSO and Tranceiver need work.

See:
https://sourceforge.net/projects/morsemadness/

If you program in Visual Basic 6 then join our team at Sourceforge for
this Open Source project !!!

Remeber a while back, I announced a contest for the week of the Dayton Hamvention? It was to be a unique award. Since I know that this person will be at Dayton this year, I thought it fitting that I award:

QRM'ER of THE DECADE to:

(Drum Roll)
(Drum Roll)

Glenn Baxter, K1MAN!

Of all the 1000's of votes from the SWL community, K1MAN stood heads and toes above the rest.

To know why Mr. Baxter got the award, please visit:

http://users.adelphia.net/~k3vr/boy.htm

I will produce a cerfiticate, to be posted on K1TP's webpage soon.

That's dialog? Perhaps you can tell us just why it was necessary for the US to launch an unprovoked attack on another nation, an attack that killed thousands and did billions in damage that we the taxpayers will now have to pay for -- to Mr. Cheney thrugh Halliburton? Where are those weapons of mass destruction? Please be specific. But I just gues you war monger aplogists just won't give up no matter how your protestations, one by one or en mass, are torn down. No WMD, no gas, no biological agents, no nukes, no long range rockets -- not one scud -- no effective air defenmse, no long-range drones, no nothing. Followed by total incompetence.

The posts you're talking about are apparently from a guy named Fred Hambrecht. He plays with headers to impersonate people.

See the thread titled "a warning to Q - identified?" for details.

Complaining to a troll is counter productive because it tells them they're succeeding in annoying you.

But there is plenty of OIL there, Money, Big Dollars for an Oil
tycoon.

Diplomacy was never an intended objective. In fact, diplomancy
would have made it impossible to take over a weaker, oil-rich country.

Dr. $lick

Is there any interest for the following items:

Tempo-S1 - Complete user & service manual - accessories (email for details)

Kenwood TH-2500 - Complete user & service manual - accessories (email for details)

Amcomm S 2 25 - User guide with schematic - accessories (email for details)

This is stuff from an older amateur clearing out to move. Stuff is still coming in.

Well, of course. The path to war was settled within days of 9/11 and there was no way the Bushies would be thwarted. The whole UN thing was a sham. There was absolutely nothing Iraq could do to stave it off.

It is a truly shameful time in American history. But unfortunately, not unique.

What ever happened to the gold (LOTS OF IT) that was supposedly stored
in the basement of the WTC? I haven't heard that they every "found"
that.

I know they couldn't wait to ship almost all the metal to China. You
don't suppose there might have been drill marks on the beams do you?

Are you disputing the fact that most of the metal (steel) from the
building was shipped to China -- very shortly after 9/11 or are you just
being your normal self?

If it is the former put forth some evidence or continue to show the world what you are.

As usual, you completely skipped the main idea which was: What happened to the gold? I'll add one. Who are you covering for? :-) Some suspect this was the "perfect" bank heist!

So when do we get to use them? Now?

To get our USB signal centered we'd need to dial
our rigs to 5330.6, 5346.6, 5366.6, 5371.6, and
5403.6 KHz That's (freq) -(2.8/2).

The gold was recovered very quickly. Though there was evidence that somebody tried to break into the vaults, they were unsuccessful. All the gold was recovered.
>
>I know they couldn't wait to ship almost all the metal to China. You
>don't suppose there might have been drill marks on the beams do you?

This is paranoia at its extreme. The metal was so much scrap, like it or not, and was sold to the highest bidders. Thgere was some mob involvement at the beginning where some metal was diverted to mob-connected business but that was quicklty squelched.

2964. Dayton a washout on the Live WebCam ?

Watching the live webcam feed from the
Dayton Hamvention right now at:

http://tmedlin.com/hamvention.html

Looks like it's raining at a pretty good clip
and I can see what looks like 2 or 3 buyers
at the most walking the flea market asile in
the live photo snapped just a minute ago.

Is this photographic confirmation that the
Dayton Hamvention, and hamfests in general
also, are going the way of the dinosaur?
Has e-Bay killed hamfests?
Did Wayne Green's "crystal ball" really
portent with accuracy and he got it right all along
in his editorials?

I recall Dayton as being so packed in past years
you felt like you were at the Indy-500. Now it looks
like our local junk weekend flea market pulls
more attendees. How sad. Time to stick a fork in it?

Actually, NATO specify a 1.5 kHz offset for SSB to be on their 'assigned frequency', so you should be on nominal carrier frequencies ending in .5, not .6. I agree that Part 97 makes this as clear as mud, though. A stock wide filter should give you 300 Hz to 2.7 kHz audio, so if you tune 1.5 kHz low as per NATO rules your sig should extend -1.2 kHz/+1.2 kHz, which is centred as per Part 97, and within the permitted channel by 200 Hz on both sides.

Did anyone attend the unofficial forum on
Freebanding in 21st Century? Was going to attend
but had an urgent business appointment. Heard I missed
a great forum. This event was not listed on any official
programs. Word was passed on the radio and via mouth,
as well as separate flyers.

Larry

2973. HTX-202 recahargeable Nicad

Does anyone know where I can acquire a Nicad Bat for the old
Realistic HTX-202?? Great little 2 meter rig with fantastic intermod
rejection. Feel free to email direct. Thank you

Gary N1MSV

I think "Mr NiCad" still has them. Also known as EH Yost.

Or you could just get the 'blank packs' and put generic AA cells in them,
NiCad or whatever.

Mike

Several companies sell them, look through QST.

Try:

www.batteriesamerica.com

www.ww-manufacturing.com

I have the 202, it's one of the most popular HTs around. Radio Shack should smack themselves silly for discontinueing it.

I have no idea where the steel went after it came down, but why would it go to China??? There are plenty of scrapyards that can melt it down just fine here, where did China come into it??? What is this China thing you have suddenly? I don't understand the jew thing, but China?? WTF? What about the Soviet tanks and planes, and the secret troops in the US?? Must be hell believing in all that conspiracy shit. Do you sing (to the tune of "I enjoy being a girl") "I enjoy being a kook"? Oh, one more thing, who gives a shit if the steel did go to china, scrap is scrap, or, let me guess, it's to hide the "evidence".

>
> If it is the former put forth some evidence or continue to show the
> world what you are.

You sure are showing the world what you are Al. Where does China come in, I don't get it. What "evidence" do you have, Pastor Peters tell you? The chinese invasion around here seems to result in too many lousy chinese restaurants. Ohhh, that's it, they are plotting to feed us MSG or some other "toxic" substance to TAKE OVER THE COUNTRY. Sheesh.

>

Well, let's take a guess, could it be that the OWNERS came in and took it out?? Kinda hard to steal your own loot. You got me Al, I got a 1% cover up fee for spreading lies about the gold and steel. Even you have to realize you are getting way out in the fringes of kookery here, I just wish you weren't serious, but you are, I guess.

No. We must wait until it becomes final. In this case, that means 30 days after this is published in the Federal Register (which hasn't happened yet - but should happen by the end of this month). Effectively, that will mean that it should be in effect by July 1, 2003 (if not earlier).

Huh? Since when do you "center" a SSB signal? When you dial up 5332
and transmit a 2.8 khz-wide USB signal, it's proper for it to be 2.8 khz
wide
above 5332. If it conforms to the proper signal bandwidth, that's
proper. The operating frequency is still 5332 khz.

Dick

That is the way I see it. 5332, 5348, 5368, 5373, and 5405 kHz USB,-
Doesn't sound hard to me. I just can't weight, my antenna is jumping up to
get tuned for this band.

Except that they have given us 5332 kHz USB +/-1.4 kHz, so you need to be
on 5330.5 kHz. If you were on 5332 you'd be out of band.

Well, the rain Saturday made the flea market a bit of a waste. Outside venders got out the plastic to cover everything up, so you really couldn't see the outrageous prices they were asking for their junk.

The rain forced everyone inside. One character had chaser lights around his callsign badge and an antenna mounted on each shoulder. There were no fatsos on three-wheel carts, but I did see several that were top-heavy and looked like they were about to tip over.

I sat up in the stands of the main arena. This is always one of my favorite places to go at Dayton, just to watch people and get away from the crowds. Besides, with everyone inside because of the weather, I didn't want to get too close to them, since most don't know what a shower is. I noticed one guy that had two young boys with him. These kids looked like they were bored out of their mind, as their father (I assuming it was their father) looked at every piece of mundane junk that was to be found.

Oh well, better luck next year.

three-wheel carts, but I did see several that were top-heavy and looked like they were about to tip over.

I sat up in the stands of the main arena. This is always one of my favorite places to go at Dayton, just to watch people and get away from the crowds. Besides, with everyone inside because of the weather, I didn't want to get too
close to them, since most don't know what a shower is. I noticed one guy that
had two young boys with him. These kids looked like they were bored out of their mind, as their father (I assuming it was their father) looked at every piece of mundane junk that was to be found.

Oh well, better luck next year.
.....
Funny thing, Dayton. Every Ham should go there at least once just for the experience. I used to laugh up my sleeve at the goofy guys that were built like a bowling pin...they'd have a three inch wide belt with four or five HT's attached to it...rubber duckies on their hard hats, battery packs hanging out of their back pockets and four inch wide plastic plackards with their callsigns engraved on them.
They have no shame.
Then there are the guys who push a friggin' shopping cart around...take up aisle space and mosey along as though they have all day. Nothing in the cart but a few flyers. Ever try to get close to the vendors? Want to look at the new Yeasus? Forget it...the old fuddie-duddies crowd around the vendor and linger for hours...knowing full well that they aren't going to buy a darn thing from the vendor!
Oh, and every now and then you happen upon an old geezer who has a flatulance problem...he farts through his Relys and has not the sense of smell to know that he is passing malodorous methane to the bystanders.
Ever try to get into the rest rooms at Dayton? Forget it! Pee outside if you can...

The funniest part of attending Dayton was, to me, a standout when I saw a goon with an aluminum helmet complete with a chin strap on which was mounted a small three element beam! This bird took the cake! What was he doing? Moon bounce? Beams in an auditorium?
No wonder people laugh...

To Dayton I say once is enough. Every Ham should go there at least one time. The laughs almost outweigh the hassles. Almost.

I would have to guess you are of the younger set. A review of history shows in the last century, no country on the planet earth gave more to France than the US. France has not shown its appreciation for the effort.

Your free speech is only guarenteed thru the efforts of those who came before us. Had the US not entered WWII, things would be very different now and am certain you would not be able to say what you do. Those of us that have served know the true meaning of freedom, those that have not only have an idea of what it really is about.

Bob

Hello everyone,

Sorry for the off-topic post, but I braved the weather at Dayton Saturday
and
picked up a Millivac MV-823A-1 RF millivoltmeter. I was wondering if
anyone might have a manual for it that they no longer need, or if someone
might know of a source for one. It was completely soaked, but after a good
drying out it seems to work. Thanks,

Kevin, K9HX

An observation from a Dayton Local with over 30 years experience attending the Dayton Hamvention:

2 meters had very little outside the area radio traffic until Thursday PM - Extremely Unusual for Hamvention week
Did not see the usual large gathering of mobiles in the motel parking lots near where I work - Very unusual for Hamvention week
94 Talking-In station hecklers at a minimum - Just plain weird
94 Traffic slow every day Hamvention was open - Unusual
Little traffic 6 meter or 40 meter heard and 146.52 did not have any traffic until Saturday - Strange occurrence

Saturday I did talk with some out bound mobiles from the East and Midwest basically their complaints were
the rain and outrageous Shuttle service. They had to pay to wait for a 1 to 1-1/2 hour ride to Salem Mall and
back.

What was unusual about my conversations with these people was they took place at about 12 Noon. People were bailing out in
droves only after 4 hours after the Hamvention doors opened, this was a first in all my years of Hamventioning! One guy commented
the attendance was about of what he had seen in the past 10 years of attendance. I agree!

The Hamvention, as it is now called by the slick promoter DARA sold out to, is no longer the premier event it was 15 years ago. It
just like the Dayton Air and Trade Exposition, have been run into the ground for the almighty buck. Sure DARA had its problems running
the Hamvention during its tenure but, the original members made it a personal event not the commercial money making machine it is today.

One Ham on 6 meters commented, "The Hamvention like Ham radio itself has matured and is on its way to old age", he further explained
the changing technologies have drawn the younger generation to computers and the internet. Those that enter Ham Radio today are basically
an aging generation of people who when they were younger did not possess the knowledge or motivation to get a license until now. They
are dying off as fast as they enter Ham Radio hence an arrested grow rate compared to other hobbies.

I think the reason Krell did not see the addicted weirdo's always present during the last 30 years of the Hamvention, is they are passing away. Several I knew personally have died or mentally gone off the deep end from their indulgence in alcohol and drugs during the 60s and 70s.

The old organizers from DARA I knew when I was kid, are all with Barry Goldwater passing traffic in that great shack in the sky.

Hamvention has a terminal old age disease and will pass on to that great shack in the sky within the next 10 years!

73, to all those who put on great Dayton Hamvention in the past .*** -*-

PS: This is no longer the Dayton Hamvention, the new promoters along with their cronies in Trotwood call it The Hamvention
(now a registered trademark). So the Dayton Hamvention in reality has been dead for several.

Stagger, when I realise folks like you are having children, I rapidly change my views and become more in favour of abortion... Not only should the Government take YOUR rights away, they should also take your children... you are an idiot, and you've been proving it every day just by virtue of your spam.

Well......like every good homeboy wannabe he thought this was amatuer.music
but his (or her) little pea brain could not deciper the small print
amatuer.misc.

Stagger Lee was some old song from back in the days of Soul Music, mucis
that has morped into Hey Yo Let's Rap Urbane Music!

Looks like the "technical staff" at FCC have gone braindead, again. They
assign a frequency which puts you out of band when you dial it up. Right.
So now the frequency assigned is not the frequency you use.
It's stupid.
Look for scads of hams to fall to that little quirk of ignorance on FCC's
part.

Did they throw you off of the street corner for preaching and
we have to listen to it here?
Who gives a shit.
A few more homicidal bombers and I say we should go in and
have a good old-fashioned slaughter of the Arab world.
You know.... the kind my Daddy said happened during W.W.II.
Fuck the terroist cowards they all need to die.

I forget the exact wording of the announcement. But the fact that
this is channelized operation, with mode specified, seems to indicate
a different situation than the norm. Obviously, when a band segment
is specified, you have to have everything within the band. If you can't
fit all your sideband in, then you have to move further into the band,
or switch sidebands. But this is a unique case. Your FCC is specifying
5 specific frequencies, and the mode. If you're on frequency, and using
the correct mode, than how can one be "out of band"?

I see. Someone seems to be suggesting that the 2.8KHz bandwidth
indicates +/-1.4KHz from those specified frequencies. Where do
they get that? Is your FCC allowing for some innaccuray for
the center frequency, and the poster is garbling that? Or is he
garbling the bandwidth of the signal to indicate it needs to
be spread around the specified frequency, rather than the norm
of specifying the frequency of the nulled out carrier, and the sideband
in effect is an offset from there?

The Clintons are back.

Sidney Blumenthal -- much-hated former Clinton aide, ethically challenged former journalist -- $850,000 advance in hand, has a new book out on May 20, attacking everyone who ever attacked him or the Clintons, rehearsing once again the old right-wing conspiracy, every attack on them, answered. The right wing conspiracy revived, answered, again.

Hillary's book is next.

Could someone please tell these people to shut up?

The Democrats might have a chance of electing a new president if they could get the last one, and his defenders, to clear the stage. It doesn't matter if they're right or wrong. They should be history.

The Clintons suck up every bit of the available air. Nothing is left for anyone else. They are big, too big. That's the problem.

The 2004 candidates need a chance to get some attention, to rise to Clinton's level, which they'll never do so long as the likes of Sidney Blumenthal are playing into the hands of conservatives in insisting on debating the scandals of the 1990s.

Don't get me wrong. No one spent more time defending Bill Clinton than I did. Too much, according to most of my friends. But in a constitutional crisis, there was no choice. Enough is enough.

There's no excuse for a grown man to have an affair with an intern, whether his name is Bill Clinton or Jack Kennedy. What the former president did was wrong.

It's bad enough that Fox has given Monica Lewinsky a talk show. Of all the hundreds of women who could help find Mr. Personality, the last one on earth who's earned the right to do it is the Queen of Blow Jobs of the 1990s.

The Republicans shouldn't have impeached him for it, but he shouldn't have given them the ammunition. And we shouldn't still be discussing it.

Why are we? Or, to put it more accurately, why are they?

Not because it serves the interests of Democrats of the future.

It doesn't help Howard Dean, or John Kerry, or Dick Gephardt.

It makes George W. Bush look good.

It gets Sidney on TV shows. If the issue is ethics, no one has less than Sidney Blumenthal. He used to call me, during the Dukakis campaign, which I

was running and he was supposed to be covering, to offer covert advice, which if accepted might result in better coverage. Much later, when I criticized him, he tried to get me in trouble with my editors. All the while, I was defending his boss. That's Sidney. He's Hillary's best friend. No wonder Republicans are delighted to see his return to the spotlight.

It raises money for their causes.

The Bill and Bob (Dole) show on CBS has proven to be a colossal bore. The ratings have fallen. Is anyone getting the message? I fear not.

Let's not mince words.

Hillary Clinton is never going to be president of the United States. There is no more divisive figure in the Democratic Party, much less the country, than the former first lady. And I like her. But many women don't. Even Democratic women. Even working women. Not to mention non-working, independent, non-political women. She can be a great senator. She's smart, hard working and effective. She is much respected among her peers.

But the more people talk about her as a future president, the more money Republicans raise. The more people talk about her as a future president, the less attention the current candidates, who might win, receive.

Revisiting the scandals of the past does no service to the Democrats of the future.

Bill Clinton is a brilliant man. But the more attention he gets, the more the Democrats of the future suffer. He would be the first to say this, if it weren't about him.

Enough with the Clintons. Please. Not for the sake of the Republicans. But for the Democrats ...

Fuck you troll. Sharon is part of a democracy trying to
eliminate a terrorism problem. If I were him I'd cut the
throat of every Palestinian terrorist I could find. They
are a bunch of cowards full of self pity.
Actually, I can't wait until there is a Pale. state. An insignificant
piece of land where they can cry all to themselves. The first
time one of those shits tries another homicidal bombing, Israel
can officially declare war on another on them because they would
be another country. And THEN you're going to see some serious
Arab blood flow. I CAN'T WAIT!
That's a war I might volunteer to fight in.

The suitcase low power FM stuff is VERY
POPULAR with people involved in the Militia
and the Patriot political movements. Many of them
set up these things in their trailer park or other
homes using an external antenna, then re-broadcast
"patriot" type programming from WWCR, WWFV
and other right-wing shortwave radio stations.
They feel doing this this is their 'duty' to 'inform' the
public about such things as chemtrails, bilderbergers,
planet-x and other such "conspiracy-kook" paranoid
bullshi+. It's a shame really, as if they'd put as much
effort into bettering their own lives as they do in
cross-pollenating the crazy BS on shortwave, they'd likely
have a much better existence than the one they
now have. Been watching these sad souls for years
and every one of em are either crazy, flat-broke or
lazy po-buckers, or a bit of all three. Alot of em goto
Dayton and other hamfests each year to buy up old
radio gear. Easy to spot em. Usually wearing old green
army jackets or goofy-message tee shirts and are almost always
missing several teeth. Smell like they could use a bath also.
Put 6 of em together and I bet they'd be hard pressed
to come up with $200 between em. They blame all their problems
on the "New World Order" or whatever Alex Jones says
is causing them their hurt, instead of lookin at the real problem
in their bathroom mirror in the morning. (should be real
fun when the FCC clamps down on these microbroadcasting
militialoons, alot like a re-hash of when they got Col Steve!)

If you didn't make Dayton Hamvention this year, here is some of the action.
Please be warned these pictures are large, and if you are on a dialup
connection it may take a while.

http://www.qsl.net/wd5bjq/hamvent03.htm

73's,

Keith, K4KAL

Maybe for him, WEIGHT is more of an issue than waiting! :-)

--
Radio amateur = ham.
Ham comes from pigs. Pigs are fat.
Many amateur operators are fat.
Coincidence?

You be the judge! :-)

We'll find out either when:
1) The FCC decides to issue a clarification, or
2) Riley starts handing out pink tickets.

This is another perfect example of why certain things should be left to the technical staff and out of the hands of politicians.

Good Enough Gay Parents

By Jeff Lutes, MS, LPC

A few years ago, I told some of my male friends that my partner and I were considering adoption. I was caught off guard when they looked at me like I had a third eye in the middle of my forehead. That experience taught me that many gay men had never seriously considered parenting as an option. But now that's changing.

Current estimates suggest that as many as 10 million children in our country live with 3 million gay or lesbian parents, and the numbers are growing. Historically, most gay men and lesbian woman have raised children conceived during a previous heterosexual marriage. Now, many of us are creating families through adoption, insemination, surrogate parenting, or by becoming foster parents.

In recent years, I've noticed that more of my clients are exploring their maternal and paternal instincts. What seems really new is the growing number of men who are starting families together, or who are actively planning to do so in the future.

In considering this prospect, most gays and lesbians have to work through the culturally conveyed belief that we are not fit to be good parents. Relax. Dozens of studies in the fields of psychology, psychiatry, sociology, anthropology, and medicine have shown that children raised by same-sex parents are just as psychologically well-adjusted as those raised by heterosexual parents. The empirical evidence is overwhelmingly strong; those who are interested can go to www.apa.org for a thorough summary of the research by the American Psychological Association.

Most adults, gay or straight, have fears about their ability to be good parents. That's normal. To not have some fears would mean you were obtuse. But luckily, most of these fears turn out to be overblown or completely unfounded. The truth is that once you are a parent, you will most likely rise to the occasion and do what needs to be done to raise your children into reasonably healthy adults. Will you make mistakes? Absolutely. A straight friend of mine recently told me that he started a college fund when his daughter was born. Now that she's entering adolescence, he's thinking about opening a therapy fund!

Gay and lesbian couples can be just as caring and nurturing with their children as heterosexual parents (or just as dysfunctional). What matters most, of course, is how well we are able to help our children feel loved

and understood. D.W. Winnicott, an influential psychoanalyst, wrote that children become happy and healthy adults when they have "good-enough" parents. His message is that we don't have to be (and can't be) perfect parents; we just need to provide a safe and reasonably stable environment in which the child feels loved, cared for, and valued. This is an important point because gay dads and lesbian moms sometimes try to be "super-parents" in order to prove themselves to those who oppose gay parenting or to compensate for the ostracism a child might face for having a different family structure. I admit, as a father and a therapist, I sometimes worry that every mistake I make will scar my son for life. Then I remind myself that I only need to be "good-enough".

We may worry that our children will be harmed by being teased and ridiculed because they have two mommies, or two daddies. While it's true that they may face some prejudice, it's also true that they will probably have the tools to deal with it. Our kids will learn a lot about society's ignorance and bias, but if we are emotionally present and listening compassionately, such trials can build strength of character and teach tolerance and sensitivity toward others. Remember that all kids get teased about something at some point. We can't protect our children from everything or prevent every negative experience. Nor should we. There is value in both diversity and adversity. No parent is capable of meeting a child's every need. But, when parents feel proud and secure, this gets relayed to the child and gives him or her the strength to handle other people's response to their nontraditional family.

We may worry about the impact children will have on the adult relationship with our partner. Well, I guarantee that your relationship will change when you become a parent. I have been asked if parenting strains or strengthens my relationship with my partner. My answer is both. Having a child has forced us to deal with some challenging issues in our relationship and the daily grind of parenting can be totally exhausting and extremely stressful. On the other hand, I frequently catch myself admiring my partner as he takes advantage of a "teaching moment" with our son. In these moments, I experience a beautiful part of my partner that I might not otherwise get to see. Watching him love our son opens up new and joyful parts of me, and I fall deeper in love with both of them.

The decision about whether or not to parent a child is perhaps the most important choice a person will make in his or her lifetime. Not all of us want to be parents and that's all right. Choosing to parent does not make a person more virtuous or noble, and choosing not to parent does not make a person self-absorbed or puerile. It's just a choice you make for a different kind of life, if you desire it, and have the personality and resources to do it. Of course, it is vital that you spend a lot of time evaluating your suitability as a parent. Talk to your partner, your friends, your family, and consult with a therapist. Take a parenting class, read books, educate yourself on-line, or join a support group. Be honest with yourself about whether or not you have the time, finances, and emotional resources to start a family. Perhaps the most important consideration is whether or not you love who you are as a person, because

you can't give a child something you don't have yourself.

Interestingly, this long process of exploration and planning is one of the strengths about gay and lesbian parenting. We rarely have an accidental "Oops, I'm pregnant!" experience. If we do all the research, soul searching, and hurdle jumping that it takes to have a child, we can be pretty sure that our little one will be cherished, loved, and adored. Good luck!

How to Fight (and how not to...)

By Sue Marriott, LMSW-ACP, CGP

"What is this By George bill showing up on our credit card?" you politely ask between bared teeth.

"Don't even start your nagging," the love of your life snaps with a sarcastic smile.

Wow, a simple question and suddenly you are off and running on a familiar refrain of conflict in your relationship. He knows his spending bothers you, yet he continues to do it! You know he hates feeling controlled but you continue to do it! What's going on here?

If this sounds familiar, you are not alone.Here, we address the urgent matter of how to avoid pissing off your partner and what to do once you are already in the dog house.

- --
- -----
Last last month the LA Times reported on a new 12-year study of gay and lesbian couples by John Gottman. According to this research, same-sex couples are less belligerent, less domineering, less whiney, and are more affectionate, humorous and express more joy than heterosexual couples.

However, no matter how great you and your lover have it, there is sure to be conflict in your relationship. After all, who knows better how to push your buttons? While the degree and frequency varies quite a bit by couple, conflict is a normal, healthy part of any intimate relationship. The more you know how to do it productively, the better off you each will be when the dreaded but often passionate circumstance arises again.

Even in full-fledged war there are such things as rules of conduct, so why not protect the one you love from your "friendly fire"? Before some suggested fair fighting guidelines, however, let's talk about ways to prevent a fight, which is a heck of a lot easier than managing things once you both have fangs bared.

The single most effective way to avoid making your partner snarl is to begin a potentially difficult discussion more gently. Guaranteed, if you start off by criticizing your partner (or worse), things are probably going to end up badly as well. Conversely, if you can slow things down and be

gentle in your approach, you are much more likely to end up in a creative, problem-solving place rather than an argument.

Going back to the above example, a better start would sound something like, "Say Hon, I've noticed that you've stopped using the Visa so much and I appreciate that. This By George bill bothers me though, because we agreed not to charge anything over $100 without talking to each other first. What happened?"

This is not intended to avoid conflict, clearly there is some, but it is more likely to decrease defensiveness and start a productive discussion about the issue at hand.

As the person on the receiving end of the start of a discussion, it is your job to listen for what sounds reasonable in your lover's request. In this case, no matter how great the thing you bought at By George looks, or what your lover just bought on the Visa, it is reasonable for your partner to hold you accountable for your agreements with each other. Focus on just that and you will do your part in continuing a productive problem-solving discussion. You can get to other issues if they are still important later.

Fair fighting guidelines:

o The over-advised but still a good idea: use I statements. (Not "I think you are stupid," more like "I feel hurt when you don't kiss me back when there are people around.")

o Stick to one issue at a time; this is not a good time to start listing her many shortcomings and failures

o Focus on specific, changeable behaviors and don't generalize to character issues ("I wish you would empty the dishwasher more often" rather than, "You never do anything - I wish you weren't so lazy.")

o Be open to your partners' efforts at making things better (the joke he cracked after he turns you down for sex really may have been an effort at reconnection)

o Take time out only after agreeing on when you will get back to each other

o Follow through on the above

o Let your partner influence you

o Work on repairing any injuries afterwards

More important than using these specific guidelines is making an agreement with your partner about what you each expect when you are in conflict and then sticking to it. I'd recommend setting as high of expectations as is realistic for you, though. Some research indicates that unions thrive when the couple won't put up with much junk from each other. And no, it's never too late to tighten up your agreements with one another.

The main idea to walk away with is to have a strong friendship with your partner, nurture it generously and often, and then when you do get angry

with one another, protect the respect that you already have for each other.

The Intimacy Two-Step

By Sue Marriott, LMSW-ACP, CGP

You haven't seen your partner Jack in way too long and you have resisted complaining. Your mind is filled with various scenarios about what he may be doing without you and none of this visual scenery is comforting. You finally just ask to talk to him when you see him next. You get the blank stare you dread and then, slowly, with obvious reluctance, he agrees to hear you talk.

Or maybe you're on the other side of this two-step. You have had a perfectly fine afternoon at work until, right as you walk in the door, you hear your least favorite phrase from your lover Roderick.

"We have to talk."

The world stands still for a split second as your mind goes blank but your body goes into super-alert, danger-on-the-horizon mode. "Why can't he just be okay? God, do we have to talk about everything?" You have already told him you love him and, dammit, you'll let him know if the status changes. What more could he possibly want from you?

"Uh, sure," you mutter, checking your watch.

In couples' relationship literature, it's called the pursuer-distancer dynamic. You may recognize it as the intimacy dance on a good day, the Coyote and Roadrunner cartoon on a bad one. In all long-term relationships there is some degree of one person initiating contact and closeness more often than the other. In the best of all worlds, these roles shift intermittently and the chaser becomes the pursued (usually when they wise up and stop chasing) and vice versa.

With whom do you identify the most: the forever longing but never quite capturing their raison d'etre Coyote, or the ever-elusive Roadrunner, whose "Beep!" only entices us not to give up the chase?

This swing from pursuer to distancer is part of life from the beginning. A relational map is laid down early in life based on a variety of factors including temperament and the ways your early efforts at connecting were responded to by your caregivers. Remember that the very first lesson in life is trust, and from there you make all kinds of assumptions about how safe the world is, how safe people are and how much closeness or distance is optimal for you. If your lover feels too far away you seek contact; too close and you pull away to regain relational equilibrium.

So let's return to Jack and Roderick. What do you suppose is really going on in this scenario? A reader with a more anxious style of attachment might identify most with Jack and guess that Roderick is having an affair

or doing something else harmful to the relationship. An avoidantly-attached reader may identify most with Roderick and guess that Jack is just insecure and needy and should just get a life. A securely attached reader might guess that it's just a bump in the road of a good relationship that will get worked out now that they are going to talk about it. We will go into the different types of attachment styles and help you identify yours in a later column, but first things first - how to get the Roadrunner to slow down and the Coyote to stop blowing himself up.
Remember that the purpose of the pursuer/distancer chase is to maintain a certain level of distance and closeness in the relationship. As noted, if the chaser stops, most often the distancer will stop; and if the chaser retreats, the distancer will turn around and pursue, thus keeping the same amount of distance between each of you at all times. But this seesaw effect can be crazy making.
So how does one calm this pendulum swing and attain a comfortable level of intimacy? The goal is to strive toward attachment security.

For the Coyote:
If you are most often the pursuer of closeness, your job is to stop chasing so your significant other can have enough room to feel their desire for you without feeling smothered. Manage the anxiety that gets stirred up when you feel your partner drifting away by keeping the focus on yourself. Hang out with your friends if you still have any, and win them back if you've let them go since you settled down with your partner. Don't wait for anyone else to fill you up; it's your right and your responsibility to take care of yourself. Get a hobby, take a class, work out on your own or with friends, get support from someone other than your boyfriend or girlfriend. In other words, take the focus off of the Roadrunner and reassure yourself that your relationship is fine. Rather than mind reading, trust that if there is a problem, your partner will talk to you about it.

For the Roadrunner:
If you tend to be the one who most often feels crowded, you can help your partner back off by giving him or her a little more of you. The more you can put into words what you need the better. Saying that you need more space to recharge and that you will return is a much better way of alleviating your lover's anxiety. This will allow him or her to stop the pursuit and is a more effective way to get what you need than taking your space by disappearing in some form or fashion.
Your partner is doing you a favor by attending to the relationship - honor that and don't take him or her for granted. The Coyote won't chase you forever. I've advised the pursuer to back off and focus more on themselves, and to you I say to focus more on them. It's okay to have space away, but it is also okay to feel your closeness and need for your partner. Even though these modes of relating can feel hard-wired in our cells, it is possible to change them. I also know it's a lot easier said than done. Believe me (beep beep).

-----BEGIN PGP SIGNED MESSAGE-----

Jealousy: Shadow of Love or Green'Eyed Monster?
How much jealousy is "normal?" As it turns out, the answer is somewhere between "none" and "a lot".
By David A. Jones, Ph.D.

"Late at night, I found myself driving by the house we had shared. When I saw that little SUV parked in his driveway, I knew it belonged to his new boyfriend. My insides just turned to fire. I sat there in my car, staring at the light coming through the upstairs window of the house for what seemed like hours. I said to myself 'I know I'm a fairly well-balanced adult. What is happening to me? Have I completely lost my mind? I should be able to start my car and drive home now.' But I continued to sit there, hypnotized by that light. The lights finally went out, and I drove home, shaking. I had never felt so crazy."

"I knew our relationship was over, but I still had very strong feelings for her. Then, one day I saw her at the vet's where we used to take our animals when we lived together. She was with this totally lipsticked-out blond, the kind who spends hours picking out the right jeans, every hair on her head in just the right place - with our dogs. I knew that I looked like an absolute mess - red nose from allergies, the extra ten pounds I had gained since the breakup, laundry-day clothes. I think I just lost it - I walked up to her, punched her, and ran outside and fell on the pavement, sobbing uncontrollably. I felt like I was going mad."

What do these two people have in common? They are both experiencing the feeling of romantic jealousy. And what do they have in common with the rest of us? More than we might like to admit! If these two examples seem extreme to you, does that mean you're somehow free from this feeling that Shakespeare called "the green-eyed monster"? Probably not. Most people experience feelings of jealousy, even intense jealousy, at some point in their lives.

If you ask a hundred people, "What is romantic jealousy?" it's likely that you'll get close to that number of different definitions. What does it mean to you? Ayala Pines, in her book Romantic Jealousy, defines it as "a complex reaction to a perceived threat to a valued relationship or to its quality." The complexity stems from the fact that a jealous reaction may involve a constellation of internal feelings including fear, anger, sadness, humiliation, and grief. It may also include thoughts of resentment, self-blame, self-pity, and fantasies of revenge. Physically, we may have a churning stomach, feel faint, and have trembling, sweaty hands with a racing heartbeat. Romantic jealousy has an external component too.

Depending on its intensity, we may deny it, talk about it, scream about it, cry it out, or use humor. At the extreme, we may retaliate and get violent with the object of our jealousy.

If we note that Pines' definition specifically mentions "perceived threat" as the trigger for a jealous response, it becomes clear that the threat may be real or imagined. If we think that our partner is interested in other people, even if the threat is just a result of our wild imaginations, we are likely to respond with jealousy. On the other hand, if we feel secure in ourselves and in our relationship, we are unlikely to feel threatened and therefore unlikely to have a jealous response. However, most of us don't live our lives in imaginations running amok or in completely secure contentment. Most of the time, we're somewhere in the middle ground.

For many people, the strongest component of jealousy is a fear of abandonment ("She'll fall for that other woman and then I'll be all alone in the world....") which has its roots in early childhood experiences. For others, the more painful component is betrayal ("How could he, my best friend and the man I trusted more than anyone else in the world, lie to me like this?") or humiliation ("How dare you embarrass me in front of our friends by flirting with that slut?"). Still others experience jealousy as a form of competitiveness ("He fell in love with that guy? He must be a better lover than I am....").

Usually, jealous feelings cause us to overestimate the actual threat present in a given situation. Thus, while we may experience our partner's "scandalous" flirting at a party as an indication that they are about to leave us, in reality all that happens may be a temporary experience of embarrassment.

So, what does it mean if you and/or your partner experience feelings of romantic jealousy from time to time? For one thing, we know that in order for a relationship to trigger a jealous response, it must be valuable. So, if you're feeling jealous, at least we know you value your relationship. The question is, how much jealousy is "normal?" As it turns out, the answer is somewhere between "none" and "a lot".

People who claim to never have a jealous feeling or thought are likely to be somehow cut-off from important parts of themselves. Imagine for a moment someone who, upon hearing from their partner that they have fallen in love with someone else, enthusiastically exclaims "How wonderful for you, Sweetie!" Most of us just wouldn't think that person was quite "normal."

At the same time, if romantic jealousy is becoming a debilitating force in your relationship, or if you find yourself acting in ways that make you feel out of control, it may be time to ask for help. Couple therapists can often help partners find a way to address the roots of their extreme jealousy and learn ways to more effectively cope with the complexities of love. However, if you and your partner only experience mild jealousy from time to time, pat yourselves on the back for having a valuable relationship that is strong enough to contain all kinds of feelings and experiences, even the complex ones!

Dinner With My Elders
By Jeff Lutes, MS, LPC

Last Saturday was one of those magical days I will not soon forget. I met my elders. I'm not talking about my grandparents... well, actually I am. Let me explain.

You see, in the past several weeks I have been producing a short video about the diversity of relationships and families within our community. The video (which will be shown at the Metropolitan Community Church of Austin during services on April 21) is a collage of images set to music that captures just about every possible kind of family; male couples, female couples, lesbian and gay families with kids, straight families, and single parent families.

Last Saturday, while on my way to film another couple, a man approached my car as I waited for the light to change at a busy intersection. Turns out the man was passing out free soft drinks and inviting people to attend his church on Easter Sunday. Attached to the can of Coke was a small card with pictures of traditional, straight, white families and the words "Find what you've been looking for this Easter". As the light changed, my eyes filled with tears. I couldn't find anything even close to my family on that card.

Which is really odd because I just have your average gay-deaf-Jewish-Baptist-Chinese family.

Anyway, I guess I just thought it was sad that most churches still seem to be so uncomfortable with diversity and inclusivity. But, I picked up speed and grinned through my tears all the way to the next light. I realized how lucky I am to have my nontraditional family, and I felt incredibly blessed to be a part of a church family that embraces all God's children.

Later that night, I found myself eating dinner with three gay couples. The "youngest" couple has been together 19 years. The second couple 39 years. And then there were my grandparents. Not my parent's parents, but my new gay granddaddies.

They are getting ready to celebrate their 53rd anniversary.

Before dinner, I visited the lovely home where they have created years of memories together. I sat in their 1970s living room and watched in awe as they treated each other with patience, gentleness, and kindness. They told wonderful stories about things that happened before I was even born. They talked about how they met in 1948 (I did some quick mental math and

realized my parents were six years old when these two men got together). As I filmed, the three couples shared that staying together has not always been easy. They said it takes hard work, dedication, and tenacity. One of the elders (the other men call him "granny") smiled at his partner fondly and said he would gladly do it all over again, because in the end, it was worth it. His partner was not comfortable being in front of the camera. He said he's only in his seventies and doesn't plan on coming out to the world until he's 90!

At the restaurant, one elder pulled out a chair for his partner, and pushed him gently to the table (while I made a mental note to be more of a gentleman toward mine). As we were leaving, one of the men stopped to admire a plant in the restaurant lobby. He touched the leaves softly to see if they were real. An elderly woman passing by said, " I thought only ladies did that!" We giggled. If only she knew.

There was a time in American history when the older generation was admired, respected, and honored. We used to go to our elders for words of wisdom. We looked up to them and understood that their life experiences served as powerful sources of knowledge and sound advice. They were our role-models; astute men and women who could guide us and show us the way.

It seems that in more modern times our culture has become obsessed with youth and physical beauty. Too often we treat our elders with disregard and disrespect. They become invisible because we don't want to see them. We would rather not be reminded that, we too, will get older.

What a shame. We are missing out on so much.

Some heroes run to save others from an imploding New York skyscraper. Some heroes just sit in their avocado green recliner and love their partner for more than half a century, despite all the societal pressures that would try to tear them apart.

I couldn't help but wonder how much better the world might be if every church had a picture of this couple on their Easter invitation. Maybe these two aging gay "grannies" could help prevent a straight couple from becoming part of our country's 50 percent divorce rate. Maybe they could help a young gay couple figure out the meaning of true commitment. If only we were more open to hearing their voices.

The next day was my fortieth birthday. I thanked God for the many blessings in my life so far, and prayed for the courage to live my next 40 years with as much grace and humility as I had witnessed on Saturday.

The Keys to Understanding and Preventing Affairs
By Sue Marriott LMSW-ACP, CGP

How vulnerable are you to having an affair? Put yourself in Mark's shoes.

Mark is incredibly attracted to Bill, who is Mark's long-term partner's friend. Mark feels noticed by Bill, and Bill is enthusiastic towards Mark's so far clumsy efforts to learn photography. Mark's partner Roderick is busy with a new job and trusts Mark and Bill to spend whatever time together they wish.

Whether or not Mark will end up in an affair with Bill is relatively predictable depending on one critical factor that only he controls: honesty.

Whatever your sexual agreement with your partner, e.g. monogamy, monogamy with agreed upon exceptions, etc., there are agreed upon limitations that take each partner into consideration. Couples that make it are those that keep the number one rule in mind - the rule of honesty. Duh, everybody says honesty is important in relationships, but if you are truly honest with yourself, you know you are not always honest. So how can this prevent an affair?

Actually, we are wired to have affairs. Human beings are one of only a few animal species that attempt to mate for life. We are designed to be attracted to people who meet our needs, and we naturally bond with people who show us attention and care. However these very human tendencies need not turn us into beasts in our closest relationships.

Contrary to popular opinion, affairs are most often borne out of simple loneliness. One-night stands are a different animal that often involve strangers and alcohol and are very short lived; they have their own dangers. Affairs, on the other hand, are generally much more toxic to a committed partnership. They usually involve a friend or co-worker or someone else already in your life. You "innocently" make a much-needed emotional connection with an available, kind person. Spark!

Most people who have had affairs say that the sex usually comes later, after the conversation and affection. And because the emotional connection can be strong, the sex is often great. The set-up to think, "Ah ha, this is true love and I've married the wrong person." Funny how you don't rush home to tell your current partner so you can correct the mistake and get on to

life with your true soul mate.

You see, it doesn't make practical sense to break up just because you are not getting the attention you think you deserve. Affairs are about peeling off an as-yet unmet need and trying to meet it (secretly, usually) outside the marriage. It is rare that you actually leave the partnership to be with the person with whom you are having the affair precisely because you know at some level that this other person is also not capable of meeting all your needs, either. The "solution" is to try to have both.

It's easy to fantasize and get delusional about this new absent lover - you are filled with the love drug again, your contact with each other is limited and secret, and danger spikes passion. You don't have to fight over who shrunk your shirt in the laundry or the piles of paper they stack up on the kitchen table. You unknowingly fill in the blanks of what you don't know about each other with your fantasy of what you hope.

Then, at home you have cut yourself off even more from your partner, and (s)he is probably aware at some level that something is amiss. If left unchecked, the drift continues and you eventually separate to "take some time apart" while usually denying and covering up the affair.

When it does eventually comes out, you then have a double betrayal to deal with - the affair itself and no less importantly, the lies and deception leading up to discovery. For many relationships, this would be a fatal blow to your long-term partnership. And if whatever caused the affair to begin with doesn't get addressed, you may well end up with the scenario again given some time for it to repeat itself with the new lover.

The good news is that most marriages do survive affairs. But the best defense against such a painful strain is a good offense - prevent any potential affairs from ever taking hold by dealing honestly with what you are feeling.

Let's go back to Mark and Roderick. Mark is aware of the danger of these feelings if kept secret, so he tells Roderick (not Bill!) about his attraction to Bill. This is painful but not nearly so as an affair, and it brings the attention right back where it needs to be - on the distance in Mark and Roderick's relationship. Mark let's Roderick know he's been missing him since he got that new job, and that he feels more distant and less alive in the relationship now than ever before. Roderick is shocked and angry, but with time and care he comes to realize that in fact he got lost in his job partially to please Mark. He wanted to take care of him financially and to appear important and powerful in their relationship. He did not realize that Mark needed his attention, not just his paycheck, and this revelation opened the door for more intimacy in their relationship.

The fantasy of what Bill had to offer is the projection of what was missing between Mark and Roderick that needed reworking. Roderick gets a chance to get closer to his partner and this process often leads to the dissolution of the attraction to Bill. If the attraction does not wane, Mark should reduce contact with Bill or it may even be necessary to even cut off his

friendship with Bill in order to protect his long-term committed partnership.

Whatever else happens Mark should never, ever, ever talk to Bill about his feelings for him, or about the problems in Mark and Roderick's relationship. Mark should turn to other safe people to discuss these matters and get support in working on the problems in his long-term relationship with Roderick.

The feeling of romantic love is so powerful it can ruin reputations, careers and families. Mark should not listen to this fickle emotion, but his long-term friends and trusted others to help him through this. Mark may eventually choose to leave Roderick, but by finishing one thing before starting the next he has given the next relationship a much better chance of actually making it. And in the meantime, chances are Mark would have actually revived passion and aliveness to the mature, enduring love he shares with Roderick.

Past the Honeymoon Stage
By Sunny Lansdale, PhD, LPC

Most of us have experienced that heady, erotic, adrenaline driven experience called falling in love. Some of us have enjoyed it once or twice, and others have been there too many times to count. Regardless of the frequency of this sweet ride, most consider it wonderful. We sing, smile a lot, fantasize endlessly about our next encounter with Mr. or Ms Right, usually lose weight because we're not getting enough sleep, and dare to dream that this could be the one. This period is called the Honeymoon Stage of the relationship and, unfortunately, as sweet as it is, it cannot last. No one can sustain the full intensity of such an experience over time. As the honeymoon is winding down or coming to a screeching halt depending upon the styles of the participants, some decide they've fallen out of love and are off to find another wild ride. For others, the change is the signal that they've entered into the second stage of relationship.

I have heard people say they could almost hear the click when they went from one stage to another. That sweet woman whom they couldn't keep their eyes off of suddenly begins to sound like Mom, or that mesmerizing hunk of burning love becomes the other side of an old familiar power struggle. There are lots of different labels for this second stage contingent upon the various struggles announcing its arrival. Some examples follow:

1) The Power Struggle Stage - Every couple has to address issues of power and control. Who is in power? Who makes the decisions? How is the power distributed in the relationship? Sometimes an abrupt change in the distribution of power proclaims the end of the honeymoon stage.

2) The Fighting Stage - All couples experience disagreements and anger. The key is how do they solve disagreements or manage anger? Often the first real fight moves a couple to the second stage of relationship. Sometimes the second stage is primarily characterized by disagreements and fighting.

3) The Disillusionment Stage - You are not who I thought you were. My dreams are not going to be realized. Did I create an illusion and fall in love with it? Every relationship has a certain degree of illusion making and subsequent disillusionment announcing the end of the honeymoon. Typically, this is known as falling off the pedestal.

4) The Transference Stage - Issues from our past relationships affect the quality of our present relationship especially if there are unaddressed

issues of trauma or abuse. The truth is we all bring our issues from the past into our relationships and the more important someone is to us the more likely we are to bring those issues to life. For example, if our new found love is having a moment of reverie gazing thoughtfully out of the window and we interpret that behavior as hostile withdrawal reminiscent of our stepmother's treatment of us when we were a child, chances are we experiencing transference. Essentially, when our past begins to distort the reality of our present relationship, we are well into the second stage.

5) The Working Stage - Whether the second stage of a relationship is characterized by one or all of the above examples, it requires some effort to manage the issues that have surfaced. It does not mean that the fun is over. It does mean that the relationship has moved to a new level; and if the fun is going to continue, these issues need to be faced.

It is tempting to treat the end of the honeymoon stage as a bad thing. Actually just the opposite is true. If the relationship is to grow and deepen, it has to move beyond the first stage, as exciting and wonderful as it is, into the growing pains of the second stage.

The bottom line is, the second stage is about our own personal growth. We have to face the ghosts of our old pathological patterns and disfunctional defenses if we are going to sustain the relationship. Now isn't that great news! We find the partner of our dreams and then discover that if we are going to ride off into the sunset with our find, we have to develop some self awareness and probably address some old unfinished business. Not surprisingly for many of us, it is just too much trouble. We would rather hop from honeymoon to honeymoon, relishing the early stage and taking our leave when the work begins.

Of course, the same process is going on with our partner. About the same time we are being triggered by some perceived irritating imperfection in our prince and/or princess, chances are they are being driven up the wall by something in ourselves which we deem to be innocent or misunderstood. Not only are our old ghosts surfacing, they are consorting with the ghosts of our partner. The ensuing dance can be both provocative and painful.

Unfortunately, the dance or pattern can also be familiar. It has not missed the attention of those who study relationships that we often ingeniously and unconsciously choose potential partners with issues that provoke our own and vice-versa. This appears to be driven by a need for psychic repair. Unfortunately, it also appears that we can repeat the pattern over and over again with partner after partner until we finally get it - or not. The optimistic perspective is that this new relationship is opportunity for growth. The spiritual perspective is that it is no accident that this very person has come into our lives.

So the second stage of relationship is about both parties attempting to learn how to live with another human being in a way that promotes their own and their partner's healing and personal growth. Sounds kind of intimidating doesn't it? Here you are thinking you are just enjoying the titillating excitement of the honeymoon stage and you might be about to

embark on a transformative experience for both parties. Attempting to navigate this second stage is challenging to say the least. Sometimes the participants discover that there is not a sufficient match to support or sustain the growth of both parties; sometimes they discover the level of commitment and hard work it requires is beyond their willingness or skill; and sometimes they discover they need the help of a professional to assist them through unknown and possibly frightening territory.

This is probably the best place to correct a possible misunderstanding. Talking about all this work gives the impression that we have no choice but to abandon the euphoria of the honeymoon stage for the salt mines of the second stage where we are doomed to slave away masochistically pursuing an illusive process that takes an indeterminate amount of time for questionable results. If true, it would make sense to bolt the second the honeymoon begins to wane. Realistically, the second stage does involve work, but if it is not balanced by growing satisfactions, a generous helping of delight, and occasional moments of bliss, it would make sense to question continued participation.

This brings us to the third stage of relationship, called the practicing stage, which involves putting to use all the things that have been learned in the second stage. It is important to point out that this process is not strictly linear. The third stage does not happen all at once; it gradually emerges as we grow through the second stage. Also, life is always is serving us new challenges and we, individually or in tandem with our partner, are routinely called upon to revisit the second working stage. However, each experience builds upon the last and gets easier as we practice.

Ideally, the third stage is the place where a new kind of love can be experienced which makes the honeymoon version pale by comparison. It is a love that is capable of revisiting the pleasure and excitement of that honeymoon experience but is not primarily defined by that excitement. This love comes from a part of us that lay dormant before we began the task of self discovery that being in a working relationship demands. It is a love born of the mutual risk of vulnerability and the creation of ever deepening more intimate connections with our partner.

Most of us, in the course of our lives, make several attempts at getting this relationship thing down and have had our false starts, agonizing disappointments, and necessary but unpleasant learning experiences. We might even see the rationale behind hopping from honeymoon to honeymoon expecting little else. Then again, maybe if we understand the process and the potential reward, we will be able to not only savor the honeymoon stage but all that lies beyond as well.

The Rules of Anger in Relationships
By Sunny Lansdale PhD, LPC

Your temperature goes up, face flushes, jaw sets, heart pounds, and muscles tense.

Instantaneously your whole body goes into attack mode with images that could make a schoolgirl cringe flashing across your brain. Communication deteriorates into a screaming match and unkind accusations. Whoa! What's happening? Could it be that a button's been punched and your adrenaline has you launched into aggressive overdrive? Then after a dramatic display of flash and fire, do you return to normal with the appropriate display of remorse and apology?

Or maybe the way you experience anger is not flash and fire but the slow burn which simmers and builds over time and then explodes like Mt Vesuvious requiring a long time to cool down with hot pockets of lava hidden underground to be reprieved when needed. What happens when two of the first type are in relationship? Or the second type? What is your individual anger profile? What is the anger motif of your relationship? Does it escalate into the tragedy of violence and its shame filled aftermath or steep in hostile silence and passive aggressive distance, which spells death to passion.

Before considering such questions, it might help to explore some thoughts about the nature of anger, and the role anger can play in your relationship.

To rationally address this issue, it is important to understand the role of anger in human experience. Out of control displays of anger justifiably get very bad press in our culture. Unfortunately, the personal experience of anger itself often falls prey to this same judgment. In reality, anger is just another human emotion like sorrow, joy, or fear. It is not good or bad, it just is. Essentially, it gives us information and provides us with energy.

Some believe that if we did not have anger, we would be very vulnerable in the world. Consider our forefather hunting in the forest for food and suddenly a hairy hungry flesh eating predator leaps into his path. Grampa had a choice - to fight, to flee, or to freeze.

All of these options required adrenaline. Essentially, we get a surge of adrenaline any time we perceive that we are about to be violated and that surge is often identified as anger.

Now, consider if that hairy beast wasn't after Grandpa but ran off with Grandpa's hard won dinner, which had been roasting over the fire. Grandpa would be frustrated because something he needed was denied him and that frustration could also be experienced as anger, at himself, at the beast, or at his misfortune.

In today's world, it is not the beast in the woods which violates us or thwarts our needs. It can be the 18-wheeler that cuts us off on the highway, or the line at the bank which prevents us from getting our check deposited, or the significant other who forgets our anniversary. Often it is not one of these adrenaline producing events but several that cluster within our daily context that present us with the challenge of containing and managing a lot of frustration. Unfortunately, our culture does not do a very good job of teaching us how to meet this challenge. We often attempt to manage our frustration by blaming ourselves and beating ourselves up which is a short steep path to depression. Or we target others, especially our most significant other, with angry outbursts costly to everyone.

Another factor which contributes heavily to our anger motif is our past.

Sometimes an apparently benign act touches off a trigger which taps into old unfinished business. Before we know it we are riding an old angry train which has ten percent to do with the present and ninety percent to do with the past. In fact, anger which is inappropriate and disproportionate is almost always about the past. Unfortunately, it does not feel that way at the time. Research on how the brain processes and integrates information indicates that when we have an experience which triggers old unfinished emotional business, access to our frontal lobes where we do our rational thinking is reduced. Great! At the very moment we most need to be able to understand, contain and process our response, we are least able to do it.

Essentially, we often do a piece of emotional time travel where it feels like we are back in the past fighting the old battle with all the intensity that battle demanded when the truth about the present is that it may bear only a slight resemblance to that original event.

So what does all of this have to do with anger in relationships? First, it is important to normalize and depathologize your experience of anger if you want to manage it. The issue is not whether or not you experience anger, that is a given. The issue is how you act upon your anger; that is where the potential destruction exists. I often think of anger as a massive Doberman pincher that you own whether you want it or not. If you respect and take care of it, understand what drives it, learn to control and manage it, you have a protector and a friend for life. If you neglect it, cage it in, pretend it isn't there, underestimate or deny its power, it can break out and go for your throat or the throat of your partner. By the way, don't forget, your partner has a massive Doberman as well.

Anger in relationships can be expressed in numerous ways. The positive way is to perceive anger as the red flag which highlights the problem to be solved and to use the energy anger generates to set about finding an appropriate solution. Much easier said than done. Because anger is an intense physiological experience and because we are not taught to use our

anger in a positive way, we can easily respond to our anger destructively. Here are two examples.

Passive Anger

This is anger that goes underground. Instead of being expressed directly so the issue can be defined and a possible solution created, passive anger resides beneath the surface. It can wait, sometimes for years, hidden beneath a cool exterior behind smiling disclaimers of "Nothing's wrong" or "I'm O. K." only to surface in passive aggressive behavior, physical symptoms, or the toxic veil of distant silence. Sometimes the underground anger reaches mammoth proportions difficult to contain and susceptible to some insignificant incident which ignites the volcanic action described above. This explosion can surprise everyone even the individual who exploded. It seldom correctly defines the issue much less creates an appropriate solution. Suppressed anger can also make us quite sick. Medical research has found a significant connection between "nice" people who never get angry and some not so nice diseases. This is the ultimate price for anger turned inward. Unfortunately, the passive approach to anger is the one sanctioned by society for many of its members. It is typically considered socially inappropriate for women to be angry thus numerous women have learned to deny or to avoid any experience approaching anger. It is not unusual for many women and men as well to get sick or depressed before they realize they are really pissed off and have been for a long time. Relating to passivity is like trying to grab smoke. You know it's there but you can't really pin it down. Imagine the numerous issues produced when two passive people attempt to have a relationship. Both people know something's wrong but no one has a clue what it is. The far more prevalent pattern is the passive person involved with the dominant, sometimes overbearing individual.

Escalation to Violence

At the opposite extreme from passivity is the angry response gone over the edge, the aggressive impulse violently acted out on some unfortunate target; often the target is a significant other. This violence can be physical, emotional or verbal. In addition to being totally unacceptable, this pattern is a tragedy for everyone. This topic deserves more attention than there is room for here but several issues need to be noted. Unlike the passive individual, the violent person has limited capacity to contain their anger or frustration and little or no impulse control. The critical question is why? Is it because that individual doesn't care about the damage they do? Is it because violent power plays are condoned by their family or their culture? Or is it because they don't yet have the skills to manage their anger or to address the issues from the past that have compromised containment and self control? Certainly, the last possibility offers the most hope; however, whatever the reason, unquestionably the primary issue when violence erupts is reestablishing safety however that has to be done - even if it means the ending of the relationship. The harsh truth is that whatever was the original issue that needed addressing is lost whenever violence occurs. It becomes superceded by the violence

itself.

For some it may seem like a victory but it begs the real question. Emotionally, both the one being violent and the one targeted are both victims.

One reason both the passive and the violent response to anger are destructive is because it is impossible to determine the real problem so that it may be addressed. The energy required to find a solution is passively withheld or discharged in acting out. The most important thing about anger is that it spotlights the issues. If we pay attention to our bodies there well be no mistake where some of our major issues are. The juice of our adrenaline ultimately tells us what needs attention, what boundaries have been violated, what old wounds still need healing, and what is our leading edge of growth. Our job is to feel and contain the emotions that emerge, learn to language our frustrations in non abusive non-targeting ways, and know that the ultimate goal is to focus on new mutually agreeable solutions. When dealing with anger, the difference from being alone and being in a relationship is to recognize that your partner is going through the same process; and from time to time, you will inevitably bump against one another. To understand the role of anger in relationship lends insight, understanding, forgiveness and even gratitude to the process.

These Things Come in Stages
By Sue Marriott, LMSW-ACP, CGP

Ah, these most coveted and dreaded of things called relationships. They are maddening no matter, and they invite the ugliest part of ourselves to emerge as well as the most precious, tender aspects of our being. Damn them. This is the first of a four-part series on the most elusive of relationships, the long-term, romantic variety.

Some of the major conflicts couples face have more to do with the stage of relationship they are in rather than something really "wrong" within the couple. So, this first column will address the stages of same-sex relationships. The following is from a combination of studies and general theories (bibliography available upon request). Read it as a fluid cycle rather than a linear list, as each couple spends more or less time at each stage depending on many factors, and they go back and rework stages as necessary to continue growing. Try to identify where you tend to get stuck in trying to develop long-term relationships or where you and your partner are, then compare notes.

The first stage is The Urge to Merge. This is that feel-great, highly idealized romantic stage that many people presume will last forever. The infatuated couple is together a great deal; they no longer feel isolated and each are consumed with the other, even when apart. Each partner is idealized and differences are de-emphasized. This is a time of high sexual activity and when you get that euphoric "love high" so often sung about by teen idols and Hollywood story lines

While it feels great when you're in it, it's partly based on the fantasy of you who you hope and need the other person to be and what you dream your new love relationship will be like. This stage is designed to arrest your attention, pheromones and dreams, but it is not designed to last. Merger and fantasy begin to give way to a love more substantial.

After this love high, it may be weeks or even a year before you enter the second stage, That Used to be Cute, but... There is still a strong felt sense of love, but anxiety can set in as the couple tries to find compatibility, set up house, and commit to one another. Differences are coming into awareness for the couple and what used to be cute might begin to be annoying.

"I thought he was the one but now he's not so hot. Maybe I made a mistake." Remember, things are cooling off now because your desire levels were artificially pumped up due to the "love high" of Stage 1, and they are returning to more normal levels now. This will happen at some point no matter who your lover is. Ambivalence is normal at this stage. The payoff for staying the course through Stage 2, of course, is that each of you gets to see and be wholly seen and appreciated for who you really are - not a two-dimensional figment of someone's imagination.

The third stage begins when the "WE" loses to "ME." Some folks say this is when love emerges as a verb. This stage is marked by the need to individuate and re-establish a separate sense of self. The tricky thing here is that it sometimes does not emerge at the same time for each partner and thus can cause conflict.

Fear of being smothered and/or abandoned often gets triggered in this stage, which can temporarily make anyone feel pretty insane. The relationship is deepened or threatened as each member begins to take risks by expressing things they dislike about the other and admitting that they need more than just each other. It is a challenging time for most couples and many need outside support to work through this stage.

On the up side, the third stage is also the time of creating more honest and open communication patterns, creating a real sense of home, resolving issues of sexuality and monogamy, and establishing rituals and traditions with one another, all increasing the felt sense of stability of the couple.

When the issues of Stage 3 are settled and dependability strongly emerges, the couple enters the fourth stage of same-sex relationships, the OK, I Can Count On You stage. The couple can now balance the WE vs. ME issues, with each partner being both an individual and an interdependent part of the couple. Intimacy is enhanced which often leads to enriched sexuality. The couple can now collaborate towards new goals and pool resources better than ever. Each may have a felt sense of rediscovering the other and falling in love all over again.

Often, couples learn to depend on each other and then move in to Stage 5, the I Accept You Completely...Yaaawn. There is deep acceptance and trust and little desire to change one another after recognizing and fully accepting each other. Close friendships and companionship are the main characteristics of this stage, as well as a higher quality of relationship. Financial resources are no longer shared as much as they are owned by both.

The couple may find life with each other too settled, however, and may begin to take each other for granted. The individuals may experience their own mid-life crises. Again, recognizing that it is simply a stage in a maturing relationship and a stage in individual development helps. So does working to rekindle the passion and romance, and reconnecting with one's fondness and admiration for the other. There was a good reason you fell in love - remember and celebrate your lover.

After resolving these issues the sixth and final stage - Mature Love - is reached. The couple indeed "falls in love" all over again but this time it

is with the actual person in front of them rather than the fantasy of who they see in Stage 1. Independence and interdependence are balanced, deep intimacy and security is reached, and sexuality is enhanced. The couple also enjoys fond memories of shared time together, while issues of health, financial security, productivity and meaning of life may become more important.

The couple at this stage often shares strong spiritual experiences, regardless of religious differences, and a new, creative energy unique to the couple may emerge along with a desire to give something back to the community. And the really rewarding, fun part is that you keep dealing with the vicissitudes of life as you need to but with the security and confidence of knowing you will be together forever.

My question is why did we get CHANNELS in the first place?
Am I missing something here?
What are they for?

>> The granting of just five spot frequencies--5332, 5348, 5368, 5373,

Mr Stagger Lee,
As I had a few moments I have never minded viewing another ones positions as this is a free country thanks to folks that worked at that issue a heckuva lot more than type on a damn computer. ITS JUST WHEN YOU STATED BY QUESTION "ARE WE THE NEW NAZIS".? I PERSONALLY DID NOT GIVE THAT OR ANY OF THE REST OF YOUR BABLINGS ONE MORE MINUTE..THE TRUTH ABOUT YOUR FREE SPEECH IS THAT OF COURSE WE ALL HAVE THE ABILITY TO CHANGE THE CHANNEL OR TURN YOU OFF AND THAT IS EXACTLY WHAT I DID. I MEAN THIS. DONT YOU EVER SUGGEST ON ANYONES BEHALF THAT ""we:"" COULD POSSIBLY BE CONSTRUED AS THE NEW NAZIS. YOU HAVE THE RIGHT TO SAY WHAT YOU WANT BUT NOW I AM INVOKING MY RIGHT TO TELL YOU NOT TO INCLUDE MYSELF AND MANY OTHERS I AM QUITE SURE OF THE FACT THAT WE DONT APPRECIATE YOUR REFERENCE THAT WE ARE YOUR SO CALLED "NEW NAZIS" BECAUSE WE COMPLETELY DISAGREE WITH ANYTHING YOU HAVE TO SAY AFTER THAT POINT. WHY DONT YOU START YOUR OWN NAZI PARTY BUT LEAVE DECENT PEOPLE OUT OF IT. WE HAVE ABSOLUTELY NOTHING TO DO WITH NOR WOULD WE SUPPORT ANY ASSHOLE IN SUPPORT OF ANOTHER HOLOCAUST. AND I AM NOT JEWISH. JUST COMPASSIONATE AND IF YOUR TICKED OFF BECAUSE THIS IS IN CAPS INSTEAD OF LOWERCASE THEN BLOW THAT OUT YOUR PROVERBIAL ASS AS WELL. YOU MAY FIND SOMEONE WANTING TO HEAR THAT.
THANKS

Well, QST will just have to tell us, along with the announcement of
our new secondary allocation (and when we get to use 'em) the
numbers we need to dial up on our rigs to get us where we need to
be. Seems that different radio services specify carrier frequencies
differently....

When time comes, I'll just program the 5 frequencies into my
rig's memory (like #51 for 5MHz band channel 1, #52 for 5
MHz band channel 2, etc.) and browse via memory mode
when I want to surf that band. My rig also stores what mode
(USB) goes with those frequencies.

Or 3) hams educate each other about the strange way the frequencies
were expressed by the FCC on this band, and what we really need
to dial up on our rigs to be in the rules. We can handle it....

QST, packet radio, and the Internet will take care of it, and word of
mouth should take care of it.

Sounds like most of our transceivers, coupled with somewhat lossy
coax and antennas cut for 40 and 80, should comply with this
power level restriction.

What about beams? Can I concentrate my effective radiated
power in one direction, or do the rules consider that to be
exceeding the max effective radiated power in that direction?
Like looking like 500W in that direction and 1 watt in all other
directions? As if I took the 50W that was spread all over
all directions and concentrated it in a narrow beam direction.
Or maybe I can only use a QRP rig with that beam?

Depends on whether your rig reads "assigned frequency" which
is the center of the occupied bandwidth or the frequency of the
suppressed carrier which (theoretically) is the lower edge of
the occupied bandwidth.

Wrong. The FCC Rules (Sect. 2.1 - based on the International
Radio Regulations) define the "assigned frequency" as the
center of the occupied bandwidth, not the suppressed carrier.
If your rig reads the suppressed carrier frequency, -you- have
the make the mental adjustment to keep the center of the
occupied bandwidth where the FCC tells you to.

>So now the frequency assigned is not the frequency you use.

The frequency you "use" is whatever your rig reads to put the
center of the occupied bandwidth where the FCC tells you to.

> It's stupid.

Not at all. It's the convention followed by the commercial
services all over the world. It's your rig that may be lying
to you.

> Look for scads of hams to fall to that little quirk of ignorance on FCC's
>part.

Look for scads of hams to fall to that little quirk of
ignorance on THEIR part.

The Rules are specific on what "assigned frequency" means.

I do believe that this was handled by the technical staff in
the International Bureau (the bureau that is the liaison with
NTIA) as well as by Bill Cross (who is an active ham) in the
Wireless Telecomm Bureau (the bureau that handles rulemaking in
the Amateur Radio Service).

The politicians in the FCC are too busy conglomerating
broadcast ownership, fostering wireline competition, auctioning
off gobs of spectrum to "wireless" carriers, and figuring how fast
they can put the internet on power line carriers to deal with any
Amateur Radio rulemaking.

Reread the announcement; "effective radiated power". It is putting
the antenna into the picture, rather than specifying output power
or even input power. If you're antenna supplies gain (and due
to frequency relatively few have the space to put up some sort
of gain antenna at that frequency), then you'll have to reduce
power so the "effective radiated power" is still 50watts.

Reminds me of an article in 73 thirty years ago. Someone
describes an antenna with tremendous gain, despite being omnidirectional
and not looking any different than a 1/4 wave whip. The fine print,
of course, was using an antenna in the trunk of the car as the
reference antenna, so the whip put out a lot more power compared to it.
A ridiculous situation, but it does point out that gain and ERP
mean nothing without the reference being stated.

The quote does specify, over a 1/2 wave dipole, so if you're using
that you can't be outputing more than 50watts. If you've got
an antenna that actually provides gain over a dipole, then
you will have to reduce power further.

All our rigs read nominal carrier frequency. Any textbook will tell you
that SSB frequency is normally reckoned as the nominal carrier frequency.
'Assigned frequency' is a miltary term, as per the primary users.

Phil, no matter what the source---it's STILL stupid.

A stupid can be nothing more than a stupid rule.

Looks like new VEC questions for the general and extra pools will be
like:

On the 60m amateur allocation of "5332 KHz", and if your
rig displays the frequency of the suppressed carrier, you need to
set the rig to:
a) 5332
b)5330.5
c)5333.5
d)5334

And:

When you're transmitting on a 60m ham allocation freq with a dipole
antenna fed by a length of coax with loss of 3dB, the rig's power
should not exceed:

a)50W
b)100W
c)70W
d)30W

I don't like to throw cold water on the party, but I don't see much benefit in

the new 60 meter allocation beyond having a few channels available for emergency use - and after all, that was *the* justification for asking for the assignment in the first place. Looks like we got the bare minimum we asked for. I hope time will see a serious improvement in the dimensions of the allocation, but one is left wondering about the short term....

There are plenty of potential problems with with "channelization" on HF ham bands, especially where frequency tolerance and specific maximum voice bandwidths are mandated. A great many older ham rigs, including PLL and other frequency synthesized units, have drifted far enough to very likely be out of tolerance For that matter, many fresh from the factory have in the past been

poorly adjusted. I know, no tolerance has yet been published, but it's certain that if discrete frequency channels are specified, a tolerance will also be. In a frequency band that is never a problem, one station or group of stations merely "zero beats" or tunes in the net control or other station, and everyone is talking on the same frequency-whatever each individual transmitter frequency readout shows. With frequency readout accuracy critical to compliance with the rules, a totally new situation arises. Whose rig if correct?
Yes, one can check it against WWV, but with measurement methods available to most hams, is that going to be good enough? And what if it "seems to be off"? Will most hams be able to adjust it accurately? Or even determine if it needs adjusting? Send it to the factory for their opinion? What?

And who knows just how close the tolerance on his SSB crystal filter might be? Are you *sure* you will be only 2.8 khz wide at the max? Really sure, now? It's well known that crystals almost always drift a bit with aging.
A typical filter contains several crystals. How do you know where yours cuts off? Can you check it to be sure?

For that matter, channelization on ham radio is a new precedent, as far as I know. Yes, "channels" have long been used on VHF, but they have always been within authorized bands, and violating a frequency tolerance was never an issue. At HF it's a new concept entirely, within ham radio. I can forsee a lot of outgoing mail from OO's and probably FCC also.

So..... I think I'll just hide and watch to see what happens. If I need to get on 60 meters for an emergency, I'll do so. Otherwise, I'm gonna sit it out until the situation stabilizes a bit - and the situation would seem to call for a bit of stabilization, fer sure. I think I'll spend some time just watching the show.

Dick

Former firehouse now home to lesbian, cats and Paraguayan memories
by Will Doig
Published on 05/08/2003

The D.C.F.D.'s Firehouse #9 was built in 1865. Following its condo conversion in the mid twentieth century, it was bought by the U.S. military and, rumor has it, used as a way station for money laundering during the Iran-Contra scandal of the 1980s. Jane Troxell, a manager at Lambda Rising, now lives there with her two cats.

JANE [in living room]: I went to Paraguay for two years with the Peace Corps. I sold everything -- the Saab, the house, the motorcycle, the business. I used to own Lammas [Women's Books & More] and now the Log Cabin Republicans are in that space. You have to roll with the ironies, I guess. So my decorating style now could be called "traditional regrouping." I'm regrouping in life.

The Peace Corps is not a high paying job. I had almost nothing left and had to start from scratch, basically relying on the generosity of acquaintances, friends, nature, the universe. In the beginning, I had all this furniture in a circle, and all of the Peace Corps Paraguay parties were here. We could all just bounce off of each other. But now, well, the room is linear. Parallel, actually. Before, social life had been coming in a circle, and then suddenly it was just parallel lives, crossing but never meeting. Now this entertainment center has become the focal point of the room. I don't watch much TV, so I use it to display my collection of Peruvian religious artifacts and Paraguayan erotic statues. This one is a lovely virgin from Paraguay. And these two figures were done by the indigenous people there. Here's the man and here's the woman. He's got a drum, a sword, a little bow and arrow, a bowl of water and all of these feathers. What does she have. A bundle of twigs on her head. She's carrying the firewood while he gets all the accessories. That pretty much crystallizes the experience down there in Paraguay.

[On deck] I had a bad relationship with food while I was there, and my kitchen is so uninspiring. It's small, there's no natural light. It's not a good kitchen if you want to get enthusiastic about food preparation. What I'd actually like to do is prepare food out here. There's no water, but there's a grill that I use when it's warm out.

I became vegetarian when Reagan was elected because I just felt like I had to do something. I was vegetarian for fifteen years before Paraguay. The food there was all white and bland. White rice, white pasta. Everything

white. I gained twenty pounds, then got sick and lost it all. Eventually I got so hungry that I just had to eat something, so I developed this addiction to rotisserie chicken. I was living in the capital at the time, so I had access to it. It really changed my life, and I've been eating meat ever since.

[In bedroom] Last year that deck was gorgeous, just full of plants. This is the only room in the house where I can have plants inside, because of the light. People give me plants that they can't keep anymore. My friend's mother died and so I took her corn plant. It was three inches then. Now it's a foot. Her legacy grows on in vibrant green. I like having unruly plants. I appreciate unruly behavior in all beings, floral and otherwise

Gay couple withdraws surrogacy bid
18 May 2003
By DONNA CHISHOLM

Two gay men who sought ethics approval to become surrogate parents have withdrawn their application, saying they are outraged at the prejudice against them and the way word of the proposal was made public.

They told the Sunday Star-Times the system which required them to seek approval was fundamentally discriminatory. Their application was to be considered next month.

"A single woman can get pregnant with the assistance of a fertility clinic and use the donor of her choice. Even a lesbian couple is not subject to such scrutiny."

The men live overseas but hoped to have a child through artificial insemination of the sister of one of them.

The Catholic church has publicly opposed the plan saying it would be wrong to deprive the child of its mother. But the men said they always intended the surrogate mother to play a significant role in the child's life.

They rejected the view that having two loving parents bringing up a child was undesirable just because both parents were men.

"Family units are more varied in their nature and structure today than ever before, and a modern society needs to adjust its thinking and perception accordingly."

Their lawyer Antonia Fisher said she had met both men and the sister. They were well-adjusted individuals with integrity and honesty and she was struck by their genuine desire to become parents. That desire remained, she said.

The men said there were deep-seated flaws in the ethnics committee structure and there were not appropriate guidelines or protections in place to cope with applications like theirs.

Many gay couples have children with men or women friends without seeking ethical approval, but Fisher said her clients wanted to do everything by the book.

Their attempts to work through the correct channels and within the system had worked against them, they said, and the committee had not approached

the application in the way they expected.

"We have been hindered by delays, costs and prejudice which we didn't expect to find in New Zealand."

Fisher has complained to ethics committee chair Professor Sylvia Rumball asking how potentially identifying details about the case were leaked. The details were not listed in the minutes.

"Our privacy has been invaded," the couple said.

Fisher said the men were mortified that such a personal matter had become public.

Rumball was out of New Zealand and unavailable to comment and her deputy Ken Daniels could not be contacted.

Ahmar Mustikhan, Gay.com / PlanetOut.com Network
Friday, May 16, 2003 / 05:26 PM

Fifteen cities and counties -- up from just eight a year earlier -- prohibited workplace discrimination in 2002 on the basis of sexual orientation, according to a report released on Friday by the Human Rights Campaign (HRC) Foundation's WorkNet project.

The annual report, fourth of its kind, also said 16 jurisdictions added protection on the basis of gender identity last year, up from five in 2001.

Altogether, 119 cities and 23 counties across the United States have so far outlawed workplace discrimination, according to the "The State of the Workplace for Lesbian, Gay, Bisexual and Transgender Americans."

"City ordinance is the only form of protection in states where discrimination at the workplace is allowed," Daryl Herrschaft, associate director for HRC WorkNet and chief author of the report, told the Gay.com/PlanetOut Network.

He said though the progress was tremendous and the majority of Americans support equal treatment, "vast majority of states, cities and counties still do not protect GLBT workers."

Herrschaft said, "Ignorant and uninformed religio-political activists who erroneously believe sexual orientation is something chosen have invested significant wealth and time into stymieing progress."

His senior colleague, HRC Education Director Kim I. Mills, who oversees WorkNet, said, "While federal law continues to lag, local and state legislators are stepping up and fixing some of the inequities."

Overall the improvements were significant. The number of employers offering domestic partner health insurance benefits grew by 16 percent in 2002, compared to 24 percent the year before; the number of employers with sexual orientation nondiscrimination policies rose by 7 percent, compared to 17 percent in 2001.

Said Herrschaft, "The fact that both indicators grew as much as they did is perhaps the clearest indication that these policies are good for business and that they have become a fact of American commerce."

The report also noted that 15 Fortune 500 companies had nondiscrimination policies covering gender identity at year end -- a three-fold increase over 2001; and 61 percent of the Fortune 500 included sexual orientation, up

from 51 percent in 1999.

It said 20 Fortune 500 companies implemented domestic partner health insurance benefits in 2002, accounting for a total of 169 by the end of 2002. The new ones on the list include Pfizer, Procter & Gamble, Sears, Roebuck and Raytheon.

The number of large corporations that publicly endorsed the Employment Non-Discrimination Act (ENDA), a federal bill to ban anti-gay job bias, jumped from 60 to 90 -- an increase of 50 percent from 2001. These included Agilent Technologies, Apple Computer, BP, Capital One Financial, Cisco Systems, Coors Brewing, IBM, John Hancock Financial Services, J.P. Morgan Chase, Levi Strauss, Nationwide, Nike, Shell Oil, Verizon Communications and Worldspan.

In 2002, New York became the 13th state to prohibit sexual orientation discrimination in the workplace, while Alaska became the ninth to prohibit such discrimination against state employees.

Thirty-seven U.S. states allow discrimination on the basis of sexual orientation and 44 on gender identity, according to the HRC.

MSP sets record straight on gay jibe

Pensioners' party MSP John Swinburne has offered to apologise for any offence caused by anti-gay comments allegedly made at a hustings meeting before the Holyrood elections.

Mr Swinburne, the only MSP of the Scottish Senior Citizens Unity Party (SSCUP), is alleged to have described homosexuals as "sick" at a hustings in Wishaw, attended by First Minister Jack McConnell.

Witnesses claim that Mr Swinburne admitted that he was homophobic and that he "did not understand this gay business" after he was asked his views on same sex marriage.

However, the 72-year-old MSP now says that he does not have a "homophobic bone in his body".

Same sex marriage

And he has signed up to Green MSP Patrick Harvie's Bill on Civil Partnership agreements, which would give gay couples similar rights to married couples, in a bid to set the record straight.

A spokesman for the first minister said that Mr McConnell had been "shocked" by Mr Swinburne's comments.

However, Mr Swinburne told BBC Scotland's Politics Show that he did recall being asked a question about same sex marriage but could not remember making homophobic comments.

"My response was as follows: 'I have been married for 50 years, I can't get my head round this problem. I do not understand it and as such I am not competent to give a direct answer'," he said.

If, however, other comments which are alleged to have been said by me have caused any upset to anyone in society, I will humbly apologise to them

John Swinburne
"That is all I can remember saying.

"If, however, other comments which are alleged to have been said by me have caused any upset to anyone in society, I will humbly apologise to them."

Mr Swinburne said his attitude to homosexuality was "live and let live".

"As long as they are living within the law I have no problems with anyone," he said.

The revelations comes just days after Liberal Democrat MSP Margaret Smith announced that she was a lesbian.

The married mother-of-two revealed that she was having a relationship with the wife of a civil servant.

By REBECCA CARROLL, Associated Press

WASHINGTON (May 16, 2003 5:28 p.m. EDT) - The number of U.S. employers offering health insurance benefits to same-sex domestic partners rose by 16 percent last year, according to a study released Friday by the nation's largest gay and lesbian organization.

The annual report also found a sharp increase in the number of local governments that passed laws in 2002 barring workplace discrimination based on sexual orientation employees.

At least 806 employers of all sizes expanded their health benefits in 2002 to include same-sex partners. A total of 5,698 employers offered health benefits to same-sex partners by the end of last year, according to the study by the Human Rights Campaign Foundation.

The number of Fortune 500 companies offering domestic partner benefits to same-sex couples grew by 13 percent for a total of 169 at year's end. ChevronTexaco Corp.; Sears, Roebuck and Co.; and Procter & Gamble were among the companies that introduced the benefits.

Married couples still get more work benefits than gays and lesbians. But Kim I. Mills, the foundation's education director and editor of the report, said progress is being made.

"As employers offer domestic partners benefits, that's a step toward a level playing field," she said.

Fifteen cities and counties enacted laws in 2002 banning discrimination based on sexual orientation, compared with eight in 2001. By the end of last year, 119 cities and 23 counties had such laws in place.

Policies that prohibit discrimination on the basis of sexual orientation were in place at 61 percent of Fortune 500 companies by the end of 2002.

New Census Data Gives Landmark Insight Into Gay and Lesbian Households
05.14.03

NEWLY RELEASED CENSUS DATA SHOWS AVERAGE CALIF. HOUSEHOLD HEADED BY
SAME-SEX COUPLE VERY SIMILAR TO OTHER STATE HOUSEHOLDS

Despite Numerous Similarities with Other Families, Gay and Lesbian
California Families Lack Equal Rights, Protections Under the Law

WASHINGTON - The average California family headed by a same-sex couple shares many similar characteristics with other state families -- including the number of children being raised, home ownership and home value - according to an Urban Institute analysis of newly released Census 2000 data commissioned by the Human Rights Campaign Foundation.

"This study should serve as a wake-up call to both state and federal leaders. Families headed by same-sex couples are much more similar to most other families than they are different -- yet all too often they don't enjoy the same rights and protections," said HRC Communications Director and Senior Strategist David M. Smith.

"The newly released Census 2000 data provides a detailed portrait of gay and lesbian families that can inform and frame public dialogue about issues that affect all American families," said Gary Gates, Ph.D., of the Urban Institute's Population Studies Center. "It reveals that laws on adoption, marriage, immigration, tax and military service clearly impact all Americans, regardless of sexual orientation."

The study showed that the average same-sex couple with children in California is raising 2.01 children, while other average couples are raising 2.08 children. While the size of families raised by same-sex couples is roughly the same as families headed by heterosexual couples, the number of rights and protections they are granted is not. Without any form of legal relationship recognition for same-sex couples, laws that most American families enjoy are not always available to children and families of same-sex couples.

"Given these findings, it is all the more mind-boggling that the California Supreme Court was asked just this week to nullify thousands of legal relationships between gay and lesbian parents and the children they are raising," said Lisa Bennett, who runs the HRC Foundation's FamilyNet project (www.hrc.org/familynet), the most comprehensive resource on gay,

lesbian, bisexual and transgender families. "What kind of society grants some children full rights and ties to both parents, but denies the same security to other children, simply because of who their parents are?"

In California, 60.6 percent of same-sex couples own their homes, and 67 percent of other couples own their homes, which, according to the census, have the same median value of $225,000. Same-sex couples, however, will often be forced to pay higher taxes on their homes as they do not have access to the tax, inheritance and shared property benefits that are associated with marriage.

"There are more than 1,000 federal rights, responsibilities and obligations associated with marriage that same-sex couples have no access to. Home ownership is just one example of how gay and lesbian couples are often forced to pay higher taxes for fewer rights than other Americans," said Smith.

The Domestic Partner Rights and Responsibilities Act, A.B. 205, is a bill before the California Legislature that would grant registered domestic partners and their families nearly all the rights and responsibilities currently available to married couples under state law. HRC is part of a coalition of groups in California, lead by the California Alliance for Pride and Equality (CAPE), working to support A.B. 205.

"From child custody and child support obligations, to community property and mutual responsibility for debt - gay and lesbian couples and their families need and deserve the same laws and protections that any other couple does," said HRC National Field Director Seth Kilbourn.

The frequency of same-sex couples and other couples in California in binational relationships is also similar, with 10.6 percent of same-sex couples and 11.3 percent of other couples in binational relationships. The Permanent Partners Immigration Act (PPIA, H.R. 832) would grant the same-sex partners of U.S. citizens and same-sex partners of lawful permanent residents the same immigration rights that legal spouses of U.S. residents enjoy.

"Immigration is yet another way that we see one set of Americans enjoying rights that other Americans have no access to. Supporting PPIA is one way that lawmakers can help to alleviate the inequity that gay and lesbian Americans face each day," said Smith.

Finally, the study also showed that California's gay men and women are an undeniable part of the country's military. In fact, 6.7 percent of coupled lesbians in California have served in the military, compared with only 1.3 percent of married women; 15.5 percent of gay coupled men have served in the military compared with 26.8 percent of married men.

"Clearly, there are significant numbers of gay men and lesbians serving in the military -- it is unconscionable that they should have to serve under a gag order while risking their lives for their country," said Smith. "In fact, these numbers show a substantially higher rate of lesbian women serving in the armed forces than other women, and yet their contribution is

marginalized by the deeply insensitive and cruel 'don't ask, don't tell' policy."

The new analyses were drawn from the recently released Census 2000 1% Public Use Microdata Samples (PUMS), a sampling of individual census records from one in 100 U.S. households. The census does not ask questions about sexual orientation. Rather, gay and lesbian families are understood to be households where the respondent identifies another same-sex adult in the house as his or her "husband/wife" or "unmarried partner." Data about the nation's single gay and lesbian population is not available from the census.

Information on individual states is being released incrementally, with California among the first 15 states to have data published. A full report will be completed once statistics on all states are available.

The Urban Institute is a nonprofit nonpartisan policy research and educational organization established to examine the social, economic, and governance problems facing the nation. More information is available at www.urban.org.

The Human Rights Campaign is the largest national lesbian and gay political organization with members throughout the country. It effectively lobbies Congress, provides campaign support and educates the public to ensure that lesbian, gay, bisexual and transgender Americans can be open, honest and safe at home, at work and in the community. The Human Rights Campaign Foundation provides public education on issues important to gay, lesbian, bisexual and transgender Americans.

"Technical Staff at FCC" is a standing joke on the professional
side of the industry. FCC has not had anything resembling a
"technical" staff for years. Bureaucratic bumbling and incompetence
more accurately describe today's FCC staff.

Oh, I don't know, there are mini-beams for 7 MHz, and there is a firm in Scotland (Antron, or something like that? - there are two firms with similar names) that make a 1/3 size beam for 40, as opposed to the Cushcraft, which is 2/3 size. I'm sure they could make a 60m version. Or maybe you could build a Maltese quad for 60? On first blush, some might be put off by 1/3 size giving you negative gain, but don't forget it would have a F/B ratio greater than 0 dB, and a somewhat lower radiation angle than a dipole as well, plus it would be in the clear (trees are very lossy), so I think in practice it wouldn't look that way. Not worth putting up a mini-beam for 5 chanels, though.

Yup, you got that one half correct. Today's FCC is populated
with politicians, but they have only one main mission, and that is
job protection, at all costs. Anything else is unimportant, unless
it affects job protection.

Steven,

While I think that Stagger's view is totally off base I must disgree with your position. I am not in favor of the government taking away anyone's rights no matter how foolish they may seem. I had two uncles in WWII who risked their lives so that people like Stagger could vent their foolishness into the air. One stormed the beach at Normandy and lost his left foot for the ungrateful people of France. The other was a navy pilot and was almost shot down by our troups on Guam because his plane had been shot up so badly that his radio wasn't functioning. At the time the Japanese were using captured American planes to bomb our installations so if you didn't radio in you were shot down before you could get close to our base. He had to ditch in shark-infested waters and be rescued. He did all of this so that people like Stagger had the freedom to make fools of themselves.

I heard a speech recently that was given during a "peace march" in South Korea. It seems like the "youth" of South Korea don't want us there any more. One elderly gentlmen stood up and gave a wonderful two-line speech. He said, "Fifty years ago 32000 young American volunteers gave their lives so that you could assemble here today and protest. If it wasn't for their sacrifice you would be cold and starving like our neighbors to the north." When he walked off of the platform you could hear a pin drop. So you see, ungratefulness isn't unique to France and people like Stagger.

Oh, wll, I've said enough.

Good day all, God Bless America!

Because that is what the FCC decided to do....actually it is based on the fact that that part of the spectrum in inhabited by FEMA/SHARES/ (US Government HF stations).

It was done for compatability. They operate on USB, so must we. We are SECONDARY users. And this will allow the PRIMARY stations to inform the SECONDARY users (hams) to shut down if needed in an emergency.

The fact that we got ANYTHING at all says volumes about how the Feds think of ham radio. Lets keep it up.

A quick trip report for anyone who might be interested.
I arrived friday morning just in time for the opening. I walked the entire outdoor flea market looking for "treasures". What I saw was loads of horribly over priced Collins rigs and several older (kenwood 520,yaesu 101) rigs priced at about double what they are worth. There were bargains but you had to be quick or they were gone.
Saturday morning I had great expectations of finding a good buy on a used HF rig only to have them washed away by the rain that started one hour after the opening and lasted all day ruining the outdoor flea market so I headed in Hara Arena which was packed....I was amazed at the number of ham operators who smelled like they had not had a bath in several days nor had they combed their hair or used deoderant...The stench was overbearing so I went back to my motel room as I had a early Sunday flight back home.
Overall not a horrible show but the weather really hurt everyone. I also wish people would bathe before mingling in a crowd....Better luck next year!

3064. Dayton 03 trip report

Well, I made the long trek to Dayton from
Delaware after missing Dayton 99/01/02
due to business. Somewhat easier this year
travel wise as I flew in via my partner's
Beech and all that was necessary was to
get a rental car once we landed at the airport.

I sorta wish that I'd stayed home. We got there
late Friday afternoon, got our room (reserved)
in Dayton and decided to go out and have
dinner, then hit the Hara early Sat morning.
Met many hams at our dinner and got to talking.
More so with my friend Carl (who is not licensed)
but told them many of his aero-stories and yearly
trek to Oshkosh. (Oshkosh is to general aviation what
Dayton is to Ham Radio and Mecca is to Islam)
I WILL make a trip to Oshkosh later this
Year FOR SURE!!

We get to the flea market bright and early...and it begins
to rain. A cold damp flea-market killing rain. This while
we were waiting in queue to get in also. I do not know
why but can someone please tell me why the dumbest
and dimmest-lightbulbs-in-the-drawer always seem to
get gate duty at hamfests?

We get inside and we are greeted by dozens of tables
on saw horses covered in blue plastic. Some had the sense
to bring poles and set up a makeshift tent/cover.
Just about everything that was available for sale on the
outside flea market (that was not water-soaked and thus
rendered as "damaged goods") was obscenly overpriced.
On guy had a TS-520S that still had pizza-sauce stains on the
main tuning dial. He wanted $400 for it. (Good luck pal, hope
there are lotsa suckers in attendance) We decided to go
inside. I felt like a sardene in the can. I got to see Icom's
new IC-8500 or whatever. The MSRP is $5000 for it.
I do not know about you but ANYONE who would pay
5K for a ham radio NEEDS to have their head examined.

Yaesu had a nice display, but then again I feel Yaesu are
the best engineered and designed radios going so I am a
bit partial. If you open up the covers of a Yaesu and and
Icom and a Kenwood and lay em side-by-side the difference

ir readily apparent. Yaesu looks like someone put some
thought and CAD into their designs. Everything fits into
place like the inside engine compartment of a Honda Civic!
Icoms and Kenwoods look like the inside of the $65 Korean
made VCR you just bought at Circuit City. Thruhole components
and wires all bent over, SMT components placed hap-hazardly
and the cheapest sheet-steel chassis used. Yeah...I'm REALLY
going to pay $5000 for an Icom that has a laptop LCD screen on
the front and inside looks like a rat's next of circuits with no
way for heat buildup to get out. (Attn all suckers! Blue Light Special
at the Icom Table!)

We left after just 3-4 hours, got some Pizza and beer, walked
around the airpark shop looking at all the new aero toys (my
friend was drooling at some kind of a NAV aid in a glass case
at the store like I would at a new Yaesu HF) and we took off
at around 5:00

Sorry Dayton, but I will not be back. Not because the Wx
crapped-out Dayton 2003, but because it makes no sense
to goto a convention, be wet and crowded in and uncomfortable
just to look at grossly overpriced radios. Better to purchase
online or go up to HRO's store in Newark Delaware which
is just 1/2 hour north of me.

See you Boys in Oshkosh!!!

This Year's dates are July 29 to Aug 04, 2003

-----BEGIN PGP SIGNED MESSAGE-----

WASHINGTON, May 14 (AFP) - Hoping to counter their image as the party of straight, white Americans, the Republican party is reaching out to blacks, Latinos, gays and other minorities in the hunt for votes.

With campaigning for next year's presidential and Congress elections already under way, it is demographics that weighs heavily on the minds of President George W. Bush and his advisors.

Population growth among blacks and Hispanics -- who tend to vote overwhelmingly Democratic -- is outpacing that of whites, and political observers say the Republican party must broaden its base to maintain control of the White House and US Congress.

"With demographic realities being what they are, you can sit still for a decade and the Democrats will begin to take over again," said political analyst Ron Walters of the University of Maryland.

The efforts have become evident in recent days. White House officials and Congressional Republicans held meetings with members of the Log Cabin Republicans, a national conservative gay and lesbian organization, at the weekend.

The attention to the homosexual vote comes after years of marginalization by the party, said the group's spokesman Mark Mead, who said that under the Bush administration, being a gay Republican no longer feels like an oxymoron.

"The president has said he has wanted to take the heartburn out of the party over this issue," said Mead, calling the White House courtship of gays "an incredible breakthrough."

There appears to be no such breakthrough as yet with racial minorities, however, although Republican lawmakers insist it's not for lack of trying. Republican leaders have begun a recruitment drive for more minority staff, for example, but so far there have been few applicants.

"The progress that has been made is collecting the names and resumes of those that want to work here," House Majority Leader Tom DeLay told a recent press briefing.

"We are an open and inclusive party to anyone that believes in the same things that we believe in," DeLay said.

Republicans are also taking part in more photo-ops like one last week, when Pennsylvania Senator Rick Santorum joined other party leaders for a ceremony at the Frederick Douglass National Historic Site, the boyhood home of a former slave who became a noted author and newspaper publisher.

"Fulfilling Americas promise for all Americans has been and will

continue to be a priority for all Republicans," Santorum declared at the event, at which Republican leaders promised nearly one million dollars in federal funds for the landmark's restoration.
But Santorum was at the center of a controversy which called into question the party's commitment to inclusiveness, creating a furore when he made remarks last month equating gay lifestyle with polygamy, incest and adultery.
Such comments cost the party some support among gays.
"The damage done by Rick Santorum's comments -- and the rallying around him by Republican luminaries, including the president -- undermines any progress that might have been made on outreach," said political analyst Thomas Mann of the Brookings Institution.
Meanwhile, Mann said, Republican outreach efforts have "been utterly ineffective with African Americans."
Walter agreed. While the Bush White House can point to prominent black figures like Secretary of State Colin Powell and national security advisor Condoleezza Rice in the administration, he said most black voters pay more attention to policy issues like aid to cities, housing or affirmative action.
"They are trying to do things at the edges while maintaining the central thrust of their message. That won't work," with blacks, Walter said.
And however earnest their efforts to broaden their base, pundits point to an unfortunate penchant among party elders to make statements perceived to be anti-minority.
In December, Senate Republicans were forced to ditch their leader, Trent Lott, after he made remarks that seemed to wax nostalgic for racial segregation.
And just last month, Republican Barbara Cubin offended many black colleagues in the House of Representatives during a floor debate on gun legislation.
"One amendment today said we could not sell guns to anybody under drug treatment," said Cubin, of Wyoming.
"So, does that mean if you go into a black community, you cannot sell a gun to any black person?" she said, in comments that her black colleagues called "insulting."
Black voters, said Walters, perceive a "strong racial subtext" in such comments that will like keep them in the Democratic fold.

Scott Long Announces Resignation from IGLHRC
For Immediate Release: May 16, 2003

For additional information, contact:
Nicky McIntyre, (415) 202-7640, nicky@globalfundforwomen.org

SAN FRANCISCO - Scott Long, Program Director for the International Gay & Lesbian Human Rights Commission (IGLHRC), has announced his resignation. Long has been employed with IGLHRC since 1997 and has been affiliated with IGLHRC since the early 1990s.

"Scott has made many important contributions to IGLHRC which have directly impacted the lives of many people around the world," said Nicky McIntyre, Chair of IGLHRC's Board of Directors. "For more than a decade, Scott has advocated for human rights, and has worked to make those rights a usable and accessible instrument in struggles for social justice."

During Long's tenure IGLHRC saw unprecedented successes at the United Nations where human rights violations against LGBT people are squarely on the agenda of world leaders. This past year alone, Long's work with the United Nations resulted in the Working Group on Arbitrary Detention issuing an Opinion condemning detentions based on sexual orientation, the first time this has occurred. Long is also credited for his advocacy on behalf of the Cairo 52 in which 52 Egyptian men were arrested in May 2001 and were tortured in detention, and jailed continuously until their trial. In addition, under Long's leadership as Program Director, IGLHRC expanded its work with LGBT grassroots activists in Asia, Latin America, and Africa.

Long has been a longtime human rights activist. Beginning in the early 1990s, while living in the former Soviet bloc, he gathered detailed information on Romania's mistreatment of gays and lesbians, and led over forty missions to Romanian penitentiaries, reporting extensively on conditions there. He has worked closely with many LGBT groups in Eastern Europe and elsewhere, as well as with human rights groups including the Romanian Helsinki Committee. In 1993, he conducted the first fact-finding mission on the situation of gays and lesbians in Albania. He is the author, among other articles and reports, of Public Scandals: Sexual Orientation and Criminal Law in Romania, co-published by IGLHRC and Human Rights Watch, and has edited and contributed to recent reports on gay and lesbian parenting, and on the use of sexuality to target women's and feminist organizing worldwide. He holds a Ph.D. from Harvard University; he has taught as a visiting professor at the University of Budapest, and for two

years was a Senior Fulbright Professor of American Literature at the University of Cluj-Napoca, Romania.

More Than One Third of Gay College Students Experienced Harassment in Past Year
05.13.03

Half conceal sexual orientation to avoid intimidation, 43% call their campus homophobic

"...'coming out' to my adviser would destroy my academic career."

"...people in passing cars have screamed 'faggot' at me."

"I think the administration can do more to enforce safety & policies that will help GLBT students..."

- - Responses to the Campus Climate Assessment Survey

New York, NY - With students and professors finishing up final exams and incoming college freshman finalizing their college plans, today the National Gay and Lesbian Task Force (NGLTF) Policy Institute released the largest-ever study of the climate on U.S. college campuses toward gay, lesbian, bisexual and transgender (GLBT) students, faculty and staff.

"Campus Climate for Gay, Lesbian, Bisexual, and Transgender People: A National Perspective," authored by Dr. Susan R. Rankin, found that more than one in three GLBT undergraduate students have experienced anti-gay harassment within the past year. Almost 1700 students, faculty, administrators and staff in 14 colleges and universities throughout the country were surveyed for the report.

"It is extremely alarming that, in 2003, people on college campuses continue to experience anti-GLBT harassment," said National Gay and Lesbian Task Force Executive Director Lorri L. Jean. "Higher learning institutions should be at the forefront of educating people about the damage of homophobic and transphobic acts. Because most of the fourteen universities surveyed provide visible support through pro-GLBT policies and resources, we can only imagine the extent of homophobia on college campuses across the country."

"Campus Climate" reveals that almost a fifth of respondents had feared for their physical safety in the last year because of their sexual orientation or gender identity, and 43 percent considered the climate of their campus to be homophobic.

Other findings include:

41 percent of the respondents stated that their college/university was not addressing issues related to sexual orientation or gender identity;
51 percent of the respondents concealed their sexual orientation or gender identity to avoid intimidation
71 percent felt that transgender people were likely to suffer harassment, and 61 percent felt that gay men and lesbians were likely to be harassed.

"While there have been significant improvements over the past decade, clearly harassment and bias are still major concerns for GLBT students, faculty and staff," said Dr. Sean Cahill, NGLTF Policy Institute Director. "Almost all of the universities that agreed to participate in the survey have sexual orientation nondiscrimination policies and/or GLBT campus centers. However, most of the United States' more than 5,500 colleges and universities don't have such policies or programs in effect."

While most universities and colleges publicly commit to creating a welcoming and inclusive environment, their actions and policies often do not support these goals. In March 2003, Virginia Tech's governing board voted to eliminate its affirmative action policy and to remove sexual orientation from its nondiscrimination policy. When Virginia Tech students and staff protested, the university reinstated both policies.

An April 24, 2003 story in the California "San Diego Union-Tribune" reported that frustrated by a resurgence of racially and sexually motivated incidents, dozens of University of San Diego students and faculty walked out of classes and urged the administration to address anti-gay, racist and anti-Semitic sentiments on campus. Recent incidents cited by the paper included anti-gay graffiti scratched on a student's apartment door. The University of Southern California's Pridefest has been marred by anti-gay vandalism in recent years. And activists at universities across the country complain that signs for GLBT student activities are regularly ripped down and covered with anti-GLBT graffiti.

"Many GLBT campus members find that they must hide significant parts of their identity, thereby isolating themselves socially or emotionally," said Dr. Susan R. Rankin, "Campus Climate" author and lead researcher. "Those who do not hide their sexual orientation or gender identity have a range of experiences including discrimination, verbal or physical harassment, and subtle or outright silencing. While higher education provides a variety of opportunities for students and others, these are greatly limited for those who fear for their safety, feel they must censor themselves, or are denied opportunities because of their sexual orientation or gender identity," said Rankin, a Senior Diversity Planning Analyst at the Pennsylvania State University. "We hope this report will assist educators, activists, student leaders and elected officials in making universities safer and more accepting of GLBT people."

"Campus Climate" makes policy recommendations to universities and colleges that are seeking to create a truly inclusive environment that supports and values all, including:

Extending employee spousal benefits to domestic partners;
Including sexual orientation and gender identity or expression in the institution's nondiscrimination clause;
Integrating GLBT concerns into university documents/publications;
Providing a clear, safe, visible means of reporting acts of intolerance and responding expeditiously to such acts;
Including sexual orientation and gender identity issues in orientation programs and employee trainings.
The "Campus Climate Assessment Survey," which serves as the basis for this report, was a collaborative project involving NGLTF, the National Association of Student Personnel Administrators, and the National Consortium of Directors of LGBT Resources in Higher Education.

Deep Inside Hollywood
by Romeo San Vicente
May 14, 2003

Fangs very much, Elton

Elton John is heading back to the Great White Way, but instead of scoring an Egyptian queen, he's going for a sexy vampire. With his longtime collaborator, Bernie Taupin, John is writing the music and lyrics for a musical based on Anne Rice's "Vampire Chronicles" fiction series. Joining in the production is Warner Brothers Theatre Ventures, which made two of Rice's novels -- "Interview With the Vampire" and "Queen of the Damned" -- into feature films. The musical will focus on Lestat, Rice's charismatic, tortured and sexually ambiguous antihero (who was, of course, played by Tom Cruise in "Interview"). Taupin and John have said they don't want to make a rock opera and will avoid the classic gothic "I vant to suck your blood" shtick in favor of a more realistic portrayal of the character. The show should hit Broadway in 2005.

Shankman tries to "Topper" himself

White-hot, openly gay director Adam Shankman, who has made it into the Hollywood big leagues with the success of "Bringing Down the House," is making another movie with silver-haired star Steve Martin. Shankman will direct "Topper," a remake of the 1937 comedy classic that paired suave icon Cary Grant with Constance Bennett as a wealthy young couple who die in a car accident. As ghosts, they haunt a stodgy banker, Cosmo Topper, and encourage him to lighten up and live a little. In the new version, Martin is set to play Topper. Shankman and Martin have also committed to the sequel of "Bringing Down the House," along with the fabulous Queen Latifah and screenwriter Jason Filardi.

Being J. Edgar

Will the fascination with closeted G-man J. Edgar Hoover never end? There have already been a few bad movies made about the infamous witch-hunter, my favorite being 1977's laughable "The Private Files of J. Edgar Hoover." Now another is in the works -- investigative journalist Richard Hack has just sold the film rights for "The Puppet Master: The Secret Life of J. Edgar Hoover" to Stone Village Productions. Adapted from Hack's forthcoming book of the same name and executive produced by Michael Viner and Deborah Raffin ("Wilde"), the film at least promises to provide more concrete information than the previous ones about the contents of J. Edgar's closet. Maybe even

the pumps.

Easing on down ... again

Musical theater fans needing a "Wizard of Oz" fix will have their wish granted during the 2003-2004 theater season when "The Wiz" returns to Broadway. The 1975 Tony-winning musical has seen other revivals, but this one promises to be special. Producer-slash-director Des McAnuff, who helmed the snappy '90s revival of "How to Succeed in Business Without Really Trying," will direct the journey back down the yellow brick road with a multiethnic cast, and word is that it will be an "environmental" production, with the entire theater transformed into Oz. (Think the "Cats" junkyard -- if you dare.) No word on who'll fill Dorothy's ruby slippers, but Romeo is thinking Margaret Cho as Glinda, the Good Witch of the North. With maybe Lil' Kim as the lead Munchkin?

-----BEGIN PGP SIGNED MESSAGE-----

Volvo Cars of North America Continues Diversity Initiatives with Campaign Targeting the Gay Community
05.06.03

Volvo Cars North America, LLC (VNCA) today announced an integrated marketing and advertising campaign to specifically reach gay, lesbian, bisexual and transgender (GLBT) consumers, as part of its comprehensive diversity marketing strategy.

"At Volvo, Diversity is a big part of who we are and all that we do," said Thomas Andersson, Executive Vice President of Marketing for Volvo Cars North America."

"All consumers appreciate marketing efforts that speak to them personally and directly. These ads focus on Volvo quality, attractive styling and safety -- attributes of universal appeal."

The campaign, which recognizes that GLBT households are as diverse as the family of vehicles offered by Volvo, is intended to build a stronger connection between GLBT consumers and the Volvo brand.

With buying power estimated at $450 billion, the 14 million GLBT consumers represent one of the more significant customer blocks in the United States. The campaign is targeted nationwide, with a specific emphasis on the metropolitan areas of Atlanta and San Francisco.

Concurrent with the marketing initiatives, Volvo will also sponsor Human Rights Campaign (HRC) fund-raiser events in Atlanta and San Francisco (Black-Tie Dinners are scheduled for May 10 and July 26 respectively).

The Volvo campaign was coordinated with Ford Global Marketing. Diversity Inc. Magazine recently ranked the Ford Motor Company (FMC) as the number one company for its diversity initiatives. "This marketing program is another example of how FMC strives to be a leader in diversity marketing, which includes gay, lesbian, and bisexual consumers," said Jan Valentic, Vice President of Global Marketing at Ford Motor Company."

Ford's Global Marketing organization and Witeck-Combs Communications, a strategic marketing and public relations firm specializing in the GLBT market, developed the comprehensive campaign strategy. The campaign features print advertising and marketing programs tailored to this consumer.

The print ads were created by Prime Access Inc. of New York and will run primarily in national GLBT publications, beginning in May and continuing through August 2003.

In addition, Volvo will run a promotional on-line campaign concurrently.

-----BEGIN PGP SIGNED MESSAGE-----

CANNES, France, May 16 (AFP) - Are we about to see the ultra-butch
Crocodile Dundee go gay? According to a film industry magazine, it seems
that's exactly what Australian actor Paul Hogan is aiming for in his next
project.
But the transformation of "Hoges", as he is known Down Under, is to be
fictional in more ways than one in the movie, titled "Strange Bedfellows",
Moving Pictures International reported in its Cannes film festival issue
Friday.
In the story, to be made by Australian director/writer Dean Murphy, "two
Aussie blokes in a small outback town pretend to be gay for tax reasons --
and
then have to prove it to the tax inspectors, without the neighbours (who
know
better) giving away their secret," the magazine said.
"It's the funniest script I've had sent to me," it quoted Hogan as
saying.

Gaywatch: Cybill Shepherd becomes Martha Stewart
Christine Champagne

Cybill Shepherd met Martha Stewart about seven years ago at a television industry convention in New Orleans. "At the time, I thought, 'I'd be perfect to play her,'" Shepherd recalls. Nearly a decade later, Shepherd was cast as the domestic diva in "Martha Inc.: The Story of Martha Stewart," a TV movie airing on NBC Monday, May 19 at 9 p.m. EDT.

Shepherd -- whose credits include the TV series "Cybill" and "Moonlighting" and the films "The Last Picture Show" and "Taxi Driver" -- physically resembles Stewart. But the connection runs deeper than that, the actress explained during a recent conference call with reporters. According to Shepherd, she and Stewart are kindred spirits in many ways: They both started their careers as models, they were both desperate to overcome their humble upbringings and they both had to cope with the ramifications of fame.

"She's a complicated character, and I have a lot of sympathy for her," Shepherd says of Stewart. "I think she is a great woman -- a genius with frailties and problems and demons to dance with."

Among those "frailties" is a nasty temper. "There's no question that Martha' s a screamer, and she is difficult to work with," Shepherd acknowledges. But the actress -- who shared her own life story in the candid memoir "Cybill Disobedience" -- points out that she herself hasn't always had the best reputation. "During the shooting of 'Moonlighting,' I had a few moments of rage I'm not particularly proud of," Shepherd says. "But I went to therapy for 10 years, and really learned to deal with the rage."

Shepherd maintains that there is more to Stewart than the negative image the media has presented. She believes "Martha Inc." presents a more well-rounded portrait, including an in-depth look at Stewart's difficult childhood and relationship with her demanding father. "I hope I did her justice in terms of her vulnerability," Shepherd says. "Martha doesn't show that. You don't see that in her public persona, but I know it is there."

Based on the best-selling unauthorized biography by Christopher Byron, the biopic is comprehensive -- exploring everything from Stewart's working-class upbringing in Nutley, New Jersey, to her rise as one of America's wealthiest businesswomen to the current insider trading scandal that could ultimately destroy her empire.

"I think it is horrific, the way she has been treated in the press," Shepherd says, referring to the coverage of the ImClone scandal. "That's one of the things that drew me to the role. Also, I've had my savage press as well -- and often unfairly. I've had great press, too. I mean, I love the press, but they can't love you all of the time, and I do have to say that I've had a lot of lies printed about me?"

So what will Stewart think of this movie? "I think there will be moments when she goes, 'Oh my God, it didn't happen like that at all!' Or, 'I didn't do this,' or 'I didn't do that!'" But Shepherd stands by the accuracy of the film, noting that Byron's book, on which the film is based, started off as an authorized biography. "Then she withdrew her support for it... [but] she didn't sue the writer," Shepherd says.

Whether or not Stewart likes the movie, there is no denying that Shepherd is convincing in the role. "I'm not doing a caricature, and I didn't want to imitate her," Shepherd says. "I wanted to have the audience ultimately connect with the emotion [of the story]."

In addition to playing a wide range of emotions, Shepherd wields kitchen utensils and crafts tools in the movie like a professional. She denies having any skills as a homemaker, however. "It's called acting," Shepherd says. "I'm a real slob around the house. Martha Stewart would be horrified at my house."

The Crossdresser vs LaQuinta Inn Corp.
by Jeffrey Linamen
www.GayWebSource.com

Denver, CO - As a local cross dresser of the Denver area, Louis Smith enjoys performing in non-profit benefit drag shows. As most performing cross dressers, Louis takes his role seriously. To maintain his costume he regularly plucks his eye browse. Unfortunately this brought notice to the 41 year old, also know as Dixie Darlin. A female co-worker commented he must be a cross dresser, if he plucked the hair above his eyes. She also made a request for him to do hers.

Mr. Smith started working for LaQuinta Inn Corp. in July of 2002. He states just days after starting with the company he was getting feed back from other co-workers about being gay. Co-worker would ask him if he had Aids or knew anyone who was HIV+. Mr. Smith states he prefers not to discuss his sexuality and cross dressing preference in the work place, but coworkers continually and openly speculated about whether he was gay and from that if he cross-dressed. He reluctantly told several coworkers some fact about himself, believing this curiosity was honest rather than prurient.

Thus, curiosity was not tamed, this information only created a desire to know more. He started receiving phone calls at home asking questions about his shows. At one point he reported to work to find a large rainbow triangle on the wake up call logs at his computer monitor.

Mr. Smith states the snickering spread beyond his location and into other Laquinta locations. One week before his termination, he was contacted by a night auditor of the Westminster LaQuinta, asking for photographs and if he had a web site. He complied with the request and faxed photographs of his cross-dressing and supplied his web site URL. The general manager of that LaQuinta took the photos from the auditor's box, confronted him and demanded to know whom it was. The general manager was told that the performer was a night auditor form another location, Mr. Smith was terminated a week later on November 11, 2002

Mr. Smith has retained the Denver law office of James L. Abrams. Mr. Smith is seeking $25,000 for loss wages, pain and suffering. He is also seeking agreement from LaQuinta that the company will give him a positive reference and will not block his ability to seek unemployment compensation.

GayWebSource.com sent LaQuinta Inn Corp an e-mail requesting their policies on harassment and discrimination. We also asked them their views on dealing with the gay community and there comments on this situation.

Jeffrey M. Schagren, Assistant General Counsel of LaQuinta Corp. contacted GayWebSource.com by e-mail and advised he cannot comment directly on Mr. Smith's case due to the possibility of pending litigation. However, it is important to note that it is the policy of La Quinta Corporation to afford equal opportunity to all individuals in recruitment, hiring, treatment during employment, compensation and promotional opportunity regardless of race, color, national origin, ancestry, gender, religion, age, disability, veteran status or sexual orientation. Moreover, our organization's Policy Against Harassment specifically states that harassment by a co-worker, supervisor, manager or third party based on any of the preceding is strictly prohibited. As such, we take all complaints of discrimination and/or harassment seriously.

Letter Sent
to LaQuinta Inn Corp.

*GENARO C. ARMAS

WASHINGTON (AP) -- Gay and lesbian couples are slightly
better educated than married people and earn similar paychecks but
aren't as likely to own their homes, according to a study of Census
Bureau data released Tuesday.
More than 35 percent of people living with same-sex partners
had a college degree in 2000 compared with 28 percent of married
people and 19 percent of opposite-sex unmarried partners, said the
analysis commissioned and released Tuesday by Human Rights Campaign,
a gay rights advocacy group.
Median wages earned by gay and lesbian couples were equal to
married people -- about $32,000, $8,000 more than for opposite-sex
unmarried partners. About 64 percent of homosexual couples owned
their homes, compared with 78 percent of married partners and 41
percent of heterosexual unmarried couples.
The data were culled from detailed 2000 census data released
for 15 states so far. The Human Rights Campaign study includes data
from California, New York and Texas -- the states with the greatest
number of same-sex unmarried partner homes. Also covered was
Vermont, which three years ago passed the nation's first civil union
law recognizing gay and lesbian "domestic partnerships."
Human Rights Campaign strategist David Smith said the study
shows homosexual couples are "a mirror image of the majority of
families in the country" who should have the same benefits and
protections.
The 2000 census was the first in which the bureau
extensively analyzed data for unmarried partners, regardless of
sexual orientation.
A question on the census asked "How is this person related?"
For people living together who were unrelated, options included
"Roomer, boarder," "Housemate, roommate," "unmarried partner" and
"foster child."
Gay rights groups considered a person living with someone of
the same sex who checked off unmarried partner to be homosexual.
The Census Bureau does not ask about a person's sexuality
and is required by law to keep answers confidential.
Data released two years ago revealed there were 594,000
households headed by same-sex partners -- about 1 percent of the
nearly 60 million households in the United States led by couples.
The vast majority of those homes -- over 54 million -- are led by
married people.

Differences in homeownership may arise because same-sex couples, especially gays, tend to cluster more in cities, where home prices are more expensive and rental units are more plentiful, said Gary Gates, a demographer from the Urban Institute who did the analysis.
For instance, the median property value for a gay couple that owned a home was over $162,000, $25,000 more than the median for lesbian and married couples, and $50,000 more than for opposite sex partners.
Lesbian couples are more likely to have children than gays and are concentrated more in suburbs, where housing is cheaper, Gates said.
About 8 percent of lesbian partners said they had prior military service, compared with 1 percent of women who are married or who are in unmarried partnerships. About 14 percent of gay men had served in the military, about the same as for men in unmarried partnerships but half the rate of married men.
Other states covered in the report were Alabama, Florida, Illinois, Kansas, Maryland, Nebraska, New Jersey, Ohio, Oklahoma, Rhode Island and Wyoming.

-----BEGIN PGP SIGNED MESSAGE-----

ASHLAND, Ore. (AP) -- Students at Southern Oregon University say they will cancel their blood drive this term because many gay men are ineligible.
Guidelines established by the U.S. Food and Drug Administration ban males who have had a homosexual encounter since 1977. Some students say that goes against the university's anti-discrimination policy and falsely labels AIDS and HIV as a gay men's disease.
"I know I've been yelling about it for years," said Daniel Conner, a senior. "I'm a gay man and I don't like being forced to lie to help people."
Amanda Guidero, a student government official, decided not to hold the planned blood drive after hearing complaints.
"It took me four days to decide and I can walk away knowing I made the right decision," Guidero said. "I do believe those students had a legitimate concern."
According to the federal Centers for Disease Control and Prevention, men who have sex with men represent the largest proportion of new HIV infections at 42 percent. Next come heterosexual couples, then intravenous drug users.
Dr. Leslie Holness, medical officer for the division of blood applications for the FDA, said that although the screening process is not ideal, it is continuously reviewed.
Officials are "reluctant to change present guidelines if they seem to be protective," Holness said. "You have to balance how much good you're doing with a safe blood supply with the bad feelings you're stirring in groups of people."

Poll: 6 in 10 Americans OK gay unions

by Christopher Lisotta
Gay.com / PlanetOut.com Network

A May 2003 Gallup poll shows that a majority of adult Americans accept the idea that same-sex relations between consenting adults should be legal and that homosexuality is an acceptable way of life.

Results of the poll show that the concept of legal acceptance for gay relationships has reached the 60 percent level, up from 52 percent last year and 43 percent when Gallup first began asking about homosexuality in 1977. But when it comes to the concept of comparable rights for gay couples as compared to straight married couples, opinion is evenly divided.

Although a majority of Americans have consistently opposed the total concept of "gay marriage," when asked if they favored a law that would "allow homosexual couples to legally form civil unions, giving them some of the legal rights of married couples," the breakdown was 49 percent in favor, 49 percent opposed. In May 2002, when asked the same question, 46 percent were in favor, while 51 percent said they were opposed.

The Human Rights Campaign (HRC), that nation's biggest gay rights group, applauded the results of the survey, and pointed out that many local and state laws do not reflect changing public attitudes.

"In spite of the overwhelming support for equal opportunity in the workplace, it is still legal to fire someone based on their sexuality in 36 states. The time is long overdue for meaningful workplace protections for this country's gay, lesbian, bisexual and transgender community," said HRC Political Director Winnie Stachelberg.

The survey's most dramatic result came from people's attitudes about treatment in hiring. The survey found that almost 9 out of 10 Americans agree that gays and lesbians should have equal rights in terms of job opportunities. In 1977, 56 percent of the people polled felt gay people should have those rights, while in 2003, the number hit 88 percent, up two percentage points from the May 2002 results. When asked if they felt homosexuality was an acceptable lifestyle, a small majority, 54 percent, approved while 43 percent disapproved. This is up from a 34 percent approval rating in 1977.

"What we see here is a steady groundswell of support for gay and lesbian Americans. As more and more gay men and lesbians come out and live their

lives openly, and more Americans realize that gay people are their family, friends, co-workers and community members -- they are better able to understand the issues facing the gay community," said HRC Communications Director and Senior Strategist David M. Smith.

Results of the poll are based on telephone interviews conducted May 5-7 with a national sample of 1,005 adults, with an error of plus or minus three percentage points.

Well, "WE" are invading multiple countries, just like the Nazis
did.

I'm not saying Bush is just like Hilter, but if you have to shove
"Democracy" down people's throats, is it really democracy and
"Freedom"???

Is it really "Freedom" when you bomb the sh** out of an oil-rich
country so you can control it's resources while installing a puppet
government? What about the other dictatorships in countries that
don't have natural oil, how come we don't invade all of them??
$$$$$$$$$$$$$

Is it really "Freedom of Speech" if you are too afraid to
question your government for fear of appearing "Unpatriotic"?

Is Freedom really just about who is the strongest militarily?

Slick

Nope. It means that less people are going to walk around in a cold rain.

> Has e-Bay killed hamfests?

I doubt it. There is probably some effect though. But just wait. I suspect that as internet fraud suffers a crackdown, this all may change. At some point, Ebay will probably share some culpability in what happens there. And auction fraud is the number one internet complaint to the FTC.

You base your conclusion on insufficient evidence. A webcam in the rain is not much of an indicator.

I also made the Dayton trek from the west coast and thought it very much fun.

Friday was very nice, the weather was great for Dayton at that time of the year. Had a chance to see an overview of the flea market at that time.

Prices don't really drop on many items until late Saturday or Sunday. But you knew that right..?

Saturday weather wise was not so great... about 60% of the time it rained past the point where dealers wanted to uncover. Quite a few serious Dayton people did bring weather fixtures. Others just called it quits for the day and went inside to look around.

There were brief spells of clear weather during the mid afternoon, but many people didn't open back up right away.

Sunday found the weather great, things dried up and the last portion of the event found the remaining people really dealing up a storm. I'd say at least a third of the Friday/Saturday Flea Market People left Sat Night. That's typical for Dayton.

But the whole thing wrapped up on a high note for most everyone who stayed through Sunday.

In 2002 the wx was not so great on Friday, but good on Sat/Sun. This year Saturday was the bad day for rain. Not much you can do about that. Most of the Saturday People stayed indoors and looked at the various booths, which provided a (reported) nice boost for indoor equipment sales.

Like all of the conventions and shows I've attended this year (10 plus) only 70 to 80% of previous high numbers were made... this includes commercial communications shows I've attended (like IWCE). Shows have been smaller is size overall. Daytons' ~80 numbers are no surprise...

Many of the commercial two way radio shops trying to dump large quantities of used radio gear were gone this year. But there were more than enough there to find a good deal on commercial radio "boat anchors".

The only part I didn't think so great were the Computer Suppliers hawking their wares... but when you have empty sales spaces, might as well have them there than nothing. No one was displaced by them being there... plus quite a few of the local Dayton kids/people came in to see the Clear Computer Cases with Neon lighted fans and internal lighting.... or of course the stainless steel computer cases. They really looked cool...

Many of the true "Nuts and Bolts" of Amateur Radio Mfgrs were on hand. Seems the slow economy shakes out a lot of the loose ends as evident by this years numbers. But all the normal "players" were on hand to show off their products. Ten Tec had a really nice booth this year...

Side trips around Dayton included the massive Wright-Pat AF Aircraft Museum, just incredible to be in a room with B-52 over your head. One could easily take a few days to view the W-Pat aircraft displays. You've got to see the place to believe it.

Friday eves finds many at the Weak Signal, VHF and above dinner at the Holiday in. Just a great time over all. Many of the larger Radio Companies also had their own parties and events. Reports of the typical antics at various evening parties are now floating in (as recovered from the hotel pool).

I had a great time, will go back again next year as always. Picked up some great deals on things I wanted. Hard to argue with a $214 air fare from the West Coast.

cheers
see you next year at Dayton

Greetings all I am in need of Microphone information on a Azden PRS-400. I just acquired a unit and it was without a microphone. If anybody out there has a microphone that will serve and/or a schematic or manual I would be grateful. Gladly pay any costs incurred.

I am also trying to locate a connector for the Wilson WRY-500 Antenna Rotor. I need the outside 8-Pin female connector that looks like a Cannon connector. If anybody has one that will work or could point me to a source, that too would make me grateful. Please respond to my email address. Thanks Don Smith KB6GQA

Basically, you can't mix and match those things. You're stuck basically trying to find someone who has kept the exact model microphone with the exact frequency (unless you want to recrystal). I see receivers at hamfests all the time but nobody ever remembers what happened to the microphones.

Because they use companding, you can't just use a Shure mike on an Azden receiver and expect it to work decently.

Is it a Cannon P-connector style thing? If so, Connector World Supply in Seattle will have it.

Zero beating against WWV should be more than good enough. Use
the 5MHz WWV station, and if you find that your rig is off a bit, just
note the error, and "mis-tune" yourself by the same error to null it
out when operating these new allocations. This if your rig's manual
doesn't describe how to adjust the rig to fix the error. Page 24 of
my TS440SAT's manual tells how.

> And what if it "seems to be off"?
> Will most hams be able to adjust it accurately? Or even determine if it needs

Not so far as to be a problem here.

>
> A typical filter contains several crystals. How do you know where yours cuts
> off? Can you check it to be sure?

We could check it on another band, and have someone several miles away
(with the attenuator switched in on his receiver) check above and below
the "channel" you're on. Most all rigs use an intermediate frequency for
the SSB modulator and heterodyne that to the frequency you want to transmit
on. So using another band to check it works fine for this.

Besides, crystals are pretty reliable. How often do you find bad SSB
other than those someone deliberately messed with on the air?
And those are likely due to misadjusted linears.

The rigs the other users of 5Mhz use are likely to be quite similar to
modern ham rigs except for how the user selects the channel. And that

is just a microprocessor fetching a number from memory and loading the PLLs with it. My TS440SAT can be placed into such a mode with the "VFO/M" front panel key. So the big knob selects channels instead of incrementing or decrementing the frequency. It's all firmware differences here, the rest of the rig can be otherwise identical. The point here is that a modern ham rig should perform just as well as the rigs used by the other services around 5MHz.

IGBO Milwaukee 2005

Milwaukee is bidding to host the International Gay Bowling Organization's 25th Anniversary tournament to be held May 25th - 30th, 2005. The committee is trying to bring 800 to 1,000 bowlers from around the world to the city of Milwaukee for this milestone event. There has been an enormous amount of effort already completed to become a bidding city for this tournament. The committee has already submitted the preliminary and second bid packages to the IGBO Bid Standards committee and will be mailing out the final bid proposal's April 15th. The final decision will be reached in Phoenix this Memorial Day weekend when that city will host the 23rd annual IGBO Tournament. IGBO Representatives and Board Members will be casting their votes at the general membership meeting for either Milwaukee or New Orleans, which has also submitted a bid proposal as well.

Co-directors David Burney, Bill Conklin and Mark Klemme have organized a very talented group of people to assist in the planning and organization of hosting such a tournament. The committee is still looking for volunteers to join us in providing a quality tournament that bowlers have come to expect here in Milwaukee. One does not need to be a bowler to assist the committee; we are looking for varied talents and fields of expertise in order to provide the bowlers and spectators a week of activities outside of the bowling lanes as well.

This event is also going to require a tremendous amount of fund raising and sponsorship from the entire community. With the economy and world situation, the committee realizes that this is going to be an uphill battle, but is confident that the goals can be reached. In order to meet the projected budget, IGBO Milwaukee 2005 is trying to raise over $45,000 before March of 2005. This may sound like an unattainably amount of money, but the impact of 1,000 bowlers to the Milwaukee community will greatly will greatly outweigh the cost of sponsorship and fundraising efforts.

The committee has already begun a bowling pin campaign as a current fundraiser. You my purchase a cut out bowling pin and write your name on it and become a supporter of IGBO Milwaukee 2005. All of the pins sold will be displayed in Phoenix showing the support of the Milwaukee community. Bars will have the opportunity to buy larger pins, which will be displayed in the hospitality suite in Phoenix prior to the voting to show their support to bring the tournament here as well.

If anyone is interested in joining the committee or would like more information, please feel free to send an email to IGBOMILW2005@aol.com or by calling Mark or David at (414) 453-1868. We hope to have great news for the Milwaukee community upon our return from Phoenix, Memorial Day weekend.

RESEARCHERS SEE NO PROBLEMS WHEN U.S. TROOPS FIGHT WITH GAY-FRIENDLY BRITISH

Zero Impact Seen on Combat Capabilities

SANTA BARBARA, CA, May 14, 2003 - Top military analysts this week evaluated the impact of coalition fighting in Iraq among military forces with conflicting policies on gay troops. In interviews conducted by the Center for the Study of Sexual Minorities in the Military (CSSMM), a think tank at the University of California, Santa Barbara, combat experts described the nature of joint operations by coalition forces. Their comments suggested that when U.S. units-which ban openly gay soldiers for fear of undermining unit cohesion-fight with British units which allow gay soldiers, there is no adverse impact on military effectiveness.

Lt. Gen. Gregory S. Newbold, a vice president at the Potomac Institute, said there were instances in the war in Iraq when U.S. and British forces exchanged personnel. In coalition fighting, he explained, the two different armies might provide fire support, air defense, tanks or logistics for one other, as well as translator capabilities and other non-combatant support.

For coalition fighting, the two forces must train together before going into combat. "If you're going to provide combat forces [for each other,]" he explained, "you would absolutely want to train together, and generally we do that." He added that American and British forces "have trained together a great deal, so that relationship is a very easy one to carry into combat."

One of the first American casualties of the Iraqi war was an "exchange officer" who was flying in a Royal Navy Sea King helicopter when it collided with another Sea King over the Persian Gulf. The officer, Thomas Mullen Adams, 27, was part of an exchange program in which American and British forces send soldiers to fly with one another as a way of sharing tactical information. Glenn Truitt, a classmate of Adams' from the Naval Academy and a former submarine officer, said such exchange programs have been in place since World War II. He explained that their purpose is "to make sure we all have the best information" about air tactics, which are constantly being refined and developed.

Mr. Truitt said it was no surprise to him that American soldiers could work effectively with the gay-friendly British military. As a submarine officer, he knew of gay soldiers on his command, and he said their professionalism

rose to even higher levels than that of straight soldiers. "The homosexual men I knew in the military were much more professional about their sexuality than the heterosexuals," he said, "if only because they had to be" to gain full acceptance.

Maj. Gen. Bill Nash (Ret.), a senior fellow at the Council on Foreign Relations, stressed that concerns about the presence of female and openly gay soldiers in fighting units arose less during actual combat than in training. "Most of the issues about women and gays take place when the bullets aren't flying," he said. "When you're fighting, you've got other things on your mind."

His comments seemed to imply that the integration of female and openly gay soldiers into fighting units did not relate to combat performance, but reflected more generalized social concerns: "There are a lot of disciplinary issues that, unless they are directly related to combat performance, are not addressed on the battlefield."

In Congress, U.S. Rep. Martin Meehan, a Massachusetts Democrat, viewed the success of coalition fighting as further proof that allowing known gays to serve in the military does not compromise combat performance. "The adherents to the ban have never been able to produce any evidence that allowing gay men and lesbians to serve openly and honorably would harm the effectiveness of our military," said Meehan, a senior member of the House Armed Services Committee and a leading critic of the military's gay ban. "The Iraq war demonstrates that the morale and cohesion of our forces is simply not affected by the presence of openly gay soldiers."

According to Aaron Belkin, CSSMM's director, twenty-three other nations besides Britain allow gays to serve openly. CSSMM has published extensive studies on four of them: Britain, Israel, Australia and Canada. Researchers concluded that lifting the gay ban had no significant impact on combat capabilities. "The fact that U.S. troops fought successfully right next to British service members who are openly gay and lesbian shows that lifting a gay ban does not undermine military performance," he said.

Safety in numbers
Phoenix Lambda Center gives GLBT people in drug, alcohol recovery a safe space
By Matthew Heil

- ---
- -----

PHOENIX
- From the name, it's not easy to tell what the Phoenix Lambda Center is, or does. The beneficiary of funds raised by Echo's 11th annual swimsuit contest sounds like a gay community center, or office complex.
Basically, it's both. The Phoenix Lambda Center provides a centralized meeting space for 12-step recovery programs serving the gay community. The building's three meeting rooms and kitchen provide a safe, welcoming environment to more than 130 recovery meetings each week, as well as special events associated with those programs.
For those involved with Lambda, the center is more than a place to park themselves during meetings, however. Chuck Helterbrand, who serves on Lambda's board of directors, stresses that finding a place where GLBT individuals with substance abuse problems are welcome isn't just difficult, it is almost impossible. Either the stigma of addiction, or homosexuality, kept Lambda's members on the move before the center opened. Groups met in school cafeterias in the '80s, but when the threat of AIDS hit, they were asked to leave. Later, Lambda's groups met at an abandoned Popsicle factory, but again they had to move.
"We got tired of being kicked out of other places," Helterbrand said.
Finally, in 1991, the Phoenix Lambda Center found a permanent location.
Making a place for all GLBT folks with recovery needs isn't easy, even if it is necessary. As a home for 12-step programs, the Phoenix Lambda Center's main source of funding comes from member donations. These contributions provide about 80 percent of the center's operating needs.
The other 20 percent, barring unexpected expenses, come from outside sources. For that reason, the Echo swimsuit competition will be a real boon to Lambda. Helterbrand said the money will aid in paying rent, utilities, and all the maintenance that is required at the center's location.
Helterbrand recalls how the group ended up in a real fix four years ago, when the air conditioner broke, costing the group thousands of dollars.
Enough donations would make such dilemmas less stressful, and let Lambda provide preventative maintenance. The center could even stay open longer hours.
The Lambda Center has managed wonderfully on volunteer support, too.

The safe space allows 12-step programs to blossom, so that now more than 30,000 participants attend throughout the year. The groups, aligned to GLBT people, make working on recovery easier than it would be otherwise. Helterbrand notes that members don't have to change pronouns in the stories they tell, or worry that coming out will leave them without support. Just as homophobia can drive men and women to drug use to avoid dealing with their sexuality, fear of homophobia can keep them from recovery. "Being gay doesn't cause addiction, but it does affect it, because you have to hide," Helterbrand adds.
For more information about the Phoenix Lambda Center, visit http://members.cox.net/phxlambda.

Calling a rule "stupid" is one usual defense when one
finds it inconvenient to comply with it. I didn't think that
you were in that category, Dick.

One should not blame "the rule" for one's deficiency in making
the computation as to where to set a particular rig to be where
the rule tells you to be.

The rule is clear - the "numbers" represent the center of the
channel, just like 146.90 MHz represents the center of THAT
channel.

APOLOGIST? HA!!

Mister Anonymous Big Al, I'm one of the loudest critics of the FCC..... read some of the diatribes that I post from time to time. The one that you replied to in another posting was a very mild gentlemanly expression of my views. Is the agency screwed up? You bet your bottom. We can thank Charlie Ferris and his successors for that. Is it what we have to work with unless we get it changed somehow? Ditto. What I won't buy into is anonymous widespread generalities with no basis in specifics or fact.

I earn my snack money keeping current on the Rules and the case law (amateur radio is a small sliver of what I handle) and advising clients what the FCC Rules require and how to get where they want to go without violating them. That's something that I'm good at and enjoy both personally and professionally.

It's a lot easier and cheaper for the client to do it that way than to have to mount a defense in administrative litigation and hearings.

I'm sorry that your rig does not have a panel or automatic
switch to change the displayed readout frequency from "suppressed
carrier" to "center of occupied bandwidth" if you can't make
the computation in your head.

Get a copy of Part 2 of the FCC Rules and READ the definition
of "assigned frequency" in Section 2.1 of the Rules. This
applies to the Amateur Radio Service as well as other FCC Radio
Services. This is the standard method of specifying discrete
channels for regulatory purposes.

>correct?

Interpretation of Sections 97.101(a) and 97.103(a) of the Rules
puts the burden on the station operator and licensee to ensure
that their operation complies with FCC Rules.

Look at it this way - the FCC gave us five "mini-bands" to
operate in.

>Yes, one can check it against WWV, but with measurement methods
>available to most hams, is that going to be good enough? And what
>if it "seems to be off"? Will most hams be able to adjust it
>accurately? Or even determine if it needs adjusting? Send it to
>the factory for their opinion? What?

Is the sound that I hear that of kicking or screaming?

> And who knows just how close the tolerance on his SSB crystal
>filter might be? Are you *sure* you will be only 2.8 khz wide at

>the max? Really sure, now? It's well known that crystals almost
>always drift a bit with aging. A typical filter contains several
>crystals. How do you know where yours cuts off? Can you check it
>to be sure?

Hint -- the simple way is to either unsuppress the carrier
or inject a single tone of known frequency. Measure the output
(single rf frequency) of the rig (into a dummy load, of course).

This will tell you what "dial offset" to use. Simple, eh what?

If you can't rely on "reading the dial", get a good frequency
counter. Even a "cheapie" 0.1 ppm counter will get you within
5 Hz at 5 MHz.

> For that matter, channelization on ham radio is a new
>precedent, as far as I know. Yes, "channels" have long been used
>on VHF, but they have always been within authorized bands, and
>violating a frequency tolerance was never an issue. At HF it's a
>new concept entirely, within ham radio. I can forsee a lot of
>outgoing mail from OO's and probably FCC also.

Kicking or screaming ?

Amateur Radio Newsline™ Report 1344 – May 16, 2003

The following is a closed circuit advisory. Amateur Radio Newsline report number 1344 will follow.

Ladies and gentlemen, Amateur Radio Newsline's support fund administrator, Andy Jarema, N6TCQ.

--

I want to begin by saying thank-you to all of those who have contributed so far to keeping these Amateur Radio Newsline reports coming your way. As I said a few weeks ago, to continue bringing you the news and to continue to honor the accomplishments of youthful radio amateurs with the Young Ham of the Year Award, we have to raise about $1000 a month. I am happy to tell you that thanks to your generosity, we are now about 20% of the way to that goal. That's the good news. The bad is that we still have 80% of the way to go and the bills keep coming in.

I know that I have said this before but I have to again. The bottom line is that you, and only you keep all of this going. Its your tax deductible contributions that pay the cost of producing and distributing Amateur Radio Newsline bulletins. Its your generosity that makes possible the honor bestowed on a young ham operator every August.

Without any doubt, you are the most important part of the Amateur Radio Newsline family because it is you who tell us through your contributions that you want us to continue. And for that we are eternally grateful.

Remember, Amateur Radio Newsline is a federal 501 c 3, not for profit corporation, and, as I said earlier, your contributions are tax deductible. Our address is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066.

Thank you for taking the time to listen. Newscast number 1344 follows immediately.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1344 with a release date of Thursday, May 15th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The tornadoes of May continue as ham radio lends a hand and the doors open at Hamvention 2003. Find out the details on Amateur Radio Newsline report number 1344 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE TORNADOES OF MAY CONTINUE

According to statics, May 4th through the 10th, 2003 was the most active week of tornadoes on record. This, as scores of twisters ripped across the nation's midsection, reducing hundreds of homes and businesses to splinters. We have more on the storms and the part ham radio played in the aftermath in this report.

--

It was a busy week for ARES and RACES volunteers across the nations mid-section. Nearly 300 tornadoes have been reported since the beginning of May. That’s nearly 100 more than the most recent comparable outbreak in 1999. And so far, May 4th to the 10th has been the most volatile time of all.

Tornadoes have been everywhere from Oklahoma and Kansas to the West and to Alabama and Tennessee here on the south. And ham radio operators have been on the job as severe weather spotters looking for approaching storms. They have also been part of the clean-up effort after they have hit.

Among the groups using ham radio is the Salvation Army. Its website says that nine emergency disaster vehicles were set up in Kansas and Western Missouri following twisters that hit there. Its communications arm -- the Salvation Army Team Emergency Radio Network was dispatched to each location to assist using Amateur Radio channels.

One twister that struck the Oklahoma City area late Friday the 9th approached the metropolitan area from the southwest, then skipped through the city. This storm snapped utility poles, flipped a light airplane parked at a local airport and ripped apart an elementary school. It also knocked out a lot of telephone communications bringing out emergency trained ham radio operators to fill in.

Not long after this tornado hit, the Federal Communications Commission declared a general communications emergency for the Oklahoma area. United States Amateurs were told that they could not use 3 point 900 MHz, plus or minus 3 kHz, unless they were handling emergency traffic. The FCC said the declaration was in support of ham radio communications by the Salvation Army's tornado relief efforts. The ban was in force for about 24 hours, terminating at 22:30 on Saturday May 10th.

And on Saturday, May 10th, the weather service posted more tornado warnings for parts of Indiana, Missouri and Illinois. And the Storm Prediction Center said severe thunderstorms were likely from eastern Oklahoma to western Ohio. In northeastern Kentucky, at least 17 people were treated at hospitals and more than two dozen homes were damaged Saturday night after a tornado hit in Lewis and Mason counties near Maysville. This put already weary ham radio communicators back on alert once again. Adding to the misery, torrential downpours flooded streets and fields in Indiana put hams there on call as well.

But it was not over yet. Storms with wind speeds of up to 150 mph hit parts of Central Kentucky early Sunday the 11th. Homes were damaged in Hardin, Hart and Mercer counties. Retired ARRL President George Wilson, W4OYI, who lives in

Owensboro Kentucky says that there were two siren alerts indicating severe weather was on its way. He says that local hams involved in storm spotting duties geared up under the leadership of Emergency Coordinator Jake Jennings, KG4EMO. Thankfully, no twisters actually hit but one was spotted around midnight causing one of the alarms.

Severe weather alert systems and ham radio operators involved in ARES and RACES may be in for quite a work out in the days to come. This is because meteoreologists say that the 2003 tornado season is really just beginning.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

President Bush has cleared the way for federal aid by issuing a disaster declaration for ravaged areas of Tennessee, Kansas, and Missouri Oklahoma. The tornadoes combined with straight-line wind, lightning and floods to caused 44 deaths from Kansas to Georgia. (ARNewsline™)

**

HAMVENTION 2003®: HAMVENTION WANTS TO STAY AT HARA!

The 2003 Dayton Hamvention is on and the big news is that it wants to stay where it is. Amateur Radio Newsline’s producer Bill Pasternak, WA6ITF, has that story:

--

The Hamvention wants to stay at the Hara Arena. So says the Dayton Daily News which reports that Hamvention organizers are in negotiations for a two-year contract to comtinue using the Trotwood Ohio facility. My colleague Henry Feinberg, K2SSQ, has that part of the story:

--

The Dayton Daily News article Bill refereed to quotes Hamvention production manager Garry Matthews, KB8GOL. He says that organizers are pleased with Hara Arena and want to keep the show in the area. Also, that no other local venue can comfortably hold Hamvention at its current size. This says Matthews, makes a move unlikely.

A story in the May 2nd ARRL Letter said exhibitors would prefer the show to be held in Columbus if Hara wasn't available. Indianapolis and Cincinnati were also listed as possible sites.

When asked by the Dayton Daily News, Matthews said that the article doesn't mean Hamvention organizers are looking for another site. But says KB8GOL, organizers do have contingency plans that would move the convention elsewhere if Hara couldn't host it.

Will Hamvention 2004 be at the HARA Arena? We should know more by Sunday the 18th when Hamvention 2003 comes to an end.

I’m Henry Feinberg, K2SSQ. Bill.

--

Thanks Henry.

**

HAMVENTION 2003®: SOCIAL HOUR WILL HONOR AWARD WINNERS

Now turning to the social side of Hamvention 2003 -- and after all -- the Hamvention is a major social event -- there is some very good news. Seemingly taking a cue from the highly successful ham radio cocktail hour at the National Association of Broadcasters convention, the Hamvention will host a similar gathering this year. As Hamvention General Chairman Pat Neff, N8IGS, told RAIN's Hap Holly, KC9RP, this gathering is to honor the Hamventions award winners:

--

Neff: "Theres going to a an award winners reception at HARA on Saturday. Its going to start at I believe 6' o'clock and it will be within two of the largest forum rooms that will be converted. But its only going to have a capacity of about 450 people."

--

In addition to drinks and horderves what else can those buying tickets to this gathering expect?

--

The award winners will be giving acceptance speaches there and, like I say, its going to be an informal to-do that will allow the average attendee to be able to possibly get to talk with the award winners as well.

--

Neff says that the decision to hold the reception at the Hara Arena came as the result of feedback from past Hamvention attendees. Many said it was hard to spend the day at the show and then travel across town for a banquet. With the banquet now history and an informal reception at the Hara taking its place, those wanting to attend need only buy a ticket and hang around. We will.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

Amateur Radio Newsline has a team of reporters in Dayton and will provide full covering of Hamvention 2003. (ARNewsline™)

(5 sec pause here)

**

HAMVENTION 2003®: BIG HAPPENINGS IN DX

Still with Hamvention news, this years D-X forum should be one of the better ones in recent histoey. So says moderator Jay Slough, K4ZLE, who adds that the scheduled speakers are a really impressive line up. For instasnce, Daily D-X Editor Bernie McClenny, W3UR, will be talking on the recent AH3D operation. And Al Hernandez, K3VN on hand with the ZL7C story. The ARRL's Wayne Mills, N7NG with a DXCC update, and if thats not enough, Tedd Mirgliotta, KB8NW, will be on hand to present the Northern Ohio DX Association Award for the 2002 DXpedition of the Year. It looks like there will be something for everyone at Hamvention 2003. (OPDX)

**

RADIO LAW: HR-1478 GETS SUPPORT FROM CQ MAGAZINE

CQ Magazine has joined the ARRL in asking hams to support House Bill HR-1478. This is the measure re-introduced by New York Congressman Steve Israel to expand the limited protections of "PRB-1" to homeowners' associations and restrictive covenants.

According to the ARRL, the 2002 version of the bill died without action. The new bill initially had 13 co-sponsors from both parties including the only two known hams in Congress. They are identified as Representative Greg Walden, WB7OCE, of Oregon and Representative Mike Ross, WD5DVR, of Arkansas.

The ARRL and CQ are both now encouraging amateurs to contact their representatives in Congress to request that they support and even co-sponsor the bill. (CQ)

**

ENFORCEMENT: PIRATE BROADCASTER SENTENCED TO JAIL

A Florida pirate broadcaster will spend the next nine months in a federal prison. This is the sentence handed down by United States Magistrate David A. Baker against Rayon Sherwin "Junior" Payne.

Payne's conviction is the result of an investigation that began in February of 1999. About that time the Commission's Tampa Office began receiving complaints from residents and broadcasters in Orlando of interference to the reception of licensed broadcast stations. The investigation lead them to Payne's unlicensed station after which he was charged with multiple counts of operating an unlicensed FM radio facility.

Payne pleaded guilty to two of the counts before Magistrate Baker who also sentenced him to one year supervised release in addition to the jail time. Once he is released Payne must perform 50 hours of community service and must not violate any Federal, State or Local laws of the Communications Act of 1934.

The FCC announced the sentence on Monday May 12th. The case was prosecuted by the United States Attorney's Office for the Middle District of Florida.

(FCC)

**

ENFORCEMENT: AN EXPENSIVE LESSON FOR MICHIGAN HAM

The FCC has told a ham to pay a $12,000 fine for willful and repeated interference, broadcasting of music and failing to identify with his call sign. Being ordered to pay is Scott E. Kamm, N0UGN, currently of Souix City Iowa but who had his statiion licensed to the town of Waterbury Nebraska when he was first cited.

As previously reported, last December the FCC T-hunted down a strong signal on the input to a local repeater to Kamm's Waterbury Nebraska residence. Agents then performed a station inspection where they found a two meter transciever set to the repeaters frequecy pair. But Kamm denied any knowledge of the jamming, telling the inspectors that he never transmitted on the system and that the radio gear was used for monitoring purposes only.

But the FCC refused to buy Kamm's story. On January 24th of this year the regulatory agency issued Kamm a Notice of Aparenlt Liability in the amount of $12,000. Kamm never responded to it. And so a few days ago on May 7th the FCC affirmed its earlier order and gave Kamm 30 days tio pay up. (FCC)

**

ENFORCEMENT: $2400 FINE FOR UNREGISTERED TOWER

The FCC has also issued a $2400 a monetary forfeiture to Morris Communications, Inc. of Greenville, South Carolina for failing to register an antenna structure. The FCC calls this one a willful violation of Section 17.4(a) of the Commission's Rules.

On July 8, 2002, the Atlanta Office issued Morris a $3,000 forfeiture notice for failing to register its antenna structure in willful violation. In its response, Morris admits that its tower was not registered, but argued that the forfeiture should be rescinded because it did not "willfully" violate the rules.

Morris claims that it made two good faith attempts to register the structure in 1999, but the Commission first rejected its application on erroneous grounds and later returned it without explanation.

But says the FCC, the Rules provides that, effective July 1, 1996, the owner of any proposed or existing antenna structure that requires notification to the Federal Aviation Administration must register the structure with the Commission. Abother section of the Rules provides that the owner of an antenna structure that had been assigned painting or lighting requirements prior to July 1, 1996 must have registered the structure prior to July 1, 1998.

Morris admits that its Adrian tower was not registered at the time of the inspection on May 7, 2002. Accordingly, the FCC says that that Morris violated the Rules and has ordered it to pay the fine. The entire fionding is on-line at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1366A1.doc (FCC)

**

RADIO RULES: FCC RESOLVES COMMERCIAL BROADCAST SPECTRUM ISSUE

The FCC has released new procedures to allocate and license the commercial F-M broadcast band. This, where conflicting commercial and noncommercial uses are proposed. Since most new F-M and T-V channels can be used for commercial purposes and would be affected by non-commercial proposals, the CGC Communicator says that this decision may have widespread implications. (CGC)

**

RADIO RULES: FAA TO SEND CLEARANCE DATA TO FCC ELECTRONICALLY

According to a Primedia trade publication, the Federal Communications Commission and the Federal Aviation Administration have announced that tower and antenna airspace clearance data from the FAA will now be transferred electronically to the FCC. This will enable the Commission to process antenna structure registration applications faster and more accurately, and will save staff time at both ends. The electronic transfer of data is also expected to reduce the time it takes to get this information into the FCC's database from one to two weeks to only one day. More information is opn the web at http://beradio.com/ar/radio_currents_24/index.htm#tower1 (CGC)

**

HAM RADIO PUBLICITY: NPR FEATURES “HELLO WORLD - A LIFE IN HAM RADIO”

Tom Walsh, K1TW, reports over the Internet that National Public Radio featured ham radio in a recent Talk of the Nation segment. Walsh says that the final 15 minutes of the two hour program on April 30th was devoted to the new book "Hello World - A life in Ham Radio” and even featured callers including someone who is a QSL manager.

Tom says that you can still hear the program. Just taker your web browser to the National Public Radio archives and bring up the April 30 version of Talk of the Nation. Go to the second hour, find the last 15 minutes, turn your speakers up and enjoy. The URL is www.npr.org/programs/totn/index.html>http://www.npr.org/programs/totn/index.html (K1TW, K1KI, others)

**

NAMES IN THE NEWS: W9GIG TO DEPART THE IRA

ARRL Central Division Director Dick Isely, W9GIG, says that he will not stand for re-election to an official position within the Illinois Repeater Association. Isley has been a guising force within the repeater council for years.

It was Isley’s guidence that helped to create the National Frequency Coordinators Committee several years ago. He has also served with ther Illinois Repeater Associuation for many years and has become a main stay in the repeater coordination community.

According to his departure announcement, the decision to stand-down has nothing directly to do with his position within the ARRL but he says that does want to put more of his time toward League matters. Isley says that he has thoroughly enjoyed working for the Illinois Repeater Association but feels that it is time that new people step up to leadership positions. He also wished the group continued success in its work of providing efficient and fair Amateur Radio repeater frequency coordination to the hams of Illinois. (Via E-Mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE IRAQ WAR: WHO IS ACCEPTING WHAT POST-CONFLICT OPERATIONS

With the war in Iraq now just about over, both CQ and the ARRL are accepting certain operations from that nation for their DX award programs. But there are some differences. Amateur Radio Newsline's Bruce Tennant, K6PZW, has that part of the story:

--
PKG HERE
--

Most observers believe that the situation regarding ham radio in Iraq is very fluid and criteria for operations will change. (ARRL, CQ, others)

**

INTERNATIONAL - AUSTRALIA: NEW 23 CM BEACON

VK4RTL experimental 23 centimeter beacon on air neat Townsville Australia. It weent on the air on 21st April on 1296.444 MHz at Mount Stuart for a trial run. Q-News reports that this mighty little beacon puts out a massive 2.5watts and can be heard on most modern tri-band handhelds around Townsville and Thuringowa. Reception and range reports go to vk4wit@wia.org.au (Q-News)

**

INTERNATIONAL - CANADA: CANADIAN SPECIAL PREFIXES.

Industry Canada has authorized the use of "Special Event Prefixes" between May 24th and July 27th to celebrate the 50th Anniversary of the National Library of Canada. The special prefixes are C-K for all V-E's, C-J for all V-A's, C-Y for all V-Oh's and C-Z for all V-Y's. The special prefixes will therefore be available for use in the upcoming C-Q W-P-X C-W Contest on May 24 and 25th.

**

INTERNATIONAL - ITALY: WOULD YOU LIKE TO FLY IN MY BALLOON

Remember the 1970's song Up-up and Away by the 5th Dimension? Well a ham radio group in Italy has come up with a 21st century Amateur Radio version of just such an event.

The Milan Chapter of the Italian Amateur Radio Society says that its planning a manned Amateur Radio Balloning Experiment to take to the sky on Saturday, May 17th from Mantova Airport. Operating on 144.330 Mhz upper sideband, the in-flight operation is slated to begin between 08:00 to 09:00 U-T-C and last between 1 and 3 hours. A-P-R-S will be used to track the balloon during the time its aloft.

More information on the flight is the groups wesite. That information appears on the groups website at www.arimi.it/rubriche/arbe.html (IT2SAI)

**

ON THE AIR: GRID CIRCLEING ROVERS WANTED

N9REP says over the VHF Reflector that the K9RN VHF Contest Group is now accepting applications for captive rovers during the June VHF/UHF contest. Wendell says that the terrain in and around grid square EN52 is very rugged and harsh and that the first requirement for rovers is a vehicle capable of handling any on-or-off road QSO task, particularly regarding grid circling.

Any team wishing to be a captive rover must supply their own approved vehicle. A list of vehicle manufacturers that appear to meet all of the demanding Rover specifications is at www.maximog.com (VHF Relector)

**

DX

In DX, word that the make-up of the CY9 DXpedition team is now complete and the operation will take place from July 24th to August 2nd. The team members are N0RN, N5VL, W0IZ, KO4RR, K5AAH, K5AB and VE7SV. They will be taking with them a Battle Creek Special and will operate on the low bands during all openings. Callsign will be given either at the beginning of the operation or shortly before. QSL via N5VL. (OPDX)

**

THAT FINAL ITEM: ITS T-HUNT TIME

And finally this wee, do you like hidden transmitter hunting? If you do then this one is for you. Here's Joe Moell, K0OV, has the latest information on the World Amateur Radio Direction Finding Championship games that are coming up.

--

Who are the best transmitter hunters in the country? That's what we'll find out when the Third USA ARDF Championships get under way near Cincinnati, Ohio on July 30. The sponsors, OH-KY-IN ARC and the Cincinnati Orienteering Club, promise two challenging radio-orienteering courses. One will be on two meters,

and the other on 80 meters. This is a test of individuals, and it's all on foot. You'll have five transmitters to find each day, negotiating your way through the forest with your map, compass and direction-finding gear. If you can walk or jog a 10 km racecourse, you have the stamina to complete an ARDF event. If you're a senior citizen, don't worry about being trounced by teenagers, because there are a total of nine age categories, five for men and boys, four for women and girls.

This year, the USA Championships are an international event, combined with the International Amateur Radio Union (IARU) Region 2 ARDF Championships. If past events are any indication, there will be plenty of international experts in the sport on hand, so you'll have a chance to learn foxtailing tips and techniques from the very best. Positions on ARDF Team USA to next year's World Championships in the Czech Republic are open, so perhaps you can earn a spot for yourself. We're looking for good candidates in all age/gender categories, so encourage your kids and grandkids to give it a try.

For the most intense experience, stay in the dorms at Miami University of Ohio, in close contact with the other competitors. But space is limited, so now is the time to make plans. You can stay elsewhere nearby if you like. In either case, time is getting short, so get registered at the Championships Web site: www.ardfusa.com That's ardfusa.com

For lots more on foxhunting, including equipment ideas and techniques, go to www.homingin.com. Read about past USA Championships and get a link to this year's. That's one word "homingin" --- homingin.com.

From southern California, where there's some kind of transmitter hunt almost every weekend, this is Joe Moell, Kay-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Don’t worry if you missed those websites Joe mentioned. You will find them I the print edition of this weeks Amateur Radio Newsline report. (K0OV, ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2003 amateur Radio Newsline Young Ham of the Year closes May 30th. Nominees must be 18 or younger. Full rules and a fill-in-the-blank electronic application are at our new special website at www.yhoty.org.

For now, with Bill Pasternak, WA6ITF, at the Editors Desk, I’m Norm Seeley, KI7UP, saying 73 and we thank you for listening. Amateur Radio Newsline is copyright 2003 and all rights are reserved.

3100. Re: 5mhz operation approved

Did the responders on this thread read the FCC Report and Order that is
linked from the ARRL page. It says quite clearly that the listed
frequencies are the center yet people are still arguing which frequency
is meant.
It is unusual relative to usual ham practice since all rigs I have ever
used read the suppressed carrier frequency - not the center frequency.
But so what? How hard is it to set your rig to -1.4KHz of the listed
channels. Maybe this will help some people learn that setting your VFO
to say 14.349.5 still puts your signal out of the band.
73

I tried to be nice about all this and just dump you in the kill-file, but since you feel the need to change your "nick" every couple days, to by-pass my filters, I'm just going to start reporting you to your ISP. If you had left well enough alone, things could have been different...

Look again. The FCC usually just says "operate between 14.150 MHz
and 14.350 MHz with voice modes. It's up to us to pick out any frequency
to use to have all our sidebands inside that range. Which means don't
park your rig on 14.349 MHz and expect to keep all your USB sidebands
in band. It's just ham tradition to specify the frequency of our suppressed
carriers instead of the center of our USB signals.

After all, every ham eligible for the new freqs had to pass a code test.
And we all know that proves that we all are smart enough to handle this....

Just imagine, a band without a code allocation!

Gay journalists' association regroups
By Brent Dorian Carpenter

DETROIT - Matthew Helms, a 31-year old openly gay writer at the Oakland County Free Press office, has re-launched the Detroit chapter of the National Lesbian and Gay Journalists Association. At its height in the mid-1990s, the group boasted 50 members across the state. The Detroit newspaper strike caused the group to fall into disarray.

Responsible for covering roads, construction issues and suburban governments in Oakland County, Helms spoke to Between The Lines about challenges faced by gay journalists at mainstream media outlets and of his hopes for a revitalized local NLGJA chapter.

BTL: What is the National Lesbian and Gay Journalists Association?

MH: It's a group of lgbt people who work in the media. It was formed [in 1990] to encourage a number of improvements in industry, including professional growth and respect for lgbt workers in the industry, fair and accurate coverage of lgbt issues and mentorship to future journalists.

BTL: What are the benefits of membership with the national organization?

MH: The group offers professional development and mentoring, networking opportunities, access to email listservs, online resources, job fairs, a members-only job board on the NLGJA Web site, a quarterly newsletter called NLGJA Outlook and discounted rates to attend national NLGJA conventions. Plus we have a snazzy sports cap that says: "We're here, we're queer, we're on deadline."

BTL: What can you tell me about the original Michigan chapter?

MH: A number of people who worked in newspapers, TV, radio and related organizations had a strong Michigan chapter in the mid-1990s. One of the most successful events it hosted was a public "Meet the Media" night in which editors and others from major newspapers, radio and TV networks answered questions from roughly 300 members of the lgbt community.

BTL: What do you hope to accomplish with this new iteration of the group?

MH: We hope to revitalize the group and provide a supportive environment for lgbt people who work in Michigan media. Some of us may be the sole lgbt person in our workplaces. Eventually, we also hope to host activities that will encourage interaction between news organizations and the lgbt public to make sure our community is represented fairly and accurately in the

news.

BTL: Why is there a need for an organization like this one?

MH: While there have been great gains made in the way mainstream media cover gay issues, there are still instances where news outlets let false or misleading perceptions slip out unchallenged. We are a diverse community racially, economically and politically, and we are regular folks, too. Too often this is left out of the news in favor of sensational or controversial topics.

BTL: How much influence and/or opportunity do you have in incorporating gay topics into the mainstream stories you write?

MH: The topics and areas I cover don't always lend themselves to coverage of lgbt issues, per se. But working in our Oakland County newsroom in Royal Oak, I fairly regularly suggest story ideas to colleagues and help coworkers who have questions about gay issues.

BTL: Whom do you hope to attract to the revived group?

MH: Though we are primarily working journalists, anyone may join. There are membership levels for people who work in related fields such as advertising and public relations and for others, "friends of the NLGJA," who may simply care that the media represents us fairly. So far, all sorts of people have shown up, reporters, editors and others from daily newspapers and TV and radio stations in Detroit, Ann Arbor and elsewhere.

3106. Houston-Hunks Pounding the Pepperoni--The Ins and Outs of Gay Sex

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 02:09:17 UTC
From: SLee@houston-hunks.com

After reading your section on the Web site, I do thank you for your advice. It seems that I might as well not have sex at all when considering the risks. I am a 29-year-old male, and in 14 years I have had sex only twice. On one occasion about two years ago I performed oral sex on a friend. Since then, I have tested negative for HIV. I have not had sex since. Currently I take Lamisil to treat some fungus infection concerning my nails. I read the side effects on the box, but the sensation of a ☐tight throat☐ is not mentioned. Could this be a symptom for some STD? I have no trouble when eating, and it is not the typical sore throat. It is just a tight feeling.
☐Raul
It does not sound like your tight throat is related to a STD or the medication you take. It comes through loud and clear in your letter that you are very frightened of having or catching a STD from sex. I write my column both on this site and at www.gayhealth.com not to scare people from having sex but to empower them with knowledge so they understand risks and treatments. If you get a STD, it should be treated. Don☐t use fear of STDs as an excuse to keep from having sex.

Some men see HIV as a punishment for being gay. I don☐t know if this is how you feel, but this is a terrible and very wrong way to feel. Some men also believe that if they have sex with other men, they will definitely catch HIV. This is also not true: Many HIV-negative men have loving and sexually satisfying relationships with other men and don☐t catch the virus. Yes, they must be careful and have protected sex, but it is definitely possible.

I urge you to see a good doctor or STD clinic and ask for a gonorrhea, chlamydia, and herpes throat culture. You should also get a syphilis test and HIV test. While you don☐t have to mention that you have had oral sex with a man (some men catch STDs or HIV from oral sex with women), I believe honesty with your doctor is best. If the cultures are negative, then you know you don☐t have an STD. I know you might be too frightened to go for the tests, but this is obviously on your mind. It is better to know for sure than to continue worrying. And remember that STDs are treatable, and most are curable.

In addition to getting tested for STDs, I hope you will talk to a therapist about the fears that keep you from having sex. At 29 you should have sex☐you don☐t have to be promiscuous, but sexual fulfillment is a vital part of life. You are too young to toss that part of you away. STDs are not a ☐gay thing☐: Many heterosexuals catch these infections as well. In fact, I believe that in this day and age it may be impossible to have a healthy sex life, gay or straight, and avoid all risk of an STD. You can certainly avoid HIV if you have protected sex, but other STDs (like HPV, a.k.a.

genital warts) may be unavoidable. The key is to not let fear keep you from sex. Know the risks and symptoms, and get treated if you have a problem.

I am 18, male, a nonsmoker and nondrinker, but I have lost all ability to gain an erection. The most I can achieve is about half the size, and it□s still mostly limp. It□s been two weeks since my last erection, which leads to my question: I used a dildo on myself anally for the first time on that last masturbation with a full erection. Since then, I have masturbated and ejaculated unintentionally in the flaccid state while trying to gain an erection. I know this is bad, and I want to know if there was any possible damage done to me through using the dildo and if this has been heard of before. □ Brian

Let me put your mind at ease immediately: You did not injure yourself with the dildo, and this problem of not being able to have an erection does happen. Now that you feel better, I hope, let□s delve into your problem and examine causes and a solution. Men can injure themselves with a dildo, but it usually occurs in the anus or rectum. They can notice pain or bleeding as well as signs that the delicate lining of the anus and rectum is torn or the muscle has gone into spasm. As long as the dildo is comfortable and you insert it with constant gentle pressure, you should not harm yourself. Clearly, if you feel pain or notice blood, stop. A dildo, even if forcibly inserted, will not damage the nerves that control erection.

Your letter points out a very interesting phenomenon: that orgasm, erection, and even ejaculation are three very separate functions. While usually they go together, you can have an orgasm without an erection□or even without ejaculation. Medically speaking, the three events may occur separately or in any combination. When someone experiences sexual dysfunction, it is important to determine whether it is physiological or psychological. When a young man suddenly develops inability to achieve an erection, it is most likely related to psychological stress. Clearly, medical conditions such as diabetes, blocked arteries, and other diseases can produce this problem, but onset is usually gradual and seen in older men. You might have some sort of uneasiness over the fact that you used a dildo. Some men find that using a dildo makes them really confront their sexuality, as anal stimulation is often incorrectly associated as a □gay-only□ kind of pleasure. (Believe me when I tell you: Straight men can be into it too.)

I think your problem will correct itself with time. Try and stimulate yourself visually (a movie or magazine). If you get an erection when you wake up in the morning, try and masturbate then. Some men find that Viagra will help them achieve an erection and get them beyond their difficulties. Once you see you can have an erection, the anxiety lessens and you won□t need Viagra anymore. If the problem isn□t getting better and, especially, if you don□t have a morning erection, see an urologist. Simple tests can be done to be sure that the problem is not physiological. An urologist can also give you a prescription for Viagra.

I was diagnosed over a decade ago with a mild case of ulcerative colitis. It is under control with medication. A few years ago during sex my partner entered my rectum with a little too much force and I reflexively clinched. When he withdrew there was lots of blood from my rectal area. Since then I have never been the same; I haven□t been a bottom since. Even when I have a formed bowel movement, it hurts and often causes bleeding. I have asked my gastrointestinal doctor about this recently, and he told me I have a fissure. He said that with time it will heal. It□s been three years, and it still hurts and bleeds. I wonder if it is directly related to the colitis and if there□s anything I can do about it. I would like to be a bottom again, but it□s just too painful. Even when my partner enters me with his fingers, it sometimes causes bleeding. What can I do to get my bottom to heal and become a bottom again? □Alan K.

Ulcerative colitis can be a debilitating inflammation of the colon, and you are fortunate in that you have a mild case. As you are well aware, I am sure, some people with ulcerative colitis need to have surgery to remove the diseased portion of the colon. There is also an increased risk of colon cancer in people who have ulcerative colitis for more than 10 years. It sounds like you do have a fissure that may have occurred during anal sex. I assure you, however, that fissures in men with colitis can occur even without sex: They can be related to the colitis or bowel movements. The colitis can make the lining of your colon so irritated that it just tears. You might feel the tear and think that it is because your partner entered you too forcefully, when in fact, it simply happened. I urge you to talk about this with your partner so neither of you feel guilty or blamed for your problem.

Getting your colitis under control is the most important step in promoting the fissure to heal. Diarrhea can be just as damaging as hard bowel movements to the torn tissue of the anus. Your doctor must also look inside to be sure that you do have a fissure and not some other problem that may or may not be related to the colitis. A biopsy is very important to check for precancerous changes in your colon.

If you do have a fissure, then it should have healed within three years. Your doctor might need to prescribe a cortisone suppository or an enema like Rowasa to help promote healing. Stool softeners and fiber agents are very important to make your bowel movements less traumatic. Nitroglycerin ointment also might help the fissure heal. If your doctor is unfamiliar with these medications or if you want another opinion, you could see a colon and rectal surgeon. However, just because they have the name surgeon doesn□t mean they will want to operate□you can look for a list of gay or gay-friendly physicians on www.gayhealth.com or www.glama.org. If your problem does not heal with medical treatment and if your colitis is quiet, then surgery might be the best option. Sometimes, surgically removing the torn, inflamed tissue can be enough to promote healing. A specialist will advise you.

Last but not least, I am sorry to say that you may not be able to have receptive anal sex again. Some people with ulcerative colitis have too much inflammation and will always tear. If you do heal, then be very careful

when you attempt anal sex. Go slow, and stop if you feel pain or bleeding. A small dildo should always be tried first to test for comfort before you move on to the real thing.

I hope this helps, and I don☐t mean to discourage you. Please don☐t let the doctor tell you month after month that it will heal, because sometimes it doesn☐t. While surgery is not a pleasant thought, it could get rid of your fissure.

I am perhaps six to eight months into a case of Peyronie☐s disease [which is characterized by a plaque, or hard lump, that forms on the penis]. My urologist has prescribed Verapamil ointment twice a day, and I can☐t tell whether there is any effect or if it would be much worse had I not begun this regimen. It☐s not improving: The inflammation forms about a 30- or 40-degree asymmetrical bend along the length of the penis and to the left, and it has three or four plaques and three or four visible dents. The only change I think I see since starting the ointment is a minimal reduction in tenderness. It☐s basically repulsive, yet my urologist believes my case is in the less-severe category. As a pathologist I have access to lots of literature, and I realize there are no reliable remedies. I☐ve read that Verapamil injections have had some limited success, and that when one☐s case is stabilized, curvature can be lessened by a plication procedure described by Tom Lue at University of California, San Francisco. My question to you is: Do you know of any gay urologists with a good reputation in the Bay Area (or elsewhere) who may be experienced with Peyronie☐s disease? ☐E.C.
I discussed your problem with Franklin Lowe, MD, a very gay-friendly urologist in New York City who has been of invaluable help to me over the years. Dr. Lowe agrees that the Verapamil will probably not work. He advised Vitamin E (400 milligrams daily) and Potaba. Potaba requires taking 12 grams a day, which amounts to 24 tablets. He also told me that Tom Lue, MD, in San Francisco is one of the foremost experts on Peyronie☐s disease I urge you to see him.

In reference to ☐Bill,☐ the man with two daughters, I just want to lend a helpful hand by saying that sending them back to their mother just because he finds a male friend is not the right thing to do. That will just make them think that he doesn☐t love them or have enough love to share with them and another man. They will never recover from that. If he finds that they are having a rough time with it, then therapy should be considered. Never, never, never let your children think that you do not love them or that you cannot love them and someone else too. That will only hurt them and you and your ex-wife. They will think that if she finds someone else also, they will not be welcome to see her either. That is not the image that you want to show them.

There is a section in the public library in my hometown that has age-appropriate books on gay parenting. This is a great idea for all parents, not just gay ones. I found that these books were very helpful when I got divorced and retained the custody of my daughter. She was a little

bit older than Bill☐s girls, but she was still going through a lot of new things. The divorce in itself was a pretty big change compounded by living in a new home without the mom. The school was very helpful to me also.

Regardless of the issues at hand, I was completely open and honest with my daughter, and I always reassured her of my love for her. You might also be surprised at how tolerant many of the neighbors and parents of friends may be: I only received a very few negative reactions, and my daughter came to realize that those of her friends whose parents had problems with the situation were not really good friends to her anyway. I wish Bill the best of luck with everything, including finding a soul mate and living with that love and his children☐s. He just might be surprised to find out that his new love interest may also have children of his own. ☐Jake

In a recent response to a gay man who has two young daughters, you wrote, ☐If [your wife] reinforces the fact that homosexuality is not a choice but a legitimate lifestyle, then your children will have a much easier time adjusting.☐ I would ask that you reconsider the use of the term lifestyle to describe homosexuality. While it is a common term today, it has come to be associated with choice, including ones with negative implications such as drug use, promiscuity, bar-going, etc. It is all too often the term of choice for our fundamentalist religious foes. I expect to hear it from them but am dismayed when I hear other gays and lesbians repeat it. Thank you for your time and for the opportunity to express my opinion. ☐Justin

Local news briefs
Ford's Allan Gilmour receives national business award

PHILADELPHIA - Allan Gilmour, the openly gay Vice Chair and CFO of Ford Motor Company, has received the Distinguished Business Leadership Award from the National Gay & Lesbian Chamber of Commerce (NGLCC).

"We applaud Allan for his remarkable achievements and dedication to the lgbt community," said Chance Mitchell, an NGLCC co-founder.

The NGLCC co-hosted the International Business Colloquium Panel at the 2003 Equality Forum this past weekend in Philadelphia, Pa.

Dancin' in a church
SOUTHFIELD - Northwest Unitarian Universalist Church will hold a welcoming congregation dance for lgbt folks and friends on Saturday, May 17 from 8 p.m. to midnight.

The event will be alcohol and smoke free, with soft drinks and snacks provided.

Admission is $10 per person at the door. The church is located at 23925 Northwestern Highway in Southfield.

For more info email derp98@yahoo.com

U of M scholarship opportunities
ANN ARBOR - Two scholarship opportunities are open to advocates, activists, women and hell-raisers through the University of Michigan.

The James Neubacher award is given to someone raises awareness, access, acceptance and full participation and is making significant contributions in society for people with disabilities.

The award includes a stipend provided by the Office of the President, and the nominating process is open to faculty, staff, students, or alumna/alumnus of the University.

The Neubacher nomination deadline is Saturday, May 31. For more information, visit www.umich.edu/~hraa/neubacher.

The second opportunity is in scholarships for women returning to school. Offered by the U of M Center for the Education of Women, these are given at the graduate, professional and undergraduate levels to women whose education has been interrupted. There are various scholarships available, ranging from $1,500 to $6,500.

The interruption in education must be for at least a) 48 consecutive months or b) a total of 55 months, not counting interruptions of less than 12 months.

As the first step in applying, you should submit an explanation of your circumstances in writing for an evaluation by the eligibility committee PRIOR to submitting an application.

For more information, visit www.umich.edu/~cew or call CEW at (734) 998-7699.

Volunteers needed for Womyn Everywhere Megapicnic
BRIGHTON - Once again the Womyn Everywhere Collective is looking for volunteers to help out at the July 12 picnic. There are two jobs we need volunteers to fill: (1) Greeters, who are responsible for greeting all women arriving at the picnic, giving out free WE raffle tickets and picnic information pamphlets, managing the parking lot, etc.; and (2) Welcome Table workers, who are responsible for overseeing all activities at the welcome table (i.e., collecting WE raffle tickets, selling WE stuff, collecting $1 donation from all picnic participants, registering volunteers, giving out name badges, etc).

Shift times start at 10:30 a.m. and go until 6 p.m.

If you are interested in helping out please contact one of the WE Volunteer Coordinators: Carole (hootiepd@aol.com) or Nicole (nicpittman@yahoo.com). Please indicate if you would prefer to work before or after 1:30 p.m. and if you have a preference for working as a greeter or at the welcome table.

For information on the WE Picnic go to

New group looks for more members
CLAWSON - After founding the Suburban Lesbians of Michigan online group in September 2002, Kelly Leszczynski said that more than 180 members have already signed up.

She manages a website at http://hometown.aol.com/suburbanlesbian/org.html, geared towards creating a social avenue for Michigan lesbians to meet each other.

The group holds monthly social events and is in the process of planning charity events.

"One of our main goals is to give back to the community in as many ways as we can," said Leszczynski.

SLOM is meant to be a place where women of all ages can gather, talk, and share, she said.

"A place where we can be ourselves and be respected for doing so," she added. The group works to set up events like going to bars/clubs, having dinner, and just gathering in a neutral atmosphere.

Ferndale honors gay-friendly FANS
By Sharon Gittleman

FERNDALE - A Ferndale husband and wife active in lgbt rights campaigns have been named "Citizens of the Year" by a city civic group.

Joann and Dick Willcock were nominated for the award by Ferndale City Council member Craig Covey and Ferndale Mayor Robert Porter.

A plaque and proclamation was presented to the couple by Lodge 1588 of the Elks Club on April 26.

"Those two have a long history of volunteerism in Ferndale, in a wide variety of causes," Covey said. "They work on the Blues Festival which raises money for charity. They've worked on the Dream Cruise for five years."

But the couple have also devoted their time to a number of causes dear to the lgbt community, including the 1999 campaign to pass a human rights ordinance in the city and the Michigan AIDS Prevention Project.

Joann Willcock serves on the board of Friends and Neighbors of Ferndale, a gay and lesbian community organization.

"I am so pleased they won," said Ann Heler, FANS' president. "They are Ferndalian cheerleaders. They support the city and have lived here all their lives. If you need them, they are there wholeheartedly. They are humble, helpful and kind. You'd want them to be your neighbors."

Joann Willcock was the co-chair of Ferndale's failed campaign to pass a human rights ordinance in the city in 1999. "I also worked on the ad hoc committee that that studied the ordinance. My husband worked on the campaign as well," she said.

Willcock said she was initially undecided about the proposed ordinance, but that testimony she heard convinced her the ordinance was needed.

"One young man I spoke to was trying to get a job in a restaurant in Ferndale and he was told he was too gay to work there. There was another incident we knew of. Someone was denied seating in a restaurant because he had children of color," she said.

"I have a friend who has a store that was egged because they were gay. It angered me that someone could be treated that way. It opened my eyes."

Willcock said volunteering to help gay people and others in her neighborhood was "the right thing to do."

"I hate to say somebody has to do it, but that's the way it is," she said. "Everybody should be treated with respect and dignity, and I have seen very often the gay population has not been treated with that respect and dignity."

Willcock said she was speechless when she learned about the award.

"We were quite surprised and honored to be nominated," she said.

"It's something I never expected," agreed Dick Willcock. "We were just trying to make our community a better place to live."

Willcock has lived 37 years in Ferndale, a community he describes as a "a small town inside a large metropolitan area where everybody knows everybody and everybody pitches in."

While neither he nor his wife is gay, Willcock felt compelled to help his lgbt friends and neighbors.

"I think it's somewhat better for gay people, but we still have a long way to go," he said. "We had a neighbor - somebody scratched 'fag' in the hood of his car last year. We tried to give him as much support as possible and directed him how to file reports."

Willcock said he thought there would have been more tolerance in his "diversified neighborhood."

"We've been very fortunate this year that there were no hate crimes reported," he said. "Hopefully, we can go through the whole year like that."

Joann Willcock said she's seen a tenfold improvement in community acceptance over the past five years. And her husband holds even higher hopes for the future.

"I'd like to see everyone treated equally," he said.

3109. Houston-Hunks Pounding the Pepperoni--Graduates walk out on Santorum after Anti Gay Remarks

Graduates walk out on Santorum
Approximately one eighth of the graduating seniors at Philadelphia's Saint Joseph's University walked out of commencement ceremonies on Sunday as U.S. senator Rick Santorum (R-Pa.), who recently infuriated gay rights groups and others with derogatory remarks about homosexuality, prepared to deliver the keynote address. About 100 graduates got up and walked out--amid competing boos and applause--when students were given an opportunity to leave "nondisruptively" before Santorum was introduced to receive an honorary degree and make his speech. Santorum didn't make any reference to the walkout or the controversy directly. "We are all called to love one another, even people we disagree with, even people who hate us for what we believe," he said.

Some students had urged the Jesuit university to rescind Santorum's invitation after he likened gay behavior to bigamy, polygamy, incest, and adultery in an April 7 interview with the Associated Press. "Senator Santorum and I are at completely opposite ends of the spectrum," said Saint Joseph graduate Sara Foglesong, who was among those who walked out. "I am not incestuous. I am not a bigamist. I just happen to be bisexual. It offended me."

The commencement also drew about two dozen protesters to a nearby street corner. "He represents homophobia, [which] I don't believe is a value based on Christian love," said demonstrator Malcolm Lazin, executive director of Equality Forum, a Philadelphia-based gay and lesbian group. "Homophobia encourages hate crimes, and Senator Santorum needs to be held responsible for that."

Patrick Hamilton, a 1996 graduate of Saint Joseph's, said he was "disappointed" that the university had invited Santorum: "Saint Joseph's has always been known as a conservative university, but they've made a lot of strides in being more tolerant and accepting of gays and lesbians."

3110. Houston-Hunks Pounding the Pepperoni--Gay Motor City Pride set to ride

Motor City Pride set to ride
By Brent Dorian Carpenter

DETROIT - Despite recent concern surrounding outstanding debts to the City of Ferndale, organizers of Motor City Pride are giving assurances that the event is caught up on its delinquent bills and that all the plans are in place for this year's celebration.

Jeffery Montgomery, Executive Director of Triangle Foundation, which took over the hosting reins of Motor City Pride two years ago, explained that - although the problem has now been resolved - the delinquent bills problem was really a debate over whether MCP should have been charged for certain city services.

"It's an extremely expensive event to produce," Montgomery said. "Obviously, we're trying to save as much money as possible. There were things that were negotiable about what we should have to pay for."

Montgomery said this year's deposit was paid early, a clear sign that the organization's ties to city management in Ferndale are in good standing.

Tom Barwyn, Ferndale's City Manager, stated his unequivocal support for Pride. He said that, but for one or two vocal protesters, he has seen strong community backing for the event. He said Pride permits should sail easily through the City Council hearing process.

"It's been well run, well attended," he said. "I don't anticipate any problems. We've had a great relationship and I hope it stays."

Openly gay Ferndale Councilman Craig Covey echoed the sentiment, saying, "We're glad Motor City Pride is here and the city and the council has a good relationship with Triangle."

2003 marks the third year the annual Pride celebration will be located in downtown Ferndale. According to Montgomery, last year's event attracted more than 15,000 people. He said they are anticipating as many as 20,000 this year.

"We want to expand, and the city has worked well with us," he said. "I think Kevin [McAlpine] and Jay [Lippy] have done a really great job holding down costs and attracting sponsorship."

McAlpine, Triangle's Director of Development, recently released a $50,000 operating budget for Motor City Pride. Roughly 40 percent of that, or $20,000, comes from corporate sponsors; another $15,000 from vendor fees; $5,000 from donors; and the remaining $10,000 is listed as donated by

"other."

"The first year we lost a small amount of money," McAlpine said. "Not a significant amount. The second year we broke even. This year we look like we may clear a small profit."

Michael Larry, the past producer of Pridefest (when it was located in Royal Oak and before its name changed), says he is disturbed by the direction the event has taken. He criticizes the late payment of the debt, and questions if Triangle is spreading itself too thin with its various ventures unrelated to victim advocacy.

"Before, the bills were paid in advance or at least 30 days after the event," he said. "This has nothing to do with a gay issue. It's a matter of trust, especially since they are trying to come back. It reflects badly on the entire community. They should not be focused on entertainment. With the Comedy Fest, the Film Festival and Pride, they risk collapse."

Montgomery admits that, like any organization dependent upon donations and fundraising, Triangle's fortunes ebb and flow.

"We don't have an elaborate system for accounting here," he said. "We have money and then we don't have money (laugh)."

Gay TV
by Gay Boy Ric (5/14/2003)

DAWSON☐S CREEK SERIES FINALE

Wed., May 14 WB, 7-9 p.m.

Set five years in the future, Dawson, Joey, Pacey and Jen return to Capeside to attend a wedding. Dawson has been living in L.A., producing his autobiographical TV series The Creek, but has never forgotten the love of his life. Joey is a successful book editor living in New York with her boyfriend (Jeremy Sisto). Pacey is the owner of the new Ice House and still carries a torch for Joey. Jen is a single mom living with Grams and managing an art gallery in Soho. While Jack ... Jack has become a teacher at Capeside High and has fallen in love with a secretly gay man! Promos hint that one of the four main characters dies in the episode ☐ (since Jack is considered Character No. 5, he☐s safe). The series finale was co-scripted by out show creator Kevin Williamson ... no wonder Jack lives!

WEDNESDAY, MAY 14

ALL MY CHILDREN (ABC, noon) The cat☐s out of the bag ... Bianca now knows that Lena was secretly working for Enchantment☐s competition☐and was ordered to befriend Bianca in order to steal Enchantment☐s anti-aging formula. But Lena tells her that her love for Bianca is real ... and Bianca forgives her.

ELLEN ON PRIMETIME GLICK (COM, 9:30 p.m.)

SEAN HAYES ON LETTERMAN (CBS, 10:35 p.m.)

THURSDAY, MAY 15

WILL AND GRACE (NBC, 8:15 p.m) Season Finale: The gang sets sail on Stanley☐s yacht to scatter his ashes at sea. But as Jack and Will frolic, Grace frets because hubby, Leo (Harry Connick Jr.), is keeping company with a very seductive M.D. (Nicollette Sheridan) while on a medical assignment in Guatemala. Minnie Driver and Deborah Harry guest star.

E. R. (NBC, 9 p.m.) Season Finale: Carter joins Kovac on a relief mission in war-torn Africa. With Laura Innes as lesbian Dr. Kerry Weaver.

SEX 2K: GAY CRUISES (MTV, 9 p.m.)

FRIDAY, MAY 16

MARIO CANTONE: COMEDY CENTRAL PRESENTS (COM, 10:30 p.m.) Also Saturday at 7 p.m.

BETTE MIDLER ON CAROLINE RHEA (Ch. 6, 4 a.m.)

SATURDAY, MAY 17

SEX 2K: GAY CRUISES (MTV, 5 p.m.) 100 PERCENT NYC: TRIBECA FILM FESTIVAL CONCERT (MTV and VH1, 7 p.m.) Mario Cantone and Whoopi Goldberg are among the performers.

SUNDAY, MAY 18

SIX FEET UNDER (HBO, 8 p.m.) David and Keith navigate troubled waters in their relationship.

HITLER: THE RISE OF EVIL (CBS, 7 p.m.) Part 1: Robert Carlyle (THE FULL MONTY) plays Hitler in this new dramatization of how the young Hitler rose to power in pre-WW II Germany. Peter Stormare plays the Ernst Roehm, one of Hitler□s closest early allies and the thuggish leader of the ultra-violent S.A. (Storm Troopers), also known as the Brown Shirts. Although Roehm is now known to have been gay, his sexuality is not portrayed until Tuesday□s Part 2, when a disaffected Hitler□ having decided to order Roehm killed□walks in on Roehm and a young blonde lover in bed.

THE MATTHEW SHEPARD STORY (Bravo, 8 p.m., 1a.m.) Repeat: As Matthew Shepard□s parents (Sam Waterston and Stockard Channing) deliberate whether to recommend the death penalty for their son□s killer, flashbacks recall Matthew□s life and tragic. Matthew: Shane Meier. Originally an NBC TV Movie.

QUEER AS FOLK (SHO, 9 p.m.) Melanie has trouble adjusting to Michael□s need to be an involved father-to-be.

TUESDAY, MAY 20

HITLER: THE RISE OF EVIL (CBS, 7 p.m.) Part 2: As he prepares to order Ernst Rohm (Peter Stormare) killed, Hitler walks in on Rohm and a young blonde lover in bed.

BUFFY THE VAMPIRE SLAYER (UPN, 7 p.m) Series Finale: Buffy meets her destiny when she leads the Scoobies, the Potentials and Angel into the Hellmouth for a final showdown with the First. With Alyson Hannigan as teen lesbian witch Willow.

NYPD BLUE (ABC, 9 p.m.) Season Finale. With Bill Brochtrup as the precinct□s gay receptionist John Irvin.

Final confrontation forces couple out of state
Taylor couple looks forward to moments of peace
By Kelly Peters

TAYLOR - Since October 2002, Amy Larcom and her partner, Karen Vauris, have put up with constant verbal harassment and torment from their neighbor, Derek McDonagh.

Their next and hopefully last trial is scheduled for 1 p.m. on May 13 in the Wayne County 23rd Judicial Court. Then, Larcom and Vauris are moving south to Missouri, to live with Larcom's mother until they reestablish themselves and find some peace of mind.

"I can't believe this whole mess," Larcom said. "All I know is that we intend to go to court against Derek for everything he has done to us. I am a wreck and we just want to pursue a new life somewhere else. It's terrible when you are pushed out of your own home. Is this America or is this a terrorist state?"

The couple's troubles started last October after Larcom's sister, who was visiting from out of town, reprimanded two kids for playing ball so close to her car. The two kids were linked with McDonagh. After that, McDonagh set out on a seven-month tirade of fence dismantling and verbal harassment, sending the two women to seek help from whomever they could.

After contacting the Triangle Foundation, the City of Taylor Police Department and an attorney, the couple had their day in court on Jan. 21, 2003.

At the pre-trial conference, McDonagh pleaded "no contest" to charges of harassment and the imposition of 12 months of unsupervised probation.

But, according to Wayne County prosecutor Peter Schwartz, a judge subsequently refused to accept McDonagh's plea or the condition of unsupervised probation, and rescheduled another hearing on Feb. 4.

McDonagh's punishment went from 12 months to six months of unsupervised probation; he was given 21 days to resurrect the fence between the properties.

"McDonagh obtained an attorney, and I had met with him and said I would consider dismissal of the charges, if after six months there had been no problems between the two neighbors," Schwartz said.

He said he then found out that McDonagh was still harassing the couple, and he forgot about the dismissal charges.

On April 27, according Larcom, McDonagh took down the fence he had just replaced in February.

"I guess these women can't get any peace without putting him on trial," said Schwartz. "I thought the threat of a trial would calm this guy down, but it doesn't appear to have worked out that way. We are going to go ahead with the trial."

On May 2, the couple hired a fence company to come in and replace the fence themselves. The task proved impossible because McDonagh had sawed down the fence posts into the ground.

Even though they now have plans to move away from McDonagh, and has sold their house, the couple has fears about the time remaining in Taylor.

"We know that we will be having problems with him again because we will be moving and it will be his last chance to do something to us," Larcom said.

The couple will go back to court, and their supporters are hoping that McDonagh will finally get a formal charge and some jail time for violating his probation.

"This guy has no respect for the law," said Crystal Witt, victim advocate for the Triangle Foundation. "Hopefully, his violation of his probation will get him incarcerated."

The City of Taylor has a harassment clause in its city charter that states: "It shall be unlawful for any person with intent to harass, annoy or alarm another person to: (1) Follow a person in or about a public place; or (2) Engage in a course of conduct or repeatedly commit acts that alarm or seriously annoy another person and that serve no legitimate purpose."

As of press time, Detective Jim Martin of the City of Taylor Police Department did not return phone calls.

A fence dispute 11 years ago led to the deaths of two former board members of the Affirmations Lesbian-Gay Community Center: Susan Pittman and Christine Puckett. The two lived in a rural Huron Township home and were shot to death in their front yard in May 1992 by their neighbor, Jim Brooks, as Puckett tried to resurrect a fence between the properties.

3113. Houston-Hunks Pounding the Pepperoni--Gays go to prom

I learned the truth at 17
Our high school senior correspondent reaches a crossroads: If he takes another guy to the prom, is he doing it for himself, or just to fulfill an image of ☐gay teen☐ that☐s taking over his life?
By Paul Chandler
An Advocate.com exclusive posted April 9, 2003

A few weeks ago I was contemplating taking out an ad that read, ☐Emergency! Need gay male prom date. Respond immediately.☐

Every time spring rolls in, prom fever hits. Who am I going to go with? Where do we go to eat? What about afterward? Do we really want to go to ☐after-prom☐? What group should we travel with? Is it really that important? Do we really have to go to that downtown French restaurant? Finally, the last one: Do I really have to go with a guy?

About six months ago I went to homecoming with my friend John. It was the first time in the school☐s history that a male couple went to a school dance. While I had a lot of fun, it wasn☐t as fun as it could have been.

The music wasn☐t too bad (though at school dances one can only expect so much). Even the personal drama I had with one of my best friends wasn☐t the reason for the damper. Now that I look back on it, I think it was because I felt pressure to be something that I wasn☐t. Maybe it☐s been that way all along.

I felt like I had to make a statement. One of the T-shirts I wear says, ☐W.E. We☐re EVERYWHERE,☐ and that☐s what I wanted to show everyone. I wasn☐t going to sit down and take it. I wanted to show them that we are right there, listening to the ☐Oh, that☐s so gay☐ and the ☐God, that guy☐s a fag☐ every day, every single hour. We are their best friends, their siblings, their parents. We aren☐t going to be faceless anymore.

When John told me he might dress in drag, I figured that if one face was that of a drag queen, all the better. This is one extreme: Learn it. Accept this and you☐ll accept everything. I was going to shove it down their throats and make them feel what society continues to do to us. ☐I did a cheerleader in the bathroom.☐ Yeah? Well, my friend participates in an open relationship. There☐s a park downtown where some people go for anonymous sex. We☐re not all like this, but for every one of your extremes, we☐ve got one too. We☐re right down in the dirt with you, no better, no worse, same exact proportion, same exact problems.

It was like all the times in the closet when I had been pressured to say, ☐Oh, yeah, that girl☐s so fine☐ were coming back and working backward Now

I felt I had to offer a loud ☐That boy is hella hot!☐ I had to be a rooftop yeller. I had to be the Gay Guy. I☐ve heard that this is overcompensation And now I can say yep, that was me.

My justification was that a demonstrated fact can destroy an existing stereotype when the two cannot coexist. A woman cannot be inferior and intelligent☐we know intelligent women, so women are not inferior. A fag cannot be an athlete☐I am an athlete, so fags can indeed be athletic. Once someone proves an assumption wrong, I figured, the whole belief system crumbles. The weak were the ones who succumbed to compromise; the brave prevailed.

But as the year progresses, I see I☐ve made a fatal error. The positive truths about a person do not necessarily obliterate the negative assumptions. One person told it to me this way: ☐If you see a basketball player who is amazing, you cheer for him. If you find out he☐s gay, you might still cheer for him, but only for that nonexistent part of him which is straight.☐ In other words, if you hate fags, you grant that this one person is an exception who☐s more like straight people, and you can still believe that all other fags can☐t be athletes. Simple as that.

And if you put yourself out there as only gay? Is that good enough to erase other people☐s negative attitudes?

I know now, it☐s not.

I thought I lived and worked for the day when high schoolers wouldn☐t care when someone comes out. I longed for when telling your friends that you☐re going out to the movies with Paul is as easy as telling them you☐re going with Jenny. I think in that sense, I☐ve done a little good and a whole lot of bad.

I☐ve asked people constantly what I could have done better. They answer simply and directly and tell me that I should be doing what I think is the hardest thing of all to do: Be myself. One of the people who told me that was the best friend in my homecoming article, who didn☐t approve of the idea that I might take a drag queen to the dance. (In the end, I didn☐t.) We☐ve grown apart since that article came out, and now there are times when we don☐t even say hi in the halls. I look back on what happened and I can understand why he was upset. I was wrong. It wasn☐t about him not liking drag queens; it was about respecting other people☐s tolerance levels. It was about nudging people in the right direction instead of jerking them.

Sometimes when I try to talk to him, I can see how much he hurts when he looks at me. I feel like I☐m ripping apart his insides. I don☐t think I ever felt so stupid in my entire life.

I☐m not going to lie. I☐m still a flamer. But maybe there is a difference between nelly flaming and proper flaming. Maybe being nelly is throwing it in people☐s faces because you don☐t want them to see who you really are Maybe it☐s too hard to face the whole world naked, so you take refuge in stereotypes. That way, when people say they hate your guts and you☐re going

to hell, it□s not you, it□s that persona you wear. Then maybe it becomes so hard to take off that mask that you squeeze everything in your world into that niche and accuse your best friends of the greatest atrocities for the smallest crimes.

Maybe.

I don□t know where I□m going from here. I□m still learning. I guess I should start with square one□I experience □romantic feelings□ toward guys□and work from there. It□s time to stop living for the spotlight and start living for myself.

It□s funny, you think you know everything when you□re 17. You start walking forward in long, easy strides until suddenly that rake slams into your face and you think you have a splinter in your nose.

I think I□m bringing a lesbian to prom this year, not because she□s a lesbian but because she□s a good friend of mine whose school is too small to have one. She□s also a great dancer. I□ll show up at her door in my beat-up car, pin on her boutonniere, and hold out a wrist for my corsage. We□ll eat at that fancy French restaurant, maybe get a limo, meet up with some friends before and after the prom, and fill in the rest with laughter.

We□ll just all be ourselves, enjoying the last major event before graduation

My mother, survivor
She may be barely 5 feet tall, but she□s the strongest person I know, from weathering her husband□s desertion after 25 years of marriage to embracing her newly out gay son.
By Michael K. Feds
An Advocate.com exclusive posted May 7, 2003

While putting diesel fuel in our tractor this evening at our home in rural Clermont County, Ohio, as my recently divorced middle-age mother was preparing to mow six acres for the upcoming open house, we talked back and forth about the men we are dating. Among the verities of chirps from spring birds and the bark of the neighbor□s coon hound Shasta-Mae running around in the field, the value of life was again made clear to me.

I saved my mother from suicide last year, ripping the knife from her hands and holding her weeping soul, tight in my arms on the kitchen floor. It was the day my father ended a quarter-century of marriage and left her with a home, bills, land, and a broken heart. But that was a passing moment of weakness, because my mother is the strongest person I know. She stands barely 5 feet tall: I look at her and in my mind still see her standing by her Firebird hot rod in the 1970s photograph she doesn□t know I have pressed in my Bible. She still has her blond hair (although I think she might be getting □assistance□ for that now), and she still turns heads when she puts on her church dresses (forgive me for the combination) and drives off to her Baptist church with the top down on her Mustang GT.

Well, she used to. He got the cars in the divorce, along with a slap on the wrist.

When I was a boy in this rural town, on these six rural acres of paradise, my mother was the flower that was always in bloom, even on our worst days. She was the only one who came into my room and dried my tears after awful days at school, particularly the day when Spanish class was halted for the students to vote on whether or not I was a fag; the teacher was with the majority. My mother was the one who said, on the day I graduated from high school□which I barely made it to□that she was proud of me, even though I was forth from last in the survivor lineup.

She was the one who hugged me when she found out I was gay just months later and listened to my story; so many other mothers would have done just the opposite.

When I was a young man in this rural town, on these six rural acres of paradise, my mother encountered a change in her life. As have so many gay, lesbian, bisexual, and transgendered people, she found out what it is like to come out of her pain and find happiness. After seven years of suffering mental and emotional abuse from my father□during those same years that I was a boy in this rural town□she no longer accepted his victim-of-infidelity treatment. We cleaned out the closet and sent him packing and began to not rebuild, but to build our much-deserved human right of happiness.

Happy Mother□s Day, Mom.

OK...

It was great. As usual.

I found all kinds of stuff out in the flea market. Had a tough time resisting the Nikon LS-1000 slide scanner for $100, but was finally successful. I just came to the conclusion that scanning slides wasn't how I wanted to spend the next few years (I have 1000's of slides).

Made boneheaded move by not buying one of the 600W inverters for $40. What was I thinking? And... passed up the $6 ARRL repeater atlas - latest version, too. Was gonna get it Saturday - Ha. Rain.

Saw all kinds of neat stuff in the flea market to keep in mind for when I really have the money. One fellow there was showing off the "1 man tower" - a square, steel affair that has a Hazer-like tram up the side. Claims 19 Sq. Ft. at 130 mph and U only climb it once to erect it. The Hazer-like attachment is used in the erection of it. Free-standing tower, too, BTW. I got the literature - if I get a new tower, this will be a consideration. The tower is imported from Australia - they have a California-based PE that certifies the Aussie's calcs, for the zoning boards to puruse.

On the downside, I've seen _all_ the old Motorola and GE commerical 2-way rigs I will ever need to see - hams, other than repeater-erectors, really buy this stuff?

Moving inside, esp. during the rain Saturday, was a pleasant experience. The inside was _not_ packed. Posters saying it was, have never seen Dayton during the 33,000+ attendance of the April Hamventions. I was able to see everything I wanted to see, without much hassle in getting close enough to see it. Worst congestion was around the Glenn Martin tower displays around 3:00 PM when they were drawing for the 8' roof mount tower. A little crowded.

And while quite a few hams are overweight, I have a sensitivity for foul odors, and can smell a cigarette _all_ the way across a theater, but I smelled no one there.

I could have spent another week there, except that I'm not used to walking and being erect for that many hours in a day. My lower half needed good drugs! Tylenol was not "making it".

I managed to kill maybe a half hour just deciding not to buy anything at MFJ since they weren't discounting and I could get anything I wanted any time I wanted at the local Ham Radio Outlet store. I did take a while to mentally catalog the many varieties of swr / power meters they had on display. I didn't think there were that many different types of SWR/Power meters built.

Picked up various odds and ends I would have trouble finding anywhere else. Had already looked for the snap-on ferrite chokes for quieting RF interference traveling on wires, and found them at several places there - $2 each was the going price. Bought what I hope was a year's supply! <G>

Then there was grounding braid. Might have to pull the car's body and engine and tail pipe and etc. together electrically, eventually, to keep the HF rig from picking up a lot of hash from the car electricals.

Able to get 3/16ths inch aluminum rod for the 2M beam, too - without shipping costs or having to putz around ordering it. It was there for purchase in 12' lengths. Try finding that somewhere else.

Less CD's and less variety than in the past, but only really wanted QRZ Ham Radio for sure, anyway. The huge displays of CDs seem to have disappeared. Oh, well, most of the CDs had nothing to do with ham radio anyway... but they were fun...

And the lack of "crush" of people was pleasant. Probably was about 20,000 there last weekend - that is a pleasant number for that size property.

Anyway, _I_ liked Dayton. I'll be there next year, and the next, and the next, and hopefully every year 'til I'm dead.

Its just outstanding.

And that, Phil, is why I regard the rule as stupid. It's not FM we're discussing.
Some functionary somewhere, maybe ITU for all I know, decided to do something with his boring day and arbitrarily changed decades of technical convention. SSB began referenced to the carrier frequency and has been that way ever since. It's the intelligent way to describe it. There is no good reason to describe SSB in equivalent terms with other modes. The reason as I just described is obvious. In fact, it is technically incorrect to do so. 5532 USB is NOT 5329.6 but that's what ham radio readouts will have to show. It is simply oncorrect, and is a fine example of arbitrary ruling just because someone wanted it to be that way, in the face of technical accuracy.

In the absense of a *very* good reason to change that attribute, it can only be regarded as a dumb rule that will cause lots of confusion and more importantly cause many, many radio frequency readouts to read incorrectly - that is, assuming their operators have been apprised of the ridiculous rule.

If that's intelligent I sure don't see it.

Yerah, I know---it made perfect sense for every channel to be described as its center frequency. But in the case of SSB it is inaccurate on its

face.

I agree, Dayton is a total waste of time and money, but it
was entertaining watching all the obese fruit cakes trying to
get bargain basement prices for quality equipment. I notice
the body odor was very high this year, maybe high humidity,
plus we alrady know most of the fruits go two weeks without
a shower before attending Dayton.

What does this have to do with scanners?

"Stagger Lee" <SLee@houston-hunks.com> wrote in message
news:0HA5LGKW37761.172974537@Gilgamesh-frog.org...
My mother, survivor
She may be barely 5 feet tall, but she's the strongest person I know, from weathering her husband's desertion after 25 years of marriage to embracing her newly out gay son.
By Michael K. Feds
An Advocate.com exclusive posted May 7, 2003

While putting diesel fuel in our tractor this evening at our home in rural Clermont County, Ohio, as my recently divorced middle-age mother was preparing to mow six acres for the upcoming open house, we talked back and forth about the men we are dating. Among the verities of chirps from spring birds and the bark of the neighbor's coon hound Shasta-Mae running around in the field, the value of life was again made clear to me.

I saved my mother from suicide last year, ripping the knife from her hands and holding her weeping soul, tight in my arms on the kitchen floor. It was the day my father ended a quarter-century of marriage and left her with a home, bills, land, and a broken heart. But that was a passing moment of weakness, because my mother is the strongest person I know. She stands barely 5 feet tall: I look at her and in my mind still see her standing by her Firebird hot rod in the 1970s photograph she doesn't know I have pressed in my Bible. She still has her blond hair (although I think she might be getting "assistance" for that now), and she still turns heads when she puts on her church dresses (forgive me for the combination) and drives off to her Baptist church with the top down on her Mustang GT.

Well, she used to. He got the cars in the divorce, along with a slap on the wrist.

When I was a boy in this rural town, on these six rural acres of paradise, my mother was the flower that was always in bloom, even on our worst days. She was the only one who came into my room and dried my tears after awful days at school, particularly the day when Spanish class was halted for the students to vote on whether or not I was a fag; the teacher was with the majority. My mother was the one who said, on the day I graduated from high school-which I barely made it to-that she was proud of me, even though I was forth from last in the survivor lineup.

She was the one who hugged me when she found out I was gay just months later and listened to my story; so many other mothers would have done just

the opposite.

When I was a young man in this rural town, on these six rural acres of paradise, my mother encountered a change in her life. As have so many gay, lesbian, bisexual, and transgendered people, she found out what it is like to come out of her pain and find happiness. After seven years of suffering mental and emotional abuse from my father-during those same years that I was a boy in this rural town-she no longer accepted his victim-of-infidelity treatment. We cleaned out the closet and sent him packing and began.to not rebuild, but to build our much-deserved human right of happiness.

Happy Mother's Day, Mom.

Been there for awhile, haven't we? I worked there for a full commercial
career. But that certainly doesn't make it a good thing for ham radio.
Ham gear has never been subject to strict tolerances as has commercial
and othre non-ham gear. So now we get to play by commercial tolerance
rules, eh? That's a good thing for ham radio? Not in my book.

General blanket coverage for all services at all times. But the
difference is that hams have alway had BANDS, and never discrete
frequency channels with strict tolerances. I'm not real anxious to see
that change. It introduces a non-relaxed element to ham radio that tends
to change the nature of it.
But it would give me a use for my 100watt Motorola Micom crystal
controlled HF transciever! Maybe I'll crystal it up for 60 meters!
But when I order crystals, it'll have to be for frequencies 1.4 kc below
the authorized frequency. Only a Federal bureaucracy could screw things
up that badly, sorry!

>
>
> Look at it this way - the FCC gave us five "mini-bands" to

No way that properly describes the case. "Bands" convey frequency
flexibility and that's absent.

>
> Is the sound that I hear that of kicking or screaming?

Not from me. I have all the equipment I need to stay in shape to handle
it and the knowledge to use it. Most hams have neither.

But it tells nothing about how wide your signal is. Do you feel you can trust the filters in ham gear as you would in commercial units? I don't. They deliberately were not built with the same care and to the same standards since the same rigorous tolerances were never demanded of them.

And again, you're an engineer and you and I know how to do all this. How many new Generals do you think picked up all this information enroute through the Question Pools?

> Kicking or screaming ?

Hey Phil- it ain't ME that I'm concerned about, rather all those legions of the unlearned out there in ham radio land who haven't even a clue what we're talking about. I spent a couple years with Uncle Sam, running around Europe calibrating electronic gizmos and picked up a pretty good feel for tolerances and how to calculate them. I also ran a VE team for eight years, while you sat in the SF director's office, remember? I *know* what we're dealing with here. Most of them don't. You can bet the farm there'll be a bunch of hams sitting on the posted frequency, not down 1.4khz.

And once more, for effect-- just because the rest of the world of radio has long used channels certainly doesn't mean it's a good thing for ham radio. I give you reference to the 40 channels below ten meters as evidence.
It's gonna be hard to move a couple kc's up the band to avoid all that QRM, isn't it?

If that's what ham radio is coming to then it's a good way to get us to lose interest, and one more method of spectrum swiping.

Tis you, bucko, that needs to learn what is going on. I've got nothing against the existance of either Israel or Palestine, and see no logical reason both cannot peacefully co-exist.

Historical fact: The present State of Israel is a product of conquest, of hostile takeover.

If someone came into your home, and said "we are claiming this home for ourselves and we don't care if you don't like it", what would you do? You would fight them tooth and nail, would you not? Denied an army, Palestine, or at least some citizens thereof, are using the only means at their disposal to attepmt to take back what was theirs. I DO NOT CONDONE THE MEANS, but I can understand them. We were not exactly playing by the rules in either our own Revolutionary War or our Civil War. And people without standing armies don't play by rules, as there is no possible way for them to win.

All that being said, the leaders involved on either side are not interested in co-existance. For them, it's whole hog or none, so to speak. Thing is, genocide is not right, no matter who is doing it, or for what stated reason. I refuse to actually take sides in the Middle East situation, because I feel both sides are wrong. Israel, like the United States, is here by right of conquest. That's fine, a right taken my mankind since it's appearance on Earth.. but conquerors have no inherent expectation that the conquered are going to lay down and lick their whatevers.

And you still don' know the exact bandpass of your crystal filter. I doubt the FCC
will bother us on this issue, but you know how it is. Rulz is rulz.

>
>
> Besides, crystals are pretty reliable. How often do you find bad SSB

Not the point. In this instance we hams are being held to commercial tolerance
standards when our gear was not designed nor built for it.

>

And you *know* that all this means your TS440 meets the necessary tolerances, right?

Then when I lived through the time of the 1967 wars, it was all lies printed
in the papers?

I align myself with no one. I stated plainly that I think BOTH SIDES are
wrong. I stand by my statement about conquest, as it is exactly what was
reported in the news at the time. And 1948 was no picnic for the arabs,
either. What is going on with suicide bombings is morally wrong by any
standard of morality. I understand the ends, I even to some extent
understand the means to the ends.. but do not condone them. What is so
difficult to understand about that? And what Sharon is doing on the West
Bank is equally wrong, and intrinsically evil. You do not punish entire
families for the actions of one of their members.. this sounds like
something out of the dark ages and the Inquisition.

Furthermore, I am not a spammer. I am answering someone else's post, and at
least > I < use my real name and a real addy, unlike the person that I was
answering.

Take care, and stay well.

Thats Eisenman or Einstein from Omaha Nebraska. His call is K0NEB and
he did the kit building session that I really enjoyed.

This guy is a soldering wiz. He can put together just about anything
and did. It was the best training session they had at the Hamvention
and I learned a lot about home building.

He's also a nice guy. Afterward I asked him a few questions I thought
he might think were dumb, but he took the time to answer each one of
them. He also told me he wears the funny hat so that his friends can
find him. Its his trademark for years.

This was my first Hamvention and it was great. If you want to learn
about how to build this K0NEB is the person who can teach it to you.

Be careful here, hams have done some monstrous beams and still do 'em.
Right here in this neighborhood k3jh/n3ea (SK) had a fullsize
two-element 3.5 Mhz quad up even back in the '60s. That's a quad with
540+ feet of rotatable wires. And he spun it with an old WW2
prop-pitch motor. Without having to turn the earth at all.

You asked what SPNAKED means. I'll use it in a sentence for you because by now you have gotten some reality email from abuse@alt.net. You are probably sitting in front of your computer licking your wounds afraid to type another troll like sentence or post someones real life Name and Address or post a binary to a non binary group.

You have just been SPNAKED by Chris Caputo for acting like a troll and will no longer cause trouble in this newsgroup.

Here's another new word for you to learn. "TOSSED"

Should you attempt to troll again in this newsgroup you will get "TOSSED" by Chris Caputo.

LMFAO

Here's to ya, 666, Aunt Bea, Barabbas, Juan Garcia Garcia Farrakhan, Voila, Ray!

MUAHAHAHAHAHAHAHAHAHAHAHAHA

3133. Houston-Hunks slappin the salami--In The Bush Regime Gays and lesbians need not apply

Gays and lesbians need not apply
Bill Berkowitz - WorkingForChange

05.16.03 - "Reducing wasteful duplication," "eliminating unnecessary bureaucracy," and "encouraging cooperation" were among the buzz phrases used
by House Republicans to sell the Workforce Reinvestment and Adult Education Act, H.R. 1261. The $4 billion bill passed the full House by a party-line 220-204 vote last week, after coming out of the Education & the Workforce Committee by a 26-21 vote, "strengthen[s] and streamline[s] job training and
adult education programs, providing job seekers with valuable tools and resources as they seek to rejoin the workforce or retrain for better jobs," according to the bill's GOP backers. But that's not all the legislation does: Tucked inside the bill is a provision that allows faith-based organizations to receive government grants and sidestep civil rights laws.

"Committee members are carving out an exemption for discrimination," Joe Conn, a spokesperson for Americans United for Separation of Church and State, told me in a late-April telephone interview (before the House vote). "This is part of an overall agenda that allows religious groups to get public funds and discriminate in hiring while using those funds. It codifies
discrimination & rolls back civil rights protections that apply to publicly-funded programs."

In a press release after the bill had emerged from the Education & the Workforce Committee, Chairman John Boehner (R-OH) said: "Strengthening and improving programs that help Americans get back to work is essential in this
time of war and economic recovery. This important legislation would help improve results for Americans striving to get back to work by streamlining unnecessary bureaucracy, increasing effective cooperation among workforce development partners, and placing increased emphasis on basic skills in adult education programs."

The Workforce Reinvestment and Adult Education Act "reforms and reauthorizes" the Workforce Investment Act (WIA), legislation passed in 1998
"which made significant reforms and improvements to the nation's formerly fragmented and inefficient workforce development and adult education

programs," the press release reads.

State and local governments, trade associations, and workforce groups support the legislation, according to the press release. The Labor Policy Association (LPA), described as "an organization of the senior human resources officers of more than 200 of the nation's largest private sector employers, collectively employing nearly 13 million Americans," is also on board.

On May 11, U.S. Secretary of Labor Elaine L. Chao issued a statement in support of the bill. Making no mention of the religious exemption, Secretary
Chao urged the Senate to work quickly to pass the legislation.

What's not to like about legislation that appears to be aimed at providing a
one-stop delivery system for job-seekers to give them "access to labor market information, job counseling, and job training to help them get back on their feet?"

Workplace discrimination

The problem with the Workforce Investment Act is that it "jeopardizes civil rights and religious freedom because it would roll back protection against discrimination or misuse of government funds by religious organizations," the American Civil Liberties Union (ACLU) said in an early April Action Alert titled "Stop Congress from Rolling Back Key Civil Rights Protections."
For the first time there is legislation "allow[ing] religious organizations involved in federal job training programs to discriminate according to religion when hiring staff for these taxpayer-funded services."

The ACLU: "The Act must not allow taxpayer-funded discrimination. Unless Congress explicitly prohibits discrimination, the Bush Administration has made it clear that it will allow religious organizations that take federal funds to discriminate against applicants for jobs on the basis of religion, marital status, sexual orientation, gender, HIV status or any other characteristic that a religious organization finds objectionable. All federally funded employers must protect, not gut, the civil rights of all Americans."

Interestingly enough, neither of the two House Education & the Workforce Committee-issued Fact Sheets dated April 9th mentioned civil rights issues or religious organizations. One section of the Fact Sheet titled "Eligible Training Provider Provisions" referred to "training provider requirements [that] are overly burdensome," and giving States "the authority to determine
what standards, information, and data will be required for eligible training
providers." And another section, titled "Increased Opportunities for Training," said that "the bill provides for greater flexibility in the delivery of core, intensive and training services."

What the Fact Sheet called "overly burdensome" requirements may be existing civil rights laws prohibiting organizations from discriminatory practices if
they receive government grants. Exemptions are outlined in Section 124 of the bill. Titled NONDISCRIMINATION [bill's caps], it says: "Section 188(a)(2) is amended -- (1) by striking `No' and inserting (A) IN GENERAL- Except as provided in subparagraph (B), no'; and (2) by adding the following
subparagraph: (B) EXEMPTION FOR RELIGIOUS ORGANIZATIONS- Subparagraph (A) shall not apply to recipients of financial assistance under this title that is a religious corporation, association, educational institution, or society, with respect to the employment of individuals of a particular religion to perform work connected with the carrying on by such corporation,
association, educational institution, or society of its activities. Such recipients shall comply with the other requirements contained in subparagraph (A)."

Faith-based finagling

The attempt to sidestep anti-discrimination measures is particularly attention-grabbing in light of the two-plus-year controversy surrounding the
president's faith based initiative -- the centerpiece of his "compassionate conservative" domestic agenda. Recently, the Senate finally passed of The Charity, Aid, Recovery and Empowerment (CARE) Act, a stripped-down version of the administration's faith-based package that had been mired in legislative gridlock because right-wing legislators insisted that provisions
allowing religious-based organizations to disregard state and local ordinances against discriminatory hiring practices be included in any final bill.

This issue of exempting religious organizations has surfaced before: A few months after the president announced his faith-based initiative the Washington Post revealed that top administration officials were trying to solicit support from the Salvation Army by assuring the charity that any White House-supported legislation would allow religious organizations to circumvent state and local laws barring discriminatory hiring practices on the basis of religion and sexual orientation. The Post's revelations were met with denials from both the Salvation Army and the administration, but they didn't go unnoticed by Democratic leaders in the Senate. They effectively back-benched the initiative until the anti-discrimination exemption was removed.

At a May 7 Press Conference, Rabbi David Saperstein pointed out that "Religious beliefs do not change the way that a staff member teaches résumé writing or helps file claims for unemployment insurance. Christians, Jews, Muslims, and Buddhists use the same criteria to determine eligibility for Welfare-to-Work programs."

These days, GOP congressional leaders are "pushing to add discriminatory language to every social-program-legislation that comes up," Joe Conn of

Americans United said. "Americans United is monitoring these faith-based grants to see if they are being used in a discriminatory way. If anyone feels they are being denied a job on religious grounds they should contact our legal department," Conn added.

The Workplace Reinvestment and Adult Education Act is not a done deal. It now heads to the Senate where, like the president's faith-based initiative, it should be revised and the discrimination exemption removed.

The ACLU is calling on the Senate to "preserve current civil rights protections in federal job-training programs".

Equal-protection provisions cited

By Matt Krasnowski
COPLEY NEWS SERVICE

May 2, 2003

LOS ANGELES ☐ Knowing they might face discrimination, San Diego resident Jane Brooks said she and her partner Shannon Rose warily pursued becoming foster or adoptive parents last year with Olive Crest Family Care and Adoption Agency.

"We let them know we are a lesbian couple," said Brooks, a 42-year-old law student who lives east of downtown. "We were up front on that. We said, 'If there's a problem, let us know now.' "

For about two months it was all good news. Brooks said they were reassured they'd be treated fairly. Their case manager with the agency was supportive. Brooks and Rose, a physician certified in pediatrics, were deemed "pre-certified as an Olive Crest foster/adoptive family."

Then things changed quickly, Brooks said.

In September, the couple were told that Olive Crest adopted a new policy that specified the agency "prefers to place children with nuclear families" and that other applicants would be considered on a case-by-case basis. Their case manager quit in protest.

"It was like getting slapped in the face," Brooks said. "It was like being told, 'You're never going to get a kid.' . . . After so many reassurances, it was very shocking ☐ very, very, very upsetting."

Yesterday, Brooks and Rose took their frustration to court.

They filed a lawsuit in federal court in Santa Ana, accusing Olive Crest of discrimination in violation of their constitutional rights and state law.

Lawyers with the American Civil Liberties Union filed the complaint against the Orange County-based not-for-profit agency.

The suit contends that because Olive Crest receives federal, state and county funds to recruit, train and certify foster and adoptive families, it must give prospective adoptive parents equal consideration. The agency also is bound by state anti-discrimination laws.

The suit asks a judge to find that Olive Crest violated the U.S. Constitution's equal protection provisions and to order Olive Crest to stop

engaging in "unfair, unlawful and fraudulent business practices" and to develop policies to prevent such discrimination.

The suit also seeks compensatory and punitive damages as well as attorneys' fees.

"The law that's in place needs to be respected," said Brooks, who grew up in a family of five adopted children near Los Angeles. "Children need homes."

A written statement issued by Olive Crest stated the agency was "disappointed" that Brooks and Rose filed the suit.

"We have not seen any official documentation regarding a lawsuit and the press release from the American Civil Liberties Union contains significant factual errors," the statement says.

"We look forward to having an opportunity to set the record straight. Our single most important goal is to place each child in an environment that is in the best interest of the child."

The state's Community Care Licensing Division has taken action against Olive Crest, ordering the group to develop a recruitment policy that doesn't discriminate against applicants based on sexual orientation. Olive Crest appealed a notice of recruitment violations and was rejected, said ACLU lawyer Jordan Budd.

In the aftermath of the Olive Crest experience, Brooks and Rose are working with a different adoption agency.

"We have thousand and thousands of children that need a home. . . . It shouldn't matter who the parents are if they are providing the children what they need," Brooks said.

3135. Houston-Hunks slappin the salami--Boy Scouts Lose Funding for Lack of Gay sensitivity

Miami-Dade United Way Cuts Scouts' Grant
Wed May 14,10:30 AM ET Add U.S. National - AP to My Yahoo!

MIAMI - The United Way of Miami-Dade will no longer give nearly a half-million dollars a year to the local chapter of the Boy Scouts of America, citing the chapter's failure to provide gay sensitivity training for its leaders.

At a private meeting Tuesday, the United Way's board of directors voted unanimously to discontinue the annual $480,000 grant after the agency's current fund-raising campaign ends June 30.

The funds represent about 20 percent of the Scouts' South Florida Council's operating budget. Most of the money goes to programs in the area's poorer communities.

"It's a serious blow to the council's ability to deliver Scouting programs," council spokesman Jeff Herrmann said.

At least 50 other United Way offices nationwide, including Seattle and San Francisco, have pulled their contributions since a 2000 U.S. Supreme Court (news - web sites) ruling upholding the Scouts' right to ban gay leaders.

Miami-Dade's United Way based its decision to suspend funding on its belief that the Boy Scouts agreed in 2001 to implement training to help Scout leaders be sensitive in dealing with children who have trouble coping with sexuality issues.

Herrmann said the Boy Scouts never agreed to such a deal.

"Sex education and sexual orientation are not part of our program and we're unwilling to make them part of our program," he said.

3136. Houston-Hunks slappin the salami--Block-long Philly mural celebrates gay life

Block-long Philly mural celebrates gay life

A 7,500-square-foot mural that pays tribute to Philadelphia's GLBT community will be dedicated on Saturday.

The mural is the latest commissioned by the city for various neighborhoods. Titled "Pride and Progress," it is one of the largest, stretching almost a block long along one side of the city's gay community center.

"I wanted to create something beautiful and atmospheric," said Ann Northrup, 54, the artist whose design was chosen for the mural.

Northrup, 10 assistants and 10 volunteers began work on the mural last August, using more than 50 gallons of latex paint to create the panoramic scenes.

"Pride and Progress" depicts a composite of 1960s gay civil rights marches in Philadelphia and New York, a festival on cobblestone streets with a multicultural throng and segments of Independence Mall, all under a moody sky with the hint of a rainbow.

Jane Golden, who founded the city's mural arts program in 1984, said the idea of a mural for the gay community was first raised three years ago.

She praised Northrup's design because of its historical, political, multicultural, multiracial and multigenerational feel.

Golden said that in researching the project, no one was able to find another public mural in the country paying tribute to the gay community.

Rainbow banners to fly in Ferndale

Gay-friendly pennants symbolize city's tolerance
May 16, 2003

BY BILL LAITNER
FREE PRESS STAFF WRITER

Two decades ago, Ferndale was, well, just another suburb of Detroit.

This week, lampposts in the city's downtown display rainbow pennants, crowning Ferndale's unlikely transformation to what many are calling the gay-friendliest city in Michigan.

On June 1, the city will host Michigan's largest gay-pride gathering, marking the nationwide start of Gay and Lesbian Pride Month. Organizers hope Motor City Pride, in its third year in Ferndale, grows to 20,000 patrons from last year's 15,000.

Compared to the downtown's other promotional banners, the new rainbow flags, signaling gay solidarity, are small and unobtrusive. Some gays say they're signs of accelerating acceptance across society. Others call them tokens of a minority still embattled but at least claiming a beachhead against intolerance in this suburb of 22,000 residents just north of Detroit.

Either way, Ferndale is on the map as the first Detroit suburb where gays say they're truly secure -- as residents, civic activists, business leaders and -- after helping to elect an openly gay councilman in -- as voters.

The flags, to be up through the end of June, will be bigger next year, vows Michael Lary, a resident and store owner who paid for the colorful swatches. Keeping them small this year "was tasteful, and not shoving it down anyone's throat," said Lary, 41.

It also keeps them out of reach of those who might tear them down, he said, smiling after putting up the first several flags. Most of the three dozen flags are going up next week on West 9 Mile Road. Lary is active in downtown promotions and co-owner of Just 4 Us, a shop that caters to gays.

Merely seeing the colors go up without controversy -- without the outbursts of critics who once frequented city meetings and vilified the annual festival -- shows gays have made strides in Ferndale at gaining acceptance, said Mayor Robert Porter.

But resident Latrice Jackson, 41, called them "so fake" because "we are so segregated in this society." A health care worker, Jackson will host the Pride festival's Ladies Lounge, "to meet and greet. We're going to be drumming!" she said.

Jackson feels strength only in numbers. Her Ferndale block is chock-full of gays, with one neighbor getting a sex change.

"It's like, 'Hey, look! He's wearing a dress today,' " she quipped.

Elsewhere, the city is far less gay and gay-friendly. Two precincts east of Woodward and north of the State Fairgrounds are a bastion of fundamentalist churches, firmly antigay. For years, residents bitterly complained at City Hall against gays and the Pride festival. Not anymore.

"It's true that a lot of us aren't comfortable with what's going on," said Robert Paczkowski, 77, mayor from 1974 to 1980. But complaining does no good, he said, because City Hall is pro-gay.

One reason? For the last two decades, when leaders yearned for new residents, more shoppers and fresh businesses, gays and lesbians arrived to invest. Monday's City Council vote was a quick 5-0 to approve the Pride festival permit. Last week, the Downtown Development Authority OK'd the rainbow flags.

The flags may alienate some residents, many of them retirees, who tolerate gays and lesbians "as long as they're not too visible," said Richard Elling, a resident and chairman of the political science department at Wayne State University.

But Ferndale's gays seem past the point of worrying about that, said Elling, who is not gay.

"It's like the black pride movement of the '60s. You're saying, 'I'm glorying in this. I'm not ashamed of anymore,' " he said.

Demographers say the nation's gays and lesbians increasingly resemble other minority groups, who first set up enclaves in big cities and clung to their subcultures, then fought discrimination as they moved to suburbia.

For thousands of Detroit's gays -- Ferndale officials hesitate to give an estimate -- the move has been north to this blue-collar town, whose stock of conservative Christians is mixed with a heritage of liberal Democrats and unionists, said the Rev. Robert Wurm, pastor of St. James Catholic Church in Ferndale and a student of the city's history.

Now, fluttering downtown is the rainbow symbol, designed by a California artist in 1978, and marking streets of gay enclaves across the country -- from New York and San Francisco to Ferndale.

3138. Houston-Hunks slappin the salami--Nepal Gays Demand Rights

From Closet to Ramp: Nepal Gays Demand Rights
Wed May 7, 7:52 AM ET Add World - OneWorld.net to My Yahoo!

Sanjaya Dhakal,OneWorld South Asia

KATHMANDU, May 7 (OneWorld) - While the UN recently put off a resolution seeking protection for homosexuals, in sharp contrast, the orthodox Himalayan nation of Nepal paved the way for their acceptance last week, by holding the first ever beauty pageant for the persecuted minority. When a bevy of impressively dressed gays, lesbians and bisexuals sashayed down the aisle at the National Theater in the capital, Kathmandu, it took the Himalayan nation's conservative and predominantly Hindu society by surprise.

Organized by the Blue Diamond Society (BDS), a nongovernmental organization (NGO) working to promote homosexual rights, the beauty pageant-cum-fashion show was an event that finally brought Kathmandu valley's 10,000 homosexuals out of the closet.

"Our society has denied the existence of homosexuals for too long. This event was to show their existence and work towards building acceptance," says BDS executive director Sunil Babu Pant.

The first sign of an organized body of homosexuals was observed after BDS held a conference in Kathmandu in January, advocating the need to respect the human rights and health rights of homosexuals.

Set up in September 2001, BDS also provides counseling to Nepal's homosexuals.

But for most Nepalese, there is no such thing as the gay way. "Homosexuals simply do not exist in society's scheme of things. They do not have legal or social recognition," says an advocate with the Forum for Women, Law and Development (FWLD), Basanta Basnet.

Nepalese regard homosexuals as some kind of Western detritus. Adds Basnet, "They are thought to be a disgusting bunch of people; a product of Western anomalies."

FWLD provides legal services to gays in coordination with BDS.

Even as they face massive homophobia, police atrocities and the looming threat of AIDS (news - web sites) also haunt this community living on the fringes of society.

There have been news reports of police harassment of homosexuals especially those in drag. On April 22, The Himalayan Times daily carried a report of

police torture of a group of gays.

"We had stepped out of a restaurant when some policemen beat us for no reason at all. Then they took us to the police station and again tortured us," one of the gays, Ramesh Rai (name changed), was quoted as saying.

"We behave differently than straight people but we have the same feelings like the others. We should be allowed to live with dignity," said Rai.

Immediately afterwards, Pant was notified and he with the help of FWLD got them released. "There have been many incidents of police beating, torture and even sexual exploitation of transvestites as they are the most vulnerable among homosexuals," says Pant.

But attitudes have slowly begun to change. According to Pant, a recent meeting BDS and FWLD had with the police brass was fruitful. "The police assured us of help and said they would instruct their juniors not to harass homosexuals," says Pant.

Basnet alleges it is junior policemen who torment the transvestites, call them names and even physically and sexually exploit them.

A top cop says the police - like society - are unprepared to deal with the issue. "That's because the issue of homosexuality is a new one. But with better coordination, we hope the situation will improve," he adds.

AIDS is another nagging problem. "Earlier, homosexuals had no idea that sexual relations could transmit the disease. But now awareness campaigns have made them aware," says a social worker.

In fact, BDS distributes free condoms and other materials to raise AIDS awareness in the community. It is supported by these agencies in its efforts. The recent fashion show was also sponsored by an NGO which promotes the "Number One" condom in Nepal.

AIDS awareness is sorely required, given the fact that prostitution is not uncommon. "BDS has been distributing condoms to MSMs (men who have sex with men) to prevent the spread of AIDS," says Pant.

"Issues like educational and health rights should be accorded top priority to help these people," asserts leading actor Madan Krishna Shrestha, who was one of the chief guests at the beauty show.

Shrestha's subsequent remark reveals Nepal's blind spot regarding homosexuality. "I was really surprised that there are so many homosexuals here," he says.

BDS estimates there are at least 10,000 homosexuals in the Kathmandu valley alone.

Homosexuals in Kathmandu consist of gays, lesbians, transvestites, eunuchs and bisexuals. "Although eunuchs and transvestites consist of only one to two percent of the total number of homosexuals, society considers all homosexuals eunuchs," points out Pant.

The majority of Nepal's homosexuals are behaviorally bisexuals who lead a double life. Says a social worker, "There are many who lead a normal life in their family but are bisexuals in reality. They undergo acute stress and depression and we give them counseling," he says.

3139. Houston-Hunks slappin the salami--Does Gay Pride Matter?

Newsgroup: rec.radio.amateur.misc

Does Pride matter?

As the Pride season approaches, we wondered what you thought about it: Is it a beautiful community experience or an embarrassing bad example? Does it help or hurt our cause? Does it mean anything any more?

As usual, you're not shy with your opinions. We were deluged with e-mails: angry, loving, inspiring, melancholy and well-reasoned. Those against Pride were a little louder than those for -- but perhaps that's because you sent us so many level-headed e-mails full of constructive criticism on how Pride can be improved, rather than blindly accepting it for what it is.

These opinions are worth reading, even if you don't share them. They might just spark you to make a few changes in the way you approach Pride this year -- whether it's making sure to go out and show your support or deciding to boycott; toning it down or camping it up; lending a hand or organizing an alternative.

3140. Houston-Hunks slappin the salami--African leaders 'scapegoat gays'

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 10:46:04 UTC
From: SLee@houston-hunks.com

African leaders 'scapegoat gays'

President Sam Nujoma says homosexuality is unAfrican
Southern African leaders have been accused of blaming homosexuals for their countries' problems.

A joint report released in Cape Town by two human rights organisations said that verbal attacks by African leaders had led to a culture of intolerance in their countries.

Human Rights Watch and the International Gay and Lesbian Human Rights Commission (IGLHRC) have documented harassment and violence against lesbians, gays and bisexuals in Botswana, Namibia, South Africa, Zambia, and Zimbabwe.

Their report says that victims have been assaulted, jailed, sacked from jobs, denied access to healthcare, expelled from schools, evicted from their homes and driven into exile, or even to suicide.

"When Southern African political leaders like President Robert Mugabe of Zimbabwe make speeches saying that gays and lesbians are 'worse than dogs and pigs', it should be no surprise that violent attacks follow," said Scott Long of Human Rights Watch, co-author of the report.

"These attacks are just the first step in creating a climate in which all rights are at risk," said Paula Ettelbrick, executive director of IGLHRC.

Beatings

The report was compiled from eyewitness testimonies. One 16 year-old Zimbabwean gay man, tells how four plain clothes policemen confronted him and a friend in November 2001 at a shopping centre in Harare.

"They showed us their IDs, they were CIO [presidential security police]. They handcuffed me and threw me in a car. They called my friend over, and they said to us, 'You gay people, you should be killed'."

He said they beat them both and drove him about until night before he was thrown into a prison cell.

The two organisations are calling on the five governments to stop promoting intolerance and inciting discrimination and abuse. They also urge:

repeal of laws banning sodomy;

enacting protection against discrimination;

promoting awareness of people's rights.

In South Africa, the constitution outlaws discrimination on the basis of sexual orientation and in March the nation's highest court ruled that gay couples should receive the same financial benefits as heterosexuals.

However, the report concludes that any equality is fragile, and even endangered by "the silence and foot-dragging of political leaders in South Africa".

3141. Houston-Hunks slappin the salami--Democratic Candidates Seek Gay Vote

Democratic Candidates Seek Gay Vote
Mon May 12,10:46 AM ET Add Politics - AP to My Yahoo!

ATLANTA - During his keynote address at a black-tie dinner here Saturday, Sen. John Edwards (news, bio, voting record) voiced his support for adoptions by gay parents.

The North Carolina senator, one of nine Democrats seeking the party's presidential nomination, isn't the only one courting gay voters. Former Vermont Gov. Howard Dean has touted a law he signed allowing civil unions for gays and lesbians. U.S. Sen. John Kerry (news, bio, voting record) of Massachusetts, a decorated Vietnam veteran, makes has said gays should be allowed to serve in the military.

Bill Clinton (news - web sites) made history in 1992 by openly courting gay voters en route to the White House. Eleven years later, the courting of gay voters is under way like never before.

"In a crowded race or a close race, an energized and mobilized constituency can make a real difference," said Dave Noble, executive director of the National Stonewall Democrats, a group that promotes the agenda of gays within the party.

"Right now, we've got so many different candidates going after the community, and there's not one candidate the community has settled upon."

Exit polls from the 2000 presidential election showed that 4 percent of voters were gay and that close to three-quarters of them voted for Democrat Al Gore (news - web sites). In the 2004 Democratic primaries, their influence could prove pivotal, activists argue.

Several candidates for next year's race, including Edwards, have hired staff members to advise them on gay issues. U.S. Rep. Richard Gephardt (news, bio, voting record) of Missouri has said his daughter, Chrissy, will be an ambassador to gay groups. She is a lesbian.

"The gay community has become one of the constituencies you have to meet to be a viable Democrat," said Steve Elmendorf, a top adviser to Gephardt's campaign.

That was clear during this month's Democratic debate in South Carolina. The nine candidates each touted their gay-rights credentials and universally condemned anti-sodomy laws as an invasion of privacy.

Six of the nine candidates have endorsed the idea of civil unions, though most won't go as far to say they support gay marriage.

Edwards spoke Saturday night in Atlanta at an event held by the Human Rights Campaign, the nation's largest gay-rights group. His speech also included calls for greater workplace protections and stepped-up efforts to find an AIDS (news - web sites) vaccine.

"I was raised to believe in an America that embraces everybody," Edwards said.

When speaking of adoptions by gay parents, Edwards said, "In a world where far too many children are neglected or unwanted, we need to encourage responsible, loving adults to raise children, which is why I support the rights of gays and lesbians to adopt children."

Edwards did not explicitly address civil unions, though he apparently was referring to the subject when he said "not everyone of us will agree on every single issue."

During his 1998 Senate race, Edwards said he was opposed to gay marriage. Although he does not object to states' recognizing civil unions, he continues to have reservations about both gay marriage and civil unions, said Jennifer Palmieri, Edwards' campaign spokeswoman.

"It's an issue he thinks the country ☐ and North Carolina ☐ is not ready for," Palmieri said.

But his efforts to court the gay community could work against him in North Carolina, particularly if he ends up seeking re-election to the Senate in 2004.

If Edwards runs for the Senate, "you can sure this will be brought up," said Thad Beyle, a political science professor at the University of North Carolina at Chapel Hill.

"It gives some ammunition to people. I think it's probably less of a big deal that it used to be, but there are still people here who are uncomfortable with this. They see homosexuality as a sin."

In a similar vein, the Democratic presidential nominee risks losing some support among swing voters in the South, analysts say. But campaign strategists downplay that potential.

"It's overrated as a general election liability," said Elmendorf, the Gephardt adviser. "In 1992, Clinton got people past the notion that if you're pro-gay rights, it will kill you in the South."

Savage Love 2.0
More

by Dan Savage
For the past decade, Dan Savage has steered GLBT, straight, curious and confused people down the path of healthy hedonism in his internationally syndicated sex advice column, "Savage Love." Now, we have him all to ourselves: Introducing "Savage Love 2.0," an all-gay, all-the-time column just for readers of PlanetOut and Gay.com. Steel yourself for some sharp-tongued answers to your gayest questions and read on. (Note: Reader discretion is advised.) E-mail Dan your questions at mail@savagelove.net.

I'm openly gay, and I have often thought that my roommate was also gay. One day while he was out, I decided to snoop around on his computer -- there isn't a better way to really find out about someone than by looking through his Internet history. Sure enough, his computer was full of gay porn. Now I don't know what to do. He tells everyone he is straight, but it's so obvious that he isn't. I understand that he is probably too insecure to come out, but I want to be able to help him. I definitely don't want to put pressure on him to come out, but I would like to be able to talk to him and to help him with his struggle. How can I approach him so he knows he can talk to me, that I am there to help him?
-- What Would Jesus Do?

Let your roommate be. He'll come out when the pressure gets to him -- and if he's checking out tons of Internet porn, I can assure you that the pressure to come out and start getting laid is definitely building. In the meantime, WWJD, just because someone tells you he's straight doesn't mean that you or anyone else has to believe him -- or pretend to believe him, even to his face. When he says he's straight, say, "I don't think so, Nathan Lane. You're gayer than American musical theater." Don't tell him why you don't believe him (and no more snooping, you dog), just tell him you've got a hunch about him.

I'm a 24-year-old gay man who has been living with the same man for almost four years. He is incredibly nice, giving and supportive. I have been faithful to him, and I believe he has been faithful to me. The only problem with the relationship is that he has some major issues with sex. He was raped at age six, and I don't think he has ever truly dealt with it. For four years, I have been trying to help him through this, but now I've realized I will never be able to rid him of his demons; he must do it on his own. My major problem is that we don't have sex -- maybe once a month, if I'm lucky. When that once-a-month fling actually happens, it lasts three to five minutes and lacks any intimacy. I do love this man, but my balls

are blue, man! I see myself being with him for the rest of my life, but I know I really enjoy sex. I never saw myself as a cheater, but as I get more and more frustrated, I think more and more about having an affair. Is it wrong for me to think that maybe this man can't give me everything, and I should just have a fling every now and again to satisfy my needs?
-- NYC

Break up with him, NYC. For his own sake, your boyfriend needs to deal with his shit -- and being dumped because he refuses to deal with his shit just might prompt him to go off and deal with his shit. Once you've dumped him, you can run off and have flings and, with any luck, find yourself a guy who is ready for a big-time, all-grown-up, love-and-sex-and-everything relationship. Tell your boyfriend that once he's dealt with his shit and is ready, willing and able to have a love-and-sex-and-everything relationship, you're totally open to being with him again -- provided, of course, that you're still single if and when that time finally comes.

My question is not sex-related; it's more a question of confidence. I am 23 years old and a fairly handsome guy. I don't have a problem finding sex or talking to people -- plus, I'm a huge drunken flirt. But I started losing my hair when I was about 20, and it sucks. It sucks a lot. It's truly what I dislike most about myself. Every day, when I look in a mirror, I see less and less hair. I mean, I'm not bald yet, but I will be -- and I hate the inevitability of that. It drives me nuts. I'm wondering how I can deal with this. I've tried Rogaine and that crap, to no avail. I don't want to go bald, and I can't accept the fact that it's happening to me. What can I do?
-- Hates All Inferior Rogaine

What can you do? Get used to the idea of being bald, HAIR, and try to have a sense of humor about it. Some gay men don't find bald men attractive, it's true, but some do -- and others don't really give a shit one way or another. But nobody finds bitter bald guys attractive, HAIR, nobody. So it's time to accept your fate. Enjoy your hair for as long as you've got it, and when it's reached the point when there's more scalp showing than hair, SHAVE YOUR HEAD. Come over to the dark side, HAIR, and embrace baldness. It's not what you would have chosen for yourself, it's true -- but the graceful, confident, attractive thing to do in that situation is to make it look like you chose it.

You got it wrong in advising Weddingboy. I should know, since I was best man at a friend's wedding two months ago. It's not about whether or not he wants to bring someone: It's the couple's wedding day, not his. Everything about the day should be how they want it. In my case -- and without my asking -- the groom and bride invited my partner of four years and even asked him to be a groomsman, and we were the only gay couple there. So Weddingboy should ask the couple what they want, then go along with what they say -- either going alone, with a male date, with a female date or whatever.
-- Supporting Castmember to the Real Stars

If the couple getting married doesn't want any gay people at their wedding, SCTTRS, then perhaps they shouldn't invite any gay people to their wedding.

Yes, the couple getting married gets to make all sorts of demands on the folks attending -- some reasonable, some idiotic. But demanding that their gay guests jump back into the closet isn't something that the "real stars" should do -- and if they make that demand on their gay guests, it's not a request that their gay guests should honor. If someone invited me to a wedding but asked me to leave my boyfriend at home, I wouldn't attend their wedding at all. I'm sorry, SCTTRS, but the days when gay people were expected to accommodate the prejudices and delicate sensibilities of folks who can't deal with us are long since past.

That's the problem with gay people: It's always about what is best for them -- screw everyone else and what they think. What about how other people at the wedding feel? There are religions that oppose homosexuality. Get over it, Dan, it's a fact of life. Weddingboy's cousin's wedding is not the place to make a point. Not every member of a family is liberal and accepting, and it is wrong to create a problem on someone else's big day. His family may need time to take it all in, and may require a more gentle approach. Not every human on this earth understands what being gay means and how to react to a situation, and a wedding is not the place to bring this forward. Why should Weddingboy spoil everyone else's day for his own selfish benefit? Your advice is closed-minded, and a typical gay man's advice.
-- Tony P.

I'm glad you think the advice I gave Weddingboy is "typical gay man's advice." I would like to think that the overwhelming majority of gay men out there wouldn't dream of jumping in and out of the closet at the whim of their bigoted relatives. It's not how I live, and it's not how any gay man should live. Yes, some religions have a problem with homosexuality. If Weddingboy's cousin's religion has a problem with homosexuality, then they shouldn't invite him. And if straight couples invite gay friends or relatives to their wedding and some asshole bigot, religious or otherwise, gets upset or makes a scene, Tony, it's the bigot who ruined their big day, not the gay folks.

3143. Houston-Hunks slappin the salami--Extending bill's reach to gays sparks debate

Extending bill's reach to gays sparks debate
Justice minister says he supports plan

But religious groups call it threatening

TONDA MACCHARLES
OTTAWA BUREAU

OTTAWA—The federal justice minister said yesterday he supports extending hate-crimes protection to gays and lesbians.

An amendment to the 1970 hate-crimes law, which now only bans the incitement of genocide or hatred against an "identifiable group" defined by colour, race, religion or ethnic origin, is currently under study by the Commons justice committee.

But the bill, proposed by New Democrat Svend Robinson (Burnaby-Douglas), is contentious because religious groups have argued that adding "sexual orientation" to the law threatens freedom of speech and religious freedom.

The Canadian Alliance's Vic Toews (Provencher) said Robinson's amendment is so badly drafted "it would classify parts of the Bible as hate literature and portions of the Catholic catechism as hate literature."

He said the committee has received more correspondence on the proposed hate-crimes amendment than on any bill.

Yesterday, Robinson challenged Justice Minister Martin Cauchon in a heated conversation before a justice committee meeting and again later in the House of Commons.

"Does the minister support the inclusion of sexual orientation in Canada's hate-propaganda laws, yes or no?" Robinson asked in question period.

"Yes," Cauchon said. "The bill is consistent with the government's position on sexual orientation."

But Cauchon insisted it was up to the parliamentary committee now examining the proposed amendment to make its report to Parliament.

"We will see what will happen," he said.

When justice department officials appeared before the committee, they cautioned that extending protections to gays and lesbians may be seen as an infringement of free speech. The committee was urged to consider whether there is enough evidence of hate propaganda against gays and lesbians and

enough evidence of harm done to that group to justify breaching free speech before the courts.

But the department has not, until now, advocated a position. The Supreme Court of Canada has only narrowly upheld violating free speech in the hate-crime prosecution of Alberta teacher Jim Keegstra, convicted because of his anti-Semitic teachings.

Robinson, an openly gay member of Parliament who has tried for years to amend the hate-crimes law to cover gays and lesbians, was infuriated when three social conservative Liberal MPs showed up Wednesday night to replace three absent Liberals on the justice committee. He accused Cauchon of stacking the committee with the sole purpose of killing his bill.

Cauchon denied any role in deciding who went to the committee. "We oppose and condemn hate propaganda," he said. "It's an amendment to the Criminal Code. As I said, it's in agreement with government's policy."

But Robinson didn't accept his explanations.

"Tom Wappell (Scarborough West), Andy Savoy (Tobique-Mactaquac), and Paul Steckle (Huron-Bruce) have consistently opposed equality for gays and lesbians," said Robinson.

One Liberal MP on the committee admitted he was "surprised to see" the trio there, but could not explain their appearance.

The bill is now caught up in procedural wrangling in committee. The Alliance has put forward a motion to kill the bill. But it is expected to come back to the House of Commons within a couple of weeks.

"Let's examine the issue of whether or not this bill in fact criminalizes the communication of essential matters of faith," said Toews, the Alliance's justice critic.

3144. Searching Service Manual for Yaesu FT-790R (first generation)

Hello togehter,

I bought an used Yaesu FT-790R at a flea market.
I guess, I made a bad deal, because it doesn't transmit (rx ok).
Now I'm looking for a service manual to have the chance to get it repaired.
I'd be happy for any help to get it.

TIA
Heiko, DL4FDV

Not true! Broad & Sweeping generalizations like this are
generally always wrong. The U.S. military does not follow
any broad & sweeping channel plan.

But not just any bureaucracy. The gross mismanagement and
incompetence spewing out of the FCC in the last few years
shows an agency in disarray, out of control and out of touch with
reality. Managers are paranoid about job protection and totally
absorbed in watching their back, while they delegate high management
level tasks out to very junior inexperienced people who cannot
figure out what a Hertz is, let alone a frequency allocation! What
we are seeing is an agency imploding into itself. Embroiled in
internal bickering and politics. I look for the agency to be sliced
and diced in the near future. Already there are rumblings of this
at very high levels.

73,

Mark Mansfield, P.E.

Here's one:
Friday was a great day, the WX was mild and temps very comfortable.
Found a great deal on an Icom IC-551 6 meter all mode rig. Clean, and works
FB, $165.00
Later I found some small "gadgets" for the single tube transmitter I'm
building, and renewed my ARRL subscription.

Saturday was a bit crappy WX wise, still I found good deals on more
"gadgets", also picked up a nice hand key from N1TP. Found an old CB
vertical antenna for $5, this will get cleaned up and put onto 6 meters.

Sunday I went back to get my cards checked at the ARRL booth, and now I'm
waiting on my DXCC certificate! Found a good deal on 100' of RG8X and
connectors for the IC-551. Later this week I hope to get the antenna up and
rocking on 6.

As for the smelly fat people, dirty bathrooms, and all the other bitching,
who cares. Go to any event where the public is invited and you will find
them. Either don't go or get over it and have fun. I sure did and can't wait
until next year.

I didnet go to Dayton but AES had a nice $200 coupon for the TS870 which
I took advantage of.

I hope to make it there some year.

You would make a good elder. NOT!

> Hint -- No code techs. are unaware of any frequencies beyond
> CB and two meters.

You have a very poor outlook of the very people now coming in to bolster
the ranks of the dying hams. I guess you think CW is the end all. If one
doesn't know code, they are stupid. Ham radio does not need you. Good-bye.

P.S. All the new techs over here know much more then that. They like
6 meters, too. The best of both worlds, HF & VHF in one band! IRLP
is fun for a day or so, then one wants real DX again...

I had a great time also. Got some good deals too. I have a very sensitive nose, and there was only one person there who needed a fire hose turned on him that I saw.

We'll probably get the same people complaining about the same things next year..

Yup, it was a great time.

3156. Icom IC-M88 programmability?

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 17:44:58 UTC
From: Jon Gauthier <jon.gauthier@spam.killer>
Message-ID: <3ECA699A.80509@spam.killer>
Source record: 67301

Tried posting this over in rec.boating.electronics and got no response:

Anyone have their Icom IC-M88 handheld marine transceiver programmed to enable the LMR (land mobile radio) functionality? It's normally used for commercial business, but it does overlap into the amateur 2 meter band (144-148 MHz). The LMR band covers 146-174 MHz, which also overlaps marine band (156.05-163.275 MHz).

I got my ham license over a year ago and haven't used it. I bought the IC-M88 to replace my dead Horizon HS-250, and got the '88 specifically because of LMR capability.

Can the M88's 22 LMR channels be programmed to work with 2 meter amateur repeaters? It supports CTCSS and DTCS...

Finally, is the programming done using a PC and serial cable, or manually using the keypad?

The manual says have the dealer program it. Most consumer marine electronics dealers wouldn't have a clue since they only deal with marine VHF, and a precious few may work with ham-enabled marine SSB's like the Icom 710 or the newer 802. Any have ideas on how to program this tiny radio?

A state House ethics committee decided April 24 not to censure Rep. Arlon Lindner, R-Corcoran, for disparaging remarks he made in March about gay people, the Holocaust and AIDS in Africa. Lindner, who has proposed repealing state human-rights protections prohibiting discrimination based on sexual orientation, and who has questioned the extent to which Nazis persecuted gay people during the Holocaust, made statements on the House floor that many considered offensive. "What I'm trying to prevent is the holocaust of our children getting STDs, AIDS and various other diseases," he said. "If you want to sit around here and wait until America becomes another African continent, well, then you do that, but I'm going to do something about it." When asked by the ethics committee if he regretted any of the statements, Lindner replied, "Not in the least." Rep. Matt Entenza, DFL-St. Paul, said that the ethics committee's decision not to censure Lindner means that any comments, regardless of their truth or accuracy, will now be allowed on the House floor. "I think this highly partisan proceeding would give even a kangaroo court a bad name," he said.

3158. Houston-Hunks Gay Pride--Howard Dean first to sign Gay Civil Union law in Vermont

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 18:55:17 UTC
From: SLee@houston-hunks.com
Message-ID: <34UZK4C737761.871087963@Gilgamesh-frog.org>

If not for the fact Howard Dean is running for president, the third anniversary of his signing of the civil-unions law might have passed without notice. Civil unions have become an accepted part of Vermont life. According to Republican Gov. James Douglas, who was outraged by Pennsylvania Republican Sen. Rick Santorum's anti-gay remarks in an interview with the Associated Press, comments over the controversy over civil unions in Vermont has all but died. "Most Vermonters have come to accept the civil-unions law as a part of our state statutory framework,'' he said. And Douglas said the law has benefited Vermont. "I think there is some evidence that it's been beneficial economically to us, in terms of visitors coming to the state for ceremonies and whatnot and spending money when they are here,'' he said. That's a far cry from three years ago, when it was feared tourists outraged by the passage of civil unions would boycott the state. And the quiet acceptance within Vermont of the law today is a far cry from the emotional turmoil of 2000, as lawmakers wrestled with the issue in the spring and faced the verdict of voters in the fall. Today's acceptance makes it hard to recall that the political climate was so volatile that at times then-Gov. Howard Dean wore a bulletproof vest; that the outrage then was so great that he signed the law in private. When Dean launched his presidential campaign, many analysts dismissed his candidacy solely because of the civil-unions law. Their feeling was that the nation, especially the South, would not vote for a candidate who was such a strong advocate for gay rights. But Dean's campaign, fueled in part by his criticisms of the Bush tax cut, his anti-war stand, his direct style and his advocacy of national health insurance, has gained momentum among Democrats. Vermont and its leaders have come a long way since the winter of 2000. Dean himself says, "I didn't have much of an understanding of the gay community until after I signed the civil-unions bill.'' --Christopher Graff

3159. Houston-Hunks Gay Pride-- Savage Distorting Gay Issues on MSNBC

: Savage Distorting Gay Issues on MSNBC
Group Says Show Is ☐Sensationalized, Unbalanced☐

From Staff Reports

Michael Savage (pictured), whose cable television program premiered on MSNBC in March amid controversy and protest, sensationalized and grossly misrepresented lesbian, gay, bisexual and transgender (LGBT) issues on his May 3 show, according to the Gay and Lesbian Alliance Against Defamation (GLAAD).

During the program, Savage stated, ☐Here☐s what worries me: If a fellow goes in for a job that requires certain skills, and he happens to be dressed as a woman, and he says to the person, ☐I want this job and I☐m a transsexual.☐ And then the employer says, ☐Can you do this job?☐ And he says, ☐that☐s irrelevant. What☐s relevant is my sexuality. I☐m going to sue you.☐☐

The May 3 show marked the first time that Savage has discussed LGBT issues on his new show. But GLAAD has charged that the discussion was one-sided and blatantly incorrect in its analysis of California Assembly Bill (AB) 196, which grants employment protections to transgender people and sets penalties for those who deny employment based solely on the person☐s gender identity. Savage☐s only guest on the show was Peter Sprigg of the Family Research Council, whose commentary merely complemented Savage☐s point of view and created a completely unbalanced discussion.

After a hiatus due to war coverage, Savage☐s show returned three weeks ago, seemingly under the same stringent content and caller screening as before. GLAAD contends that the show blatantly misrepresented the facts in his critique of AB 196. According to the California Fair Employment & Housing Act, which AB 196 would amend, employees or tenants that allege gender discrimination would have to meet the same high legal standard for allegations of discrimination on the basis of race, religion, sex and other categories. In fact, Sprigg, a longtime anti-gay activist, corrected Savage by informing him of the bill☐s allowance for employers to set acceptable dress code standards for transgender employees.

In addition, the program repeatedly contained footage of drag queens at pride celebrations, which GLAAD says served only to sensationalize the issue.

In an April 30 segment on MSNBC☐s Hardball with Chris Matthews, similar footage was shown during a debate between Sprigg and Mark Leno, the California state assemblyman who introduced AB 196. Following the airing of

the Hardball segment, GLAAD spoke with producers at MSNBC to register our concerns and were assured that the footage was inappropriate and would not be used in other primetime shows.

3160. Houston-Hunks Gay Pride-- Black Gay Men's Call

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 18:55:17 UTC

A Black Gay Men's Call to Action to the Black Community
More than two decades have passed since the HIV/AIDS pandemic emerged. Despite advancements in other communities, the virus' progression among black people continues to quicken.

As a group of professional black gay men, we call on our community to join us in the fight to rid our community of this devastating disease. We come together from all walks of life to search for and implement solutions. We are elected officials and public servants. We are leaders in the world of music. We are businessmen, lawyers, artists, entertainment and media executives, and scientists. Despite our varied areas of expertise, our strength is our common vision. We are black men who refuse to remain silent while black people account for over half of all new HIV infections every year in the United States.

Our community must recognize that this is a state of emergency. We must each speak openly about living with HIV-whether or not we are infected, we are all affected. It is our collective responsibility to be informed and responsible.

- We must protect ourselves and our partners from the virus' continued spread.

- We must teach each other about HIV and AIDS and recognize that this is a preventable and treatable disease.

- We must get tested and encourage our partners, family and friends to do the same.

- If we are positive, we must get into treatment.

- And we must demand that we as a black community call upon our own resources and our government to take appropriate and targeted action to combat the epidemic in our communities.

Perhaps most crucially, we must engage every part of the black community in a coordinated effort to turn the tide. It is time for us to reject the paralyzing denial, stigma and homophobia promoted by a few lone voices. We must confront the socio-economic conditions that cause people to do drugs and exchange needles; challenge the lack of affordable medicine and treatment options available to many of us; dispel the myths and misinformation circulating in our communities; and alleviate the myriad issues that contribute to the spread of AIDS in black communities today.

We are calling on every black organization in America to add HIV/AIDS to its agenda. And we are asking every black man, woman, and child to make a

personal commitment to fight against HIV/AIDS in our communities.

Finally, it is time for black gay men to stand up and be counted. In order to participate in the healing of our community we must first heal ourselves. So we are joining together as one voice, one body, and under one spirit of love. It is through this union that our healing can begin. And so we invite our mothers, fathers, brothers and sisters to join us in a partnership to end this pandemic. Only through coming together can we end the plague sweeping through all quarters of black America. The power to save our lives ultimately lies in our own hands!

3161. Houston-Hunks Gay Pride--Rescind Health Benefits for Gays

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 19:01:18 UTC

The Colorado Springs City Council voted April 22 to rescind health and family-leave benefits for same-sex partners of city employees, just four months after it became the state's fifth city to offer such benefits. The 8-1 vote followed emotional pleas against the move from employees, residents and Councilman Richard Skorman, who was the lone dissenting vote. Skorman even offered to cover the expense for the first year out of his own pocket, with activists David Sellon II and the Rev. Nori Rost of Pikes Peak Metropolitan Community Church offering to cover the second and third years respectively. The estimated annual cost to the city is about $6,700 to cover six employees. The reversal demonstrates a sharp ideological shift in the Council since the April 1 election--last year the Council passed the resolution 5-4. Mayor Lionel Rivera, who promised in his recent campaign to discontinue the benefits, dismissed arguments that Colorado Springs should follow the lead of the increasing number of corporations that offer benefits to gay couples. "Those are corporate dollars," he told the Colorado Springs Gazette. "They certainly aren't taxpayer dollars." Several city employees expressed their disappointment with the Council's reversal. Julie Draper, who works for the city as a firefighter, said her family will leave Colorado Springs because of the Council's action. "I feel disrespected, I feel unappreciated--as a veteran, as a taxpayer, as a positively contributing member of this community," she said.

3162. Houston-Hunks Gay Pride-- Jersey teen stabbed after telling assailant she was a Lesbian

New Jersey teen stabbed after telling assailant she was a Lesbian
Crime to be pursued as bias crime; vigil and protest planned

Early Sunday May 11, 15-year-old African American Lesbian teen Sakia Gunn was the victim of a fatal stabbing while waiting with four female friends for a bus in her hometown of Newark, N.J.

Police say that Gunn, who was returning from a party in Greenwich Village, was attacked by two men who pulled up to the bus stop in a van and started flirting. After she and her friends rebuffed the sexual advances by telling the men they were Lesbians, a shoving match began, and Gunn was stabbed and the two men fled the scene.

This week Newark police obtained an arrest warrant for a man they believed stabbed Sakia. Richard McCullough, 29, of Newark faces murder and weapons charges and bias intimidation charges. McCullough was identified by witnesses.

Gunn, a sophomore at West Side High School, was buried Friday. A viewing preceded the funeral. A vigil was held in Newark on Thursday at the corner of Broad and Market where Gunn was slain. Another protest is planned for May 16 in front of Newark City Hall to raise awareness about the state of New Jersey not having adequate laws to protect Gay rights. At both events, people will be wearing either white or rainbow colors that identify them as Gay.

"The local response to this murder has been overwhelming," said Michael Young, GLAAD's Northeastern regional media manager, "and it's encouraging to see the Newark community come out in support of this young woman. We hope media attention of this case will increase awareness of anti-Gay crimes in general. Journalists have the opportunity to not only cover Sakia's murder, but also explore hate crimes in a larger context."

3163. Houston-Hunks Gay Pride-- Gay Animals are Coming Out of their Closets

Gay Animals are Coming Out of their Closets
Zurich Zoo Tour Focuses on Homosexuality in Animals
Mark Ledsom / Swiss Info.com

People who consider homosexuality to be ☐unnatural☐ might be forced to reconsider after a visit to Zurich zoo.

As part of the city☐s ☐Warm May☐ festival, the zoo is offering guided tours dealing with homosexuality among animals.

The crowd that gathered for the first tour comprised a predictable mix of homosexual humans and their curious heterosexual counterparts.

☐I have kids at school who think that homosexuality is unnatural,☐ one young teacher told Swissinfo, ☐so I wanted to come along and get some facts to prove them wrong.☐

Unfortunately the decision to schedule the tour for the early evening meant that most of the zoo☐s inhabitants were favoring sleep over any form of amorous activity. But, despite the lack of first-hand evidence, tour guide Myriam Schärz (pictured) assured her audience that gay and lesbian activity is a common part of animal life.

☐I don☐t know of any species that is exclusively heterosexual,☐ Schärz said. ☐There are studies of this going back hundreds of years, although scientists were previously reluctant to explore the matter further for fear that they would themselves be branded gay.☐

During the entertaining one-hour tour, Schärz recites evidence from American biologist Bruce Bagemihl☐s groundbreaking 1999 study ☐Biological Exuberance,☐ which documented homosexual activity in more than 450 animal species.

Visitors to the zoo learn about the indiscriminate and almost insatiable sexuality of bonobo apes. And re-runs of Flipper might never be the same again after hearing how gay male dolphins use their lovers☐ blowholes for sexual gratification.

But there are also anecdotes from closer to home. ☐Right here in Zurich we once had a gay flamingo couple who remained partners for life,☐ Schärz recalled. She pointed out other examples, including dominant silver-back gorillas who ☐have been seen engaging in homosexual activity and deliberately shunning available females.☐

☐Humans seem to be the only species where homosexuals are not readily accepted in society,☐ Scharz said. ☐Animal societies tend to stay together

and accept each other.☐

Skeptics and believers alike will be welcome at the zoo when the last two tours take place on May 28.

3164. Houston-Hunks Gay Pride-- Versatile Guy Feels Limited by Bottom-Feeder Boyfriend

Top Gun Dilemma
QuestionMark?
Mark Rutherford LCSW

Versatile Guy Feels Limited by Bottom-Feeder Boyfriend

I□m versatile, and up until about four months ago, I also assumed my boyfriend was. But these days he will only top me and he refuses to bottom any more. I still have the desire to occasionally top a guy, and I□m not a complete bottom. So what do I do? I want to stay with Peter.

Dear Very Versatile,

It seems like you are going to have to bite the bullet and have a heart-to-heart conversation with your boyfriend. How long have you and your boyfriend been together? What was your sex life before this sudden change four months ago? Was there any discussion about why he decided to become a strict top with you? How often, if at all, did he let you top him before this change? And vice versa. How often were you the bottom before the change?

As you can see, I have a lot of questions. But so should you. When two people are in a relationship together, there should always be conversations if one partner decides to make some changes. Your boyfriend may have some very good reasons for modifying your sexual menu.

Infidelity, anger issues, medical problems, insecurity issues are the usual culprits. However, if he doesn□t inform you of what is going on in his head, he is doing you both a disservice. And if you just sit back and let this situation unfold around you, you aren□t helping either.

I say sit him down and talk with him about what you□re feeling. Make it a non-confrontational encounter□over coffee on a Sunday morning or having a glass of wine after work.

Let him know that you care about him and value the relationship but that you have some concerns about your sex life. Ask him point blank if something has happened for him, either emotionally or physically. He may be embarrassed or scared or angry. This is your chance to find out as well as an opportunity to offer him your support.

Once you get all the information, then start negotiating. Tell him you love being a bottom for him. Tell him he□s the best pitcher in the world. Then tell him you want him to be the catcher once in a while. See what he says, and then take it from there.

The last resort would be to open the relationship or to go outside the relationship to get your sexual needs met. These aren□t really solutions at all. They are just ways of escaping your feelings. Open relationships can be wonderful and fulfilling, but they have to be grounded in two people who are totally content with each other, and outside sex is seen as a recreation rather than a solution to an internal problem. Good luck.

Dear Mark,

Lately, I get hard at the drop of a hat. It doesn□t have to be sex; I can get hard watching TV. What□s wrong with me?

Signed, Jim

Dear Jim,

At the risk of oversimplifying this for you, you□re horny. Plain and simple. As a society we tend to pathologize even normal behaviors. Sex is normal. Wanting to have sex is normal. Being horny in general is normal.

If you have a sex partner or a f**k buddy, give him a call and make a time to get together. If there□s a certain place you like to go to meet men, go there and see who□s around. There might be another guy around who has the same thing as you in mind.

Or, the most trusted avenue is you and your right hand. Get out a bottle of lube (Eros is my favorite), pop in a video (love the new stuff from those talented guys at Titan), lay back on the couch and go to town.

Whatever method you choose to satisfy your needs, make sure you enjoy yourself to the fullest. Don□t worry about why you□re horny. As some wise philosopher once said, □Go with the flow.□ Indeed.

3165. Houston-Hunks Gay Pride--Brown Executed for Gay Murder

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-20 19:01:18 UTC
From: SLee@houston-hunks.com

Gary Leon Brown was executed by lethal injection April 24 for the 1986 stabbing death of a gay man. Brown, who was 44, initially told police that he and accomplices Archie Bankhead and James Lynn Bynum went to the home of Jack David McGraw on Memorial Day 1986 to drink with him, hoping that McGraw would pass out so they could rob him. When McGraw refused to drink with the men, they attacked him. Brown reportedly told police he stabbed McGraw repeatedly with a pocket knife. McGraw's body was left in his mobile home, where he lived alone, until it was found by neighborhood children. He had been robbed of $67 and several appliances. Although the murder was not prosecuted as a hate crime, prosecutors pointed to the savageness of the attack--Brown was stab-bed 78 times and his throat had been cut--as evidence that the motive was more than just robbery. Witnesses also testified that the killers used anti-gay slurs to describe McGraw as they boasted of killing him. Bankhead is currently serving a life sentence without parole for his part in McGraw's murder; Bynum also was convicted, but was paroled from a life sentence in 1997.

3166. Houston-Hunks Gay Pride-- 60s Sex Kitten Hisses at Gays

☐60s Sex Kitten Hisses at Gays
365gay.com

Onetime sex symbol Brigitte Bardot accuses gays, Muslim immigrants and fast-food chains for the ☐ruination of France.☐

In a new book which went on sale this week, the actress turned animal rights activist says gays should keep their sexuality quiet and be more like those of a generation ago.

She says of today☐s gay men ☐[They] jiggle their bottoms, put their little fingers in the air and with their little castrato voices moan about what those ghastly heteros put them through.☐

The 68-year-old Bardot, who appeared nude in a number of 1960s films, has nothing good to say about Paris prostitutes either.

☐Our lovely, kind street-walkers have been replaced by girls from the East, Nigerians, travelers, transsexuals, drag-queens, bearers of AIDS and other friendly gifts. Having a risk-free go is becoming a real exploit,☐ Bardot writes.

Her book, A Cry In The Silence, also contains numerous passages attacking Islam.

In politics, she likes President Jacques Chirac ☐as a human and a friend☐ but has little use for other politicians including gay Paris mayor Bertrand Delanoe.

3167. Houston-Hunks Gay Pride-- Gay Film Fest Executive Director Resigns

Gay Film Fest Executive Director Resigns
Phillip Matthews Takes Job in New York
Mary Damiano

Carol Coombs and Phillip Matthews at the opening night of the 2003 Miami Gay & Lesbian Film Festival
---

Phillip Matthews, who stirred controversy last fall when he was named executive director of the Miami Gay & Lesbian Film Festival in the wake of the ouster of founder Robert Rosenberg, has resigned his position.

Matthews has accepted a position in New York with In The Life, the television program about the gay community seen on local PBS stations.

Although sources say Matthews made his decision about a month ago, at press time the MGLFF had not issued a statement about his departure. Carol Coombes, MGLFF program director, termed Matthews☐ departure as having ☐no acrimony☐ and that he did not want anything said during the fifth annual film festival, which ended May 4. Several sources said Matthews has family in New York and was eager to return to be close to them. ☐This is a no-news issue at this time,☐ Coombes said.

Matthews was not present at the MGLFF office Friday afternoon and he could not be reached for comment. Coombes said Matthews☐ official last day with the festival was Friday, May 16, but that he had taken the week of May 12 off.

☐We☐re very sad that he☐s leaving, but this is a terrific opportunity for him,☐ said Fran Levey, co-chair of the festival☐s board of directors. Levey told The Express that the organization does not plan to name an interim executive director, and that they will take this time to reassess their needs and perhaps amend the executive director☐s job description to fulfill those needs. ☐We☐re looking at this as a good opportunity for us to not rush ahead and hire a new director, without really taking a look at what the best structure is for us.☐

Board member Mark Gilbert echoed Levey☐s comments: ☐We have a really good plan in place that, at least for the short term, will save the festival some much-needed funds that we would normally be paying an executive director, and yet keep the festival going in a positive direction.☐ Gilbert said details of the plan will probably be released next week.

Gilbert said that although the festival knew about Matthews impending departure, their publicist has been working on a press release. ☐We didn☐t feel an absolute need to announce it right after the festival,☐ Gilbert said. ☐I think we all wanted to bask in the glory of an incredibly successful festival, and not have anything take away from the enormous success we achieved, in part due to Phil.☐

The Express asked Robert Rosenberg, who experienced a controversial break with the organization he founded, to comment on the timing of Matthews☐ departure. He said only that it takes about a month for the director and staff to complete the aftermath of a festival. When The Express asked about the possibility of rejoining the organization in light of this current development, Rosenberg said, ☐I think any future relationship I might have with the festival is so speculative and hypothetical it☐s hard to really comment on that.☐

Although Levey and several other board members said that the festival is in good shape, Harvey Burstein, former MGLFF board member and founding member of the organization, said that he☐s been asked on more than one occasion by several different board members to rejoin the board because it was in trouble. Burstein told The Express that he would consider rejoining the board in an advisory capacity to help get things back on course, and suggested several other community leaders who could help with that job.

Burstein took issue with the fact that the MGLFF knew Matthews was leaving for some time, but did not inform the community, even after the festival ended.

☐It☐s our festival, we pay for it, we support it and it belongs to the community,☐ Burstein said. ☐Whatever happens, good and bad, they have to share that with the community. We have to know what☐s going on. How is the community ever going to help unless we know what☐s going on☐unless they☐re hiding it from us.☐

I was at Dayton this year and considering I've been to the last 13 of 16, I can probably give an informed opinion.

It has been my experience that the number of good deals depends on what you might be looking for a particular year and what your interests are. This can account for different perspectives. I can attend with other people and everybody leaves with a different opinion.

They had problems with the shuttle bus this year. The bus company went out of business about 2 weeks ago and they scrambled to get buses. Some buses came from Chicago and were an hour late because they did not account for the time difference. We arrived at Salem mall about 7:45, but had about a 45 minute wait. Normally this would get us there for opening. There was a lot of complaining, but once the reason was known people were more understanding. By Friday afternoon the problems were solved and all went smoothly including Saturday.
I have always taken the Salem shuttle, except for 1 year, and in my opinion it is the best method.

One thing that was a little frustrating and I hope they solve it in the future was related to advance ticket sales. I purchased by credit card a hamvention ticket that included the shuttle bus. It was held for pickup at the Hara box office. The problem is that to get to Hara to pick it up, I had to pay $2 for the shuttle bus, which was included in the price of the ticket I had to pickup. Of course $2 is not much money, but they should have a system to turn in your $2 ticket for reimbursement when the all inclusive ticket is picked up. I emailed them 2 weeks in advance to ask about this but never received a response. This needs improvement.

As far as this year, Friday was about as good as the weather can get. No rain. Not too hot. It can be unbearable if it gets too hot and by the end of the day a person can be exhausted.

Saturday rained all day. Past experience tells me always be prepared for rain. It never rained hard and I kept going carrying an umbrella. This is all part of the Dayton experience. What I was surprised at was how ill prepared some vendors were. With a tent or CLEAR plastic on your table there is no reason sales cannot continue through light rain.

If anybody thought it rained hard they were not there the year a 2" deep river flowed over the entire site and items were floating away.

In general I thought attendance was down, but that is just my
impression.

I did not believe indoors was ever really crowded, even with the rain.
Before anybody objects to that, remember it is all relative at Dayton.
It is always crowded, it is just a matter of how much. I have seen it
MUCH worse.

Here you go, bucko.
No lie... most every country is a product of conquest.
The difference is that Israel is a democracy and mostly
uses military force to go in a capture (kill if necessary) the
cowards shits who strap bombs to themselves and blow
up people sitting in cafes.
Stop the homicidal bombers and Israel will pull out.

Actually the correct term is 'Homicidal Bomber'
Their goal is to murder innocent Jews for the shock effect
not to kill themselves. (Which would be great if they did)
Punish entire families. Huh? They don't bulldoze down those
houses for the fun of it. Those Arab cowards use and hide in
these houses and this technique helps alleviate this. Why
unnecessarily endanger a Jew's life to root out a terrorist
coward.
They Pale. know how to go down the road which would allow them to
live in a civilized country. But their leaders don't want to or aren't
motivated enough to arrest the terrorist cowards.

Does it really matter how the channel is specified? How many people know what the frequencies of broadcast TV channel 4 are? Or conversely, did you know that the FCC refers to channel number instead of carrier frequency when talking about the FM broadcast band?

Hams are like to just give each new "channel" a nickname like "305", "465", "665", "715" and "4305" So we can change channels quickly by dialing up either keypad entry or surf our memories on our rigs. And the names would relate to what we see on the frequency displays. As long as we get our signals in the proper place in the radio spectrum, it doesn't matter what we call it.

It's like on 2m when we say "the '79 machine" for the repeater on 146.79 freq you receive on and you transmit on 146.19 to get repeated.

> . Most of them don't.
> You can bet the farm there'll be a bunch of hams sitting on the posted
> frequency, not down 1.4khz.
>

It's 1.5Khz. Besides, more often than not, a newbie may hear other users and dial his rig down to get reasonable quality SSB reception and thus be nearly on the correct frequency. As there are guardbands between channels, being slightly off freq isn't very serious, only mildly serious. And that's because our SSB transmit filters have side skirts that are not "brick wall" from passband to stopband.

My rig's specs say "400Hz to 2600Hz" at 6dB down. Doesn't say what it's doing say at 10dB down, but it's likely not grossly wrong for the 5MHz band. also the frequency accuracy spec'd is ï¿½ 1 x 10^-5 of the carrier freq. That's 50Hz at 5MHz, which looks good enough. Say it drifted worse as the rig aged, it still won't be much worse.

The FCC full well knows that hams will use their existing modern rigs to get on 5 MHz, and if they though that we couldn't handle it, not let us have these allocations. Few hams have trouble being on freq for repeaters on the 2m band, and the percentage error you can have there is much less.

The biggest problem is likely to people dialing up the wrong freq on their rigs, but education is the answer there. Like QST telling us what numbers to set our rigs to to get our signals where they should be, when they publish the news about this allocation.

3178. Houston-Hunks Columbus Tx Chapter--Gay Minister Delivers Prayer on Capitol Hill

House Warming
Gay Minister Delivers Prayer on Capitol Hill

By Bob Roehr
Given the general attitude toward the gay community in the U.S. House of Representatives, many noted the irony involved when the Rev. Steve Torrence stepped to the podium of the House to deliver the opening prayer on May 1. He was the first clergyman from the worldwide Metropolitan Community Churches (MCC)--which primarily ministers to LGBT people--to have the honor, and is believed to be the first openly gay person to deliver that prayer.

Torrence wore the crisply pressed uniform of the Key West (Fla.) Police Department, where he serves as a police officer and chaplain. He is a former pastor of the MCC Church in Key West.

May 1 is the official date of the U.S. National Day of Prayer, as well as Law Day. Both celebrations were created in part as a backlash against May Day celebrations, which came from pagan rituals.

And while the religion-tinged rhetoric of Sen. Rick Santorum, R-Pa., still swirled on Capitol Hill, a further irony was that Torrence's invitation to deliver the prayer came from a Republican--Rep. Ileana Ros-Lehtinen, who represents southern Florida, including Key West.

"It is important to have diversity in Congress and it is important to understand that sexual orientation does not determine one's faith," she said.

Torrence's prayer was appropriately short and included the lines: "As a nation, let us remember that all people have one common origin. Fill our hearts with compassion for our neighbors and the desire to ensure justice for all. ... Let us always remember that despite our differences, we are one human family."

The Rev. Troy D. Perry, founder and moderator of the international denomination, said the prayer marked "yet another significant milestone in MCC's ongoing quest for equal rights for gays and lesbians at every level of government."

He noted that MCC recently was authorized to provide chaplains for the Veterans Administration, and its application to provide similar services to the armed forces is moving forward.

3179. Houston-Hunks Columbus Tx Chapter--'Naked' truth: Gay sex comedy delivers lads alone

'Naked' truth: Gay sex comedy delivers lads alone

By Michael Upchurch
Seattle Times staff

It ain't the script ☐ it's the Lad Factor.

At least that's how it's supposed to work in this nudity-splashed gay sex comedy from the writing-directing-producing team that brought "Making Porn" to Seattle a few years ago.

The formula goes like this: 1) Hire a gay-porn actor as your marquee draw; 2) Throw in some actual thespian talent that's willing to disrobe and not too hard on the eyes; 3) Collect a surprising amount of money at the box office.

"10 Naked Men" delivers the porn star: Rocky (no last name ☐ but he advertises his cellphone number in the program). And it features a couple of animated performers who have clearly put in time at both drama school and the gym. But Lad Factor alone just isn't enough to keep things going when burdened with a script that's this flimsy ☐ or should I say flaccid?

Theater review

"10 Naked Men," written and directed by Ronnie Larsen. Thursdays-Sundays through June 8, Theater Off Jackson, 409 Seventh Ave. S., Seattle; $25-$30 (866-468-3399 or Ticketweb.com).

The plot: Aspiring actor Robert (Preston Lee Britton) moves from Seattle to Los Angeles, but can't find work or a boyfriend ☐ although he does find a hustler willing to fulfill his prison-rape fantasies. Meanwhile, aspiring actor Richard (Irwin Gallan) is also looking for gigs in L.A. ☐ and paying the bills by doing some hustling on the side. And, in a last hustler-scenario twist, Steve (Rocky) is servicing clients all over town, while experimenting with having a steady boyfriend on the side: Robert's best friend, Kenny (Finn Walker).

A number of agents and johns (it's hard to distinguish between the two) camp it up big-time as they thirst after and manipulate these youngsters. Various sexual fetishes are touched on. Scenes race by. Actors dash on and off stage. The woes of sleazy showbiz are lightly examined.

A few lines hit the mark, with Robert's instructions at an audition for a commercial providing the show's wittiest moment: "Try to discover that the ice cream is good. Don't already know it." A more representative snippet of

dialogue: "This is L.A. ☐ everyone's for sale." (Yes, but are they returnable?)

As for the performers: Nature blessed Rocky with a tidy little physique, but someone needs to teach him how to enunciate. Gallan has some good moments as a talentless hunk who thinks his walk-on appearance in "A Few Good Men" can be parlayed into a screen career. The rubber-faced Britton is the one actor onstage who keeps the whole mess from being insufferable, especially in an extended scene in which he twists himself in knots of anxiety while calling his first hustler.

Still, that's not a recommendation. The truth is: You can have all the Lad Factor you like. But if those lads don't have a decent script to follow, even the most chiseled pectoral will start to look lifeless.

Peace, gay groups blocked from parade
EVENTS: Entries must be entertaining, not political, chamber says.
Mark Porter, The Bellingham Herald

A local anti-war group is questioning the motives of Ski to Sea Grand Parade officials after learning both it and a local gay and lesbian support group won't be among the hundreds of participants on Saturday.

Ski to Sea parade officials rejected the Whatcom Peace and Justice Center's entry, "Whatcom Neighbors for Peace," telling its leaders the entry lacks "high entertainment value" in a popular annual parade already filled to capacity.

The anti-war group and Whatcom County Parents, Families and Friends of Lesbians and Gays (PFLAG) were among about 20 entries that were denied for space constraints and/or lack of entertainment value, said Mike Brennan, president of Bellingham/Whatcom Chamber of Commerce & Industry.

Others who were denied include the Bellingham Bells baseball team - which wanted to run a team bus through the downtown Bellingham parade route - and the Whatcom County Chapter of the American Red Cross, said Brennan, whose organization runs Ski to Sea events.

No political party entries or candidate floats are allowed in the parade, where the prevalent theme is entertainment, Brennan said.

"This is not an event for statements," Brennan said. "This is a stage play. It has to be entertaining. That's the whole key to it."

Pro-peace entry

Anti-war activists say they are dismayed their pro-peace entry with 100 participants with a theme, "Peace in our Heart - Peace in our World" was rejected. The group planned balloons depicting peace doves and the Earth as well as stenciled signs with the name of a participant's neighborhood or community.

It was the first time the group has applied for a permit, said Jamie Donaldson, coordinator of Whatcom Peace and Justice Center.

"I think folks in our peace community will be interested in what groups will be allowed in the parade," Donaldson said on Monday. "We will be looking for veteran presence or American patriotic signs - our statement for peace was refused."

The group made the May 2 entry deadline cutoff and Donaldson phoned and contacted the chamber several times during the next seven to 10 days. She learned the entry was denied late last week, she said.

"There may be nothing to this all," she said. "But folks want to know why 'Peace in our Heart, Peace in our World' is not an acceptable application."

Entries that include any political, religious or social issues are at the discretion of the parade committee, according to entry fine print, Donaldson said. The Bellingham Unitarian Fellowship will have an entry, she said.

"This was not an anti-war parade," she added. "It was a pro-peace parade. Folks in the peace community are interested in learning ... is there any pattern to keep voices out of our civic parades?"

Local PFLAG leaders were unavailable Monday to comment on the group's rejection.

Possible appeal

Bellingham attorney Larry Hildes is looking into possible ways to appeal the decision.

The group's entry is neither obscene nor inflammatory and the chamber's decision could be considered illegal since public money is being used to fund the parade, Hildes said.

"(The Whatcom Peace and Justice Center) board is extremely upset and wants the Chamber of Commerce to rescind the decision," he said.

The city of Bellingham gave the chamber about $34,000 for Ski to Sea events this year, according to city Deputy Administrator Don Keenan.

The chamber has spent the last years trimming entries, Brennan said. In the past, car clubs had 35 to 40 cars in the parade, now they are limited to four or five, he said. A longtime Christian group entry with religious signs was rejected several years ago, he added.

Brennan has some suggestions for the PFLAG and peace activists: "redesign your system and apply next year."

3181. Houston-Hunks Columbus Tx Chapter--President Continues to Push Anti-Gay Nominees for Federal Courts

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-21 00:18:55 UTC

By Aslan Brooke

Once again a Bush nominee for a federal judgeship has stirred all manner of controversy. This time, the man in question--Alabama Attorney General Bill Pryor, nominated to sit on the 11th U.S. Circuit Court of Appeals--seems to be on the same page as Sen. Rick Santorum, R-Pa., when it comes to comparing homosexuality to such aberrant behaviors as pedophilia, bestiality and, incredibly, necrophilia.

Pryor's unflattering opinion found its way into a friend of the court brief he wrote in February in response to the U.S. Supreme Court's decision to hear the landmark Texas sodomy case Lawrence v. Texas. Having appeared two months before Santorum's equally disturbing comparisons (which added bigamy and polygamy to the mix), Pryor's brief, which was also signed by attorneys general from South Carolina and Utah, argued that the Texas statute only forbids same-sex acts, not sexual orientation. He further argued that homosexual acts are "historically recognized as wrong."

"Petitioners' protestations to the contrary notwithstanding, a constitutional right that protects 'the choice of one's partner' and 'whether and how to connect sexually' must logically extend to activities like prostitution, adultery, necrophilia, bestiality, possession of child pornography, and even incest and pedophilia (if the child should credibly claim to be 'willing')," he wrote.

Gay-rights groups have vociferously argued against Pryor's confirmation, among them the Gay and Lesbian Alliance Against Defamation (GLAAD). According to GLAAD spokeswoman Cathy Renna, "If his personal views are going to in any way influence the way he passes judgment on cases before him, I would be really nervous if I was a gay or lesbian person who had an anti-discrimination case where Pryor was the judge."

Even gay Republicans are wary. The Associated Press quoted Log Cabin Republicans Executive Director Patrick Guerriero as saying, "Clearly the arguments put forth in [Pryor's] amicus brief reflect a true misunderstanding of a large segment of the American family in gay and lesbian relationships."

In the Senate, noticeably outspoken was New York Democrat Charles Schumer, who sits on the Judiciary Committee that will consider Pryor's nomination. Terming Pryor's brief "another red flag for a nominee who is starting out with a troubling record," Schumer said, "It's hard to believe that in the entire state of Alabama, the administration can't find a conservative to nominate who isn't out of the mainstream and doesn't make incendiary

comments."

Republicans--and some Democrats--have rallied around Pryor, even though he has already been under scrutiny because of his opposition to abortion rights. Despite this, and the revelation of his indisputably anti-gay comments, opposition is expected to be anemic because of his influence in Alabama, although 16 civil-rights leaders, including Martin Luther King III, have come out against him.

But Pryor's key base of support comes from the far right. One of Pryor's most ardent defenders is Jay Sekulow, executive director and chief counsel of the right-wing, Virginia Beach, Va.-based American Center for Law and Justice (ACLJ), founded in 1990 by anti-gay televangelist Pat Robertson. The legal advocacy group bills itself as being "dedicated to defending and advancing religious liberty, the sanctity of human life, and the two-parent, marriage-bound family."

The ACLJ is a strong supporter of school vouchers, supports funding of faith-based social services and religious proclamations in the public domain, and often equates religious expression with patriotism, according to the constitutional watchdog group People for the American Way (PAW).

According to PAW, the ACLJ strongly opposes "the right to legal, safe abortion and provides legal help to pro-life protesters who harass women seeking reproductive services." Likewise, the ACLJ challenges domestic-partnership benefits for city and state employees, anti-discrimination ordinances that include sexual orientation, and generally fights against the right of gays and lesbians to be parents.

At press time, Pryor's confirmation hearings have not yet been scheduled.

The 11th Circuit oversees cases in Alabama, Florida and Georgia.

Meanwhile, another judicial controversy has been defused: U.S. Attorney Michael Mosman, the Bush administration's top candidate for a District Court seat in Portland, Ore. Mosman declared that he opposes sodomy laws and treats gays with "respect and civility and tolerance.''

In an interview with the editorial board of The Oregonian on May 1, Mosman said he was not expressing his personal views in 1986 when he wrote legal memos as a Supreme Court clerk that opposed overturning a Georgia sodomy statute in the Bowers v. Harwick case.

Mosman met privately in late April with officials from two gay-rights groups in Portland to assure them he is not biased against gays, according to the newspaper.

He said that if he were a legislator, he would have voted against Georgia's sodomy law. He added that he voted against the 1992, 1994 and 2000 anti-gay ballot measures sponsored by the Oregon Citizens Alliance.

Mosman has the support of Sens. Gordon Smith, R-Ore., and Ron Wyden D-Ore., as well as the Washington, D.C.-based Human Rights Campaign. HRC Political Director Winnie Stachelberg told the Associated Press that she was pleased

that Mosman was
"willing to engage in a dialogue and answer questions."

Mosman's answers--in which he drew distinctions between his 1986 memo and his current views--"have given us some comfort," Stachelberg told the wire service.

3182. Houston-Hunks Columbus Tx Chapter--The Republican Party's 'gay problem'

The Republican Party's 'gay problem'

The Republican Party has a "gay problem" that could complicate President Bush's re-election prospects. Bush wants to be moderate on gay issues, and that makes right-wing activists furious. Democrats and gay activists thought Bush was caving in to the right when his press secretary defended Sen. Rick Santorum (R-Pa.) as "an inclusive man" after he likened legalizing gay sex to legalizing incest and bigamy.

Right-wing groups condemned the statement as "tepid," demanding a full-blown defense of Santorum's argument, and accused GOP leaders of "pandering to the homosexual lobby." Ken Connor, president of the Family Research Council, wrote that "if Republican leaders cannot mount a vigorous defense of marriage, then pro-family voters perhaps should begin to reconsider their loyalty to the party."

The right has a catalog of complaints with Bush policy on homosexuality ☐ from White House and top-level GOP meetings with gay groups to Bush's signing a District of Columbia appropriations bill that funded benefits for unmarried domestic partners ☐ and more points of conflict can be expected Even Connor expects the Supreme Court will shortly overturn the 1986 decision that Santorum cited as the basis for his argument.

Already, right-wing groups are angry that the administration declined to submit an amicus brief in the case before the court, Lawrence v. Texas, that challenges Texas' law criminalizing sex acts between homosexuals. Meanwhile, a case in the Massachusetts Supreme Court and a bill in the Legislature may revive the issues of homosexual marriage and civil unions. And there's likely to be a major dustup in September 2004 over the Republican Party platform.

In 2000, the right successfully inserted language declaring that "we do not believe sexual preference should be given special legal protection or standing in law." The Democratic platform called for enactment of national hate crimes and employment anti-discrimination laws to protect gays and "equitable alignment of benefits."

This year, six of the nine Democratic presidential candidates support state enactment of civil union laws. Patrick Guerriero, director of Log Cabin Republicans, the GOP group representing gays and lesbians, says that at next year's convention "it could get real tense between the far right and the East Coast wing of the party, particularly because it's in New York and the state's governor and the city's mayor have histories of being against discrimination."

Guerriero said, "There will be one day at the convention where the party decides where it stands on our issues. We'd like it to be inclusive and not ugly, but my guess is that no matter what the platform says, there will be demonstrations." (Disclosure: I spoke to the Log Cabin Republicans at their convention last weekend and received an honorarium.)

There's wide agreement ☐ on the right and among gay-rights groups ☐ that the Bush White House and GOP leaders are "walking a fine line" or "trying to have it both ways" or "triangulating" on gay issues.

"They're caught between the base and the need to be seen as moderate," said David Smith, communications director of the Human Rights Campaign, a gay-rights group. "What you're seeing is triangulation," he said, using the term applied to President Bill Clinton when he distanced himself from liberal Democrats dominant in Congress in order to win re-election.

On the right, similarly, Connor said, "There is clearly, at the highest levels within the Republican leadership, a calculated strategy to embrace the gay agenda and promote that agenda. They think they need to take this position to endear the party to soccer moms and immunize it from criticisms in the media and appear to be a kinder, gentler White House."

Connor said he did not know whether Bush was party to the strategy, but he said that "the White House does not embark on any strategy without Karl Rove's approval," referring to Bush's top political operative. GOP moderates argue ☐ accurately ☐ that attitudes on gay issues have become dramatically more tolerant since 1986, when Chief Justice Warren Burger declared that homosexual acts were "of deeper malignity than rape."

Gallup polls show that in 1986, Americans favored keeping gay sex illegal by a margin of 57 percent to 32 percent. In 2002, they favored its legality by 52 percent to 43 percent. The party's political problem is this: About 4 million self-identified gays went to the polls in 2000, 1 million of whom voted for Bush. Historically, other GOP candidates have garnered up to one-third of the vote. A reputation for inclusiveness and tolerance could also help the GOP among moderate suburbanites who reel from "culture war language."

On the other hand, as Connor put it, "Karl Rove himself complained (at a 2001 American Enterprise Institute event) that 4 million fundamentalists and evangelicals didn't turn out in 2000, almost costing Bush the presidency."

Which way will the party tilt? It's not a good sign that Mary Matalin, former aide to Bush's father and to Vice President Cheney and a figure identified by the right as part of the pro-gay movement in the GOP, defended Santorum extravagantly last Sunday on "Meet the Press."

3183. Houston-Hunks Columbus Tx Chapter--Church Kicked Out of Association for Baptizing Gay Men

Membership Has Its Disadvantages
North Carolina Church Kicked Out of Association for Baptizing Gay Men

A Southern Baptist church in Concord, N.C., has been expelled from a religious association after the pastor baptized two gay men and welcomed them into the congregation. Leaders of the Cabarrus Baptist Association--a regional group of 81 churches affiliated with the Nashville, Tenn.-based Southern Baptist Convention--overwhelmingly agreed in a closed meeting April 28 to sever ties with McGill Baptist.

Of 268 delegates at the meeting, 250 voted to withdraw McGill Baptist's membership. The Rev. Randy Wadford, the association's missions director, read a statement after the vote in which he said, "The homosexual lifestyle is contrary to God's will and plan for mankind."

The Rev. Steve Ayers, the McGill pastor, said being kicked out of the association doesn't have many practical implications. The 800-member church had contributed to the association's food and clothing projects, but would find a new way to help the poor, he said. "The kingdom of Christ is about love, about God's grace and mercy," Ayers said. "When a church becomes so judgmental that it can't accept people into their fellowship, it is a sad, sad day."

Speakers at the meeting illustrated the divisions between churches that want to include gays and those that don't. Wanda Ritchie, a lifelong member of McGill, told the association that the church was for everyone and it was "almost unthinkable" for the association to seek to control the membership policy of one church.

Ayers said the two gay men have declined comment, preferring to stay out of the spotlight. As much as the men are upset over the furor, Ayers said they are glad to have found a church. They both attended Sunday Services on April 27. When it came time for worshippers to sign the register and mark whether they were members of McGill Baptist, he said, one of the men wrote "Oh yes."

3184. Houston-Hunks Columbus Tx Chapter--Binational Gay Couple Make Their Relationship More Permanent

No More Question Marks
Binational Couple Make Their Relationship More Permanent

After months of anguish and uncertainty, one Los Angeles-area same-sex couple finds their relationship has taken on the stamp of legal permanence. Marco Aurelio, a Brazilian citizen, recently found out he was granted political asylum in the United States due to his sexual orientation. Although the move was welcome news to Aurelio, it meant just as much to his partner, Doug Haxall, who no longer had to worry about his boyfriend being deported.

"It's completely changed everything," Haxall said of Aurelio's new status. "We were fighting this struggle for a long time. You have this sense of impermanence in the relationship. It was a financial hardship. We couldn't make plans for the long term, really."

Although Haxall and Aurelio's story has a happy ending, the details of their relationship show how difficult it is for binational same-sex couples to go about making their relationships stable, and how legal anomalies and loopholes mean the difference between being together and facing a life apart.

When Haxall and Aurelio first met at the 1998 West Hollywood Halloween festival, they knew there was an attraction, despite a significant language barrier. But they were determined to make their relationship work, even if it meant in the beginning they had to struggle to communicate. The pair soon found out English was the least of their problems, as Aurelio tried to take steps to get the legal protections needed for a noncitizen to stay in the country.

Aurelio came to the U.S. on a tourist visa, but knew after meeting Haxall he wanted to stay with the man who had quickly become a part of his life. The two decided to move in together, and Aurelio made the snap decision to apply for a student visa, which meant the two men decided to make their relationship more permanent despite the struggles to communicate.

Luckily, Haxall could help Aurelio financially with English-language classes and cosmetology schooling, which are expensive for international students. Still, there was a level of stress involved, because Aurelio continued to face deportation if he left school. It was then that Aurelio applied for permanent status based on his sexuality.

"You have to fill out a lot of paperwork," Haxall said. Aurelio then had to meet with an immigration agent, who studied the details of his case.

Despite all the roadblocks, Aurelio's life was made easier by the change in his legal status.

"If you're illegal, it is a much more dangerous process," Haxall said. "You go before a judge and he can deport you."

Ally Bolour, who represented Aurelio in his petition for asylum, said getting permanent status is ultimately decided on a case-by-case basis. "If you can show there was past persecution or credible fear of future persecution," Bolour explained, "then you can get it."

Citizens from countries like Malaysia, Myanmar (Burma) and Indonesia all have an easier time proving their governments have active policies that discriminate against gays and lesbians, but petitioners from places like the U.K. or the Netherlands are unlikely to be successful.

"If the person is from Western Europe, they won't get asylum," Bolour said. He also noted that Mexican petitioners face new hurdles since their country's laws have been changed to be more inclusive. "Mexico cases aren't good anymore because Mexico doesn't persecute as much."

With its famed Mardi Gras celebrations and Rio's reputation for wild gay fun, Brazil seems an unlikely candidate for a country that persecutes gays and lesbians, but Bolour pointed out that the experience of American and European tourists on vacation is not the same as the experience for the average gay or lesbian Brazilian.

"If you're Brazilian and you're gay, there is a lot of societal discrimination that applies," he said.

The ability to get asylum based on sexual orientation is relatively new. As late as 1991, gays and lesbians were excludable based on medical grounds, which classified gay people as inferior or having a mental defect. A 1990 law dropped the exclusion of gays looking to emigrate, but depending on the local Immigration and Naturalization Service offices, sympathy for same-sex asylum cases varied. In 1994, then-Attorney General Janet Reno issued stronger regulations, giving all courts and immigration offices universal standards for the treatment of gay and lesbian asylum seekers, making life much easier for people like Aurelio. Haxall pointed out that same-sex couples still have far more obstacles facing them than straight couples, who can easily sponsor their spouse and are more likely to get a decision that goes their way.

Haxall and other binational gay and lesbian couples are trying to change that. Despite significant challenges from conservatives and scared progressives who don't want to vote for anything that even looks pro-gay, the Permanent Partners Immigration Act, which would grant permanent residency status to same-sex partners of American citizens, has over 100 co-sponsors in the House of Representatives, as well as the support of the American Immigration Lawyers Association.

"We're kind of ahead of schedule," Haxall said, noting that both Democratic and Republican members of the House have signed up to sponsor the bill,

which was first introduced in the last session of Congress by U.S. Rep. Jerrold Nadler, D-N.Y. "We are trying to get it in the Senate this year."

At least for Haxall and Aurelio, life has gotten much easier since their relationship is no longer a legal question mark.

"The sense of fear is kind of gone," Haxall said. "We couldn't grow that much as individuals. Now that's all lifted."

3185. Houston-Hunks Columbus Tx Chapter--Pro-Nuclear, Anti-Gay

Pro-Nuclear, Anti-Gay
ACLU of Southern California Sues Adoption Agency, Charging Discrimination

The American Civil Liberties Union of Southern California on May 1 filed a lawsuit against the Orange County-based Olive Crest, a foster family and adoption agency, for discriminating against a lesbian couple who sought to become certified as a foster family, with the goal of adopting children in foster care.

Olive Crest is licensed and regulated by the state, receives federal, state and county funds, and has contracts with four California counties to recruit, train and certify foster and adoptive families and to place foster children with these families.

"California law and regulations clearly state that foster care and adoption agencies must treat married, unmarried and same-sex couples equally," said Martha Matthews, Bohnett Attorney with the ACLU. "Olive Crest wants to give preference to what it calls 'traditional, nuclear' families. But since Olive Crest contracts with the counties, accepts taxpayer funds, and is part of the state's and the counties' system of care for foster children, it cannot discriminate."

In July 2002, Shannon Rose, a doctor, and her partner, Jane Brooks, a law student, applied to become certified as foster/adoptive parents with the goal of adopting foster children. The couple received repeated assurances from Olive Crest that they would be treated fairly. They filled out numerous forms, were fingerprinted, and went through the extensive home-study process required for certification. They were told by their Olive Crest social worker that their home study was fine, and they had been 'pre-certified' as foster/adoptive parents.

Then, in September 2002, they were told that their adoption process had been suspended and were informed of Olive Crest's new Foster Family Recruitment Policy. The new policy stated that Olive Crest "prefers to place children with nuclear families," and that "other applicants will be considered on a case-by-case basis." The policy also stated that Olive Crest would refer applicants whose qualifications "do not agree with Olive Crest's values, guiding principles or treatment philosophy" to other agencies. Rose and Brooks were told by their former social worker at Olive Crest--who quit her job over the agency's handling of their case--that this policy was specifically intended to allow for discrimination against gay and lesbian couples.

"We were devastated when we heard Olive Crest planned to stall our certification process," Rose said. "The ones who suffer the most, though,

are the children who are waiting for a place to call home."

Attorneys from the San Diego office of the law firm of Heller Ehrman White & McAuliffe are working with the ACLU in connection with the case and are & representing the couple pro bono.

3186. Houston-Hunks Columbus Tx Chapter--Homosexual age of consent bill under debate

Homosexual age of consent bill under debate
By Tim Dick
May 20 2003

The Gay and Lesbian Rights Lobby has labelled the different ages of consent for gay and straight sex as "a blatant piece of state-sanctioned discrimination on the grounds of sexuality" and called on those MPs opposed to equalising it to "understand the detrimental impacts of this law."

Debate on legislation to equalise the age of consent for heterosexual and homosexual sex begins today in State Parliament. It is the third try to lower the consent age from 18 to 16 for gay men, the same age as for straight men. New South Wales is the only state not to have an equal age of consent but voting is expected in the lower house this week on the government bill before it takes on the less receptive upper house.

The Lobby was joined today by the Aids Council of NSW (ACON) and FPA Health, formerly Family Planning, to back the bill's passage. All three groups said the current situation had a detrimental effect on the health of young gay men and needs to be changed.

The Lobby's Co-Convenor, Rob McGrory said: "Western Australia has recently equalised the age of consent. "The world hasn't ended there. The sky hasn't fallen. There is no harm, there is only benefit in equalising the age of consent."

McGrory also sought to distance the Lobby from concerns critics have about the risk of child sex abuse. "Gay men aren't pedophiles. The age of consent is about consensual sexual relationships. It's about ensuring a fair go for everyone in New South Wales."

advertisement

advertisement

Both Labor and Liberal parliamentarians are free to vote on the measures as a matter of conscience, although National Party members have decided to oppose the bill as a block. McGrory said the Lobby was hopeful of the bill passing but that "the health and welfare of young gay men should be a matter of government policy."

ACON CEO, Stevie Clayton, said the current position prevented health workers giving safe sex information out and discouraged young gay men from accessing health services, "which means they don't get information about HIV/Aids and other sexually transmitted infections until, in some cases,

it's too late for them," she said.

"It leads to low self esteem which increases rates of drug and alcohol and tobacco use and unfortunately it also leads to much higher rates of youth suicide. We're talking about 300 times more likely to commit suicide than their heterosexual peers," Clayton said.

Opponents of the bill have suggested raising the age of consent for heterosexual sex to 18 as a way to get equality. That idea did not wash with Margaret Hansford from FPA Health, formerly Family Planning.

"We believe that's a totally unrealistic proposal and it would be ridiculous if it weren't such a serious issue. We know from the recent Sex in Australia survey that young people begin sexual activity at about the age of 16 years. That sexual activity is already occurring and what would happen ... is that it would criminalise those young people as well," Hansford said.

An 18-year-old gay man, Daniel, joined the three groups at state parliament today and said the current laws were ineffective and stopped him accessing health services.

"The unequal age of consent didn't stop me having sex. It didn't stop me being active. However, it did stop be accessing services like FPA and ACON offer. It made a really hard part of my life even harder."

Daniel said that the parliamentarians considering the legislation were "predominantly heterosexual white males" that were not effected by the legislation. He called on them to "speak to a few a young gay guys in the community who are 17 and coming out and have this idea that for them to be sexually active and for them to have a partner who they're in love with and want to have sex with for it to be illegal."

3187. Houston-Hunks Columbus Tx Chapter--Bush Wants it Both Ways on The Gay Front

"They□re caught between the base and the need to be seen as moderate," said David Smith, communications director of the Human Rights Campaign, a gay-rights group. "What you□re seeing is triangulation," he said, using the term applied to President Bill Clinton when he distanced himself from liberal Democrats in order to win re-election.

On the right, similarly, Connor said, "There is clearly, at the highest levels within the Republican leadership, a calculated strategy to embrace the gay agenda and promote that agenda. They think they need to take this position to endear the party to soccer moms and immunize it from criticisms in the media and appear to be a kinder, gentler White House."

Connor said he did not know whether Bush was party to the strategy, but he said "the White House does not embark on any strategy without Karl Rove□s approval," referring to Bush□s top political operative. GOP moderates argue, accurately, that attitudes on gay issues have become dramatically more tolerant since 1986, when Chief Justice Warren Burger declared homosexual acts were "of deeper malignity than rape."

Gallup polls show that in 1986, Americans favored keeping gay sex illegal by a margin of 57 percent to 32 percent. In 2002, they favored its legality by 52 percent to 43 percent. The party□s political problem is this: About 4 million self-identified gays went to the polls in 2000, 1 million of whom voted for Bush. Historically, other GOP candidates have garnered up to one-third of the vote. A reputation for inclusiveness and tolerance also could help the GOP among moderate suburbanites who reel from "culture war language."

On the other hand, as Connor put it, "Karl Rove himself complained (at a 2001 American Enterprise Institute event) that 4 million fundamentalists and evangelicals didn□t turn out in 2000, almost costing Bush the presidency."

Which way will the party tilt? It□s not a good sign that Mary Matalin, former aide to Bush□s father and to Vice President Dick Cheney and a figure identified by the right as part of the pro-gay movement in the GOP, defended Santorum extravagantly on "Meet the Press."

The rule may be clear in that respect, but the problem is that there is much equipment that would still display the "center" frequency if the SSB transmission were AM (i.e. the carrier frequency is displayed) and they do NOT have a feature to display the center of the modulation sideband that is in use.

My HF rig, being a Kenwood TS-930, is like that.

The example of an FM signal above does not help since FM is like DSB or regular AM - a central carrier and modulation both above and below. SSB is "lopsided" in that respect.

Regardless of correctness, because of this mismatch between the ruling and custom, some are bound to "correct" it by tuning 1.4kHz down from the frequencies listed in the ruling while others will set their radios to display those exact frequencies listed (thus tuning by the suppressed carrier and being +1.4kHz above the rest). The bad designation, being in conflict with the common understanding by custom, will cause this interference problem - and that will be the FCC's fault for issuing a VAGUE ruling.

Not to an appl;iance operator whose only interest is in dialing up a frequency and shooting the breeze. If you're interested in what you're actually doing and where you're doing it, it sure matters.

> As long as we get our signals in the proper
> place in the radio spectrum, it doesn't matter what we call it.

True. But if you don't know that FCC insists on you misdialing your frequency to be legal contrary to accurate technical convention as in this case, you can easily be in violation and have not violated anything but a silly, misleading rule. That may not matter to you but to me it sure does.

As I see it, what you missed is the difference between a discrete frequency channel and the accompanying tolerance (which AFAIK hasn't yet been announced) and which your TS440 was NOT designed to meet, and commercial gear which was. If you can't put numbers on the situation you can't be certain you're within tolerance. I guess "close" is gonna be good enough, then.

And, you seem to be competent to take care of this problem. Most "ordinary" hams are not. The relaxed tests notwithstanding, looks like they better learn..

>

But--- that isn't the situation, Robert. We didn't get a band of frequencies, just 5 discrete channels, with no authorization off of those discrete frequencies beyond the allowed tolerance, whatever that turns out to be. Surely they won't fail to announce one-will they? I've given up on expecting rational things from that quarter, though.

>
> My rig's specs say "400Hz to 2600Hz" at 6dB down. Doesn't
> say what it's doing say at 10dB down, but it's likely not grossly
> wrong for the 5MHz band.

There's a good chance that if you check it with good enough test gear it won't meet its announced specs. Ham gear never was manufactured to meet close specifications and I've seen some that was fairly far out of specs when new.

> also the frequency accuracy spec'd
> is ï¿½ 1 x 10^-5 of the carrier freq. That's 50Hz at 5MHz, which

If you assume that sort of benevolence from FCC you might get a rude surprise. If they announce commercial tolerances I wouldn't expect them to ignore violations.

Yes, but how about all those who don't get QST? Sure, most hams will get the word somehow, but plenty will not. Happens that way every time.

"Q", while I am breathlessly awaiting the forthcoming notification from Chris Caputo (due to your comment that you netcopped me) I want to ask. Why are you posting from an anonymous out-of-country server? Did Stagger cause you to pucker up your Relys and hide your tracks?
I see, "Q" that you are on a one-track path here and that is to discredit President Bush at every turn, and you like to "spice" up your diatribes with comments about Gays. Do you have a problem with Gays? Many of you stupid oldsters are avowed Homophobes and that is OK. It comes with being old and intolerant and flatulent. Oldsters such as yourself often dislike and/or condemn that which you do not understand or cannot comprehend. Is your problem, "Q", that you find yourself attracted to the neighborhood boys and you are actually railing against the urges you know to be abhorrent to mainstream society? Does the sight of a young boy set your old heart atwitter?
One lone poster in another group posited that you perhaps are an agent of the Palestinians and that you have fantasies of kissing Yassar Arafat fully on his bloated lips. I say this is not so. I say that you wish to kiss Mr. Arafat in an area immediately below his navel. The poster posited that perhaps you have an affinity for the uncircumcised Arabs and that Smegma is your favorite "cheese". SAY IT AIN'T SO, Q!!!!

Let's see. Where were we? Oh, yeah. You are so busy netcopping that you had to pull the elastic leg band away from your adult diaper to "let off steam" and you had put me on "notice". So where IS this notice? I'm still waiting. Maybe if I get tossed from Altopia I can come over and join you at COTSE. Then you and I can really go round and round, but until then?
Take your heart meds, Old Man. You are nothing more than a small pustule to be popped at my convenience.

Aunt Bea

Hey Aunt Bea,

I just mark all of SL's posts as read when I get here.

Amazing how much QRM drops out when I'm done...
.....

Scott. Most, if not all of the posts by Stagger are coming from an old malcontent who used to post as "Q". He is allegedly a Ham and was outed by another person in this group. I noted that his call and name was posted earlier and it was further noted that he has "quite a history" on the news groups. The oldster has too much time and too little talent on his hands. If you look back I am sure you will be able to find the call and the name. Not that it is important.

That's what I first thought, but a proper USB signal has audio from
300 Hz to 2.7 kHz audio, so if you tune 1.5
kHz low your sig should extend -1.2 kHz/+1.2 kHz around the
frequency number specified by the FCC.

What's the channel spacing in this band anyway? I hear some
signals that sound like RTTY on 5344.5, 5338.5, 5411.5, and
voice at 5505.0 (aviation weather reports). These numbers are
what my rig reads out, i.e., the suppressed carrier freq.

I see your point. Which makes the "off frequency" rule even that much more
ridiculous.
And then there's still the matter of just what your SSB filter actually
passes.......

3202. Opinions on Batteries

Newsgroup: rec.radio.amateur.misc

All--

Looking for opinions on replacement batteries for HT's, cell phone (Nokia), etc.

Where is the best online or mail-order place to get them?

Experiences, either good/bad, and how you feel about their pricing, warranty or after-sale treatment, etc.

Specifically, I have a TH-D7A, and am looking for a better battery than the PB-39 NiCd, plus a drop-in charger/maintainer.

Thanks & 73

3206. Houston-Hunks Columbus Tx Chapter--Gay-Straight club stirs up parents

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-21 10:27:10 UTC
From: SLee@houston-hunks.com
Message-ID: <O5F6SBI537762.5175@Gilgamesh-frog.org>

Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc,alt.radio.scanner,alt.radio.pirate

HAZEL PARK - A Gay-Straight Alliance Club at Hazel Park High School has some parents trying to convince school officials that student club memberships should be possible only with parental permission.
The lobby by parents started a few months ago when the parents learned about the nearly two-year-old Gay-Straight Alliance Club, said Pam Baker, 43, whose son is a senior at the high school but not a member of the club.

"We're responsible for our kids until they are 18," said Baker. "(The schools) want us to control our kids. But when it comes to these issues, they don't want the parents to know about it."

Baker said issues like sexuality should be discussed among parents and their children.

"If a child can't talk to a parent, that's what counselors are for," Baker added. "I've talked to a few parents who are very concerned about it."

Baker said those parents have a lot of questions about the club, including who is running the meetings.

"When you are of high school age, you are vulnerable and have mixed and confused feelings," Baker said. "Should they be talking to homosexuals? Are there straight persons helping to run the meetings?"

Baker added, "I don't understand the importance of learning about your sexuality (at school). I don't think they should be using kids for meetings like that.

"It's great they are concerned about kids. But we also have kids graduating with a sixth-grade reading level. Where's the interest in academics?"

Baker also has a son in junior high school who she contends won't be attending Hazel Park High School if officials continue to allow children in clubs without parental permission.

Several parents have addressed the issue to the school board in recent past months. They were expected to speak to the board again on Monday night.

"This is nothing new," said school board President Clinton Adkins. "It's been going on for three months. The (Hazel Park High School) principal (James Meisinger) and the administration met with one parent.

"Personally, I don't believe the school or officials can dissolve that club," added Adkins. "The issue, in my opinion, is whether all clubs should require parental permission."

Adkins said school administrators have compromised with parents.

"They have promised parents they will send them information on every club in the high school," said Adkins, adding parents then would have the option to keep their children out of certain clubs.

Adkins said the high school doesn't have a problem about letting parents know about clubs.

"That club wasn't kept a secret," he said. "A female teacher is the mentor. The idea, we were told, is about awareness, that there are different types of people in the world and we should tolerate them. There is no talk about sexual orientation, only tolerance to people."

Adkins said he believes parents have a right to keep their children out of certain clubs.

Meisinger said there are more than 30 clubs in the high school outside of athletics.

"Each year we publicize the clubs and who their sponsors are," he said. "Seventy-five to 80 percent of the teachers volunteer their time and energy."

Meisinger said opposition to the Gay-Straight Alliance Club is comprised of only a few individuals who are, he added, very vocal.

Parents can talk with club mentors any time and even go to the meetings, Meisinger said. The school will honor parents' wishes to keep their children out of certain clubs.

He said there are five or six students in the Gay-Straight Alliance Club.

"It is one of the least active and smallest clubs," he said. "But it still exists. The purpose of the organization is acceptance of everyone including gays."

Most of the direction for the club comes from State Parents-Teachers-Students Association.

"There is no talk of sex or sexuality," Meisinger added. "The club meetings are open to everyone and anyone, including parents. We believe the activities are wholesome and in the best interests of the students."

Meisinger said teachers don't want permission slips for club membership because they feel that could create a "bureaucratic nightmare." Besides student club members, often non-member students drop in on the sessions, he said.

3207. Houston-Hunks Columbus Tx Chapter--More Jurisdictions Add Gay Rights for the Workplace

More Jurisdictions Add Gay Rights for the Workplace

Wednesday, May 21, 2003

A growing number of cities and counties are prohibiting discrimination on the basis of sexual orientation, according to a new report from the Human Rights Campaign Foundation's WorkNet project.

The report found that 15 jurisdictions prohibited discrimination on the basis of sexual orientation in 2002, PlanetOut.com reports. Eight did so the previous year. In addition, 16 jurisdictions barred discrimination based on gender identity last year, according to the study. Five did so in 2001.

The study also found that the number of companies that offer domestic partner health insurance benefits grew by 16 percent in 2002, down from 24 percent in 2001, according to PlanetOut.com. The number of firms that have adopted nondiscrimination policies for sexual orientation grew by 7 percent last year.

"The fact that both indicators grew as much as they did is perhaps the clearest indication that these policies are good for business and that they have become a fact of American commerce," Daryl Herrschaft, associate director for HRC WorkNet, tells PlanetOut.com.

One state, New York, added coverage for sexual orientation in 2002. Thirteen states, 119 cities and 23 counties now prohibit sexual orientation discrimination, according to the HRC.

3208. Houston-Hunks Columbus Tx Chapter--Prison Term In Assault On Gay Student

Prison Term In Assault On Gay Student

May 20, 2003

A 20-year-old man was sentenced today to 16 months in prison for attacking two members of a gay student group outside the Virginia Commonwealth University Student Commons.

Before he was sentenced, Andy P. Roberts apologized to Joye Abbott. At his trial in March, Roberts admitted hitting Abbott and breaking her nose but said he did so instinctively after being hit in the face with a glass bottle.

Richmond Circuit Judge Richard D. Taylor discounted Roberts' testimony. He termed his conduct reprehensible and credited testimony from witnesses that Roberts had said, "I'm not afraid to hit a dyke."

The altercation occurred after a confrontation between a gay VCU student and Roberts and two of his friends outside the Commons while a meeting of the Sexual Minority Student Association was underway.

The student went to the meeting and said he had been assaulted because he was gay. About 40 people spilled out of the Commons and confronted Roberts and at least six others.

Members of the association told Roberts' group to go home, and his group responded with homosexual epithets.

The confrontation escalated to shoves and the blow from Roberts to Abbott's face. He was sentenced to a year in prison for unlawful wounding in the attack on Abbott and to four months in jail for shoving another member of the association.

3209. Houston-Hunks Columbus Tx Chapter--Judicial Nominees Endanger Gay Rights

Judicial Nominees Endanger Gay Rights
Monday, 19 May 2003
NEW YORK -- The New York Times editorial board on Monday drew a direct connection between the Bush administration's conservative nominees to the federal bench and the dangers these nominations pose to the advancement of gay and lesbian civil rights.

A growing threat to millions of gay Americans.

Said the Times: "The president called Senator Santorum, who had just equated homosexuality with polygamy and incest, 'an inclusive man.' At the same time, the Bush administration has been appointing federal judges who are hostile to equal rights for gay men and lesbians."

The newspaper singles out two federal judiciary nominees -- Bill Pryor, the Alabama attorney general, and Claude Allen, the number two official at the Department of Health and Human Services -- who deserve to be rejected at the conclusion of their confirmation hearings in the Senate.

Pryor who has been nominated by Bush to serve on the 11th Circuit Court of Appeals in Atlanta recently submitted a brief to the Supreme Court defending the Texas sodomy law. In it, he placed sexual relations between consenting gay adults and lesbians in the same category as necrophilia, bestiality and pedophilia.

Allen, the Times notes, distinguished himself as a rising conservative under Senator Jesse Helms of North Carolina. During a reelection campaign, Allen was quoted as saying that the Democratic opponent, James B. Hunt Jr., then governor, was vulnerable because of links to "the queers."

The editorial comment ends with the reminder that Allen and Pryor are just two of the hundreds nominated by conservative ideologues in the Bush administration eager to leave their stamp on the nation's courts.

3210. Houston-Hunks Columbus Tx Chapter--Man believes anti-gay motive behind crime

Man believes anti-gay motive behind crime

Tuesday, May 20, 2003
By GREGG HERRINGTON, Columbian staff writer

A gay Vancouver man figures his sexual orientation is the reason for the sledgehammer vandalism to the trailer in Ridgefield where he operated a T-shirt silk screening business.

"The deputy said it was probably because I was gay and it's the only reason I can think of," Ed Gagnon, 44, said Monday.

"This was hatred. Whoever did it was violent and angry."

Someone broke into Gagnon's 22-foot camp trailer on private property at 1915 N.W. 189th St. the night of May 10. Furnishings and silk screening gear were smashed and tossed outside.

The vandal also smashed interior walls, apparently with a sledgehammer, said Gagnon, who resides in Vancouver but used to live in Ridgefield.

"Everything was pulverized," he said. "Things were unrecognizable. It had to have taken at least an hour to do that much damage."

The property owner, an 84-year-old woman who lives adjacent to the trailer, told Deputy Bryan Skordahl she didn't hear or see the incident.

According to Skordahl's report, another trailer nearby that is owned by someone else was not damaged. He said there were no suspects.

Gagnon said he was an active supporter of the amphitheater now being built on the Clark County Fairgrounds and couldn't rule out that involvement as a motive for the vandalism.

He estimated the damage at $2,500.

3211. Houston-Hunks Columbus Tx Chapter--Church's gay rights advocate is made a bishop

Church's gay rights advocate is made a bishop
By Jonathan Petre, Religion Correspondent
(Filed: 21/05/2003)

One of the Church of England's most prominent advocates of gay rights, who has called for the ordination of practising homosexuals and blessings of gay marriages, has been appointed a bishop.

In a development which will dismay traditionalists, Canon Jeffrey John, the Chancellor and Canon Theologian of Southwark Cathedral, was yesterday named by Downing Street as the new Suffragan Bishop of Reading.

His elevation will give fresh impetus to the Church's gay rights movement and reflects the new mood since Dr Rowan Williams, who has admitted ordaining a practising homosexual, became Archbishop of Canterbury.

His predecessor, Dr George Carey, who warned that the Church was on the brink of a fundamental split over the issue, is unlikely to have welcomed the appointment.

Dr John, 50, who has declined to comment on his own sexuality, has been an outspoken campaigner for gay rights for decades, and last year contributed to a collection of prayers for homosexuals. It included prayers for same-sex marriages, sex changes and "fantasy and fetish".

Dr John, a former Dean of Magdalen College, Oxford, has said: "I don't think there is any alternative to the bishops demanding discretion to ordain whoever they think fit.

"Probably more than half of them have been ordaining and supporting positively gay clergy for years."

His appointment was made by the Bishop of Oxford, the Rt Rev Richard Harries, a liberal who heads the House of Bishops' working party on sexuality, after consultations with Dr Williams.

An Oxford diocese spokesman said Dr John continued to hold his controversial views privately, but would publicly abide by the House of Bishops' 1991 report Issues in Human Sexuality.

This document, which has been criticised by liberals including Dr Williams, argued that homosexual practice was unacceptable among clergy, though it might sometimes be condoned among the laity.

The Rev Rod Thomas, a spokesman for Reform, the conservative evangelical network, said: "This appointment will cause shock to many evangelicals.

"It will make them worry even more about the Archbishop of Canterbury's own position, and reinforce their desire only to accept biblical ministry in their churches rather than the liberal opinions of some bishops."

3212. Houston-Hunks Columbus Tx Chapter--Gay Youth Fest Attracts 5000

Gay Youth Fest Attracts 5000
05.19.03

By Michael J. Meade

(Boston, Massachusetts) A record crowd attended Boston's Gay/Straight Youth Pride Festival on the weekend.
The festival, organized by the Governor's Commission on Gay and Lesbian Youth drew more than 5,000 people, double the attendance last year.

The young people marched from Copley Square to the Esplanade. As they passed under an arch of rainbow colored balloons near the Hatch Shell the crowd let out an immense roar or approval.

Brian Bolduc, one of the organizers stressed the importance of having a pride event geared for teenagers, many of whom are just beginning to understand their sexuality.

''Being in high school is such a difficult time anyway, but coming out in high school is even harder,'' Bolduc said. ''An event like this for them must be incredible.''

This year's festival also featured booths from colleges and universities.

''A few eyebrows were raised when I said I was coming to this event,'' said Jerry W. Pope, dean of admissions at Illinois Wesleyan University. ''One alum asked me, `Why?' We go to Latino and black college fairs, and since we don't discriminate, why not?''

An admissions representative from Dartmouth College said the perception of heterosexual men in starched shirts and pleated chinos no longer applies at the Ivy League school.

''The school has a lot of traditions but is open and accepting,'' said John Dolan, an assistant director of admissions.

''I think, from personal experience, gay students may appear less connected with the school community and many feel silenced,'' he said. ''It may be hard to find the right avenues in order for [colleges] to connect with them.''

Teenagers and college students were not the only ones on hand. A lesbian couple in their 40s, who have three children in their teens, drove from Maine to attend the fair.

3213. Houston-Hunks Columbus Tx Chapter--Gay Military Group, Others Share $7.2 Million Gift

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-21 10:27:11 UTC

Gay Military Group, Others Share $7.2 Million Gift
July 22, 2002
Gfn.com News

The Servicemembers Legal Defense Network, a legal services organization for lesbian and gay military personnel harmed by the military's "don't ask, don't tell" policy, announced Friday receipt of a 10-year gift from the Clarence E. Anderson Living Trust & Charitable Foundation.

The gift, to be paid through annual installments over the next decade, was created by Anderson as part of his estate planning.

Anderson, who died in June 2001, was a resident of Los Angeles. Anderson's bequest, currently valued at $7.2 million, will be divided among eight nonprofit organizations, including the Washington-based SLDN. The first installment, awarded one year from the date of Anderson's death, was made on June 24.

"Mr. Anderson's gift is a poignant example of the change we can effect through charitable estate planning," said SLDN executive director C. Dixon Osburn. "His bequest is a reminder that a lifetime of dedication to positive change can also be a legacy for many years."

Anderson, who was an engineer by training, served four years in the U.S. Army, achieving the rank of sergeant. A longtime member of the American Legion, he spent his entire postmilitary career with IBM Corp. Throughout his life, Anderson used the wealth he amassed through IBM to create on-going gifts to support his college, his faith, and numerous organizations that strive to help others.

"Mr. Anderson's bequest continues his service as a veteran, a philanthropist, and a patriot," said Osburn. "His gift will make a real difference in the lives of men and women who continue to serve our country under federally sanctioned discrimination."

Other organizations receiving a portion of Anderson's estate include the Dunwoody Institute; Parents, Families, and Friends of Lesbians and Gays; Gay Men's Chorus of Los Angeles; Los Angeles Gay and Lesbian Center; Human Rights Campaign; National Gay and Lesbian Task Force Foundation; and Gay and Lesbian Adolescent Social Services of Los Angeles

3214. Houston-Hunks Columbus Tx Chapter--National MP to cross floor over gay consent vote

National MP to cross floor over gay consent vote
May 21 2003

NSW National Party MP Russell Turner will break ranks with his party and vote to support an equal age of consent for gay men because his son is a homosexual.

While the Liberal and Labor parties have allowed a conscience vote on whether to lower the age of consent for gay men from 18 to 16, the Nationals had resolved to vote as a bloc against the move.

However, Mr Turner said he had been granted leave to cross the floor on the matter.

He told state parliament his son's sexuality had given him an increased understanding of the discrimination faced by young gay men.

"I have spoken to my son on many occasions and the National Party understands my situation where my son is a homosexual," he said.

"I would hope in supporting this bill today, and I will be voting for this bill, that slowly some of the ignorance and some of the fear that we have in our community will dissipate.

"(And I hope) we will accept these people as a section of the community that deserves to be treated equally and we will get rid of most of the discrimination that they are suffering at the moment."

Turner was courageous in supporting the government's equal age of consent for gay men, his party leader Andrew Stoner said today.

National MPs agreed to vote as a bloc against the move two weeks ago, but Mr Turner was given permission to cross the floor, Mr Stoner said.

"Russell's shown a lot of courage," he said.

"He's also shown a lot of love for his two sons and daughter and that's what it's all about - a man who loves his children no matter what."

Mr Stoner rejected suggestions Mr Turner was referring to his fellow National MPs in his parliamentary speech in which he referred to community's ignorance and fear.

"Russell's referring to a general lack of awareness of issues that he and other parents of gay children face and I think he's talking about that ignorance in the community generally," Mr Stoner said.

"I don't think he's talking about his colleagues.

"I think we've demonstrated a great deal of sensitivity to those issues in giving Russell the go-ahead to effectively cross the floor against the party.

"There is another side of the argument and it's about the protection of immature young men from the predatory sexual advances of older men.

"It just so happens that's the prevailing argument for me and the majority of my colleagues.

"But in Russell's case, because it's much closer to home, that side of the argument is much stronger for him."

Here is the latest RFI challenge.
Looks like the FCC part xx sure got overlooked or over paid to some inspector
to let this pass the regs.
You need to read the website below to get the details and see the graph of
the RFI to understand what I am talking about.
Good luck. 73

Hi

I have a Yaesu FT-one with a locked up VFO. As soon as i switch her on the read out is all 0.000.00's i can spin the VFO till my fingernail turns blue and falls off, but nothing ! I can try to use the keypad to enter a frequency but it's locked up to!

Before it locked up i had just hooked up a new antenna (home made) and yes it
had a high S.W.R So is it the CPU ?? and how can i reset it if it is?? Or is it something more??? (please no)

I was going to enter the VK/ Trans-Tasman Contest with her.

Help

Stunning gay Jewish movie
Keith McDonnell
Gay.com UK
19 May, 2003

Trembling Before G-d is an unprecedented feature documentary that tackles the dilemmas facing homosexual orthodox Jews. This multi award-winning film will be released in the UK at the end of May. It is a sensitive tribute to the determination of observant Jews struggling to reconcile their commitment and love of Orthodox Judaism with their homosexuality and the universal search for intimacy and love.

Filmmaker Sandi Simcha DuBowski was inspired to shoot the documentary after meeting the gay son of an ultra-Orthodox rabbi. It took Sandi over five years to shoot as it proved difficult to break the public silence over homosexuality in the Jewish community.

His interviewees come from such diverse environments as New York, Jerusalem, Los Angeles, London, Miami and San Francisco. Many of them were afraid to talk directly to the camera and others gave permission for interviews only if their identities would be kept secret. The result is an intimate and compelling piece of cinema.

☐I saw Trembling before G-d last night at the Film Forum in NYC. I can not stop thinking about it. You did an amazing job with this film. I expected to see a movie bashing Orthodox Jews and putting down their perspectives on Homosexuality. Instead I saw people that love learning Torah, love praying to G-d , love Jewish tradition and want to be accepted for who they are."

☐Stunning.. Fascinating How it got overlooked at Oscar Time is a mystery☐
**** Empire Magazine June 2003

☐As an Orthodox rabbi who wants to help everyone bring halacha [Jewish law] into their lives, I learned from this film humility and sensitivity, which themselves are crucial to making any halachic decision."

The film won ten awards including the Teddy Award for Best Documentary at the Berlin Film Festival, The Mayor☐s prize for the Jewish Experience at the Jerusalem Film Festival, and the Grand Jury Prize for Best Documentary at OUTFEST Los Angeles.

Trembling Before G-d opens in London at The Screen On The Hill and the Other Cinema on 30 May 2003, and at selected cinemas nationwide from this date.

There are also several special events with director Sandi Dubowski and the first openly gay Orthodox Rabbi, Steven Greenberg as follows:

London: Screen on the Hill, June 1 (020 7435 3366)
London: The Other Cinema, June 4 and 8 (020 7734 1506)
Cambridge: Arts Cinema, June 2 (01223 50 44 44)
Liverpool: FACT, June 4 (0151 707 4450)
Brighton: Duke of York's, June 2 (01273 602 503)
Leeds: Hyde Park, June 9 (0113 275 2045)

Judge Asked To Dismiss Gay/Straight Lawsuit

Boyd County school officials deny they violated federal law by banning a gay-rights student group from meeting at Boyd County High School.

They want a federal judge to dismiss a lawsuit against them. The lawsuit challenge is by the school board, Superintendent Bill Capehart and Boyd County High School Principal Jerry Johnson.

U.S. District Judge David Bunning said last month the suit has a strong likelihood of winning.

The lawsuit was brought by the American Civil Liberties Union on behalf of the Gay-Straight Alliance, seven students and their parents, and Kaye King, a high school English teacher who is the alliance's adviser. The response was filed May eighth.

After the school's teacher-parent council voted to let the group meet on campus, the school board banned all non-curricular student clubs from using school facilities.

But the ACLU sued in January, saying some student groups were allowed to meet at school while the alliance was not allowed to meet.

Just goes to show, you can't please everybody. Sometimes it appears that some people just seem to go places "hoping" to have a bad time so that they can complain about it afterwards. I think the new ICOM was more like $7-8K projected price.

I bet they don't complain about paying $2+/gallon for aviation fuel, $$$ for the airplane motor(s) rebuild fund, etc., though (I'm a pilot, too.) Compare "hobby" flying prices to ham radio prices. No comparison. But what's it worth to you????

Saw a post earlier which said there had been a LOT of spam within the past week. Those were my thoughts too. So for the first time
in 15 years of using PC's decided spam filtering was necessary for NG's too (I've used it for eMail for a while).

Well after a half hour of cleaning up the junk in the files here (I use Outlook Express) and adding key words to the spam filter
(like: shit, crap, fuck, politic, god etc etc etc) AND adding the names of people who tend to go OFF TOPIC I've got to say, the
posts I see look pretty good. No more 'Houston-Hunks' faggot stuff and peoples political views which *DO NOT BELONG HERE*

I know a LOT of people have been upset by people acting like jerks sending inappropriate material so I'm sending this as
ENCOURAGEMENT so people who want to stay on topic DON'T leave.

Take the time to figure out your software filter options (it's not hard) and ADD the keywords used in SUBJECT LINEs you wish to
block. I would also recommend blocking posts from people who typically to not adhere to the rules of these forums. Here's an example
of how I set up filters with Outlook Express:

to add SUBJECT LINE keywords ...
from the main pulldown menu select: Tools, Message Rules, News
click NEW

section 1.
click Where the Subject line contains specific words

section 2.
click (whatever you want) I clicked 'DELETE IT'

section 3.
click the HIGHLIGHTED link which says 'contains specific words'
type in the word you wish (such as 'political')
click ADD
type in the next word, click ADD etc. etc. etc. until you have the words you wish
click OK all the way out

To block specific peoples posts (e.g. Stagger Lee) do the following ...
from the main pulldown menu select: Tools, Message Rules, News
click NEW

section 1.
click Where the From line contains people

section 2.
click (whatever you want) I used DELETE IT

section 3.
click the HIGHLIGHTED link which says 'contains people'
type in the name you wish to block (such as 'stagger lee')
click ADD
type in the next name (or portion of a name), click ADD etc. etc. etc. until you have the words you wish
click OK all the way out

Final notes: of course you must modify the words and users to block on occasion but it's worth the effort! You will find browsing
much more enjoyable!

Yeah buddy....more RF trash to put up with.

How about the latest 'goodie' from the FCC? You know the one about RF from 2 to 80 MHZ passing digital trash to everyones house and put on the POWER LINES. Its called PLC or BPL. Check the ARRL page for the details. Then submit your comments to the FCC.

QST, when they publish the fact that we will be getting this
allocation, should mention how the FCC specifies the frequencies,
and point out that most ham rigs traditionally display the suppressed
carrier freq, and that we need to dial up the rig so the display
reads 1.5KHz lower than the FCC numbers. And, as there are only
5 freqs, just list the numbers translated into "ham" from "FCC/NATO".

3227. QSL card design?

I'd like to design a QSL card in anticipation of actually making a
contact on HF. Unfortunately, I can't think of anything really
creative to put on my card -- the only thing that comes to mind is a
picture of my rig or my antennas with some text superimposed
(callsign, grid square, stuff like that) -- so I thought I'd ask for
suggestions.

Anyone?

Jack.

Are you sure about that Robert? I hven't been around any rigs that
don't do that.

> And that, Phil, is why I regard the rule as stupid. It's not FM we're
>discussing.

Here are the rules being talked about, from the definitions section
of Part 2. The (RR) means they were cribbed from the Radio Regulations:

Assigned Frequency. The centre of the frequency band assigned to a
station. (RR)
Assigned Frequency Band. The frequency band within which the
emission of a station is authorized; the width of the band equals the
necessary bandwidth plus twice the absolute value of the frequency
tolerance. Where space stations are concerned, the assigned frequency
band includes twice the maximum Doppler shift that may occur in relation
to any point of the Earth's surface. (RR)

Notice that they make no mention of any mode at all. That's because, in
general, an "assigned frequency band" is not necessarily associated with
any particular mode, it is just an assignment of a slice of spectrum, and
that spectrum doesn't move when the mode changes. The channel is hence
specified in a way (center frequency + bandwidth) which is independent of
the mode being used and can be understood by anyone no matter what mode
they're using. The channel is the same, no matter what the mode.

> Some functionary somewhere, maybe ITU for all I know, decided to do
>something with his boring day and arbitrarily changed decades of
>technical convention. SSB began referenced to the carrier frequency and
>has been that way ever since.

I think what the ITU standardized was a way to specify frequency assignments independent of the mode being used, which makes sense to me since, in general, the same frequency assignment could be used by many modes. It is the case that the particular assignments you're talking about are currently constrained to USB only for hams, but the mode restrictions could change without changing the frequency restrictions. If in future they decided to allow all authorized modes that fit in the same channels, then when changing modes on your ham transceiver from USB to CW to LSB you would also need to change the frequency on the dial, no matter how the channel frequencies were specified. If the channel frequency was specified with respect to the (untransmitted) USB carrier frequency, it would be wrong for CW and LSB despite the fact that the channel hasn't moved.

>There is no good reason to describe SSB in equivalent terms with other
>modes. The reason as I just described is obvious. In fact, it is
>technically incorrect to do so. 5532 USB is NOT 5329.6 but that's what
>ham radio readouts will have to show.

It seems to me the fundamental technical problem is that there is no way to specify a single readout frequency for your ham transceiver which will keep the transmitter output in the channel independent of the mode you set the transceiver to. Even though the channel doesn't move when the mode changes, you still need to twist the frequency knob on your transceiver when you change the mode switch.

I hence think that what you are complaining about is not a problem with the regulations but rather is a consequence of the fact that your ham transceiver wasn't designed for use in a channelized environment. A friendier radio for a channelized environment might center the transmitter output on the (ITU defined) assigned frequency independent of mode, or might even just show channel numbers instead of frequencies, but since your radio wasn't designed explicitly for this environment it does something else. It seems like that's okay, though, since you are a resourceful ham and should be able to make do with what you have available even if it means doing some math.

3232. Re: QSL card design?

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-21 19:35:02 UTC
From: AMHAM <amham@connectnet.net>
Message-ID: <GxQya.19433$Pc5.12730@fed1read01>
Source record: 67227

For the pic -- take a digital camera or 35mm and take a shot of the local attraction.

For example check my cards at url:
http://ac6v.com/brag.htm#Photo

Here is my favorite -- On NN6X QSL Card -- goto http://www.qrz.com/
For call type in NN6X

Minium info on a card

1.. Your callsign, name, address, country, zip code, and E-mail address.

2.. Use an E-mail address that is independent of your provider (e.g., amsat.org, arrl.net, hotmail, yahoo mail, etc.), so that your card does not become obsolete should you decide to change providers.

3.. Callsign of the Amateur Radio Station contacted, callsign of the QSL Manager if applicable.

4.. Date and time of contact. This is the UTC date. Since various countries use different notations (i.e., 10/1/99 or 1/10/99 for October 1, 1999) it is best to spell out the month followed by the day. Many use roman numerals for the month e.g., March = III.

5.. Band or frequency of contact. Mode of operation, SSB, CW, RTTY, etc.

6.. Signal report exchange - in the RST system.

7.. Contest name and contest exchange number if applicable.

8.. Check boxes for "Please QSL" or "Thanks for your QSL".

9.. Your signature.

10.. For a general all purpose card you can add information used for awards, such as:

11.. 10/10 Number for 10-meter contacts. Ten-Ten International was established to encourage 10 meter activity. For 10/10 number applications, see the Glossary.

12.. County, province, prefecture, oblast, or parish.

13.. Grid square -- Many JA's collect these on HF

14.. Zone - both CQ and ITU

15.. Your awards, especially those that count for reciprocal award working

16.. DX Clubs you belong to. Many offer awards for working a specified number of club members.

Then if you have room maybe list Rig, antennas, etc.

Some QSL card Creators at URL:
http://ac6v.com/dealers.htm#CRE

"Jack Twilley" <jmt+usenet@twilley.org> wrote in message news:86ptmcurje.fsf@duchess.twilley.org...

-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

I'd like to design a QSL card in anticipation of actually making a contact on HF. Unfortunately, I can't think of anything really creative to put on my card -- the only thing that comes to mind is a picture of my rig or my antennas with some text superimposed (callsign, grid square, stuff like that) -- so I thought I'd ask for suggestions.

Anyone?

Jack.

3233. how I stopped newsgroup SPAM: UPDATE

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-21 20:32:15 UTC
From: Vic <nospam@bogusaddress.com>
Message-ID: <flRya.41518$HP4.27747@fe08.atl2.webusenet.com>
Source record: 67228
Cross-posted to: rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave,rec.radio.swap

My previous post explaining how to use OE filters to block unwanted posts & posters seemed well received so I decided to explain how
to get rid of all the 'garbage' you don't want in your existing files!

It's a little complicated but I'll run through step by step. If you print this out it will be easy to follow the rather lengthy
instructions. I'm sure it will be worth your effort!

to START:
open Outlook Express
press Ctrl+Y
select the folder or main GROUP FOLDER you want to clean
(here is a 'group' folder example: on my PC there are a number of GROUP folders, one is called LOCAL FOLDERS, another is called
NEWSGROUPS. If NEWSGROUPS is expanded I see MANY 'rec.radio.whatever' newsgroups. I want to clean EVERYTHING under my main group
called NEWSGROUPS ... select the folder or main folder 'GROUP' you want by highlighting and clicking OK, or highlight the folder and
press enter)
the folder you selected is now loaded in OE
press Ctrl+Shift+F (a Find Message dialog box should appear)

we want to remove all the 'Stagger Lee' garbage so type 'stagger lee' in the FROM box
click 'FIND NOW'
press Ctrl+A
all messages found should be highlighted
place the mouse cursor over highlighted messages, right click
click MOVE TO FOLDER
a MOVE dialog box appears
highlight the folder to move the junk to, I use DELETED ITEMS
click OK
now to PERMANENTLY delete them!
in the FIND MESSAGE dialog click BROWSE
select the folder you 'moved' the junk to
I selected DELETED ITEMS
click FIND NOW (OE will now look for whatever item you just moved)
press Ctrl+A (everything found should be highlighted)
now for the good part ... press DELETE on your keyboard
a dialog pops up asking (bla, bla, bla, Do you want to PERMANENTLY DELETE)
click YES

THAT'S it! (Whew)

I searched for all the garbage stuff using keywords in the SUBJECT box and I also deleted posts from certain users by using their

name as a keyword in the FROM box. What a pleasure it is to look at the posts the way they should be!

Hope you enjoy it

Vic

PS: I found it is necessary to be careful with the words one selects as keywords. For example, I wanted to delete all messages with
g-d (god) but some posts have a subject line which contains the words 'analoG-Digital' (funny). Naturally I don't want those
deleted. There were others too. I've also found 'shortcuts' for keywords. For example, 'politic' gets rid of subject lines with
POLITICAL, POLITICS, POLITICALLY etc.

Thanks Vic..

This is one of the most useful posts I've seen here in some time.

I am going to do this, and every other serious radio newsgroup user should as well, since apparently no one else cares to stop this ridiculous abuse of the Usenet Newsgroups.

And to think that I was blasted by my ISP for posting some FA items!

Vic

I followed your advice and it worked a treat.

I found it a bit easier to delete the postings already made though (OE6). In the message rules there is an 'apply now' button - you need to select the newsgroup you wish to apply the rule to first.

Will any hams who stole toilet paper from the rest rooms
at Dayton please return same to the Dayton Convention or
mail a check for payment of same. Contrary to what some
hams believed, toilet paper in the rest rooms was not one of
the "freebie" hand outs. We ran out of toilet paper in many
cases and hams having to take a dump.....well....you fill in the
blanks. Hope you washed your hands after shaking hands
with other hams.

Thanks,

Randy

SAN FRANCISCO, May 20, 2003 ☐ The Lesbian ,Gay, Bisexual, Transgender (LGBT) Family Expo is set to open Pride Month festivities in the city of San Francisco by providing valuable information to protect LGBT families, their assets, and to help them plan for their golden years. The Expo will be held on Saturday, June 7, from 10 a.m. to 3 p.m., at the San Francisco LGBT Center.

☐Our community is rich in resources that need to be made available to those who need the information the most,☐ said Rachel Robasciotti, a financial planner who conceived the event and is also a board member for the National Center for Lesbian Rights. ☐Placing them under one roof provides our community a rare opportunity to learn all aspects of family planning at once.☐

The Expo is planned to meet all the needs of LGBT families, or LGBT people seeking to start a family. Presenters will cover issues ranging from legal affairs, to financial planning, to adoption and insemination, to retirement. A special panel will be dedicated exclusively to the needs of children in the community.

☐Our families have special needs that involve a wide array of specialists that makes the entire process of raising a family challenging,☐ said Molly McKay, Esq., MECA Executive Director, Northern California. ☐Indeed this expo will prove invaluable to our local community.☐

The Expo will be help at the San Francisco LGBT Center on Saturday, June 7, from 10 a.m. until 3 p.m. The LGBT Center is located at 1800 Market Street at Octavia. For more information please call Rachel Robasciotti at 51-410-8530 or Traci Hollander at 415-575-3775.

PUYALLUP: Gay Straight Alliance gains club status at high school
Jim Szymanski; The News Tribune

Puyallup High School's Gay Straight Alliance has gained full-fledged club status.

The club petitioned for the designation after school officials turned down an attempt to publicize the group's activities with posters. Lawyers for the school district and American Civil Liberties Union advised the school that a federal court of appeals ruling guarantees the group club status.

Group members learned of the decision when it was announced at a student council meeting on Tuesday. The club designation will allow the Gay Straight Alliance to hold assemblies, publicize activities and apply for student association funds.

3241. Columbus Tx Houston-Hunks presents--Gay business network now open in Rehoboth Beach

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-21 22:20:06 UTC

Gay business network now open in Rehoboth Beach
Gay Business Association Of Rehoboth (GBAR) is now open for business. The new association, consisting at present of a core group of about 20 interested independent business owners, began meeting weekly on Thursday evenings at the Rehoboth Race-In Deli March 13. Instrumental in forming this new alliance of business owners were local businessmen Chris Miles from the Shore Inn Bed & Breakfast and Ray Whitehair from Rehoboth Race-In Deli. Subsequent GBAR meetings have been held weekly at Rehoboth Race-In Deli with an average of 25 businesses attending each meeting

In an effort to launch the new organization☐s objectives effectively and efficiently, GBAR members from ☐EXP Gayzette☐ and www.gayrehoboth.com have offered to assist the group in cutting its startup costs. ☐EXP Gayzette☐ copublisher Jeffrey Balk offered to donate space in a May edition of the magazine to accommodate the association☐s members☐ phone directory.

☐It is my pleasure to help this fledgling organization publish their first phone directory,☐ said Balk. ☐I think, by offering to publish the phone directory, and thus cover production costs for GBAR, it will help the organization build its member list and get on its feet. ☐The Gayzette☐ will offer 15,000 copies of the directory through ☐EXP Gayzette☐s☐ distribution circuit in eight cities in four states. It will also allow the group time to build its member list and also the time to produce a more complete stand-alone phone book next year.☐

In the same manner, gayrehoboth.com website owner and ☐EXP Gayzette☐ copublisher, Carol Fezuk offered to host GBAR☐s website off the popular local gay vacation and information website. ☐Our site☐s popularity, especially since its relaunch on April 10, thanks to local webmaster Michael Graham, will be an asset to the group in establishing its web presence with a clickable link from gayrehoboth.-com,☐ said Fezuk.

☐While GBAR☐s new web address, www.gayrehoboth.com/GBAR will invite potential visitors to our beautiful beaches for fabulous food and exciting nightlife geared for the alternative community, it will also promote the association☐s members and their services.

☐Both the print and online versions of the association☐s materials will include a comprehensive description of GBAR☐s members as well as a detailed map featuring members and their street locations.☐

☐This association would certainly not be possible without the members who have been at every meeting helping to build this association,☐ said Gay

Business Association Of Rehoboth acting Cochairman Chris Miles. ☐I am thankful and impressed with how this idea has taken off and grown so in such a short time. Not to mention, this association has also allowed us, as local business people to meet, become better friends and networking associates.☐

The Gay Business Association of Rehoboth☐s mission statement is to promote and support gay business in the area.

Future plans for the group include the production of a gay business directory, sponsoring a gay job fair, developing the plans for a gay film festival and supporting gay pride events.

For information about GBAR or to join, contact Miles at 227-8487, Ray Whitehair at 227-0700 or email: gbarehoboth@yahoo.com.

For more information on ☐EXP Gayzette,☐ call 227-5787, 877-397-6244 or email EXPgayzette@aol.com.

3242. Columbus Tx Houston-Hunks presents--Citing gay ban, students drop blood drive

Citing gay ban, students drop blood drive
Gay.com / PlanetOut.com Network
Monday, May 19, 2003 / 04:56 PM

Students at Southern Oregon University canceled a spring blood drive in protest over federal guidelines that ban gay men from giving blood.

Students at SOU say the policies violate the university's nondiscrimination policy and stigmatizes gay men.

Since 1985, the U.S. Food & Drug Administration (FDA) has banned all blood donations from any man who has had sex with a man since 1977, even once. Also, women may not give blood if they had sex over the last 12 months with a man who had gay sex in the last 26 years.

As reported by the Associated Press, student government official Amanda Guidero canceled the drive due to complaints.

"I do believe those students had a legitimate concern," she told the A.P.

"I know I've been yelling about it for four years," said Daniel Conner, a senior. "I'm a gay man and I don't like being forced to lie to help people."

In 2000, an FDA advisory committee voted 7-6 to keep the current policies about gay men in effect. Some officials had suggested that men be allowed to donate if they hadn't had sex with a man for five years or one year.

My gay son: Nats MP bucks the party line
By Paola Totaro, State Political Editor
May 22 2003

A National Party MP, Russell Turner, spoke in Parliament yesterday about his adult son's homosexuality, in a bid to explain his decision to defy his party and support changes to age of consent laws.

In a spirited and sometimes emotional day, the floor of the NSW lower house became an arena for a rare kind of political debate - one unfettered by pre-ordained party positions, and speakers guided principally by their consciences.

The reforms, which were designed to bring NSW into line with all other Australian states, will provide a uniform age of consent for men and women, fixing a legal anomaly that had led to a higher age of consent for homosexual men. The changes are coupled with tough new penalties for child sexual assault by adults in positions of trust.

Last night, the House voted 54 to 32 to support the changes. At least eight coalition MPs backed the bill, including Opposition Leader John Brogden. At least six Labor MPs voted against, including Gaming and Racing Minister Grant McBride, former corrective services minister Richard Amery and Fairfield MP Joe Tripodi.

The bill now moves to the upper house where the Labor Government does not have a majority.
More than 20 MPs chose to speak on the reforms, but it was Mr Turner, the MP for Orange, who seized his colleagues' attention and quiet admiration.

The National Party Leader, Andrew Stoner, a vehement opponent of the changes, had said his MPs would vote as a bloc, but Mr Turner was allowed to speak freely on the reform and he told Parliament he wanted to give some detail about how personal experience had shaped his understanding.

Last night his son, Scott, 38, told the Central Western Daily that he was proud of his father and his decision to set aside party politics to vote with his conscience. "I am proud of him as a man, a father and a politician.

"Dad is very much aware of how difficult it is for a young gay person growing up in a rural area with most young men not comfortable to acknowledge their sexuality until they are well into their 20s. Until then the intervening years can be very traumatic. This issue is not about

sexuality; it's about equality."

Mr Turner told Parliament that it was the understanding and support of family that had allowed his son to return from Sydney, where he had trained as a teacher, and settle in Orange again, accepted by friends, family and the community.

Mr Turner said many young men he had spoken to in recent years had explained that they were forced to leave their families and live in Sydney because their small towns did not offer the support or acceptance they so desperately sought.

"My son has a partner, a business and a home in Orange. He is accepted by friends of my wife and I, and he is accepted by the vast majority of people in Orange who have a reasonable understanding of the issue," he said.

Visibly shaken during his speech, Mr Turner said that society may have come a long way, but it still needed to work through the issue of homosexuality and learn to stop discriminating and "treat homosexuals as normal human beings".

"People can live what appear to be normal lives, but a scratch of the surface reveals that they have not been able to acknowledge their true sexuality . . . importantly, [homosexuals] are the sons and daughters of parents who agonise about how to handle the situation."

His hope, he said, was that the legislation would help in this process.

3244. Columbus Tx Houston-Hunks presents--School officials ask for dismissal of gay group suit

School officials ask for dismissal of gay group suit

The Associated Press

ASHLAND, Ky. - Boyd County school officials deny they violated federal law by banning a gay-rights student group from meeting at Boyd County High School and want a federal judge to dismiss a lawsuit against them.

The response of the school board, Superintendent Bill Capehart and Boyd County High School Principal Jerry Johnson challenges the lawsuit, which U.S. District Judge David L. Bunning ruled last month has "a strong likelihood" of winning.

"The case hasn't been tried on the merits yet," said Sheri Bryan, chairwoman of the Boyd County school board.

The lawsuit was brought by the American Civil Liberties Union on behalf of the Gay-Straight Alliance, seven students and their parents, and Kaye King, a high school English teacher who is the alliance's adviser. The response was filed May 8.

After the school's teacher-parent council voted 3-2 in October to let the group meet on campus, the school board in December banned all student clubs not connected to curriculum from using school facilities. But the ACLU sued in January, saying some student groups were allowed to meet at school while the alliance was not allowed to meet.

The ACLU said the district violated the alliance members' free-speech rights, failed to end anti-gay harassment and violated the Kentucky Education Reform Act by overturning a school council decision.

Bunning agreed. He issued an injunction requiring the district to let the Gay-Straight Alliance meet at school, pending resolution of the lawsuit.

Bryan said the school board did not want to appeal the injunction because school is nearly over for the year.

King said Monday that the alliance has been meeting weekly at the school with 10 to 12 members at each meeting.

"We're not having any trouble with the students here at school," King said.

In its response to the lawsuit, the district denied discriminating against the Gay-Straight Alliance, failing to address anti-gay harassment and violating the reform act. The response also said that the alliance failed to pursue all administrative channels in regard to the club ban and that the district had the right to ban clubs "to maintain order and discipline in the school district as permitted under both state and federal law."

School board members said in December that they banned clubs through June 30 to give the board time to rewrite the district's club policy. Bryan said that the process is ongoing, but that the board likely will revise the club policy next month, and that it will go into effect July 1.

"It will be equitable across the board for all clubs," she said.

3245. Columbus Tx Houston-Hunks presents--GAY TEEN BOOK AUTHOR TO BEGIN WEST COAST TOUR

GAY TEEN BOOK AUTHOR TO BEGIN WEST COAST TOUR

Brent Hartinger, author of Geography Club, the acclaimed new gay teen novel from HarperCollins, will embark on a West Coast author's tour this summer, visiting bookstores and gay pride festivals in Palm Springs; Los Angeles; San Francisco; Sacramento; Portland, Oregon; Seattle; and Spokane, Washington. Hartinger will read selections from and sign copies of his book, but will also recount the book's fascinating, if convoluted, journey to publication.

"The book was rejected by seventeen publishers before finally ending up at HarperCollins," Hartinger said. "At the time, everyone claimed there was no market for a gay teen novel. Of course, now that the book has gotten all these great reviews and is selling so strongly, all these editors are coming to my agent saying they're upset that she didn't send the manuscript to them!"

Geography Club is the story of 16 year-old Russel Middlebrook, who starts a secret gay-straight alliance at his high school in order to spend time with the object of his affection, a closeted baseball jock. Because they're afraid of being exposed as gay, they disguise the true nature of their club--and try to discourage anyone else from joining--by giving it the most boring name they can think of: the Geography Club.

Horn Book Magazine called Geography Club "pitch-perfect," and said, "This is the most artful and authentic depiction of a gay teen since M. E. Kerr's groundbreaking Charlie Gilhooly in I'll Love You When You're More Like Me." The Dallas Voice said, "Geography Club deserves every bit of praise it's been receiving....Readers of all ages and persuasions will enjoy the travails of a wholly engaging protagonist whose 'geography lessons' teach him the precarious landscape of gay love and life at the start of the 21st century."

Hartinger is currently adapting the book into a play with two versions, one for commercial theatre, and a shorter touring version for high schools.

"My film agent is the woman who turned the book Holes into a play and movie," Hartinger said. "Now she wants to do the same thing with Geography Club, and I couldn't be more pleased."

3246. Columbus Tx Houston-Hunks presents--Anti-gay pastor to protest Lincoln graduation

Anti-gay pastor to protest Lincoln graduation
His church is upset a D.M. student received a scholarship named for Matthew Shepard.
By TARA DEERING
Register Staff Writer
05/21/2003

A Lincoln High School senior's graduation ceremony will be protested next week because he was awarded a college scholarship in honor of Matthew Shepard, the gay Wyoming college student who was tortured and killed in 1998.

Julius Carter is Lincoln's senior class president. He plays football and sings in show choir. He also is gay.

Anti-gay pastor Fred Phelps and members of his Topeka, Kan., Westboro Baptist Church announced plans to protest Lincoln High School's graduation May 31 at Veterans Memorial Auditorium.

Lincoln High officials received a press release Saturday from the church group condemning them and the school district for recognizing Carter. Principal Al Graziano said he was dismayed when he read the press release Monday.

Carter said he was offended that the group was attacking his school.

"I could care less what they say about me because I go through that all the time," he said.

Carter applied for the Matthew Shepard scholarship to help pay for his pre-medicine education at the University of Iowa. He said the scholarship covers tuition, books and fees for four years.

Carter said he came out about his sexuality about two years ago to his close friends. After hearing of the protest, he said his friends have expressed concern for his safety.

"My friends are very protective of me, even more so now," Carter said Tuesday. "By this happening, (Phelps) is going to see that no one in Iowa cares because the way he presents himself is wrong."

Carter said he doesn't want anything to ruin his peers' special day.

"The last thing I want to do is be someone who hinders their happiness," he said.

Graziano also said he doesn't want the protesters to take away from his students' graduation day.

"It's their graduation day, and we want to keep the focus on the graduates," he said. "We plan to still have the best ceremony we can have."

Des Moines police officials said they are aware of the planned protest and don't foresee any problems.

Graziano said Carter is a visible member of the student body who is well regarded. He said many of the students who know of the planned protest have expressed concern for Carter.

Shirley Phelps-Roper, 45, the church's attorney and a member, said between 10 and 15 protesters are expected to protest at Veterans Memorial Auditorium.

"There are some people left in this world who haven't given over whole hog that it's all right to be gay," she said. "The issue is to publish this message. And what better way to catch these children is when they're heading into their graduation."

Phelps-Roper said she received several calls Tuesday from students and friends of Carter condemning the planned protest.

LGBT LOBBY DAY IN SACRAMENTO A SUCCESS

Lieutenant Governor Cruz Bustamante Joins Coalition in Support of Key Bills

SACRAMENTO ☐ Monday, May 19th, California☐s statewide lesbian, gay, bisexual, and transgender (LGBT) advocacy organization, previously known as the California Alliance for Pride and Equality (CAPE), formally announced its new name: Equality California. The announcement was made at the legislative reception following an extremely successful day of meetings with legislators and statewide elected officials as members of Equality California☐s Board of Directors and other allied organizations lobbied for the passage of key LGBT-rights legislation sponsored by Equality California.

☐We selected the name ☐Equality California☐ to reflect our mission and the work that we do: ensuring equality for the LGBT community and all Californians,☐ said Geoffrey Kors, executive director of Equality California. ☐The name seems especially appropriate in light of the incredibly broad coalition of supporters we were able to bring together for this extremely successful lobby day.☐

Leaders from dozens of local, statewide, and national groups participated, including Parents, Family and Friends of Lesbians and Gays (PFLAG), LLEGÓ-the National Latino/a LGBT Organization, Children of Lesbians and Gays Everywhere, ACLU, the Human Rights Campaign, California Church IMPACT, Love Sees No Borders, Marriage Equality California, Lambda Legal, National Organization for Women, Out & Equal Workplace Advocates, National Center for Lesbian Rights, Metropolitan Community Church, Amnesty International, Stonewall Democrats, Log Cabin Republicans, San Francisco AIDS Foundation, California Safe Schools Coalition, Gay and Lesbian Law Enforcement Professionals, and Our Family Coalition.

One of the highlights of the day was a 30-minute meeting with Lieutenant Governor Cruz Bustamante. He voiced his strong support for all three of Equality California's key pieces of legislation: AB 17 (Kehoe) - equal benefits for state contractors; AB 196 (Leno) - gender nondiscrimination; and AB 205 (Goldberg), the Domestic Partner Rights & Responsibilities Act of 2003. Bustamante shared stories of his own personal and political history, and offered insights about how to work with legislators to increase support for legislation important to the LGBT community.

"We applaud the Lieutenant Governor's continued willingness to speak out on behalf of equality for lesbian, gay, bisexual, and transgender

Californians," said Kors. "Cruz Bustamante continues to be a strong advocate for our community, and we are grateful for his leadership."

Board of Equalization Member John Chiang also met with the group, and similarly voiced support for all of the Equality California-sponsored legislation. The group also met with Insurance Commissioner John Garamendi, and representatives from Secretary of State Kevin Shelley, Attorney General Bill Lockyer, and Board of Equalization Chairwoman Carole Migden.

Following the day of meetings, Equality California hosted a legislative reception at which the Speaker of the Assembly, Herb Wesson (D-Los Angeles), presented Equality California□s 2003 Legislative Equality Award to the five members of the Legislative LGBT Caucus: Senator Sheila Kuehl (D-Santa Monica); Assemblymember Jackie Goldberg (D-Los Angeles), Christine Kehoe (D-San Diego), Assemblymember John Laird (D-Santa Cruz) and Assemblymember Mark Leno (D-San Francisco). In his remarks, Wesson commented that he looks forward to a California where, □We don□t care who you love, we don□t care how you love □ we just care that you love.□

Following the award, Marina Gatto, a fourteen-year old high school sophomore from San Carlos who has appeared on national television numerous times as a spokesperson for children from LGBT families, spoke about the hardships her family has endured simply because she has two mothers. She encouraged everyone present to support AB 205, which would grant important legal protections to children in families like hers.

□We are grateful to Marina for joining us yesterday,□ said Kors. □We are also grateful for the presence of the many other individuals who have been impacted by the lack of legal recognition for same-sex couples and their families. Hearing their personal stories illustrates for legislators and everyone else why this legislation is needed.□

3248. Columbus Tx Houston-Hunks presents--NYC's 20TH ANNUAL LEATHER GAY PRIDE NIGHT AUCTION

NYC's 20TH ANNUAL LEATHER PRIDE NIGHT AUCTION

Saturday, June 14th, 2003

NEW YORK, NY March 17--The 20th annual Leather Pride Night Auction will take place on Saturday, June 14th, 2003. Doors open at 7:30 PM. Auction and festivities continue until 12:00 Midnight at The Puck Building, 295 Lafayette Street (at Houston Street, one block east of Broadway). This space is wheelchair accessible.

Jo Arnone, LPN's veteran auctioneer, will preside over hundreds of items being auctioned, including leather and latex fetish clothing, unique toys and equipment, art and Broadway theater tickets, and much more. Leather Pride Night is sponsored by twelve NYC s/m-leather- fetish organizations: DefendersNY, Gay Male S/M Activists, Imperial Court of NY, Iron Guard BC, Lesbian Sex Mafia, MetrobearsNY, NY Panthers LC, NY Renegades, Pariah's MC, Promethean Guard, Society Nocturnus of Gotham, and The Eulenspiegel Society and many committed individuals.

In 2002, Leather Pride Night donated $15,100 to five local and national charities. This year, Leather Pride Night will donate the 2003 Auction proceeds to: the Heritage of Pride (HOP), the NYC AIDS Monument Committee, the Pride Center of New Jersey, the Foundation for Research on Sexually Transmitted Disease (FROST'D), Teens Prepared for Life (TPL) and the New York City Gay and Lesbian Anti- Violence Project (AVP).

Tickets for Leather Pride Night are $15 in advance, and $20 at the door. Paypal payment is available at the LPN website www.leatherpridenight.org. Tickets can also be obtained at any of the sponsoring organizations, as well as the following supporting commercial venues: David Samuel Menkes Custom Leatherwear, Purple Passion / DV8, London, Paddles, The Leather Man, The Noose, Submit, El Mirage, Le Chateau Exotique and Toys in Babeland.

Leather Pride Night is part of a month of fabulous leather and fetish oriented events in New York City. On June 14, after the Leather Pride Night festivities, TES will hold its Annual Leather Pride Night Party at Paddles, 250 W 26 St 12am - 5am. Discounted entry to LPN ticket stub holders and members of other SM/Leather organization. This is their biggest play party of the year. Also that night, The Lesbian Sex Mafia (LSM) is hosting an all woman BDSM Play Party, following LPN, Midnight to 4 AM.

On Sunday June 15, 2003, The Lesbian Sex Mafia is hosting a Leather Community Event from 2 PM until 11 PM, which will include a meet and greet, play areas and demos. For more information and location:

www.Lesbiansexmafia.org or call 212-726-3844. On Sunday, June 22nd, GMSMA presents the FOLSOM STREET EAST VII, an s/m-leather-fetish block party on West 13th Street. Over 10, 000 leather men and women cap off Leather Pride Weekend with the largest outdoor festival of its kind on the East Coast.

The Leather Pride Night Committee is dedicated to promoting freedom of sexual
self-expression, and actively works to improve the image and understanding of
S/m and fetish lifestyles.

The Leather Pride Night Committee meets on the first Thursday of the month at 8:00PM at the LGBT Center, 208 West 13th Street.

3249. Columbus Tx Houston-Hunks presents--27TH SAN FRANCISCO INTERNATIONAL LESBIAN & GAY FILM FESTIVAL

27TH SAN FRANCISCO INTERNATIONAL LESBIAN & GAY FILM FESTIVAL

OiA Newswire

The San Francisco International Lesbian & Gay Film Festival, the world's largest and oldest LGBT film festival, returns for its 27th edition, which runs June 12-29, 2003 at the Castro Theatre and Herbst Theatre. This year, the Festival will screen 77 feature films and 194 short films from 32 countries.

The Festival opens on June 12 at the historic Castro Theatre with a screening of DIE MOMMIE DIE, the newest camp spectacle from the mind of Charles Busch (PSYCHO BEACH PARTY). Busch plays bitter fading chanteuse Angela Arden, whose children are plotting a murderous revenge. The film also stars Jason Priestley, Natasha Lyonne and Frances Conroy of "Six Feet Under." Busch, Priestly and Conroy are expected to attend the screening, which will be followed by the Opening Night Gala at the newly restored San Francisco Ferry Building.

Eighteen days and over 250 films later, the Festival will close on June 29th, the day of San Francisco's pride parade and celebration, with Alex Steyermark's hard-rocking PREY FOR ROCK & ROLL starring Gina Gershon (BOUND), Drea De Matteo ("The Sopranos") and Lori Petty (A LEAGUE OF THEIR OWN, TANK GIRL). Based on Bay Area rocker Cheri Lovedog's autobiographical play of the same name, Gershon plays a struggling musician ready to give it all up as she approaches the age of 40 until one last chance comes her way. After the screening at the Castro Theatre, step outside and into the night for a Closing Night Party under the stars.

Two widely-acclaimed new international films will receive Special Presentations during the Festival. On June 17, the Festival presents the French detective thriller GENDER BIAS, about a beautiful young transsexual with a troubled past who gets entangled with a local police chief. Robinson Stevenin won the Cesar Award for Best Actor at the "French Oscars," for his performance as transsexual Bo. From Argentina, the Festival is proud to present SUDDENLY on June 25. Compared to the early works of Jim Jarmusch and Fassbinder, SUDDENLY tracks two punk dykes named Mao and Lenin who kidnap a lonely salesgirl and give her the adventure of a lifetime. In addition to worldwide acclaim, first-time director Diego Lerman's SUDDENLY has won the Silver Leopard award at the prestigious Locarno International Film Festival and the top prize at the recent Istanbul Film Festival.

Maverick gay directors/producers Fenton Bailey and Randy Barbato will be presented with the 2003 Frameline Award recognizing their significant

contributions to gay and lesbian media arts at a special screening of their newest film, the feature film adaptation of PARTY MONSTER, starring Macaulay Culkin and Seth Green. Bailey and Barbato will also sit down for an interview with New York Times Critic-at-Large Margo Jefferson at a Close-Up/TimesTalks event at the San Francisco Public Library on June 25. The Festival will also screen two new documentaries from Bailey and Barbato's World of Wonder Productions: SCHOOL'S OUT: THE LIFE OF A GAY HIGH SCHOOL IN TEXAS and DARK ROOTS: THE UNAUTHORIZED ANNA NICOLE.

Queer youth are coming of age, as seen in a dozen new features and plenty of shorts. The makers of THE ADVENUTURES OF FELIX return with a teenage ice skater armed with a video camera in MY LIFE ON ICE. Kids also take up cameras in Darren Stein's nostalgic retro-documentary PUT THE CAMERA ON ME, a collection of outrageous home movies directed by the artist as a young gay boy in the LA suburbs in the mid-80s. The crushes of Chinese teen girls are shared in BLUE GATE CROSSING, and see the escapades of a very queer school in Canada's SECONDARY HIGH. From France, YOU'LL GET OVER IT captures the coming out of a typical high school boy, an 11 year-old boy copes with the discovery of his older brother's HIV positive status in CLOSE TO LEO, a young woman meets an exciting new friend and spirals downward to the brink of insanity in LAURA'S PARADISE. Documentaries capture queer teens in Iceland (STRAIGHT OUT) and Texas (SCHOOL'S OUT), as well as teens raised by QUEER PARENTS. The pain and pleasures of coming out and growing up are explored in the shorts programs Class Queers and Growing Pains, and meet the queer hip hop youth of the shorts program HomoHop.

With AIDS continuing to ravage the globe, the Festival recognizes the rise in filmmaking documenting the ever-changing culture of AIDS. Two new narrative features address how friends and family cope with the inevitable death of a loved one in Thom Fitzgerald's THE EVENT, starring Olympia Dukakis and Parker Posey, and Tony Ayres' WALKING ON WATER. Rory Kennedy's documentary PANDEMIC: FACING AIDS examines how AIDS is being fought around the world, and FIGHT BACK, FIGHT AIDS charts 15 years of ACT UP. The Festival will co-present a community forum in conjunction with a screening of the new documentary THE GIFT, which attempts to understand the controversial phenomenon of "bug chasing," actively trying to acquire the AIDS virus. And, the Festival is proud to look back with 10th anniversary screenings of the Academy Award-winning PHILADELPHIA and the Emmy Award-winning AND THE BAND PLAYED ON.

Queer history continues to be revealed, as seen in the collection of gay biographies at this year's Festival. Documentaries will share the diverse lives of Gore Vidal (THE EDUCATION OF GORE VIDAL), poet Audre Lorde (THE EDGE OF EACH OTHER'S BATTLES), civil rights activist Bayard Rustin (BROTHER OUTSIDER), director Luchino Visconti (THE LIFE AND TIMES OF LUCHINO VISCONTI), and lesbian activists Del Martin and Phyllis Lyon (NO SECRET ANYMORE). Two real-life murderers get the bio-pic treatment in THE CHILD I NEVER WAS and PARTY MONSTER. The shorts program Since You've Been Gone shares the stories of several members of the community who have recently passed away, including Kris Kovick and a tribute to Gwen Araujo.

Current events have led to an increase in the representation of Arab and Middle Eastern images in the Festival. Banned in Iran, an androgynous woman becomes an iconic voice in DAUGHTERS OF THE SUN. A sociology student discovers a history of homosexuality in his region as he comes out in THE PATH TO LOVE. Documentary filmmaker Ellen Flanders has just returned from the Middle East and will present her newest work-in-progress and a discussion of LGBT culture in the region in the QUEER DOCUMENTARY IN WARTIME: A NEW VIEW OF THE ISRAELI PALESTINIAN CRISIS. Renowned gay Israeli director Eytan Fox delivers the box office hit YOSSI & JAGGER, a touching romance set in the Israeli army.

Transgender images continue to be a revolutionary theme in queer cinema. In tense yet humorous FLYING WITH ONE WING, the first Sri Lankan film with a transgender character, a mechanic hides his female origins from his wife. A young transsexual gets entangled with a police investigator in the award-winning French thriller GENDER BIAS. The stories of two transsexuals, one FTM and one MTF, are documented in THE OPPOSITE SEX: JAMIE'S STORY and THE OPPOSITE SEX: RENE'S STORY. The empowering queer history of a small Mexican town is rediscovered in JUCITAN QUEER PARADISE. See the diversity of trans culture in two shorts programs, Intersex Explorations and Reel Transformations. And, don't miss the sex change vending machines in the surreal and animated PIKI & POKO: ADVENTURES IN STARLAND.

The Festival continues to highlight up-and-coming filmmakers by screening over 100 short films each year. In addition to popular shorts collections Fun in Boy's Shorts and Fun in Girl's Shorts, programs this year include a look at queer hip hop in Homohop, South Asian LGBT culture in Bhangra By The Bay, new shorts from Frameline Distribution in Shades of Pink, the role of music in queer lives in Sing Out, animals and the homos who love them in Animal Attraction, and the annual collection of the best new international shorts, Worldly Affairs.

3250. Columbus Tx Houston-Hunks presents--Ex-councillor alleges gay crime errors

Ex-councillor alleges gay crime errors
by Phil Mills

Police are providing a "hit and miss" service to the gay community, it was claimed today.

Tens of thousands of pounds have been invested in tackling homophobic crime but former councillor Nimrod Ping said: "When gays or lesbians report incidents, they don't know whether they will be dealt with properly or badly."

Mr Ping, an architect and former chairman of the Brighton and Hove City Council police and public safety committee, said violence against gays was a major problem and it was essential police responded in a proper and uniform way.

He said: "It is getting ridiculous and dangerous."

Mr Ping complained he had not been invited to a meeting at Brighton police station tonight to discuss improving communications between the force and gay groups.

He said: "I was a councillor throughout the Nineties and am very familiar with the issues. It appears the police don't know which way to turn and are making lots of errors." He said he asked Chief Superintendent Paul Curtis, Brighton and Hove police commander, for an invitation, sent emails and messages to the station but was "told to get lost".

Mr Ping also thought The Argus should be invited to report on the meeting.

Mr Curtis today invited Mr Ping to attend the meeting but declined a request from The Argus. He said: "The meeting is designed as a first step to improve communication channels.

"I wrote to 40 lesbian, gay, bisexual and transgender organisations and invited representatives to the meeting. We could not invite individuals because where do you draw the line?

Mr Curtis said Brighton and Hove had broken new ground with the launch of the Anti Victimisation Initiative and the Brighton and Hove police Anti Victimisation Unit at the John Street station.

He said: "The AVI has given a much more meaningful and consistent service to victims of homophobic crime.

"The service we provide has improved but we urge anyone who believes they have been treated badly to tell us. That goes for anyone in the community."

One man supporting tonight's meeting is Alan Bond, a member of the Lesbian, Gay, Bisexual and Transgender community safety forum.

He said: "The idea is for us to report back to our groups and to reach down to the gay community and improve communications with the police."

Mr Bond said it would have been ludicrous to invite individuals: "This is the best mechanism to keep lines of communication open."

3251. Columbus Tx Houston-Hunks presents--Gay man re-elected president of viatical association

Gay man re-elected president of viatical association

Orlando, FL (May 20, 2003) - M. Bryan Freeman has been re-elected president of the Viatical and Life Settlement Association of America (VLSAA). The election took place May 16 at a board meeting following the group's semi-annual general meeting in Savannah, Ga.

Freeman, who is the founder of Benefits America NA, Inc., an Atlanta-based life settlement broker that does business nationally, is beginning the second year of a two-year term on the VLSAA board.

"This year we had more interest than ever before in board-level service, so it is quite a testament to Bryan's ongoing leadership that his fellow board members - new and old - wanted him to continue to serve as president," says, Doug Head, executive director of the VLSAA. "Bryan has both a wealth of creative ideas and strong skills as a coalition builder, so his leadership is as dynamic as it is effective. Add to that the fact that Bryan has an unmatched knowledge of the life insurance and life settlement industries, and you can see why his colleagues appreciate his experience and his ideals."

In addition to electing board members (and the board, in turn, electing its officers), Head notes the Savannah meeting was particularly productive in regards to emerging projects. "Our members committed to develop a new Statement of Principles on responsible regulation and a Best Practices initiative," he says, noting members also recommitted to some previous initiatives.

"Along with setting new standards," Head says, "our members recommitted to our Standards of Fair Disclosure (of Risks Involved in Purchasing a Viatical or Life Settlement) and our Model Anti-Fraud Plan. In reaffirming our fight against fraud, President Freeman and our other leaders wanted to emphasize that we will not tolerate fraud - not on the part of consumers, nor from the insurance industry, nor from within our own industry."

Freeman, who says Benefits America is the largest and oldest gay-owned viatical and life settlement company in the country, has been a licensed life insurance agent for 24 years, received his "Series 7" securities license in 1984. He has been active in efforts to shape responsible regulation of the relatively new and often-controversial settlement industry. Last year, Freeman helped author, refine and gain passage of Georgia's first viatical and life settlement legislation. That legislation was signed by Georgia's governor the same week Freeman was first elected VLSAA president (in May 2002).

The VLSAA is an Orlando, FL-based non-profit trade association founded in 1994 to serve as a national resource center, providing information about viatical and life settlements. A viatical settlement allows someone with a chronic or life-threatening illness to sell their life insurance for a portion of its face value while they are still living. Life Settlements offer a similar option for seniors who may or may not face significant health challenges. The VLSAA, which currently has 28 member companies, is the industry's largest and oldest trade and professional organization.

You must admit it's a quirky set up ...

On the one hand, employers can't ask sexual orientation before they hire,
and they can't stop an employee from announcing his orientation once he
is hired, and then anyone who gets terminated can claim that they
were terminated because of their orientation.

Then there's a fine line between announcing one's
orientation and harrassing someone.

It isn't just an "appliance operator" situation. Consider what you do
if someone you are in a QSO suggests you shift to frequency NNN.
Do you set your rig's digital readout to an offset from NNN on the
assumption that NNN is the center frequency of an SSB signal or
do you set your readout to NNN and find you are exactly where
the other ham is expected to be?

The point is that the design and execution of today's transcievers
consider carrier frequency, not center frequency of an SSB signal.

I suppose the ARRL will simply not that the actual carrier frequency
for these new 5 mhz channels are NNN, YYY, ZZZ, etc and we'll all
then use that as opposed to worrying what the FCC regs actually
stated.

I haven't read the new rules, so I don't know what the actual mode(s)
allowed for these channels are, thus my SSB example may not actually be
applicable.

> > As long as we get our signals in the proper
> > place in the radio spectrum, it doesn't matter what we call it.

On this one, I agree with Dick. This is (IMHO) a practical issue of
writting
rules that take into account the accepted practice for a service. Indeed,
the
rules could easily have stated both a center freq and a carrier freq for
each
channel (again, assuming SSB is allowed mode).

Cheers,
Bill K2UNK

Agree completely. In fact, both the center freq AND the suppressed carrier
frequency could easily have been in the regs.

Cheers,
Bill K2UNK

With these new channels, I guess most of us will "snip the diode"
in our rigs to allow transmisison on frequencies not otherwise programed
as being amateur bands. I'll have to dig out my TS-690 manual which
I recall stated how to do it.

Cheers,

Maybe not that bad, but it does reflect a beurocratic
attitude towards regs that seems to ignore the practical and
pragmatic. A few additional words and all would have been crystal
clear.

What is vague about saying that the center of the occupied
band is 5xxx. If one cannot figure out where to put the
suppressed carrier to get the center of the occupied band at
5xxx, one has no business operating that transmitter.

The carrier offset depends on the actual signal bandwidth for
the SSB signal produced by a specific rig. Just because 2.8 is
pretty common, doesn't mean all rigs have a 2.8 bandwidth
implemented.

It seems to me the only way to assure that my carrier and yours
are in sync is if we specifically agree to a 1.4KHz center frequency as
an assumption. My signal may not actually be 2.8 wide and the
center frequency of my signal might actually be only 1.3 or less
up from my suppressed carrier freq.

Ultimately, to be sure we are able to make quick contacts for
emergency comms, we'll likly all agree via the ARRL that the
supp. carrier frequency for the channels is a specific frequency
(offset 1.4 from the FCC rules specified center freq.)

Cheers,
Bill K2UNK

Hi all,

I have several RS HTX 202s that I have been collecting over
the years and now want to get rid of a few.

Each is perfect, not a scratch and operationally a 10.
Comes with original box, manual, decent battery,
charger etc. Pretty much one of the last real FM
HTs that were made.

$75 includes shipping, I prefer USPS Money Order.

Thanks for reading the post and let me know if anyone wants
pics.

The vagueness is due to the custom of specifying a frequency by where the supressed carrier would fall (had it not been supressed). That's not what the FCC did but that's how plenty of people will interpret it - because they won't read it the same way as we do.

Assuming this assertion is valid, then conservatively speaking,
85% of today's ham radio operators have no business operating
a transmitter. I offer as proof my posting about the stolen toilet
paper at the Dayton Hamfest. If hams assume that toilet paper
in the Dayton rest rooms is there for the taking and just another
perceived "freebie," then that is clear example of the mentality in
today's amateur radio rank and file. Pretty scary, isn't it?

NO!
Once your existing files are 'cleaned' of past garbage your filters should take care of most future garbage (if you set up your
filters well).

Here are some SUBJECT keywords I use (I'd like to see other users choices as well):

houston-hunk
jesus
god
shit
fuck
politic
crap
israel
france
psycho
rights

... you get the idea!

Odds are they won't even know the channels exist...but seriously,
the issue goes to what constitutes good regulations as to the regs
being understandable, clear and concise.

Cheers,
Bill K2UNK

There are inherent problems with this choice of filters for subject lines..
at the very least with the words france and rights, as there can be, and has
been, much legitimate on topic discussion of subjects containing those
words.

Just my -W-23 for the day.

That obviously depends on the width of the channel. At 2.8 khz of course you're correct. At 6 khz, no. Both SSSC sidebands, most digital modes, and the CW carrier would all be covered, and there would of course be empty space within the channel depending on the mode. So, by restricting the mode to 2.8 khz, we're forced to the commercial definition of "channel". The root of the problem, and AFAIC it is a problem. Any change which causes me that much discomfiture is a problem. :-) And I'll say it one more time, I'm mostly concerned that many hams will wander into violation of the rules simply because this is a totally new way to define operating frequency within the ARS.

> Even though the channel doesn't

I think you have just given the expanded and eminently clear version of what Phil had to say. :-)

Of course none of this was an issue until the instant case which just happens to be the original amateur radio assignment (at least in the US) where FCC has assigned discrete frequency channels, as far as I'm aware

And again, it's not me that needs to be concerned-so long as I've been informed that, with these assignments only, I need to be concerned with FCC's commercial definition of "assigned frequency" and how it differs from 100 years of amateur radio practice. I'm rather certain that a fairly large percentage of hams will miss that important piece of information.

Dick

Ignoring convention and failing to clarify new rules when they
radically depart from 100 years of that convention would seem to be poor
administration, too.

ABC Says Saddam Stole Billions From U.N.

As Saddam Hussein was picking the U.N.'s pockets of billions of dollars, officials simply looked the other way, an investigation by ABC News has revealed.

An international investigation conducted by ABCNews uncovered widespread corruption in the U.N. Oil-for-Food Program involving from $2 billion to $3 billion in bribes and kickbacks from the program, massive graft U.N. officials told ABCNews they were powerless to stop. "Everybody knew it, and those who were in a position to do something about it were not doing anything," said Benon Sevan, the executive director of the Office of Iraq Program. When asked if that included him, Sevan told the network, "I have no power."

The program was intended to pay for food and medication to the Iraqi people from oil revenues, after the U.N.-imposed sanctions on Saddam to prevent him from selling Iraqi oil in punishment for his invasion of Kuwait in 1990. According to ABC, all money from the sale of oil was supposed to go into U.N. bank accounts in New York to buy food and humanitarian supplies.

The ABCNews investigation revealed that British businessman Swara Khadir found that when his company sought contracts to sell Iraqi oil, "We discovered that we had to bribe a lot of people, and because it was Iraqi oil we were talking about, it was bribing top Saddam officials."

While Khadir refused to go along [with the bribes], he kept the Iraqi documents instructing him in which Swiss and Jordanian bank accounts the bribe money should be deposited.

"They made no show of concealing it," he said, "because the U.N. was just turning a blind eye to it."

In another case, a Russian oil dealer actually complained to the United Nations that Saddam's son Uday took a $60,000 bribe but never came through with the oil contracts. The money was deposited in a bank in Amman, Jordan, in a private account for Uday, according to documents submitted to the United Nations last year but, ABC says, were never acted on by the Security Council.

"Of course it troubled me," said Sevan. "What do you think, I'm what you call a 'dodo' sitting here, what do you call, cold-blooded? Of course it bothers me."

>
> What about beams? Can I concentrate my effective radiated
> power in one direction,

Yes, so long as it does not exceed 50W in that direction. In other words you can have a 10W transmitter, a transmission line with 3dB of loss, and a directional antenna with 10dB of gain, to give you 50W erp off the front of the beam. (You CANNOT use that antenna/feedline system with a 100W transmitter, however, since your erp in that case would be 500W.)

Good luck on this one now,

de Hans, DL1/K0HB
Dusseldorf

3297. More from Houston-Hunks--Gephardt and Cheney both Gay

Chrissy Gephardt, the 30-year-old daughter of Democratic presidential candidate Dick Gephardt, feared that she would lose her parents' love and hurt her father's political career when she told them two years ago that she was gay.

In an interview with People magazine, Chrissy Gephardt described how difficult it was for her to tell them that her four-year marriage to Marc Leibole, a favorite of her parents, was over and to discuss her sexual orientation.

"I was basically saying, 'I'm not who you thought I was, and now when you have lunch with your friends, you can't say 'her husband,' but 'her lesbian partner,"' she said in describing the teary conversation.

Dick Gephardt and his wife, Jane, immediately reassured their daughter of their unconditional love. The Missouri lawmaker, who stepped down last year as House Minority leader to focus on his White House bid, said Chrissy and her partner, Amy Loder, are "a great pair, and we are happy for them."

Chrissy Gephardt recently left her Washington, D.C.-job counseling abused and mentally ill women to work on her father's campaign. She is not the only gay child of a 2004 candidate; Mary Cheney, daughter of Vice President Dick Cheney, also is a lesbian.

Anti-Gay Group Boosted by Scalia
Monday, 19 May 2003
PHILADELPHIA -- U.S. Supreme Court Justice Antonin Scalia attended a $150-per-plate dinner Tuesday night in Philadelphia hosted by the Urban Family Council, a group whose founder is suing the city in an attempt to overturn its same-sex domestic partnership law.

Antonin Scalia
The UFC said the dinner was not a fundraiser and that the ticket price was meant only to cover the cost of the banquet, held in honor of Cardinal Anthony Bevilacqua, who leads the Roman Catholic Archdiocese of Philadelphia.

"It's nice to . . . have a friend like Justice Scalia."

The news agency notes it is illegal for federal judges to raise money for political, charitable or civic organizations, and that they are prohibited by law to use the prestige of their office for that purpose. There is some question as to whether Scalia violated the letter and intent of that law by attending the event.

"We just thought, 'What better way to honor Cardinal Bevilacqua than to have a sitting Supreme Court justice up to speak?"' said UFC founder and anti-gay activist William Devlin. "It's nice to be able to say you have a friend like Justice Scalia."

Devlin is suing to overturn a Philadelphia registry that grants same-sex couples the right to register as "life partners." City officials said the law's primary purpose is to allow the gay partners of metropolitan employees to receive health benefits.

A Pennsylvania appeals court sided with Devlin last year, saying the city had intruded on the state's power to define marriage. The city appealed to the state Supreme Court, which hasn't yet indicated whether it will take the case.

On its Web site, the Urban Family Council condemns homosexuality as an immoral lifestyle choice, not a genetic predisposition, and encourages self-identified gay men and women to seek help in "becoming straight."

Age of gay consent clears first hurdle
May 22, 2003

THE Carr Government's attempt to lower the age of consent for homosexual males in NSW to 16 years has cleared its first hurdle easily.

A conscience vote of MPs in the NSW Legislative Assembly, or lower house, passed the bill to bring the age of consent for homosexual males into line with the rest of the community by 54 votes to 32 last night.

Four MPs were absent for the vote while one MP, Labor's John Bartlett abstained.

The bill was passed after including an amendment to ensure the new laws would not be retrospective.

It now moves to the upper house where MPs agreed the result will be closer.

Seattle Men in Leather Gearing up for Equinox IV - A Leathermen's Weekend

It is with great excitement and anticipation that Seattle Men in Leather announces the rebirth of a club tradition with the return of its annual Equinox Run Weekend next September. Equinox IV - a Leathermen's Weekend is set to take place September 5-7, 2003 at a private camp near Olympia that SML has rented with 160 secluded and wooded acres. Great food, drink, heated cabins, tent sites, play cabins and more await you. Equinox will be a weekend that fosters attitudes of camaraderie and community in a spirit of pride, fun and unity within the men's leather, levi and uniform lifestyles. Our theme is "Renewing the Tribe", so the emphasis will be on building friendships and renewing old ties. There will be the Tribal Instinct Educational Workshops, Tribal Games Competition, Tribal Survivor Game Show competitions, hiking, swimming, and a great deal of fun and fellowship.

And the group's leaders are also promising plenty of opportunities for more private recreational interests as well. Nighttime gatherings around the campfire promote the new friendships and camaraderie that develops at Runs like this one. The weekend, for men only, is designed to entertain, introduce, and renew friendships and relationships. In fact, the theme for this run is entitled, "Renewing the Tribe". SML's educational arm known as Tribal Instincts will be hosting a number of sessions about the leather lifestyle ranging from forums for beginners to more advanced sessions for the experienced wanting to learn more. Also, afternoon and evening social hours are scheduled, along with entertainment and orchestrated events and competitions to keep the most enthusiastic leather men and boys busy.

The weekend following Labor Day generally means still nice warm mild weather for the Pacific Northwest, and SML intends to take advantage of that by hosting this largely, outdoor 3 day event. You can stay in the heated cabins or you can pitch your own tent. Meals will be prepared by the camp staff and are enjoyed family style as a group. The camp is fully equipped for tennis; basketball, swimming, sunbathing, hiking and boating and we will be setting up some play spaces for your use. There are many activities, games, workshops and such planned for the weekend or you can simply sit back, relax and socialize. Early registration is encouraged, as space is limited to two hundred leather men.

Registration fees received between May 1st thru August 15th cost only $150 ($125 for SML members), and after August 15th, goes up to $175 ($150 for SML members). Registration covers entrance to the camp, 5 meals and snacks, all facilities including cabin or camping, and hosted social events. Participation is limited to 200 men, and pets and motor homes are not

permitted. For more information and registration forms, you may check out the Equinox IV website at http://www.seattlemeninleather.org/equinox/. Equinox applications are also available at the Cuff, the Eagle, Club Z, and many other retail outlets in Seattle and through out the Pacific Northwest. Specific questions regarding the Equinox IV Run can be address at: Equinox@seattlemeninleather.org.

Seattle Men in Leather is proud to bring you a Equinox IV - A Leathermen's Weekend sponsored by: Miller Brewing Company and Columbia Distributors. We hope that you will join us this September as we "Renew the Tribe".

Seattle Men in Leather founded in 1989, is a nonprofit, gay men's social group promoting with power and pride the Seattle's Men's Leather Community. With over 260 members, SML host's frequent social events including monthly brunches, dress code socials, potlucks, dinners, pool parties and other events throughout the year that fosters brotherhood for those of like interest in leather pride. As a community service, SML also educates its members by sponsoring educational forums in areas of mutual interest such as BDSM and the promotion of safer sex through its monthly Tribal Instincts Workshops. These events are open to everyone in the Seattle men's leather community, including the inexperienced that desire to broaden their skills in such areas. Each year, the members of SML commit themselves to hosting several fundraisers and elect a socially responsive organization, as the beneficiary for its fundraising, and the Lambert House GLBTQ Youth Center has been SML's choice for six years now. In the last three years, SML has raised over $12,000 for Lambert House. For more information on Seattle Men in Leather, please check out our website at http://www.seattlemeninleather.org

Netherlands: HIV is up among gay couples
Gus Cairns, Positive Nation
Wednesday, May 21, 2003 / 04:03 PM

The vast majority of HIV infections in the Netherlands among gay men are occurring between partners in long-term relationships rather than via casual sex, a Dutch epidemiologist has found.

The safer-sex message seems to have endured better in the Netherlands than in the United Kingdom. Whereas 45 percent of British gay men reported having at least one experience of unprotected sex last year, in Holland the figure was only 25 percent.

However, the prevention messages were aimed squarely at encouraging condom use in casual sex. As a result, the vast majority of new HIV cases among gay men in Amsterdam are now occurring within steady, committed relationships.

Dr. Maria Xiridou of the Amsterdam Municipal Health Service found that no less than 86 percent of new HIV infections in the city were occurring within long-term relationships.

"Risk-taking with steady partners remains at high levels, and infection from steady partners is now the dominant mode of transmission," she told the Reuters Health press agency.

She added: "Different prevention measures may have to be developed in targeting high-risk behavior with each type of partner, such as counseling HIV-positive men and their steady partners." She also advocated that more attention be given to HIV testing for HIV-negative men who are in monogamous relationships with positive partners.

BUENOS AIRES, May 20 (AFP) - Buenos Aires on Monday rubber-stamped legislation allowing gay couples to register, becoming the first city in Latin
America to do so.
Same-sex couples who can prove they have lived together for at least two years may share labor and social security benefits under the legislation.
Heterosexual couples -- who previously had to prove five years' cohabitation -- as well as gay couples, will benefit from the new law which does not, however, establish inheritance or automatic pension rights.
The Civil Registry estimates 5,000 gay couples may benefit from the law.
The measure was signed into law by city mayor Anibal Ibarra of the center-left Frente Grande party, after provoking intense public debate in the
predominantly Roman Catholic country.
The civil union law was approved last December in the municipal legislature, when some 29 legislators voted in favor and 10 against.
President of the Argentine Homosexual Community (CHA) Cesar Cigliutti applauded the measure as a victory for same-sex couples and said he now intends to campaign for its introduction at national level.

Gay Iraqi blogger resurfaces, writes again
Christopher Lisotta, Gay.com / PlanetOut.com Network
Wednesday, May 21, 2003 / 03:59 PM
Salam Pax, the anonymous twentysomething Iraqi Internet writer whose blog attracted readers interested in learning about life under the government of Saddam Hussein, is back online after remaining silent during the worst days of the war.

"Let me tell you one thing first," Salam Pax wrote in his first posting since the fall of the Saddam government. "War sucks big time. Don't let yourself ever be talked into having one waged in the name of your freedom. Somehow when the bombs start dropping or you hear the sound of machine guns at the end of your street you don't think about your 'imminent liberation' anymore."

The writer, a 28- or 29-year-old gay architect who spent part of his life in Europe, went offline on March 24 after power went down in Iraq's capital city, and the silence heightened anxiety among readers about his safety. For months Salam Pax had written about the buildup to the war and the first days of coalition bombing.

Fellow blogger Diana Moon received a call from Salam Pax's cousin on May 6, telling her to call a satellite phone number. "Salam sounds fine," she wrote on May 7, which coincided with his first installments since March. "We discussed as many things as we could in a short amount of time."

A secular Muslim, Salam Pax (a pseudonym that means peace in Arabic and Latin) gained readers from around the world as he ridiculed the Saddam Hussein regime while also criticizing the Bush administration's approach to the dictator. Some readers of his blog have speculated Salam Pax was a hoax, since he wouldn't include his phone number or other personal information about himself. But his detailed accounts of life in Baghdad convinced most he was legitimately writing about the besieged country from the inside.

"American civil administration in Iraq is having a shortage of bright ideas," he wrote in his May 9 installment. "I keep wondering what happened to the months of 'preparation' for a 'post-Saddam' Iraq. What's with the juggling of people and ideas about how to form that 'interim government'? Why does it feel like they are using the (let's-try-this-let's-try-that) strategy? Trial and error on a whole country?"

Despite his frustration with the chaos of the coalition takeover of Iraq, Salam Pax wrote he was glad to see Saddam Hussein out of power.

"The truth is, if it weren't for intervention this would never have happened," he wrote. "When we were watching the Saddam statue being pulled down, one of my aunts was saying that she never thought she would see this day during her lifetime."

GLMA Protests Government Censorship of LGBT Health Research

SAN FRANCISCO ☐ The Gay and Lesbian Medical Association today announced that it will send a letter to President George W. Bush, Health and Human Services Secretary Tommy Thompson, and the Directors of the National Institutes of Health and the Centers for Disease Control and Prevention protesting widespread reports of censorship and monitoring of lesbian, gay, bisexual, and transgendered health research by govenrment funding agencies. Recent reports in The New York Times and prestigious journals such as Science have underscored the seriousness and extent of the problem. Staff members within the Department of Health and Human Services have been cautioning prospective grant applicants that e-mails and other communications are being screened for sensitive keywords such as "commercial sex workers," "needle exchange," "men having sex with men," "prostitutes," "transgender," and "harm reduction." Furthermore, some program staff members have been reprimanded for the use of such terms, which have been called "inappropriate language."

GLMA has created a letter to which health care providers, researchers, and teachers may sign on through the GLMA website at www.glma.org or through a direct link at http://www.gayhealth.com/templates/0/glama/letter.html .

"We urge everyone in health care to sign on to this letter," said GLMA President, Kenneth Haller, MD. "Over the coming days we hope to gather over one thousand signatures to deliver to the Administration. Information provided by sources such as the Centers for Disease Control and Prevention has been trusted in the past because it has been based upon unbiased, scientific studies. The scientific credibility of even the CDC under the current Administration has begun to become suspect. For example, an online fact sheet on condoms and sexually transmitted disease prevention was pulled from the Centers for Disease control website in July 2001."

Haller concluded, "We cannot allow the integrity of health research and the health of LGBT persons to become victims of political ideology."

When Senator Rick Santorum, a Pennsylvania Republican, delivered an ugly attack on gay Americans last month, President George W. Bush rushed to defend him. The president called Santorum, who had just equated homosexuality with polygamy and incest, "an inclusive man." At the same time, the Bush administration has been appointing federal judges who are hostile to equal rights for gay men and lesbians. Two nominees with troubling records - one who argues in support of laws against gay sex, another who has spoken out against "queers" - are now headed to hearings in the Senate. Every senator who opposes discrimination should be prepared to ask them hard questions, and to vote against one, and possibly both.

Bill Pryor, the Alabama attorney general, is a nominee for the 11th U.S. Circuit Court of Appeals in Atlanta. He submitted a brief to the Supreme Court this year in defense of a Texas law that criminalizes sexual relations between gays. The brief puts sexual relations between gays in the same category as necrophilia, bestiality and pedophilia, and argues that states have the right to punish as criminals people who engage in gay sex. Pryor's supporters say he was just doing his job, since Alabama has a similar law. But he had no legal duty to do so, and other states with such laws did not file briefs supporting Texas.

Claude Allen, who has been nominated to the 4th U.S. Circuit Court of Appeals in Richmond, Virginia, is an official in the federal Department of Health and Human Services. He made a name for himself in conservative circles as a spokesman for the 1984 re-election campaign of Senator Jesse Helms of North Carolina. During the campaign, Allen was quoted as saying that the Democratic opponent, James Hunt Jr., then governor, was vulnerable because of his links with "the queers." Allen's supporters insist that in his current job he has worked productively with gay and lesbian groups.

Pryor and Allen are only the latest examples of the enemies of gay rights whom conservative ideologues in the Bush White House are trying to impose on the courts. Senators of both parties should speak out against Pryor and question Allen closely about whether he has abandoned the offensive views he expressed at the start of his career. When Senator Rick Santorum, a Pennsylvania Republican, delivered an ugly attack on gay Americans last month, President George W. Bush rushed to defend him. denver council 2003
Candidates spar over gay-rights stance
By Ryan Morgan, Denver Post Staff Writer
The two women vying for the District 10 City Council seat are both working hard to secure votes in the gay community - and are in a nasty dispute over who is a stronger gay-rights supporter.

In the central Denver district that includes the Country Club and Capitol Hill neighborhoods, Caroline Schomp and Jeanne Robb have produced campaign literature that targets members of the gay community - and pledges to protect their interests.

Robb's website, for example, proclaims her support for Denver's anti-discrimination ordinances and domestic partner benefits, and says she is "committed to the continued work of making Denver a safe place for the gay, lesbian, bisexual and transgendered community to live, work and play."

Schomp's ads proclaim that she "will stand with the gay and lesbian community on the issues that are so critical. Prosecution of hate crimes. Support of same-sex adoptions ... partner benefits."

But Schomp says one of Robb's ads is "disingenuous, at best" in its claim that Robb helped to overturn a discriminatory zoning ordinance in 1989.

Robb, in turn, says she's a strong proponent of gay rights, and accuses Schomp of "harping on the past."

The dispute centers around a 1980s incarnation of the city's R-0 zoning, which allowed only married adults to share the same house.

The zoning ordinance forced many gay and lesbian couples - and heterosexual unmarried couples - who shared homes to sell after their neighbors reported them to the city.

In her campaign literature, Robb says she helped craft a compromise that eliminated the restrictive ordinance, a claim Schomp says is at odds with reality.

In 1989, following a lawsuit filed by an unmarried couple sharing the same home, the city decided to amend the ordinance in order to avoid losing a court battle.

Changing the law was a contentious issue, particularly for the gay community, whose members wanted the right to share a home, recalls Tea Schook, who first became politically active because of the zoning issue.

"If (neighbors) saw a gay couple, if they found out the couple wasn't married, they would turn them in," she said.

Schook remembers that Robb, who was president of the Cherry Creek Improvement Association, lobbied to keep the restrictive ordinance in place.

"I remember being very stunned by it," Schook said. "It felt very anti-gay to me."

Robb did oppose changing the zoning law, but says her position had nothing to do with opposition to gays.

"The real concern was, were we opening up neighborhoods that had been single-family residential to rooming houses?" she said. "Was that a legitimate concern? It sure felt like a legitimate concern. Was that the only concern? Probably not."

Robb said she brought forward a compromise that addressed the issues her neighborhood group was worried about.

U. of Scranton, other Jesuit schools create gay-support programs
By ERIC TUCKER
The Associated Press

PHILADELPHIA - Administrators at the University of Scranton have spent the last few years grappling with a dilemma familiar to many religious institutions.

They wanted to add more resources for gay and lesbian students, but they also needed to remain consistent with the school's Jesuit and Catholic ideals.

Now, the small college in northeast Pennsylvania is putting the finishing touches on a campus-wide support program for its homosexual students. Under the "Ally" program, scheduled to begin next fall, interested students, faculty and staff will be trained - though it's not clear by whom - to listen and sensitively respond to concerns and questions from gay and lesbian students.

"Our role will be to do all we can to minimize issues of discrimination and homophobia," said Vincent Carilli, the university's vice president for student affairs. "We're not going to be dealing with issues of advocacy."

The distinction is crucial for Scranton and other Roman Catholic schools that say they welcome gay students but, because of church policy, refuse to condone their lifestyles. Many Jesuit schools already have in place programs like "Ally" that are warmly accepted on campus, provided they don't advocate positions contrary to the church.

At Boston College, for instance, the former head of the student body met for nearly a year with the university president, William Leahy, about a group that would support homosexual students and openly discuss issues of sexual orientation. The program, "Allies," was formally approved last month with a mandate - "to advance understanding of issues, concerns and needs regarding sexual orientation" - nearly identical to the group at Scranton.

"We're trying to be true to our mission, and our mission is 2000 years of church teaching and 400 years of the Society of Jesus's existence," said Boston College spokesman Jack Dunn. "We're always trying to be respectful of that tradition, while addressing the relevant issues of the day."

Many "Ally" programs are initiated by students seeking to educate their peers about issues of homosexuality and don't contradict religious dogma.

Liz Pascal, who co-founded the "Ally" program at Marywood University, a small Jesuit school also located in Scranton, Pa., said she drew up an educational manual for prospective "allies." She estimates that a few hundred people have undergone the requisite training, which includes discussions of gay stereotypes and homophobic attitudes.

And despite some setbacks - one flyer advertising the program was tossed in the toilet, another was defaced with the words, "Not at our school" - Marywood students and administrators have been generally receptive, she said.

"It gives exposure to the hidden minority, to the invisible minority," Pascal said.

Another "Ally" program at St. Michael's College, in Burlington, Vt., has a mailing list of about 200 people and between six and 12 active members, said Linda Hollingdale. The group, which rose out of a similar gay support group formed in the 1980s, has hosted speakers such as the mother of Matthew Shephard and Danny Roberts, a gay cast member from MTV's "The Real World."

But conflicts do happen. Administrators at Loyola Marymount University in Los Angeles initially balked at student efforts to bring a transgender speaker to campus. And certain issues - same-sex unions in particular - have sparked fundamental disagreements.

"There may be topics or issues that make some folks uncomfortable, but there's an underlying belief that there's a space for it all," Hollingdale said.

Some students involved in "Ally" programs say it's an important step in addressing the needs of gay and lesbian students on religious campuses, but they hope to see broader acceptance.

"If that's what we get right now, it's fine," Pascal said. "Do I want to see that change in the future? Yeah, maybe in my lifetime. I'll work toward it."

Phelps targets gay scholarship winner
David Ryan Alexander, Gay.com / PlanetOut.com Network
Wednesday, May 21, 2003 / 03:55 PM
The graduation ceremony of Des Moines, Iowa's Lincoln High School will receive some unusual attention this year, as outspoken anti-gay Rev. Fred Phelps and members of his Westboro Baptist Church protest the graduation of a student who won a scholarship honoring Matthew Shepard.

The scholarship was created as a memorial to Shepard, a gay Wyoming college student who was tortured and killed in 1998. His funeral was also picketed by Phelps.

On May 31, Phelps plans to demonstrate outside Veterans Memorial Auditorium, where the graduation ceremony will take place, to protest this year's scholarship recipient, a gay student named Julius Carter.

"About 15 people will attend," Shirley Phelps-Roper, Phelps' daughter and spokesperson for the church, told the Gay.com/PlanetOut.com Network on Wednesday. "The plan is to stand peacefully on the sidewalk like we always do and remind these people that there is a God, that there is a day of judgment and that it's not OK to be gay."

Carter, who is on the football team, the school choir and is senior class president, said he was concerned that the demonstration would disrupt the ceremony for his fellow students. "The last thing I want to do is be someone who hinders their happiness," he told the Associated Press.

As for himself, he said, "I could care less what they say about me because I go through that all the time. By this happening, (Phelps) is going to see that no one in Iowa cares because the way he presents himself is wrong."

Lincoln High School's principal, Al Graziano, told the A.P. that he was dismayed when he read a press release announcing the scheduled protest and condemning Lincoln High School and the local school district. He said he feared protestors would take away from his students' graduation.

"It's their graduation day, and we want to keep the focus on the graduates. We plan to still have the best ceremony we can have," he said.

In response to comments about disrupting the ceremony for other students, Phelps-Roper replied, "They are involved in it -- everyone is involved right up to their eyeballs. If they're not standing up and saying, 'no no no,' then they're not doing their duty to their Lord God."

After graduation Carter, who has been openly gay for about two years, plans to attend the University of Iowa and study pre-medicine. His scholarship

will cover tuition, books and fees for four years.

AMHAM wrote already about the information which belongs on a QSL card.
That's what counts, not the graphics. Don't worry too much about it.
The main thing is that the information is readily readable.

That having said, photo collages seem to be appreciated by a number of
people. Have a look at e.g. the gallery of www.qsl.cz for examples.

I Find it easier to click on the message then click on the message menu at the top of Outlook. Go to BLOCK SENDER. Click on that. Outlook will then ask you if you want to delete all messages from this user. Click yes and your done. You will never again see a message from the idiot it question!

I then go to Tools, Message Rules, Blocked Senders List. Go to the Blocked Senders tab, and make sure both Mail and News is checked. Now your done!

Mike:

��� Gee I thought you couldn't call it "OSHKOSH"
anymore, without paying a copyright fee ($$) to
some Cheese Head Wi., small town mayor.

��� Well this is my Dayton 2003 trip report.

��� I thought the 2003 Dayton Hamvention was just fine.
Yea it rained all day Saturday (but it wasn't a torrential
down pour), but Thursday, Friday and Sunday where
great days for walking around outside, (and it was warm
enough (in the 60's) during Saturday's all day shower,
that with just a cheap rain poncho, and a umbrella, you
could get around ok.

��� I agree (like the last few years) their where more
BAD deals than great ones; each year the Good deals
are getting harder and harder to find.� But that's NOT
Dayton's fault, I think it's more a global state of the
economy thing.� With BRAND NEW loaded rigs selling
for under a thousand, sometimes at special discounted prices
even as low as $500 (with the exception of Icom's new
IC-8500 of course, what are they thinking (??)), it makes it
near impossible to get a decent buck for your old used rigs.
Should have stayed around till Sunday, I bet that TS-520S
sold in the $300 range.

��� I didn't buy anything on Thursday.
Friday afternoon we found these great deals:
1) Decibel Products VHF cavity (the one that looks like a small garbage
can with black round tuning knobs on top.� $15.00.
2) UHF 4 Cavity Band Pass tunable filters P/N 0183646X12,� I bought 4
of them, I know these are worth 20 times more than what I paid, at $5.00 each.

3) UHF 8 Cavity Duplexer P/N 0183644X03 $25.00
4) 3.0 - 30 Mhz. Used aluminum motorized Screw Driver Antenna $100.00
5) 2100 Ma hour NmHi Batteries (I get a kick how they keep going up a few
hundred Ma each year.� In 10 years they'll be up to 10 AMPS) $1.67 each.
I bought 12 of them.
6) Misc connectors, N to N jumpers and my favorite snap on RF chokes� $10.00.
On Rainy Saturday, we made our major purchase:
1) A HP-8752C Network Analyzer.� Been looking to get one of these babies
for the past 5 years, and been waiting for its price to drop from $27,000 to

less than $5000.&#65533; Well it did this year.&#65533; Paid only $3500.
On Sunday I bought all my new stuff from my favorite Hamvention radio dealer,
AES&#65533; (NO SALES TAX, FREE Shipping, NO radio Minimums & THE BEST
DAMN HAMVENTION $$ on new equipment):
1) Yaesu FT-857&#65533;&#65533; BRAND NEW $739
2) Yaesu FT-897&#65533;&#65533; BRAND NEW $829
3) Icom IC-2720H BRAND NEW $309
Since none of the BIG 3 radio dealers (AES, R&L, HRO) had their ROCK
BOTTOM PRICES posted up this year, I wasn't able to copy them all
down.&#65533; So as an example, (since I didn't buy one this year) I'm clueless
as to what they sold ICOM IC-706MKIIG's for.&#65533; The only discounted
Dayton Hamvention prices I can swear to, are for the three popular rigs
listed above.&#65533; It breaks down to an ~20% savings thou, just like the last
few years.

&#65533;&#65533;&#65533;&#65533;&#65533;&#65533;&#65533; And of course we sold stuff at booths 3256.5 & 3257 all three days,
so I did make a small fraction of the money I spent, back

&#65533;&#65533;&#65533; Over all I have to say it was one of the most quickest (time just flew
by from Thursday to Sunday),&#65533; and it will go down as my most memorable
(that's another story for another time).&#65533; I'm wondering now if next years
Hamvention rules are going to be amended to include FORBIDDING
Cameras, and any type of photography from being taken within the
hamvention grounds (like I said another story).

&#65533;&#65533;&#65533; Of course rumor has it, this may be the LAST DAYTON hamvention.
Next year their talking about moving it to Columbus.&#65533; Personally I think
a much better choice would be holding it in Chicago, Il.

Hi Steven,

One other person mentioned a similar way to yours for blocking. Great ideas!
There are reasons I went through the lengthy process in my posts:

1. there are different versions of OE. I use v5.5, many use earlier or later versions. Although the different versions are similar
in many respects, there ARE differences (OE 6 provides functions my version does not have)
2. this is the greater reason. Going through the lengthy procedure gives a user GREATER CONTROL over the filter scheme. Fact is I
have very FEW blocked senders (a LOT of us, including myself OCCASIONALLY go OT) so instead of blocking them, I prefer using
KEYWORDS to block OFF TOPICS.

Works for me!

Vic

On Sunday I bought all my new stuff from my favorite Hamvention radio
dealer, AESï¿½ (NO SALES TAX, FREE Shipping, NO radio Minimums & THE BEST
DAMN HAMVENTION $$ on new equipment):
1) Yaesu FT-857ï¿½ï¿½ BRAND NEW $739
2) Yaesu FT-897ï¿½ï¿½ BRAND NEW $829
3) Icom IC-2720H BRAND NEW $309
Since none of the BIG 3 radio dealers (AES, R&L, HRO) had their ROCK
BOTTOM PRICES posted up this year, I wasn't able to copy them all

down.ï¿½ So as an example, (since I didn't buy one this year) I'm clue
less
as to what they sold ICOM IC-706MKIIG's for.ï¿½ The only discounted
Dayton Hamvention prices I can swear to, are for the three popular rigs
listed above.ï¿½ It breaks down to an ~20% savings thou, just like the
last
few years.

ï¿½ï¿½ï¿½ï¿½ï¿½ï¿½ï¿½ï¿½ And of course we sold stuff at booths 3256.5 & 3257 all
three days, so I did make a small fraction of the money I spent,
back.ï¿½ Thanks to everyone that stopped on by, and especially to
those that left me with some GREEN Paper ($.$$).

ï¿½ï¿½ï¿½ Over all I have to say it was one of the most quickest (time just
flew by from Thursday to Sunday),ï¿½ and it will go down as my most
memorable (that's another story for another time).ï¿½ I'm wondering
now if next years Hamvention rules are going to be amended to include
FORBIDDING Cameras, and any type of photography from being taken
within the hamvention grounds (like I said another story).

ï¿½ï¿½ï¿½ Of course rumor has it, this may be the LAST DAYTON hamvention.
Next year their talking about moving it to Columbus.ï¿½ Personally I think
a much better choice would be holding it in Chicago, Il.

You're too young to remember Sear's catalogs in the outhouse??

Take that 8.5x11 sheet of paper that WAS a free handout and fold it both ways so it is 1/4 its original size. Tear off one corner leaving a hole in the center when the paper is unfolded. Save the piece you tore out. Put your finger thru the hole and clean yourself with it. Wipe the finger as you remove the paper then clean under the nail with the small piece you saved. If you favor Morse testing, you may want to suck the finger clean to avoid getting your key dirty.

Neither of us has any problem in calculating either. Those
who have problems have no business being on tha air with a
transmitter that has a "VFO" whether synthesized or not.

My gut feeling is that those here who are doing the complaining
are perfectly capable of making that computation without any
"brain smoke".

The regulation "as written" is technically correct.

Remember that these channels are not the FCC's to give away
free and clear. I suspect strongly that NTIA specified how the
channels were to be designated and what they were to be used for.

We're playing in the "big boy" leagues now.

Funny that most of the gripers here are folks who deal in
professional comms....they should know better.

Hey, it was hard forty years ago getting used to properly
specify frequencies as "cycles per second" rather than as
"cycles" and then only a short time later as "Hertz".

We all have to grow.

I and other hams who work in frequency management had no
problem at all. It's clear and legible. Even folks who have
never seen this sort of designation before can't miss seeing
the "center frequency" bit. If they ignore it and just plow
"full steam ahead" that's their problem 100%.

We're in the "big boy" leagues now.....I would have been very
upset to have seen it designated in "comic book level" terms.

Some of us would think that the FCC is the radio equivalent of
Saddam Hussein, radio dictator. As if they wanted to, they could
put a ham repeater in the middle of the FM broadcast band.
Silly rules about how to feed an FM translator on the FM broadcast
band (they don't like it if a phone line is used instead of a local
radio receiver to feed the audio to the transmitter). Okay, so
someone from the other end of the country doesn't feed it. But
who cares if the parent station owns the translator or not.

Other rules that look silly at first turn out to protect the ham bands
from being invaded by business users (the "no pecuniary interest"
rule.).

If that were true, then the bandwidth would have to be 3kHz.

Another candidate for "stereo-quality SSB?" :-)

If we can't even agree on this, that is an indication of the problem right there.

1.5 puts a 3000 Hz baseband signal at the top of the channel,
and a 200 Hz baseband signal at the bottom of the channel.

1.4 puts a 2800 Hz baseband signal at the top of the channel,
and a 0 Hz baseband signal at the bottom of the channel.

I personally like the top-end headroom that 1.5 gives, because
the voice can and does have components between 2.8 and 3 kHz
whereas very little is found below 200 Hz.

What does the Bell standards say?

What is the expected cutoff of most if not all TX baseband
filters?

_ _ ··· ···_ _ · _ · _ · __ · __

Attorney General Ashcroft is visiting an elementary school.
After the typical civics presentation to the class, he announces, "All right, boys and girls, you can all ask me questions now."
A young boy named Bobby raises his hand and says, "I have three questions:
1. How did Bush win the election with fewer votes than Gore?
2. Why are you using the USA Patriot Act to limit Americans' civil liberties?
3. Why hasn't the US caught Osama Bin Laden yet?"
Just then the bell sounds and all the kids run out to the playground.

Fifteen minutes later, the kids come back in class and again.
Ashcroft says, "I'm sorry we were interrupted by the bell. Now, you can all ask me questions."
A young girl named Charlene raises her hand and says, "I have five questions:
1. How did Bush win the election with fewer votes than Gore?
2. Why are you using the USA Patriot Act to limit Americans' civil liberties?
3. Why hasn't the US caught Osama Bin Laden yet?
4. Why did the bell go off 20 minutes early?
5. Where's Bobby?"

Remember this when they come for you.

You're dating yourself...Bell standards have long since given way
to various telephone industry standards organization. Additionally,
today's tranmission for telephony is all digital other than the line from
your telephone to the central office ...and some of those are
digital too. Bottom line then for telephony is you get whatever you
can encode into a 64kb/sec bit stream.

> What is the expected cutoff of most if not all TX baseband
> filters?

You'll have to ask the equipment makers for
that answer.

Cheers,
Bill K2UNK

3344. MFJ 9040 QRP rig question

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-23 02:35:00 UTC
From: ku4uvham@aol.com
Message-ID: <20030522223500.20276.00000123@mb-m01.aol.com>
Source record: 67041

I have been thinking about getting into QRP operating for some time now and was considering the MFJ 9040. I don't really have the time or equipment to sit down and build a kit, so the 9040 seems like a logically choice, and it is within my budget. The thing that concerns me is MFJ's quality control with these radios. I have read reviews that say the radios drift quite a bit and have had other problems. I was wondering if anyone else has bought one of theses rigs recently, and whether or not MFJ has ever got around to fixing some of the problems with the radio. Please e-mail me and let me know your thoughts.

73,
Mike KU4UV

Bobby was actually a homicidal bomber who got taken out of action a bit
prematurely. His real name was Abobas...

Mountains outta molehills again . . God bless RRAP . .

1. Get in the program and install a decent 2.1 Khz wide TX xtal filter
which is as as wide as is necessary for SSB and also conforms with the
reg requirement to occupy no more the maximum bandwidth needed to
carry out SSB voice comms.

2. Dial into the channel with the freq readout showing that yer ham
reddio is talking 1 Khz below the stated channel freq.

3. This would give you yer own personal 700 Hz wide "safety factor"
(+/- 350 Hz. guard bands, i.e., slop both up & down from indicated)

inside the alotted 2.8 Khz bandwidth to compensate for that one too
many 807s, crappy calibration, drift, whatever.

This story may not seem as far-fetched at first read or thought!
For several years there was a hamfest-gypsy-bum who
would set up at just about every hamfest in the NJ/Pa/Del/Md. area
and one of his trademarks was he would always swipe a
roll of Charmin from out of the men's room early on.
I am not kidding folks. This unwashed, slovenly, smelly sorry
assed excuse for a ham radio op would often camp out
the night before with his xyl in their beat up old van or car to
ostensibly get the good spot in the dealer's tailgate section.
He would go into the men's room wearing a tattered old coat into which he
had sewn
2 large pockets inside early in the morning. When nobody was
looking, in his coat would go 2 or three rolls of toilet paper, bar soap
or whatever else was available. (almost every dealer knew he did this)
It did not stop there either. He also would "raid" the condiments stand
if there were foil packs of ketchup, relish, pepper and salt. He'd then
go back to his grossly-overloaded vehicle and quickly hand off his
"booty" to his XYL or himself place it under the drivers seat.
(..glub forbid he stayed in a motel! One dealer who stayed in the next
room caught him walking out of the room with 6 towels and washcloths!)

Things soon caught up with the scumbag. He was banned from 2 hamfests
that I know of, and from one club meetings for life, when at a meeting he
tried his "dirty longcoat trick" to swipe 2 rolls from the men's room at
break time, followed by two 64 oz bottles of Pepsi, was caught, and launched
into a tirade of foul comments before he left.

I am sure hams in the Northeastern USA will probably know exactly of
whom I am speaking. His "longstanding reputation" goes back 20 yrs,
his house is a junkyard, complete with 2 derelict cars on blocks and
old electronic junk in piles in sheds on the side. (I know this as a friend
works for the town he lives in ahs has been cited on numerous times
for "unkempt property" and "hazardous stacked piles of recyclables".

Thankfully, he does not go to any more area club meetings or hamfests,
as nobody wants to sit near him because he bathes once a week, and
has also screwed several hams out of $$$ from junk he's sold as
"working" which was not, or had to wait several weeks to get items
shipped only to have their late refund checks bounce.

The archetype "Hamfest Bum". Thank glub as the hamfests (sadly)
disappear more and more, these types of slovenly people are also
going the way of the dinosaur.

(this guy was not at Dayton this year Randy, but from what I've seen
at some hamfests, he has lots of "company". tell the guys at the food
stand not to put too many condiment packages out, or better yet use
squeeze-bottles-on-a-rope so the cheap SOB Hams among us will
not pocket these also....)

I will look at this from the buyers standpoint. I pretty much don't even bother to go to hamfests of any kind unless it is for the intention of just social interaction. Too many hams selling think the crap that is ten years old should still command a brand new price! Every item sold incurrs some amount of depreciation until it reaches a point of collectivity, rarity or "antique-ness."

Don't know if they can regulate photography, can they??? I wonder if that is legal? Maybe inside of the arena, but on the grounds might prove to be a little different. I can see it now.... the Camera Cops!

Bell standards!!??? You are dating yourself. Bell standards
went away years ago. Telephony transmission is now digital
and has been for years. Start with a search on "Telephone
Industry Standards Organization," if you are interested in
getting caught up with the times.

Could've been the FCC took the paper. I hear they're running short on paper
to print ham licenses.

Toilet Paper is plenty good ham licenses since restructuring took effect.

? And this 'fact' was reported in What NewsPaper ?
(Cuban Ballot Boxes with 100% Votes for Fidel Castro.)

> Kinda funny that Shrub's Brother was the Govenor of Fl.

Funny had nothing to do with it. The Good People of Florida Elected
Jeb Bush and many other Republicans. But then they also Elected Bob
Graham as US Senator. Its called a Free and Open Election and
Democracy.

> OR,that certain "types" of people "weren't allowed" to vote in Florida.

Its called the Law and Only Registared Voters can Vote Under the Law.

> OR,the confusing ballots...

A 'few' Confused People out of Millions do not make for a Confusing
Ballot. (The City of Chicago had more voting ERRORs the the Whole
State of Florida.)

The State of Florida, under Gov. Jeb Bush and the Republicans, has
improved Florida's State Wide Voting System.
(The City of Chicago, Under Mayor Daily and the Democrats, has done
nothing to correct Chicago's voting sysytem.)

NOTE: The Fact Is the Biggest Errors Occured in Democrat Controled
Counties in Florida. The Democrats Did It To Themselves, with not
Help from the Republicans.

> Brother was the Govenor of Fl
==========
Yes Im sure thousands of ballots were smuggled out of the state and dumped
into the ocean---- get real. Bush's brother is powerless when it comes to general
elections. General Election laws of every state are determined by each states
legislature, not the governor. And Fla.'s legislature is predominately Democrat.
==========

>
> OR,that certain "types" of people "weren't allowed" to vote in
> Florida.
==========
Yea like the thousands of illegals that flood into Fla. every year. Or the "deceased"
people that tried to vote. Or the people that tried, or did vote more than once. Or the
non registered people trying to vote. Or the thousands of military absentee ballots that
were thrown out for any reason the Dems could scrounge up, because they knew most
of them would be a vote for Bush?

==========

>
> OR,the confusing ballots...
==========
You mean the ones the Democrats designed and implemented??
==========
>
> OR.....
==========

In every recount Bush still came out ahead, OR the fact that with every recount more
and more cases of voter fraud turned up (see above remarks) which made the recounts
a moot point. It still boils down to, the electoral college elects presidents not the
popular
vote, end of story.

Mister Sadiq - I am a senior engineering specialist and regulatory counsel for a major engineering consulting firm in the field, whose VP of engineering is a member of several TISO committees, so I DO have knowledge of and access to modern standards. We also maintain a library of Bell System standards and BSTJs - one of the remaining few on the West Coast - as well as of current standards.

I asked about Bell Standards for a particular reason: Bill is a seasoned Bell Labs person and we can pull each other's chain (in jest, of course) over them.

In truth, the analog standards on voice characteristics (an analog process) haven't changed much over the last 30 years even though digital transmission has been common.

Hello:

I would like to invite you to HFRadio.org (http://hfradio.org/) - which includes the Propagation Center (http://prop.hfradio.org/) where you may get live propagation information through the "eAlert" mailing list, up-to-the-minute data, and even WAP/WML access. The propagation information includes information useful for not only HF, but VHF/UHF propagation analysis.

Hi, Folks.

I'd like to invite you to check out the new Washington State Army MARS (Military Affiliate Radio System) Website. It features not only information about Washington State Army MARS, but regional weather, propagation, and other resources.

http://wa.mars.hfradio.org/

MARS is a sponsored program of the Department of Defense, established as a separately managed and operated program by the Army, Navy, and Air Force. The program consists of licensed amateur radio operators who are interested in military communications on a local, national, and international basis as an adjunct to normal communications. The cool thing is that members do not have to have a General or higher level of Amateur License to participate on HF. A no-code Technician may, once becoming a member of MARS, participate fully on HF in support of the mission.

In the state of Florida, which ended up holding all the power over the whole 2000 election, Bush got a total of 2,912,790 votes and Gore got a total of 2,912,253, a difference of 537 votes.
Now, it is possible for the electoral college in Florida to go against the tally in their state and
elect the other candidate if they see that the rest of the country has elected the other candidate,
but for some reason, they did not choose to do so. Which basically leaves the individuals on the
college squarely at fault and not the system.

Wow! You have more degrees than a thermometer and more
titles than the King of England! Which.....begs the question. Just
why DO you slum here with us low lifes? Do you enjoy the petty
bickering? Perhaps you would relate better to fellow elitists
in a professional forum? BTW, you date yourself again when
you use phrases like, "Pull your chain, pulling each others chain."
Phrases like that went out with the 50s, maybe early 60s.

Hey, I'm glad I read about 3865 kHz on k1tp's web page.
The frequency is a riot!!!!! There's a mean drunk on there
every night using profanity & obscenity. He's so drunk he
can't string together two coherent words. Claims to have the
goods on everyone and hates Masons. Last night he passed
out, finally, about 11:30 pm. Then all kinds of people got on
the freq. talked about him and had a good time. Man, this
guy needs to be admitted to detox, the sooner the better!

> > and a 200 Hz baseband signal at the bottom of the channel.

Actually, no it doesn't. The center of that range is 1600Hz, so one needs to
be 1.6kHz down to make that centered.

Adjusting by 1.5Khz means that 3kHz will be 1.5kHz above, but 200Hz will only
be 1.3kHz below. That's not symmetrical and therefore not centered.

> > 1.4 puts a 2800 Hz baseband signal at the top of the channel,
> > and a 0 Hz baseband signal at the bottom of the channel.

That one is at least centered.

> vote, end of story.

JS,

More precisely:

First, the Electroial College Votes for the 'Election' of a President;
which they did for 'President Elect' GW Bush. (But that is not the
end of the Process.)

Second, the US Congress then Votes to 'Accept and Comfirm' the Vote of
the Electroial College; which they did for 'President Elect' GW Bush.
(Remember that at the time of this vote the US Congress was controlled
by the Democrats.)

The Truth Be Know.
- The Facts Speak for Themselves.
- - The Democrats 'Legally'
- - -Put GW Bush in office as President [.]

Therefore it is Clear.
- We Must Must Blame
- - The Democratic Party for GW Bush as
- - - The current President of the USA.

God Bless America ~ RHF

news:<ba0fb2dul1@slb5.atl.mindspring.net>...
> This is from ARRL bulletin just received. (ARLB035)
>
> Dan/W4NTI

And here's the follow-on info in the ARRL Letter

- - - - - - - - -

The NTIA says that hams planning to operate on 60 meters "must assure that their signal is transmitted on the channel center frequency." In general, the NTIA has advised, users should set their carrier frequency 1.5 kHz lower than the channel center frequency. According to the NTIA:

Channel Center Amateur Tuning Frequency
5332 kHz 5330.5 kHz
5348 kHz 5346.5 kHz
5368 kHz 5366.5 kHz
5373 kHz 5371.5 kHz
5405 kHz (common US/UK) 5403.5 kHz

ARRL Technical Relations Manager Paul Rinaldo, W4RI, says the assignment of these channels implies that amateurs now must adhere to certain frequency tolerances for their use. While the international Radio Regulations don't list these for the Amateur Service, he notes, they do stipulate tolerances on the order of 20 to 50 Hz for other services.

"We haven't been told anything specific about frequency tolerances for these channels but would probably annoy federal regulators if we strayed any more than 50 Hz from the assigned carrier frequencies," Rinaldo cautioned.

Keeping one's audio within the 2.8-kHz wide channel to comply with the 2K8J3E emission specification is another important issue. ARRL Laboratory Manager Ed Hare, W1RFI, believes prudence calls for not having baseband audio below 200 Hz nor greater than 2800 Hz--for a total bandwidth of 2.6 kHz. "That will probably keep us out of trouble," he said. Noting that the high-frequency response "can vary a lot from radio to radio," however, Hare recommended that amateurs play it conservatively.

Additionally, the FCC has restricted operation to USB only, with a maximum effective radiated power (ERP) of 50 W. The USB-only requirement stemmed from NTIA interoperability concerns. The NTIA wanted to make sure that federal users could copy and, if necessary, identify any amateur station using one of the 60-meter channels. As a result, the 60-meter frequencies

will become the only ones available to the general amateur community that do not permit CW operation.

For the sake of this particular grant, the FCC said it would consider a half-wave dipole to have a gain of 0 dBd. In its letter to the FCC, the NTIA stipulated that radiated power should not exceed "the equivalent of 50 W PEP transmitter output power into an antenna with a gain of 0 dBd."

"Although this is less spectrum than the American Radio Relay League petition requested, this is the best we can do pending a definition of Homeland Security HF requirements," concluded Fredrick R. Wentland in the NTIA's letter to the FCC's OET.

Sumner has predicted that, over time, amateurs can and will "develop a record of disciplined, responsible use of the five channels in the public interest that will justify another look at these rather severe initial restrictions."

Just when amateurs will get their first crack at 60 meters is not yet clear. The changes to Part 97 go into effect 30 days after publication of the Report and Order (R&O) in The Federal Register, which has not yet happened. Publication could take anywhere from a few weeks to a few months. ARRL will announce a specific date as soon as it's known.

The FCC Report and Order in ET Docket 02-98 is available on the FCC's Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-105A1.doc>.

Hi, Folks.

As some of you know, Bob Hope is turning 100 years-of-age on May 29, 2003. Many of us were entertained by Mr. Hope, during our time in the Military Service. And others of us might have enjoyed his good cheer from Old Time Radio, and so forth.

To show our appreciation, the US Army MARS is asking you to submit a "Happy Birthday" greeting to Bob Hope via the MARSgram service of the US Army MARS. If you would like to extend your birthday greeting to Mr. Bob Hope, I have set up a way for you to submit this free MARSgram via:

http://wa.mars.hfradio.org/marsgram/bob.html

Send your message, today!

we did not lay Hitlers ass to rest

there is still many world leaders like him look at Blair and Bush Hitlerites
through and through

well done Stagger for trying to make some americans think instead of
believing the spoon fed shit they normally digest.

thanks to blair and bush terrorism as expected has got worse,and we are
still not adressing the palestinian problem.

first of all chuck out all Israeli settlers they have no right to be there.

as there are more terrorists out there if reading this any american is a legitimate target,especially if military or government.

so a nice big bomb at the US embassy in London is a good target to go for,if not bomb a few hotels full of americans,but please try and leave use brits alone,we are not responsible for demented Blair.

most brits were opposed to the recent Iraq action and most still are.

oh what have i said,a certain saddo is probably on the phone to the US embassy in London now,as he did before,not that anyone contacted me about it,if they did what on earth is wrong with me exercising my democratic rights.

have the US ever heard of democracy,no i dont think so

us democracy sorry for no capitals but us is a piss country and does not deserve capitals.

you think democracy is voting in rich right wing murderers and having a military machine that opresses those who are against them.

Possible crude test (to identify gross trouble only): Find a ham friend
nearby who has
one of those modern rigs with the spectrum display. Both of you tune in
to say an
empty freq on 80 or 40m, and do a test transmission. Make "white noise" by
blowing at your mic. Have him take a look at the width of your signal.
Also do
a test in AM mode (so your carrier shows up on his display) so he knows
where
your suppressed carrier really is. If the 10dB down skirts of your
signal don't
exceed say 2.8KHz you should be acceptable. And 2.6KHz 3 dB down.
From 200 to 2800Hz.

If his rig can capture and store the spectral pattern, have him do that
so you can see
what he saw.

3387. PSK and/or MFSK on 2 metres & 70cm?

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-24 20:40:34 UTC
From: Rene <deleterene.altena@gmx.net>
Message-ID: <baolc3$1uo1h$1@ID-153362.news.dfncis.de>
Source record: 67084
Cross-posted to: rec.radio.amateur.misc,uk.radio.amateur

Hello All!

Somebody told me that PSK31 or MFSK is not well suited for communications or weak signal work on 2 metres or 70 centimetres for example because of phase shifting etc. Is there any experience known (max. distance) that could provide any clarification on this topic?

Rene

i would of thought the medication would of been more suitable for the guy
who phoned the US Embassy in london

mental or what,internet you are allowed to say what you want,when you
want,you dont have to agree,but you can say it

freedom of speech americans say,but as soon as someoene exercises this right
you tell him he cant say it.

Seems to me PSK and MFSK are designed to work under just those
conditions.....in fact VHF should be a durn site easier than HF paths.

Sounds right to me Bruce....The only digital I've done at Vhf is RTTY and
Packet at 1200. RTTY was no sweat never.
Packet was 99.9%. But sometimes the multi-path to a local machine was
disruptive. Depending on terrain.

I would think PSK would be superior in all conditons and frequencies to
those modes.

>Dan/W4NTI

It really is a decent weak signal mode for 6 DAN. You and I ought to try and work each other that way, I think it can be done.

It was really interesting the other evening I was working this guy in Dallas on psk , band didnt appear to be open, an a XE Station jumped in with us, was really surprised. Try 50.290 Dan, you will be surprised what you hear.

3394. 10m repeater on Echolink

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-25 01:26:09 UTC
From: Greg <cputec@hotmail.com>
Message-ID: <RYUza.1850$H84.999035@news1.news.adelphia.net>
Source record: 66991

Hi.... I have a technician license and just recently became involved with Echolink.

I was wondering, am I as a technician allowed to connect over Echolink to a repeater that transmits on 10m frequencies? The reason for this concern is that if you're familiar with Echolink you'll notice that some of the repeaters do not have their transmit frequency listed. Sometimes you have to connect before you can see what frequency they work on. I have been avoiding connecting to these because once you connect, the Echolink system broadcasts your callsign. Does anyone know what the rules are on this?

Thanks!!
Greg

the fact is your voting system is crap,for a start you need to be a millionaire to get anywhere in the UK you can be in politics no matter what your background or social status in the US you have the class system,you dont count unless you have money and status.

wow what a crap form of democracy,never mind maybe the UK/FRANCE/GERMANY and other european countries can go for a regime change in the US

also we know at least we will actually find WMD unlike Iraq,we also have a lot more record of the atrocities and use of such weopons by the US than we have on Iraq.

i see you bullied other countries in to giving US/UK support for your imperialism of IRAQ.

you are incapable of doing anything honestly

look at all the crap fed during the war,that Jessica story,this was real war not a film.

and we will never forgive the US for the friendly fire,i cant understand why some of your military are not facing court marshall.

hopefully we will abandon NATO and form a european miltary force with our rightful friends in germany and france.

You mean, they have posted THEIR recommended settings. That doesn't mean that they are correct either. In fact, their 1.5Khz down assumes that the center audio frequency component to be passed will be 1500Hz, and for the maximum bandwidth, a range of 100Hz to 2900Hz. A 2.4kHz filter will make that 300Hz to 2700Hz.... However, other ranges have been proposed here, so that doesn't automatically make their settings optimal.

DJ,

Hello, Lets Not Make Up the Rules as we go along.

Each State (icluding Florida) have "Slates of Electors" that are
'Pledged' to Vote for a Specific Candidate. Some States require by
Law that 'Pledged' Electors Vote as they were 'Selected' by the
Voters; others simple leave it to the 'personal honor' of the Electors

The Electorial College does not exist in any State per say. The
Electorial College only exists when it meets in Washington DC to Vote
after the Election.

The REASON that the Florida State 'Electors' (or any others) did not
change their Votes is: They Knew the Law -and- They were Persons of
Honor [.]

The Electroial College Votes for the 'Election' of a President; which
they did for 'President Elect' GW Bush. Then the US Congress then
Votes to 'Accept and Comfirm' the Vote of the Electroial College;
which they did for 'President Elect' GW Bush. Please 'remember' that
at the time of this vote the US Congress was controlled by the
Democrats.

The Truth Be Know. The Facts Speak for Themselves. The Democrats
'Legally'
put GW Bush in office as President [.]

Therefore it is Clear. We Must Must Blame the Democratic Party for GW
Bush as
the current President of the USA.

God Bless America ~ RHF

Well, everyone needs to use the same setting if we want to talk to each
other
and not sound like Donald Duck.... So the -1.5 KHz seems the most
reasonable
one to use so far.

This has been answered in another forum. It appears that the control op of
the 10m repeater would be the one responsible for supervising any techs that
accessed it through the echolink.

Technically though there isn't much point in putting a 10 meter repeater on
the echolink. When propagation is good on 10 meters, you can access those
few 10 meter repeaters in existene directly (license class permitting).
When propagation is poor on 10 meters, it does no better than 2 meters (i.e.
good only for local traffic).

Still going with the ARRL recommendations is probably the "safest." The
ARRL recommendations would carry more weight with the FCC than a person's
own individual calculation.

However, I personally don't plan to operate on these new frequencies for two
reasons. One, five frequencies is too limiting to the potential number of
QSOs. Two, I don't agree with prohibiting CW on a ham frequency.

Hey guys here is a bargain I wanted to tell you about. I have NO STAKE in this at all, but just noticed that Buxcomm (K4ABT) has discounted ALL of his digital radio interfaces to $19.95

I bought one for my IC746 and I LOVE IT!

Without a doubt this is the best way to get on the digital modes with your computer!!

As I type this, the 14.313 Kooks are at it again.

You have the screwball from Evansville ghost-talking
to long dead hams and fictitious stations, #2 and #3
Mr. CW's calling CQ ad-nausea, comments from
what sounds like the infamous "bathroom man"
and many others.

Another typical Sunday morning showtime on 14.313 !

I will make note however, of one *very special* veteran
nutcase who is on 313 right now. It's the kook who is playing
the gospel and country western music I'm hearing.

Everyone knows exactly just who this guy who plays music is.
He's been associated with 14.313 for many years, going
back to the days of the infamous 20 Meter Wars orchestrated
by a now-defunct ham.

Still not sure? Well, our music player is located
in the southeastern USA. If you look at his ham
shack photo on QRZ.com you will see an
inordinate amount of home entertainment
and related audio mixing equipment.
All that stuff is not there for "window dressings" folks......

My question is, when the heck is Mr. Hollingsworth
going to *do his job* and bust this Jake-the-Fake
with another $10K fine, just like he did to
another legendary "14.313 luminary" of
days gone past...?

We are waiting RH.................

3410. FS: sma-to-bnc custom fit antenna adapter

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-25 18:19:23 UTC
From: gulyas@earthlink.net
Message-ID: <12235960.0305251019.2bb55935@posting.google.com>
Source record: 67007
Cross-posted to: rec.radio.swap,rec.radio.scanner,rec.radio.amateur.equipment,rec.radio.amateur.misc

Do you have a need for a high-quality SMA-to-BNC antenna adapter that
is custom made to fit and protect your H.T. or scanner radio?

Adapter allows you to:
Quickly change antennas to base, mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna
changes.

Adapter features:
Gold plated contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed
for moisture and dirt protection.
The base also provides an excellent support for any length of antenna
or application.
No need to remove adapter once installed to make a quick and safe
antenna change.

Sizes to fit radio models:
Yaesu: VX-5R, VX-7R, VX-1R, FT-50-R, VX-10, VX-150, VX-110,
VXA-100, VXA-120

Where does the "10 dB down" come from? The acceptred standard
for measuring occupied bandwidth is 26 dB down.

Agreed Dan. As another fine example
there are jammers on 3.865 and 3.898
that have been screwing around up there for years!

Seems to me that the FCC and Mr. Hollingsworth
both are nothing more than * Paper Tigers * who make
speeches every now and then to make us seem to
all feel better. (better known as the warm-fuzzies approach)

Thanks Dan and good health 2-U :)

Wasn't sure what the number really was. Now I have a better number to use,
thanks for telling me.

At 21:19 zulu May 25th, there's nothing there. Oh, there's a foreign
language
QSO at 14.310, but there's nothing wrong with that.

Frequency 14313 stands as an enduring living monument
how one person, KV4FZ, can destroy what was used as a
public service frequency for years. Then the stupid FCC
gives him his license back! In all fairness, it appears he may
have finally learned how to control his mouth though. Has
anyone heard him on any freq.????

WOW!!! What a super 6 meter SSB opening this afternoon (May 25). After scanning the band from my base station radio, I decided to try a bit of a challenge. I broke out my Yaesu FT690 with the battery pack (2.5watts), plugged in the telescoping antenna, went to the back yard and made contacts in Texas, Chicago, Wisconsin(?), all from FM07.

** NOTE FROM THE EDITOR, TEDD, KB8NW (Dayton Wrap Up and Mentionables): HamVention 2003 is in the books. Eventhough the weather was not the greatest, the annual event was still great. I enjoy meeting and greeting my friend throughout world every year. However, it was on everyone's mind whether there would be another "HamVention" (as we know it!). The talk of it being moved was everywhere. Hopefully, this will not happen. Anyway, I think the Southwest Ohio DX Association's DX Forum and Dinner were particularly interesting for DXers this year. The talk by Vice Admiral Scott Redd U.S. Navy (retired), K0DQ, during the Friday night DX Dinner Banquet was interesting and enlightening. However, the turn out for the DX Forum was amazing (the largest I have ever seen). Your editor started off the forum presenting the "Northern Ohio DX Association's 2002 DXpedition of the Year" to the VP6DI group. Mike McGirr, K9AJ, accepted the award on behalf of the group. Wayne Mills, N7NG, followed with an interesting presentation of the ARRL's "Logbook of The World" (LOTW). The LOTW is still in the testing stage (possibly for 60 days), however, individuals can upload their logs now after downloading some software on the ARRL Web page. For more details, go to: http://www.arrl.org/lotw
Next on the agenda was a presentation by Al Hernandex, K3VN, on the "ZL7C" operation, and then Bernie McClenny, W3UR, on the "AH3D" operation. The DX Forum ended with an interesting talk (no slides/video) by Don Miller,

AE6IY. Don talked about some of his activities, as well as his views on the DXCC program and some public apologies. He also mentioned he knows of a new DXCC entity, and he plans to go there and activate it. No other details were given. STAY TUNED. For some great pictures of the Dayton HamVention, visit Tom's, K8CX, "Dayton 2003 Photo Gallery" at: http://hamgallery.com/dayton2003/

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18th/May, through Sunday, 25th/May, there were 222 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND. Rad/ZS6RAD, Ron/ZS5ABD, Cliff/ZS6BOX and Willie/ZS5WI will be operating from Ezulwini, Swaziland (Callsign awaiting), from July 29th to August 3rd. They will be joined by Willie/3DA0BD, Andy/3DA0TM and Nigel/3DA0NG as time permits. Activity will be on all HF bands and on VHF using all modes including WSJT, between 0300-0700z and from 1400-2200z daily. They will also be participating in the SARL Phone Contest as a Multi-Operator station. Activity will end on Sunday afternoon, August 3rd. QSL via the SARL QSL Bureau (or direct) to ZS5WI: PO Box 1064, Eshowe, 3815, KZN, South Africa (enclosing a Self Addressed Envelope; South African stations to enclose a SASE). It will be appreciated if the cost of postage can be covered as they have not secured any sponsorship. Queries can be directed to: zs5wi@iafrica.com

4W, EAST TIMOR. Stu Greene, WA2MOE, sent out the following press release on May 22nd, about the Democratic Republic of Timor Leste:
"4W1BK (JA1BK) and 4W2DN (JR2KDN) will be QRV from Timor Leste from May 24 to May 29, 2003. QSL information is 4W1BK via WA2MOE and 4W1DN via JR2KDN. This is a WFWL operation.

The United Nations no longer is in control and independence was won by the East Timorese on May 20, 2002. An application for new entity status will be filed together with an application to delete the former 4W territory as an entity under DXCC rules.

Article 5 of the treaty between Portugal and Indonesia of May 5, 1999, removed East Timor from the list of Non-Self-Governing Territories of the General Assembly and the deletion of the question of East Timor from the agendas of the Security Council and the General Assembly. The treaty, witnessed by the Secretary General of the United Nations, did not make the United Nations the administrator of East Timor but did provide for UN humanitarian assistance. Article 7 requested 'the Secretary-General to maintain an adequate United Nations presence in East Timor.'

The DX Advisory and Awards Committees quite possibly misinterpreted the language of the treaty as conferring status of East Timor as a UN administered territory which in fact was not the case. Only when the referendum authorized by the treaty was held and the East Timorese people declared themselves independent was there a new entity.

The role of UNTAET (UN Transitional Administration in East Timor) was humanitarian and peacekeeping and was not a quasi-government authorized to issue amateur radio licenses. UNTAET did not have the authority to issue amateur radio licenses; it was a peacekeeping mission and only after the referendum was there a Ministry of Communications which does have that authority. The text of the treaty for those interested is at: http://www.un.org/peace/etimor99/agreement/agreeFrame_Eng01.html

If ARRL agrees, the UN sanctioned operations in East Timor would be deleted on the ground that East Timor was not an entity under the rules and a new entity would be created effective 20 May 2002, the date of the creation of the East Timorese state. Democratic Republic of Timor Leste became a UN state on 27 September, 2002. ITU has reassigned 4WA-4WZ to the Democratic Republic of Timor Leste on 23 April, 2003."

ADDED NOTES: Since this press release, there seems to be another operator other than the team of Kan/JA1BK (4W1BK) and Yuu/JR2KDN (4W2DN) who has been active. A station signing 4W3CW has been active on 30/20/15/10 meters CW and was active in the CQ WPX Contest this past weekend. The operator was heard sending QSL via QRZ.com. It seems that the operator is Peter, G3WQU. His length of stay is unknown. Also, no comments or announcements have been made from the DXCC Desk. Hopefully, something may be said by Wayne Mills, N7NG, after the holiday on Monday. Stay tuned.

4W, EAST TIMOR. Thor, TF3MM, is also currently active from here as 4W3DX and is expected to be there for another week. He is using a rhombic antenna (leg lengths are 115 meters, up 50 meters beaming EU). Most of his activity has been on 15 and 20 meters CW. Watch 21008 kHz after 2115z and 14002-14003 kHz between 1130-1800z. QSL via TF3MM. Thor states that he will QSL when he gets back to TF-land (should be done before Christmas).

5W & KH8, AMERICAN SAMOA AND SAMOA (Update). Ulli, DL2AH, is heading to the Pacific Ocean for a holiday between July 2-29th. He plans to be active as 5W0AH from Samoa, July 3-15th and July 25-29th. He will also be active from Ofu Island (OC-077), American Samoa (callsign not known yet), July 17-23rd. Activity will be on 40-10 meter SSB only using a FT897 + a GAP TITAN antenna. He will also be active ib the IOTA Contest.

ANTARCTICA NET. There is a new Antarctica Net every Saturday on 14300 kHz around 1900z. Net Control is LU4DXU. He is in touch with LU1Z stations. Last Saturday LU1ZV, the Esperanza Base, was on the air. They expect DP1POL for next Saturday.

C5, THE GAMBIA. Juha, OH9MM, reports that an international group of operators will be active as C53M during the CQWW CW Contest as a Multi-2 entry in November. QSL via OH9MM. Look for C56R to be active outside of the contest.

CANADIAN PREFIXES. Nenad, VE3EXY, informs OPDX to look for a lot of different Canadian prefixes in the year 2003. He states, "This will be like PX paradise for PX hunters." For more details, please visit the following Web site at: http://www.rac.ca/specialcalls.htm

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. QSL via W7EJ. Jim will be active one week before the contest.

DIB NUMBER CHANGED! Pedro, PP5SZ, informs OPDX that all operations from "Cotijuba Island" (IOTA SA-060) with a DIB-43 reference number have been changed to DIB-80! Please make the correction in your DIB List Numbers. A new "Diploma das Ilhas Brasileiras" (DIB) List is available at: http://geocities.yahoo.com.br/pp5sz/diblist.htm

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operations from Iraq are approved for DXCC credit:
YI/EK6KB YI/ON4WW YI/S57CQ
YI/EK6DO YI/ON6TT YI/SM7PKK
YI/F5ORF YI/S53R YI/VK4KMT
YI/ON5NT

HAM COM. The 25th anniversary of Ham Com in Arlington, TX, between Dallas and Fort Worth, is the southwest's largest ham convention. Ham Com is also this year's ARRL National Convention and will be held June 20-22th. Listen for W1AW/5 (the convention's commemorative station) to be active. Also, the Lone Star DX Association (LSDXA) is presenting a world class DX program this year. For the DX program, please visit the following Web page at: http://www.dxer.org/lsdxa/agenda.html
For Ham Com registration and information, please visit the following Web at: http://www.hamcom.org/

HS0, THAILAND. John, W6ZIP, informs OPDX that he will be active as HS0ZEH from May 31st to June 17th from several locations. Activity will be mainly on CW on 40-10 meters. There will be some SSB towards the end of his tour (last 2 days or so). QSL via home callsign.

INTERNATIONAL DX CONVENTION 2004 (Visalia). The Southern California DX Club has announced that the 55th Annual International DX Convention will be held in 2004 at the Holiday Inn Hotel/Conference Center in Visalia on April 23-25th. For online reservation and information, go to the following Web page at: http://www.visaliaholidayinn.com

IOTA NEWS.....
AF-NEW. Ivan/OM3CGN, Afif/7X2RO and possibly three other local operators
will activate the Algerian Habbibas Island (a new IOTA in
the Mediterranean Sea Coast West Group) as 7W4HI, June 1-5th.
They will be active on CW/SSB on the usual IOTA frequencies.
QSL info will be announced later.

AF-019. Look for operators ON6VP, ON4CAQ and ON1AEO to be active as
IG9/ON4DST from Calla Madonna, Lampedusa Island, now through
May 29th. Activity will be on 80/40/20/15/10 meters SSB only.
QSL to ON4DST via the bureau, or direct via ON4AMM:
Mary Lou Moons, Oudestraat 9, B-3560 Lummen, Belgium.

AS-155. BV DX Group headed up by Paul, BV4FH, will be back on Liuchiu Yu
Island, June 6-8th. Activity will be on CW/SSB, 40-10 meters
and the WARC bands. They will use most IOTA frequencies. QSL
via BV4YB directly, and a SASE will be much appreciated. They
expect to start at 0800z on June 6th and go QRT at 0400z on
June 8th.

EU-020. Martin, SM0DTK, will be active from Gotland Island as SM0DTK/1
from now through May 31st. Skeds can be arranged via E-mail at:
sm0dtk@passagen.se
More info and a Web Cam is available at the following URL:
http://hem.passagen.se/sm0dtk/ (Click on "Losgodis"!)

EU-041. Marco, IK1YED, is expected to be active as IM0/IK1YED/p from
Maddalena Island (IIA SS-001) now through May 31st. Activity
will be on all HF bands and 6 meter SSB. He also plans to
operate from Caprera (also EU-041, SS-005) during the same
time frame.

EU-063. Terje's, LA3OHA (and JW3OHA), plans are confirmed for activivty
from Prins Karls Forland Island, July 11-25th. Four operators
have signed on. However, Terje states that they are still
looking for one more operator. More details are forthcoming.

EU-120. The South Bristol ARC will be active as GB2BLE from Lundy
Island (WAB SS14 - IO71) during June 28th through July 5th.
Activity will be on HF SSB only, 6 meters SSB/FM and 2 meters
FM. More details can be found on the Web page at:
http://www.draxium.com/gb2ble

EU-125. Operators Karl/LA8DW and Lars/OZ1HPS will activate Fanoe Island
(DIA NS-002) from June 5-7th, using the callsign OZ4DI. QSL
via OZ1HPS direct or bureau. ADDED NOTE: This callsign will
also be used for some other Danish Islands and Lighthouses
operations in the future.

EU-125. Siggi, DL1AZZ, will be active as OZ/DL1AZZ from Fanoe Island
(DIA NS-02 for the Danish Islands Award), June 7-14th. Activity
will be on all HF bands CW/SSB. QSL 100% via bureau.

EU-170. Siggi/DL1AZZ, Lutz/DL3ARK, Mario/DL5ASE and Heiko/DG0OGM plan to visit the Island of Dugi Otok (IOCA CI-018) and the Light-house Veli Rat (CRO-183) between now and May 31st. QSL via their home callsigns, direct or bureau.

NA-121. Lanny/W5BOS and Don/N5XG will activate Walrus Isls, Alaska. Operation is scheduled for July 15th (starting at 0200z) until July 17th (ending at 1500z). Activity will be on CW and SSB. Callsigns will be W5BOS/AL5 and N5XG/KL6. QSL via their home callsign. Visit their web site at: http://www.geocities.com/buzzsimm/NA121.html

J3, GRENADA. Paul, W4/G4BKI, has moved to Grenada and is now J3/G4BKI. He will be active for 1 year under that callsign until he receives his J38** callsign. His activity is mainly on 20/15 meters CW (between 2000-2330z) right now. QSL information can be found on the Web page at: http://stcgrenada.com/amateurradio.htm

JW7, SVALBARD. Look for Tormod "Tom", LA7VK, to operate from Svalbard (EU-026) as JW7VK between May 29th and June 1st. QSL via LA7VK. Tom states, "For those who send and require a QSL card via mail, please remember to include a self-adressed envelope with one IRC or two green stamps. Otherwise, the return card will be sent via bureau." For more details, please visit the Web page at: http://www.dxpedition.org/dxjwpk

LIGHTHOUSE ACTIVITY. Operators Alex/RW6CW, Andy/RK6ABM, Slava/RZ6AER, Alex/RA6AFB, Vit/RK6ALP and Serge/RK6ADS will be active from the Lighthouse "Sazalniksky", ERU-174 for ARLHS and RLE-026 for RLHA (Russian Lighthouse Award), June 6-7th, using the the club callsign RW6AWW/p. Activity is planned for the HF bands CW/SSB. QSL via RW6CW.

NATIONAL HURRICANE CENTER'S STATION (Special Activity). W1AW reports that the National Hurricane Center's Amateur Radio station WX4NHC (formerly W4EHW) will conduct its 2003 hurricane season on-the-air station test Sunday, June 1, 1300-2200 UTC. The event will mark the first time the NHC uses its new WX4NHC callsign. The purpose of the annual station test is to check out all of the WX4NHC radio, computer and antenna equipment using as many modes and frequencies as possible. Look for WX4NHC to operate on HF, VHF and UHF. Operation will follow this schedule:
1300 UTC--3.911 and 7.268 SSB and VHF/UHF FM
1400 UTC--14.325 MHz SSB, VHF 147.000 repeater/UHF 442.350 repeater
1500 UTC--144.200 MHz SSB, 14.070 MHz PSK31
1700 UTC--14.325 and 21.325 MHz SSB, VHF/UHF IRLP Node 9210
1800 UTC--21.325 and 28.525 MHz SSB
2000 UTC--14.325 and 144.200 MHz SSB. CW operation will be on 14.035, 21.035 and 28.035 MHz (times will vary).
Stations working WX4NHC are asked to provide a signal report, location and brief weather report. QSL cards are available via W4VBQ. Include a SASE with QSL requests.

NEW DX BOOKS FOR DXERS. Idiom Press is pleased and proud to announce the following new publication for DXers. For details on how to purchase these

books, please visit the Web page at: http://www.idiompress.com
* The long awaited third edition of "The Complete DX'er" by Bob Locher, W9KNI. This is the most popular DX book ever written, "The Complete DX'er" is both the highly entertaining and fascinating diary of a serious DX chaser, and at the same time a tutorial sure to make the reader a more successful DX'er. This new edition brings the work up to date, yet retains the author's warm, personal style that made the earlier editions so popular. This is a work that the owner is sure to read again and again. It very much respects and honors the traditions of DX'ing, brings a sense of excitement to the chase, and leaves the reader eager to turn on the rig and start tuning the bands looking for the ever elusive "new one". With over 26,000 copies in print (but just try to find a used copy) this is surely the return of a classic! (228 pages at 19.95 USD)

* Idiom Press is pleased and proud to announce publication of "Up Two -- Adventures of a DXpeditioner" by well known contester, DX'er and world traveler Roger Western, G3SXW. "Up Two" is a fascinating account of operations by Roger from 22 different countries, many of them quite rare, all reached by commercial transportation, and most of them "microlite" expeditions taken long before others invented the term. Roger entertains the reader with his accounts of sea voyages, bus journeys across Africa, of far flung islands and sun-blasted deserts, all with rig in hand. Some of Roger's trips were keyed to major contests, others were purely DX'peditions. All were made without support from the major foundations. This book is both an entertaining travelog and a roadmap for others interested in mounting similar operations. It is sure to fascinate both the armchair DXpeditioner and the ham plotting his own adventure. (256 pages at 19.95 USD)

NEW OFFICERS FOR 2003-2004. The French National CW Society and The Union Francaise des Telegraphistes (UFT) has elected new officers for 2003-2004.
President : Raymond TALAZAC, F6BQV
Vice President : Norbert LAURENT, F6AXX
Treasurer : Pierre GALLO, F6FXS
Secretary : Jean Pierre AUXENTIDES, F5TFP.
The Board include also the following assistant members:
Ghislain, F6CEL Bernard, F5HEW Andre, F5AKL
Alain, F6ENO Vincent, F5MJV
Alain, F6EQV Maurice, F5NQL
Gerard, F6ICG Martial, F5SIE.
The President has appointed, Jean Claude Perrotey, F9IQ, Honorary Past President, to be the UFT's CW consultant for the IARU French Society, RESEAU des EMETTEURS FRANCAIS (REF), whose UFT is associated.

QSL INFO AND NEWS.....
Phil Whitchurch, G3SWH, informs OPDX that all direct requests for 8Q7ZZ QSLs have now been mailed.

AH3D QSL CARDS WERE AVAILABLE AT THE HAMVENTION. Vertex Standard (Yaesu) hosted the distribution of the full-color AH3D folded-QSLs at their booth during the Dayton Hamvention. Veteran DXpeditioner Martti Laine, OH2BH, 22-year old severe contester Toni Linden, OH2JTE, and Daily DX Editor, Bernie McClenny, W3UR, were passing out the QSLs during the three day event. If you were not there and sent for your card, you should be receiving your QSL via the snail mail shortly.

Andy, DL4MEH, informs OPDX that he is permanently moving to Trinidad and Tobago, West Indies. PLEASE DO NOT SEND QSLS TO HIS GERMAN CALLBOOK ADDRESS ANYMORE!! Wolfgang Utz, DL4MDO, will now handle all of Andy's DX and Contest operations. This includes the following:
9Y4TBG: CQWW CW 1999, CQWW SSB 2001, CQWW SSB 2002, ARRL DX CW/SSB 2003
9Y4/DL4MEH: All operations from 1999 and on.
There will be extended activity from his contest and DX QTH on Tobago Island. Since he did not obtain a permanent resident license or a "contest station callsign" yet, listen for the callsign and QSL informations given by the operator. All QSLs for 9Y4/DL4MEH for future activities go via DL4MDO, bureau submission preferred. If somebody really wants to QSL directly to Andy (please only stamp collectors, hi), his address will be as follows (do not send earlier than August 2003):
Andreas Kretzschmar, #5 Estate Ave., Cassleton Gardens, Trincity, Trinidad, W.I., Republic of Trinidad and Tobago.

The Magnolia DX Association (MDXA) reports that the K5C QSL cards for their April 4-6th, IOTA Expedition to Cat Island (NA-082) have arrived from the printer, and they look wonderful! You can check out the K5C web site to see the QSL card and also the photos, the story, and other expedition stats at: http://www.mdxa.org/k5c_03.html
QSLs should be in the mail.

Ron, AC7DX, reports, "I apologize to all that were awaiting LT1F and/or L71F cards. I have been waiting about 3 months for printed cards paid for and purchased from UA3AA. No cards have arrived. In the meantime, I ordered cards from UX5UO which arrived in 2 weeks and all request for L71F and LT1F have been answered. Still awaiting LQ7D cards from UA3AA."

OD5/OK1MU QSL CARDS DELAY. Vrata, OK1KT, reports that on behalf of the operator and his QSL Manager OK1TN, he would like to ask the HAM community for patience with the QSL cards managed via OK QSL bureau. They just received 25,000 QSL cards from printer. Pavel will finish his activities from Lebanon at the end of June, and they will send all QSL cards they get via the bureau after his return. Do not worry please, all QSOs will be confirmed for sure!

Rob, PA5ET, reports that all direct QSLs of the last LLDXT trip to OY have been mailed as of May 17th. He currently has no backlog of direct cards. Rob states he is still receiving direct cards without contribution and/or SASE. These QSLs will be sent via the Bureau. Registered letters with QSLs are NOT collected at the Post Office so contact him by E-mail IN ADVANCE (pa5et@muurkrant.com) so he can give you another address. All QSL rules can be found on their Web site at: http://www.qsl.net/lldxt

T9 ONLINE CALLBOOK UPDATE. Nenad, VE3EXY, informs OPDX that there is an international version of the T9 callbook at: http://www.t93y.com/english

Silvano, I2YSB, reports that the complete logs for the recent TX4PG operation (12607 CW, 8901 SSB and 1029 RTTY QSOs) from the Marquesas Islands are now available at: http://digilander.libero.it/i2ysb If there are any discrepancies in QSO data, you should report them to Silvano, I2YSB, at: i2ysb@libero.it

VA2BY and K8DD/VE2 were active from Zone 2, Waskaganish, James Bay, last week. QSL via K8DD. Also, visit: http://www.qsl.net/teamzone2/

XY1M QSL STATUS (Update). OPDX was asked two weeks ago to find out if anyone has received their QSL cards for Hiroo's operation in Myanmar last November. The answer is "YES", and they received their cards within a couple of weeks. The direct mailing address is: Hiroo Yonezuka, P.O. BOX 2659, Vientiane, Laos. Hiroo warns that no Greenstamps are allowed to be sent to Laos. He only accepts IRCs.

Ralph, K2PF, informs OPDX that he is now the QSL Manager for YI/S53R. By the way, YI/S53R was active on 40 meters CW during the CQ WPX Contest this past weekend.

QSL ZW8M from the Island of Mexiana (IOTA SA-042 and DIB69) should be QSLed via CS1GDX, POB 1156, 2736-996, Agualva, Portugal (or bureau).

SILENT KEY. Reports over the past weekend indicate that the ZK1AYL and ZK1SIM operation from Rarotonga (OC-013) by June/VK4SJ and Doug/VK4BP has ended in tragedy. Details are sketchy at this time, but it seems Doug was was killed when a truck hit his motorcycle while still in the South Cook Islands. OPDX and its readers would like to send out our deepest sympathy to June, and her family and friends.

SPECIAL EVENTS (French Activity to Commemorate WWI).....
* Once again, the Departement de la Manche REF Hams will be using the special callsign TM6JUN from June 1-9th. Look for several stations to be active from Utah Beach, one station active from an old bunker (which was used as the first Allied Signal Corps Center in Normandy as early as June 8th in 1944), and another from the Landing Museum. Suggested frequencies are as follows:
CW - 3526, 7026, 14026, 18070, 21026, 24900 and 28026
SSB - 3644, 7074, 14174, 18160, 21174, 24940 and 28574 kHz.
QSL via F5RJM, either direct to CBA (SASE+postage) or via the bureau, but every contact will be confirmed. Suggested Web pages to look/refer to are:
- Utah Beach Museum Web site at: http://www.utah-beach.org/
- Le "Roosevelt Restaurant", Historical house and common wall with the bunker liberated by the General Roosevelt's GI's. at: http://www.le-roosevelt.com/
- Caen Peace Memorial at: http://www.memorial-caen.fr/

* Michel, F6IPS, will be active as TM6SME from June 6-20th. Activity will be from his home in the Sainte Mere Eglise area, which was the

first French village liberated in Normandy during the night of June 5th and 6th of 1944, by the American 82nd (American General Gavin and Brigway) and 101st Airborne Paratroopers (Screaming Eagles, General Taylor). Activity will be on all HF bands using either CW or SSB. Michel will begin each operating session on 40 meters CW, and then he will QSY (bands and/or modes) according to propagation conditions and requests. Also, Michel will monitor the 6 and 2 meters bands CW/SSB. Michel's E-mail address for skeds is: f6ips@wanadoo.fr
QSL via F6IPS, either direct to the CBA (SASE + postage) or via the French REF Bureau. Suggested Web pages to look/refer to are:
- 82nd Airborne Vets Web site at:
http://www.fayettevillenc.com/airborne82dassn/
- 101st Airborne Vets Web site at: http://www.screamingeagle.org/
- St. Mere Eglise Airborne Museum (both in English and the French languages Web Site at:
http:///www.airbornemuseum.org/uk/htm/presentation.htm

- F6IPSs' Web site at: http://perso.wanadoo.fr/michel.f6ips

* During the same period as above, a special VHF, UHF and SHF station will be active using the callsign TM6JDD, and will also entry the French VHF Championship on June 3-4th. QSL via F4OOQ.

* ADDED NOTE: Other activities are planned around this same commemoration time, especially from Sword, Gold, Omaha and Juno Beaches areas.

SPECIAL EVENT. Members of the North Country DX Association (K7ICE) and U.S. Islands Awards program (KL7USI) will host special event operations from the Yukon Territory and Alaska starting November 17th. Look for VY1/K7ICE to be on before and during ARRL's November Sweepstakes Phone Contest from near Watson Lake, Yukon. KL7USI will be on from Hyder Island, Alaska, in celebration of the USI's upcoming 10th anniversary starting around November 25th (14260 kHz). Look for mobile/portable SSB and PSK-31 operations from KL7JR's motor home (the "Icemobile"- WA license K7ICE) by WB7RBN and KL7JR (they will be fine tuning their prototype "Ice Stix" vertical antennas which they hope to market soon)! Listen for them also on the 3905 Century Club nets on 40 and 75 meters. QSL with SASE to KL7JR CBA.

SPECIAL EVENT. The members of the Belgium South Flanders DX Group (SF-DX-AG) will once again activate the callsign F/ON6JUN/P during the festivities in Ranville to celebrate the 59th anniversary of Europe being liberated (D-Day). This special event station will be on the air on all major HAM bands from Wednesday, June 4th to Saturday evening, June 7th. Their QTH will be from the garden of the "Memorial Pegasus Museum" in Ranville. Operators will be ON4AFU, ON4LBV, ON4CJV, ON4CLC, ON5SD and ON6BV. QSL via Victor, ON6BV.

SPECIAL EVENT. Jerome, F5ASD, will be active with the special callsign and special prefix, "TM5SC", to commemorate the last commercial flight of the Concorde Aircraft between PARIS and NEW YORK, May 25th through June 8th. Activity will be on 80-10 meters, satellites (UO-14, AO-27,SO-50 and others)

PSK31 on HF, VHF and UHF. Here are the following suggested frequencies for TM5SC (+/- 5 kHz or QRM): 3777, 7077, 14140, 18140, 21240, 24940, 28440 and 29330 kHz FM. VHF: 144.277 MHz. UHF: 432.200 MHz. QSL via Manager F5ASD. QSL via French Bureau or QSL direct to F5ASD: Mr. Aoutin Jerome, 14 rue Neuve, F-77410 Villeroy, France (Only 1 USD is needed for direct QSL). You could see the special QSL card on Jerome's Web site at: http://fr.groups.yahoo.com/group/f5asd-dx-news/

T33, BANABA. Bob Voss, N4CD, Public Relation Manager Banaba 2004 DXpedition, reports the following: "In March or April 2004 an International team of about 15 well known operators, including most of the award winning Cocos Island, TI9M, group, will be active from Banaba (T33) for a period of about 12 days. The main emphasis of this DXpedition will be to work Europe on all bands; especially on the low-bands. The team will use 5 stations around the clock. When the DX window to Europe is not open, the team will focus on all other areas of the world. Antennas systems with extreme low radiation angles have been specially designed by some of the world's foremost antenna experts to ensure optimum signals into Europe. We will be active from 6-160m in the modes CW, SSB, RTTY, PSK and some SSTV with linear amplifiers available, when needed. We have arranged a suitable vessel to bring us and the equipment safely to and from Banaba, a 2 day trip from Tarawa, Kiribati. It will be a completely self supporting DXpedition since little of the infrastructure of Banaba is left. All food, water, medical support, radios, antennas and electrical power equipment must be brought in by boat. A T33C license has been issued for the team and the required landing permission on this private owned island has been granted by the responsible Council of Leaders which includes an exclusively permit to stay for the purpose of radio operation to our team between now and the time the DXpedition will take place. In the company of the other islands of Kiribati, Banaba has its own complex history, as well as a unique and beautiful culture that has evolved over many generations. Where it stands apart results from its geographical location and the discovery of phosphate on the Island in the late 19th century. A web-site has been opened, and will be updated as frequently as things progress at: http://www.dx-pedition.de/banaba2004 On the web-site you can also find information about the rich history of Banaba. The QSL manager will be announced at a later date."

TK, CORSICA (Castle, Fort and Mill Op). Operators Pierre/F2WS (TK/F2WS) and Tony/TK5XN plan to activate from Corsica a Fort, a French Castle and a Mill starting June 7th and the week following. Activity will be on 40 and 20 meters SSB. QSL via F2WS, direct (envelope + postage) or via the French REF Bureau. Look for the following to be activate (reference numbers are provided for awards programs).
Mattei Mill - References numbers are: DMF 2B.001, IOTA EU-014, DIFM TK-001 and DDCF 2B-08 Canton de Capobianco.
It will be the first Mill activity in Corsica.

Centuri Castle - References numbers are: DFCF 2B-014, JN42QX, IOTA EU-014, DIFM TK-001 and DDCF 2B-08 Canton de Capobianco.

Fort Lacroix - References numbers are: 2B-015, JN42RQ, IOTA EU014,
DIFM TK-001 and DDCF 2B-01 Canton de Bastia.

VK9X, CHRISTMAS ISLAND. Your Editor met Charlie Summers, W0YG, at the
Dayton HamVention, and he told us that he will be active as VK9XG from
October 26th to November 8th this year. Charlie states that he will be
mainly concentrating on the low bands and RTTY. Also, Force 12 is sponsoring
the antennas and Lance Johnson Engineering has supplied the necessary preamp
and terminating resisters to phase a pair of pennants for the USA. He will
not be on 24 hours a day but will do his best to make 160 and 80 meters a
real possibility for Stateside hams. QSL via W0YG, please direct.

VP5, TURKS AND CAICOS ISLANDS. Paolo, IK2QPR, informs OPDX that he will
be active from Providenciales Island (IOTA NA-002) as VP5/IK2QPR from
August 16-23rd. QSL via his home callsign.

XU, CAMBODIA. Danny/M0GMT (aged 19) and Oliver/DJ9AO (aged 21) who are both
members of the WWYC (World Wide Young Contesters Club, http://www.wwyc.net),
will be operating from Cambodia, from August 4-18th. Their callsigns are
yet to be confirmed. QSL is via G3SWH, bureau or direct (QTHR). They will
be operational on all bands 160-6 meters, CW and SSB only. For further
information and updates, please visit the DXpedition Web page at:
http://www.geocities.com/dxpedition2003

XW, LAOS. Champ, E21EIC (aka XW1IC), informs OPDX that he may be on 6
meters very soon from here. Hide, JR5XPG, is shipping a 6 meter 5 element
yagi to Champ's address in Laos. Operating on 6 meters will be new for
Champ because he is not allow to be active on that band in Thailand. He
is expected to be there June 3-23rd (possibly to the 30th).

ZA, ALBANIA. Remember that the Italian team of operators will be active
this week (May 29th through June 3rd) signing ZA3/home call. QSL via
their home callsign.

Late Announcements for the CQ WPX CW Contest
(Mainly for QSL Routes and added Interesting Facts)

4L8A - Vakhtang/4L8A was active from Georgia as a SOSB (20m) HP entry.
QSL via OZ1HPS.
8P1A - Tom/W2SC was active (from Barbados) as a SOAB entry. QSL
via NT1N.
8S5A - Ingo, SM5AJV, was active from Sweden as a SOAB entry. QSL
via SM5AJV.
9K9X - Al-Ajmi/9K2RR was active from Kuwait as a SOSB (40m) entry.
QSL via 9K2HN.
A61AJ - Sejo/T97C was active from U.A.E as a SOAB HP entry. QSL
via N4QB.
C8A - Vlado, ZS6MG, was active from Mozambique as SOAB HP entry.
QSL via ZS6MG: Vladimir Karamitrov, P.O. Box 1788, Bramley 2018,
South Africa.
CO8LY - Eduardo/CO8LY and Juan/CO8TW was active (from Cuba) as a
Multi-2 entry. QSL is via EA7ADH.

CT3EE - Cornelius "Con"/DF4SA, was active from Madeira Island as
a SOABLP entry. All QSOs will be confirmed via the bureau
automatically. Return QSLs are not necessary. If anyone still
wants a direct QSL, send it to: JOSE LUIS PINTO CAMACHO,
CAMINHO DO MONTE; 66 - Madeira Island, FUNCHAL 9050-084,
PORTUGAL.
CT9A - Sampola/OH6RX was active from Madeira Island as a SOAB HP
entry. QSL via OH6RX. He will be here until May 27th.
E21CJN - Thamrougsan/E21CJN was active from Thailand as a SOSB(15m) HP
entry. QSL via W3PP.
E21EIC - Champ/E21EIC was active from Thailand as a SOSB (15m) entry.
QSL via E21EIC.
HS0GBI/2 Cy/HS0GBI was active from Thailand as a SOSB(40m) LP entry.
QSL via home callsign.
HS4BPQ/9- Yong/HS4BPQ was active from Thailand as a SOSB (20m) entry.
QSL via E21EIC.
LU5FF - Javi/LU5FF was active as a SOAB LP entry. QSL via EA7JX.
OD5/OK1MU-Pavel/OK1MU was active from Beirut as a SO HP entry. This
will be his last contest from Lebanon. He will go QRT about
August 1st. QSL via the Bureau or direct via OKDX Foundation
or OK1TN.
PX2W - Hamilton/PY2YU was active from Brazil as a SOSB (15m) entry.
QSL via: Hamilton Oliveira Martins, Rua Rui Coelho de Oliveira
Filho, 131, Jd. Panorama, 18030-020 Sorocaba, SP, Brazil.
R300SP - Operators RW1AC, RV1AW, RA1AIP and UA1ARX were active from
Russia as a Multi/2 entry. Also, celebrating 300 years of
Saint-Petersburg. QSL via RU1AE.
SI9AM - Operators SM3CER, SM3CVM, SM3EAE and SM3FJF were active from
Sweden as a Multi-Single entry. QSL via SM3CVM, direct to CBA
or via the bureau.
TI5N - Bill/W8QZA was active from Costa Rica as a SOAB QRP entry.
QSL via W3HNK.
TK/S52A - Franc/S59AA was active from Corsica as a SOAB LP entry. QSL via
S59AA.
TM7A - Laurent/F8BBL is authorized to use this callsign from France
between May 24th and June 7th, and during the contest. After
the contest, look for activity on HF + WARC and 6m. (CW/SSB/
RTTY/FM). QSL via F8BBL (Bureau or direct).
TO5AA - Activity is from FM5BH's QTH on Martinique as a SOAB HP entry.
QSL via RW3RN. QSL direct by E-mail request if worked 3 or
more QSO in the contest. E-mail address is: RW3RN@tmb.ru
VC1R - Andy/AE6Y was active from VE1JF's QTH in Nova Scotia during
the WPX CW Contest. QSL to VE1JF.
VC6A - Gary/VA7RR was active from the VE6JY station as a SOSB (20m)
entry. QSL via VA7RR.
VC6X - Bill/VE6BF was active from the VE6JY station as a SOSB (15m)
entry. QSL via VE6BF.
YM2ZF - TA2ZF (ex-M0SDX) and UA9CLB were active from Istanbul,
Asiatic Turkey, as a Multi-Single entry. QSL via UT2UB.
ZM1A - Operators ZL3CW, ZL1GO and ZL1GO(JA4EKO) were active on all

bands. QSL via ZL1AMO.

*** ADDED NOTES ***
Visit Bill's, NG3K, "Announced DX Operations" Web page for QSL and upcoming DX/Contest activity at: http://www.ng3k.com

Zrinko, DL/VE3ZIL, informs OPDX to look for fresh QSL info from the CQ WPX CW Contest to be published on the following Web page on Tuesday, only two days after the end of the contest. Please visit: http://www.contesting.info

BARF= PUKE.

Don Quixote (Herby) is a very intelligent individual. He has the sense NOT to continue his association with the misfits on 313. More power to him.

And the poster is quite correct. The various MM/Intercon nets that are NOW ON 300 used to operate on 313. And thanks to those misfits were run off.

KV4FZ....he was shut down, license removed. 2 years or so later he took his test, passed, went before FCC judge, was allowed to become a ham again. Got a call....applied to FCC for Vanity....KV4FZ...imagine that. Herby is back.

BUT NOT PLAYING THE SAME GAMES.

Heard him on 160 last season.

If it transmits on a band you are allowed to transmit on yes. Let's say 2
meters or 440. If it transmits on 10m to 10 meters then I believe you
can't. You can of coarse LISTEN on 10m without any license.

Ask them first via e-mial to be sure you will be transmitting on a band
you are ALLOWED to use.

YOU may only transmit in band. If the repeater's input in within
your license class, you may use it. The output is the owner's
responsibility. You are liable for what YOU say, however. <:

Source record: 67028

Offered is a high quality antenna tuner made by Tokyo Hy-Power company
famous for their excellent linear amplifiers.

This tuner is in very good condition with only a few marks from years of
faithful use. Tuning is very quick and virtually effortless. Power
settings are 20W and 200W making it a great choice for QRP or QRO operation.

The tuner will tune coax or random lines and it's small enough for field use
and large enough for you shack.

Tuner is housed in a rugged metal cabinet.

I will ship to lower 48 and Canada for $125USD.

So did the one that needed a -1.6kHz shift. It all depends on which audio
frequencies one wants to pass - then take the middle of that range and that
becomes the shift.

Not if the computation is improper. Just because the ARRL is "in bed with" the
FCC doesn't automatically mean that they do everything correctly.

I'd bet that ARRL ran it by the FCC before publishing. Normal procedure. That way there's never a false move or incorrect procedure published in such cases. And no egg on face. ARRL doesn't like to get caught with egg on face.

BARF
...../////////////////////////////
There is evidence that James O'Brien, W4AMP, once a BARF "enforcer" and
member is now under indictment for Felony Stalking. This can be verified by
looking at the Cobb County Sheriff Dept. web page. His charges are listed
there and he is, according to the site, awaiting trial this July.
The web site also shows that his wife, WA4SEX was also arrested for
stalking, misdemeanor.
Not mentioned is the search warrant the two-county detectives served on him
while he was living in Hiram, GA. They found ample evidence to charge him
with Felony Stalking and even, not surprisingly, found a bit of a
"controlled substance" in his home. They then added a second charge.
Mr. O'B spent around 33-35 days in jail and upon his release he was
re-arrested to face charges in the neighboring county. He allegedly
explained his time away from the radios by telling area Hams that he was out
of town on "business."
Mr. O'Brien is currently facing some serious loss of liberty as a result of
his illegal activities and several of us wish him a long journey.
So much for a fellow BARF member.

Kill filters as you are implementing are the way. Now if I could just
have thread filters. I guess I could do a key word seach but that
takes cpu resources.

Lycos address is a spam trap.
....

The oldster posting as Stagger Lee has been bounced. He had his account
canceled. W4JLE will have to lick his wounds and try another tack.
The REAL Stagger Lee is, however, still in the area.

Your message headers show this,

X-Newsreader: Microsoft Outlook Express 6.00.2800.1158
X-MimeOLE: Produced By Microsoft MimeOLE V6.00.2800.1165

And while granted that Outhouse Express is definitely one of if
not the worst Usenet news reading program ever foisted off on
unsuspecting users, it does have the ability to filter based on
the "Subject:" headers. Or at least that is what I'm told, since
I certainly do not use it myself.

That is essentially a "thread filter".

Nothing wrong with that in my book. If it comes to pass that we all then
set the cxr to 1.5KHz down, at least we are all able to communicate
with each other regardless of specific center frequencies based on
individual signal bandwidth. Does anyone really think that if

a ham's signal cxr is down 1.5KHz and that ham is operating
with a narrow filter which results in his individual center freq being
less than the FCC stated center freq, that the FCC would care one
iota?

Cheers,
Bill K2UNK

The Military Affiliate Radio System used the 1.5 as a standard. Unless
otherwise stated by the FCC I too will use the 1.5 as a standard.

With Uncle Charlie ya never know. Outfit I used to work for operated
several base stations some with callsigns beginning in KAA. For many years
all the operators would sign off with "K Double A...". Then one day an FCC
rep cited one of the stations as being in violation for not properly giving the
callsign. So the signoff was changed to "K A A...."
Then a few years later a different FCC rep did just the reverse- he said it
would be better to give the callsign as had originally been done! So the chief
of communications had to write a letter requesting clarification, and the
original method was approved.

Right hand, left hand.

Your reasoning is flawed. The necessary offset is **not** simply equal to half the bandwidth. A 'typical' baseband SSB audio spectrum is 0.3-2.7 kHz, a bandwidth of only 2.4 kHz, with a centre frequency of 1.5 kHz, because it doesn't extend down to zero Hz.

The bandwidth of the allocated channel is irrelevant to the above calculation, although, of course, our bandwidth must be less than 2.8 kHz, not more, but that is a separate issue. The offset is the nominal centre of the audio, not of the assigned channel. Of, course knowing that NATO specifies it as 1.5 kHz doesn't hurt.

The fact that there are hams who can't follow this does indeed prove that the FCC made an actual mistake in specifying it the way they did.

It appears to me that if FCC intended their specification to be strictly
followed they would have had to specify strictly the baseband audio
characteristics and even the xmtr SSB filter characteristics. Otherwise,
finding the center of the channel will be a bit elusive.

Looks like if one lands inside the 2.8 khz passband and doesn't wander too
far outside it on speech peaks it'll have to be OK.

3459. So. Cal. 2-meter activity

Hi all. After an almost 10 year hiatus I think I want to return to the airwaves. However, after listening for activity here in the San Gabriel / Pomona Valley, I see things don't seem the way I remember them. There used to be tons of activity, espescially on 147.21 (Sunset Ridge). Where did everybody go? Bob, KD6ECU

why would i need to hide

nothing illegal about joking,click on that link you will find nothing

it was sarcasm in ref to the fact that for many years NORAID operated in the
US collecting such money and now suddenly the americans are against
terrorism

Is any company making MURS radio equipment yet?? It is a great new way to communicate. So much better than CB or FRS.. (151 Mhz.)

If you have any info, please POST!! Nice place to talk before you get your Ham license. (NO license is required for MURS. 151.820 Mhz., 151.880 Mhz..) I believe there are 5 usable channels on 150.

If you can still find one at the Shack, 19-1210 {mobile), 19-1206 (portable).
Lowes or Fry's: Columbia MURS & MURS-2. These do go on sale from time to time.
The helical dummy load antenna sucks. Replace with BNC connector.

> If you have any info, please POST!! Nice place to talk before you get
> your Ham license. (NO license is required for MURS. 151.820 Mhz.,
> 151.880 Mhz..) I believe there are 5 usable channels on 150.

Yahoo Groups: [MURS-OPEN] [murs}

151.82
151.88
151.94
154.57
154.60

You will find the last two are still busy in larger areas.
Use the first 3. Hams will still have a usable SWR there.

NOTE: It is a Part 95 (CB) band along with FRS. MURS has a
two watt TPO limit, no limit on antenna. FRS is .5 watts
with a fixed antenna. I have done over 7 miles from the
roof of a six story building with a $10 Cobra FRS!!!

They heard that you were coming back, so they split! :-)

Usage in general has declined over the past 5 years. There are two repeaters that I monitor (not 2m) in SoCal that we're lucky if we get an unfamiliar user once a month and a familiar user more than twice a month - i.e. the machines are idle 99% of the time (but are kept for emergency communications purposes). These repeaters I refer to are coordinated as "open."

3467. Opinions on service for Alinco DR-570

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-27 21:06:06 UTC
From: olllllllo@sbcglobal.net
Message-ID: <2rQAa.4$3d.0@newssvr32.news.prodigy.com>
Source record: 66964

Hello--

I have an Alinco DR-570 2m/70cm radio that,
when transmitting on high power, the display
will dim to arond 50% brightness, and the power
output meter will quickly go full scale, then drop
to zero, then go full scale--repeatedly.

I believe that the radio is trying to protect itself
from damage.

On low power, all seems well, except that the
display dims more than I seem to remember it
dimming during transmit.

Does anyone have knowledge of a good place to
send it for analysis and/or repair? It is approx 10
years old, so I have to consider the cost of a new
radio over the cost of repairing this one.

Thanks for any helpful input!

Approved by _whom_? Must have been someone who didn't bother
to check the Monitoring Procedure Manual on what acceptable
call sign format is, as I had to do when the exact same
situation came up in California.

I would inadvertantly copy the above call signs as: KDA..., and
KA1KDQ.

If it were customary to insert the word "single" prior to the single
use of a letter, then the confusion of "double" would go away, except
in programming where "single" is single precision - a number.

Life would be simpler if people just said it as it appears on their
license.

Is that too hard?

in some cases it is faster to say the phonetics than the section name.
"Western Massachusettes" is harder than saying w-m-a, and whiskey-mike-alfa
is probably about the same as the whole name... and for some sections its
better to spell it out than let the other guy guess at the abbreviation for
the log. you would be amazed at how many people don't know that 'me' is
maine and 'ma' is massachusetts, let alone sort out the valleys in
california!

3480. MANUAL for Standard C568A HT Tri-Band

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-28 21:43:22 UTC
From: elisha_kobre@yahoo.com
Message-ID: <a481320f.0305281343.4ceb1894@posting.google.com>

I lost my manual for the Standard C568A HT.
Does anyone have one, or know where I can get
one.
Thanks,
Elisha

>If one had 2 Q's in their callsign, say KA1KQQ, could you say KA1K Double Q ?

You could say whatever you want, but each letter has to be
separate when it's "legal ID" time and the phonetics, if used,
must be such that the letter is readily identifiable in the
English language. At least that was what the book said when I
checked it last.

I am very proud to present, to all my
friends on 75 Meters (and my fellow14.313
war veterans) the **weirdest** thing I've seen all day:

Watch this one first:
http://www7.ocn.ne.jp/~helpme/flash/chinko_anesan.swf

Then the english translation:
http://www7.ocn.ne.jp/~helpme/flash/chinko_eng.swf

Makes you look at the land that makes Icom Yaesu and
Kenwood in a WHOLE DIFFERENT LIGHT....grin!

(..it;s almost as funny as listening to shortwave
kook James Lloyd on 9.331mHz at night.)

Yes folks, the ORIGINAL 3-Ring'ed Circus Meister
of late night AM Radio will be hosting Coast to Coast
AM this evening and Friday. (5/29 & 5/30)

Expect all you favorite guests to pay a
visit, including the "Face on Mars" shill
himself...Richard Hoagland!

Forget about Tommy Toobs and the other
late nite JO's on the upper half of the 75 Meter
ham bands! This will be MUCH MORE FUN
to listen in on.

(perhaps Wayne Green will call in???)

I know it is not funny, but such is why I still drive Chevrolets after 35 years! I just finished installing an IC706 in a S-10 and, like always in the past, the HF is quiet, performs as expected, and has no issues with RF. I have had some odd things to happen (such as windshield wipers a-wipin' and lights coming on when they shouldn't, but that was easily cured with a choke. I looked at a RAV4 because I thought they were "cute". I think I'll stay with Chevy.

YUP!! Chevy all the way!!!! Before the days of imports, we used to joke
that we could hear a Ford come by while we were listening to the AM
radio--still happens sometimes. Chevrolets always seemed (or all GM cars
seemed to be) to be "tighter" in the RF department. I could put a
radio in a Ford and the ignition noise would be horrific. Put the same
radio in a GM car--quiet as
a mouse. Seems to still be that way after all those years.

Exactly!! By the time the Toyota driver figured out why his car/truck
knocked off, you would be
long gone in most cases. He *saw* some driver talking on a radio nearby?
Doubt it. Hard to prove what happened. I do know of a guy that enjoyed
blowing out teenagers' in-car boom-boom
stereos with his KW+ linear.

Stealing toilet paper? Man, what is this world coming to? Speaking of Dayton, how was it? I've never been there yet (maybe some day). Used to always hear hams on 2 meters talking of their adventures. Haven't heard a peep on radio thus far, but it helps if one flips the power button to "on".

Kenwood TS-950SDX & IF-232
Can anyone suggest an excellent program for the above radio?
I have ARCP 5000 software for the R5000 reciever, but it won't work
with it at all.
I currently use "KMJ Control", but it only partially works and "Smart
Kenwood Control 3.23" is the same.
Thanks de KI4DN

I have a HamStick on my new Subaru Forester. When I transmit 100W in parts of the 20m band my windshield wipers operate. I avoid 20m now, but I also know that other bands might be doing something else to the computer, so I never operate while driving.

Have no trouble in my Subaru Legacy, of course I did have to put lots of ferrite beads around to clean it up. Thats whats wrong with most of you guys systems, not clean!! Try exact proper lengths on coax...plenty of grounding...ANY< I SAY any of these foreign cars can be used with 500 watt ham any where, if you just get em RIGHT... If all else fails, cover the computer module and ground it ! 73 Murray

Quite true, I haven't grounded the radio chassis, and I haven't placed ferrite beads anywhere. I did keep my coax as short as possible, though.

Where should the ferrite beads be placed? I'll put a choke on the power and power ground wires close to the radio and get a good chassis RF ground. Are there places in the auto wiring that need some chokes?

Certain mfgr's are BSing owners. I dunno about Subaru but BMW says their warranty only covers defects in materials and workmanship. So if your new BM's computer controlled brakes put you in a ditch because it is susceptable to common RFI then that's a design fault and not covered.

3509. Question about HTX-10 and grounding

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-30 16:58:20 UTC
From: nenlaven@webdreamland.com
Message-ID: <97503afa.0305300858.cc24782@posting.google.com>
Source record: 66856

I have an HTX-10 that I am using as a base station. The antenna line runs out of the back of it, out a window, to a half wave dipole that is strung up in my yard. Do I need to ground any of this? None of the articles I have read about dipoles mentioned having to ground them, and the operating manual for the HTX-10 doesn't mention the need for any grounding, and if I DID have to connect it to a ground, would I do it via the antenna line? I'm not having any problems using it, it receives and transmits fine. I just want to make sure I am not setting myself up for something bad in the future by not having it grounded.

Thanks,
KE4RCA

Yes. believe it......some hams are SO F-CKING CHEAP
that they will steal toilet paper at the hamfests. I've seen
it at Shelby NC. Dayton was a washout. Rained all
weekend, outside tailgaters left on saturday and whoever
was left had obscenly high prices for radios. One guy
wanted $300 for a 20 year old Tempo 2020 HF rig.
Ha Ha Ha! good luck finding a sucker for that "sweet
deal" - he should have tried e-Bay, more suckers and
shill-bid auctions per mouse click than you'll ever find!
As fo us, this is/was the LAST YEAR we will ever goto
Dayton. It's too damm expensive and too much of a
hassle to get into and out of the Hara Arena. No fun.

This is not 100% true. I work for a State Forestry Unit here in SC. We have installed a Motorola unit in a Honda, Toyota and just about every brand of american vechicle you can name.

In fact the Toyota dealer looked up a Service Bullentin and helped us ensure we kept power wiring and antenna cable away from any of the computer stuff in the vehicle. They showed us where the power wiring and input cables for the on car computer controls were located for no cost. this on a 2003 toyota.

Verify your facts gentlemen..

Mitch

Hi ALL

A bunch of VK guys are "heading into the outback" on the Queens BirthDay weekend starting Friday 6th June and returning Monday 9th June.

We are heading to the corner of VK2, VK4 and VK5.

We'd like to make contact with as many people as possible so if you hear us calling "CQ-DX from Camerons Corner", you know we are smak in the middle of nowhere

Frequencies and times we will be working can be found on

http://www.bmarc.oz-hams.org/camerons.html

If You DO make contact, can you take the time to post to our DX forum and let people know when and on what freq you heard us..

Please post in the DX-Expedition forum on

http://www.radiocorner.net

Ciao Pete..vk2yx

That's probably a non-issue these days. The new cars and trucks don't have high voltage distributors like in the old days. Instead of long stretches of 40KV wires from the distributor, there are individual coils at each spark plug and the distributed juice is 12 Volts. That's a _much_ cleaner way to do things - especially as far as RFI is concerned.

Off topic trolling?

Is the above author the idiot that always rants on amateur radio about how he's innocent and doesn't do anything to justify people harnessing him?

Oh boy oh boy !!!

Looks like the Police in NC and the FBI just scored
another Grand Slam folks!

Right wing Militialoon and "Christian Identity" whackjob
Eric Rudolph was JUST APPREHENDED in NC.

One by one their GOING DOWN...Ha! Ha! Ha!

Makes you wonder when the OHS is going to cut the head from off
the snake and shut down "pastor" Pete Peters Xian Identity
church of hate in Co? That should be the next target of
an armed 300 man BATF raid!

Gee...I bet ya they will be *crying the blues* on the
ERPN and Liberty Net on 75M over this development
tonight eh?

Olympics Bomb Suspect Rudolph Arrested
05/31/03 11:10 AM
By KRISTEN WYATT, Associated Press Writer

MURPHY, N.C. - Eric Rudolph, the longtime fugitive charged
in the 1996 Olympic Park bombing and in attacks at an
abortion clinic and a gay nightclub, was arrested early
Saturday in the mountains of North Carolina, the Justice
Department said.

The FBI confirmed Rudolph's identity through a
fingerprint match, authorities said. "Eric Robert Rudolph, the
most notorious American fugitive on the FBI's most wanted
list, has been captured and will face American justice,"
Attorney General John Ashcroft said Saturday.
"This sends a clear message that we will never cease
in our efforts to hunt down all terrorists, foreign or
domestic, and stop them from harming the innocent."

Rudolph was captured after sheriff's deputies in western
North Carolina spotted a man digging in a trash bin in the
small town of Murphy at about 4:30 a.m., said Special
Agent John Iannarelli in Washington. He said the man
appeared to be homeless. When the deputies approached

him, they recognized him as Rudolph.

Rudolph had been on the FBI's 10 Most Wanted list
and had eluded a massive manhunt for five years, much
of it in the western North Carolina mountains near
where he was arrested Saturday. The FBI had offered
a $1 million reward for his capture.

The 36-year-old Army veteran and experienced outdoorsman hadn't
been seen since July 1998 after he took supplies from a health store
owner in North Carolina. Authorities believed he had fled into the
mountains, and as more time passed with no reported sightings
of him, some believed he must be dead.

They spent years searching the hills and caves around
Murphy for any trace of Rudolph. Early in the search,
they ran across some camping sites believed to be his
and found cartons of oatmeal and raisins, jars of peanuts
and vitamins, and cans of tuna they said were the same brands Rudolph ate.

The 1996 bombing at the crowded Olympic park during the
summer Olympics in Atlanta followed closely on the heels
of the Oklahoma City federal building bombing and stunned the world.
The bomb was left hidden in a knapsack in the crowded
Centennial Olympic Park on July 27, 1996.
When it exploded, it killed one woman and injured 111 other people.

Two years later, Rudolph was charged with that attack
and in three others - at a gay nightclub in Atlanta and at
an office building north of Atlanta in 1997, and at an
abortion clinic in Birmingham in 1998. One police officer was killed.
In all, the bombings killed two people and wounded more
than 100 people, according to the FBI.

Rudolph, a Florida native who moved to western North
Carolina in 1981, was believed to adhere to Christian Identity
a white supremacist religion that is anti-gay, anti-Semitic
and anti-foreigner. Some of the four bombs he is charged
with planting included messages from the shadowy
"Army of God." The search for Rudolph began a day
after the Birmingham blast. He was initially sought as a
witness: A gray 1989 Nissan pickup truck registered
in his name was seen near the clinic following the explosion.
He was tied to the bombings when authorities who searched
a storage locker he had rented in Murphy found nails
like those used in the clinic attacks.

At its height, the search for Rudolph in the mountainous
region in western North Carolina, just over the
Tennessee border, included more than 200 federal agents.
In 2000, it was scaled back to less than a handful of
agents working out of a National Guard Armory just outside Murphy.

Pockets of western North Carolina have had a reputation as a haven for right-wing extremists. Some there mocked the government's inability to find Rudolph with bloodhounds infrared-equipped helicopters and space-age motion detectors and some said they would hide him if asked.

The FBI had said it believed Rudolph was somewhere in the Nantahala National Forest, living on his own, breaking into vacant vacation cabins, stealing from local gardens.

Jeff Lyons, whose wife, Emily, was critically injured in the women's clinic attack in Birmingham, said they had never given up hope that Rudolph would be caught. Saturday morning, a friend called after hearing the news.

"I turned to Emily, and I said 'What news would be worth being woken up for?'" he said. "This is indeed one of the best days we've had in quite some time."

==========
"And from Richard Jewell"

"In its rush to show the world how quickly it could get its man, the
FBI trampled on my rights as a citizen." (October 28, 1996)

On July 27, 1996, the explosion of a pipe bomb at Centennial Olympic
Park in Atlanta killed one person and injured more than 100 others,
including a Turkish cameraman who suffered a fatal heart attack after
the blast. Police were warned of the bombing in advance by an
anonymous caller, and Olympic security guard Richard Jewell was the
first to locate the bomb. However, the bomb exploded before it could
be disarmed and the park evacuated. Jewell, initially hailed as a
hero, soon became the FBI's chief suspect in the bombing. The evidence
against him was circumstantial and dubious at best, so he was never

charged, but the media picked up on the investigation and effectively labeled him the bomber. Finally, after 88 days, the U.S. Justice Department formally exonerated him, expressing "regret" for shining such an unfavorable light on him. On October 28, Jewell broke his silence to condemn the FBI and the media's handling of his case, which he called a "nightmare" that almost destroyed his life. The FBI later charged Eric Robert Rudolph with the Centennial Olympic Park bombing. Rudolph is also held responsible for the bombing of two abortion clinics and a gay and lesbian bar in 1997 and 1998. Believed to be hiding in the mountainous wilderness in western North Carolina where he grew up, FBI and state and local agents have yet to capture Rudolph, who is an experienced woodsman.

I wonder how many MILLIONS (or did it reach a BILLION) they spent trying to catch Eric?

I always said if a bank robbery was called in at the same time as a picket at an abortuary they'd respond to the abortuary first. There could be several reasons for that. One is that many cops earn extra pay playing security guard at the abortuary. Another reason might be the close kinship some of them have for those who murder the most innocent among us. :-)

I'm glad you posted this. It shows that Eric was the NEW suspect after
the FBI botched the Richard Jewell accusation.

I'm sure they think they have the RIGHT man now. After all they have
brothers and sisters in the baby-murder business and have more brothers
and sisters in the sodomite and lesbian bars that they have to take
revenge for.

Who better to blame it on that one who calls himself a Christian and
doesn't swallow the lie that the "Jews" of today are God's ONLY chosen
people! I'll bet he may have even doubted the fact that SIX MILLION
jews were killed in the holocaust. Boy, THAT would really be reason to
GET HIM!

Your logic is so f-cked up the ass that it
would be an amazing thing if you can walk
errect and not have your knuckles dragging
in the dirt alongside of you. Moron.

Want to see a few other "militaloons" who are
cryin-the-blues-river over the arrest of their
"big hide & seek hero" Eric Rudolph....?

Go to the link below and read more
eye-bulging rantings of sheer
ignorance by some there. American Taliban fer sure!

3541. Dimmie Can Do It

Newsgroup: rec.radio.amateur.misc
Date: 2003-05-31 20:25:31 UTC
From: Anus On Line <"You've Got Mail"@anon.com>
Message-ID: <bbb33r$1i1$0@pita.alt.net>

A small Kentucky Wild Animal Park had acquired a very rare species of gorilla. Within a few weeks, the female gorilla became very "in the mood," and difficult to handle.

Upon examination, the park veterinarian determined the problem. The gorilla was in heat. To make matters worse, no male gorillas of the species available.

While reflecting on their problem, the park administrators noticed Dimmie O'Brien, a part time redneck intern, responsible for cleaning the animals' cages.

Dimmie, like most rednecks, had little sense, but he possessed ample ability to satisfy a female of ANY species. So, the park administrators thought they might have a solution.

Dimmie was approached with a proposition.

Would he be willing to have sex with the gorilla for $500?

Dimmie showed some interest, but said he would have to think the matter over carefully. The following day, Dimmie announced that he would accept their offer, but only under three conditions.

"First," he said, "I don't want to have to kiss her.

Secondly, you must never tell anyone about this."

The park administration quickly agreed to these conditions, so they asked what was his third condition.

"Well," said Dimmie, "you gotta give me another week to come up with the $500."

First, I'm not crying the blues over Eric's capture. However, I know that the time is coming, if it isn't already upon us, that anyone who has the courage to attack, even verbally, this wicked system that promotes sodomy while condemning prayer, promotes the murder of the most innocent among us, the tiny, helpless unborn, and occasionally the "just born", while protesting the commanded death penalty for murderers, rapists, kidnappers, etc. will be put to death. The SUPREME court has not convened yet and the final judgment has not been meted out.

We're going to hear quite a bit about Eric being a "right-wing" something or other. Every time you hear the use of the words, right-wing or extreme right think of the following scriptural text from the NASB.

Ecclesiastes 10:2 A wise mans heart directs him toward the right, but the foolish mans heart directs him toward the left.

I might as well throw in a couple more.

Proverbs 29:9 When a wise man has a controversy with a foolish man, The foolish man either rages or laughs, and there is no rest.

Proverbs 29:11 A fool always loses his temper, But a wise man holds it back.

This is going to get LOTS of media coverage.

Wonder why we didn't get much coverage of the Jews standing on the top of one of the buildings near the WTC laughing and posing and making a video of the crashes in the background?

Or the fact that the building had been owned for less than a year (just months) by a Jew and insured to the hilt?

Wonder why it wasn't well publicized that the insurance policy was for a BILLION dollars?

Or that the 3,000 or 4,000 Jews who normally worked at that building had been told not to report to work that day?

Wonder why the ONLY Jew killed at the WTC was a fireman who had apparently not been told not to respond to a fire at the WTC that day?

Yep. We get LOTS of publicity if it is of a "right-wing" individual doing something wrong. We get practically NO coverage if it is of a "left-wing" individual doing something wrong.

As the old saying goes, "It'll ALL come out in the wash!"

Al

Who collected on the claim for that Billion Dollar insurance policy ?
Where is the audit trail? What company underwrote this alleged policy?

Please provide CONCRETE PROOF of your statements above.
No internet banter please, but REAL PROOF which
substantiates your statement above without any doubts whatsoever.

> Or that the 3,000 or 4,000 Jews who normally worked at that building had

>> Olympics Bomb Suspect Rudolph Arrested
>> 05/31/03 11:10 AM
>> By KRISTEN WYATT, Associated Press Writer
>>
>> MURPHY, N.C. - Eric Rudolph, the longtime fugitive charged
>> in the 1996 Olympic Park bombing and in attacks at an
>> abortion clinic and a gay nightclub, was arrested early
>> Saturday in the mountains of North Carolina, the Justice
>> Department said.
>>
>> The FBI confirmed Rudolph's identity through a
>> fingerprint match, authorities said. "Eric Robert Rudolph, the
>> most notorious American fugitive on the FBI's most wanted
>> list, has been captured and will face American justice,"
>> Attorney General John Ashcroft said Saturday.
>> "This sends a clear message that we will never cease

>> in our efforts to hunt down all terrorists, foreign or
>> domestic, and stop them from harming the innocent."
>>
>> Rudolph was captured after sheriff's deputies in western
>> North Carolina spotted a man digging in a trash bin in the
>> small town of Murphy at about 4:30 a.m., said Special
>> Agent John Iannarelli in Washington. He said the man
>> appeared to be homeless. When the deputies approached
>> him, they recognized him as Rudolph.
>>
>> Rudolph had been on the FBI's 10 Most Wanted list
>> and had eluded a massive manhunt for five years, much
>> of it in the western North Carolina mountains near
>> where he was arrested Saturday. The FBI had offered
>> a $1 million reward for his capture.
>>
>> The 36-year-old Army veteran and experienced outdoorsman hadn't
>> been seen since July 1998 after he took supplies from a health store
>> owner in North Carolina. Authorities believed he had fled into the
>> mountains, and as more time passed with no reported sightings
>> of him, some believed he must be dead.
>>
>> They spent years searching the hills and caves around
>> Murphy for any trace of Rudolph. Early in the search,
>> they ran across some camping sites believed to be his
>> and found cartons of oatmeal and raisins, jars of peanuts
>> and vitamins, and cans of tuna they said were the same brands Rudolph ate.
>>
>> The 1996 bombing at the crowded Olympic park during the
>> summer Olympics in Atlanta followed closely on the heels
>> of the Oklahoma City federal building bombing and stunned the world.
>> The bomb was left hidden in a knapsack in the crowded
>> Centennial Olympic Park on July 27, 1996.
>> When it exploded, it killed one woman and injured 111 other people.
>>
>> Two years later, Rudolph was charged with that attack
>> and in three others - at a gay nightclub in Atlanta and at
>> an office building north of Atlanta in 1997, and at an
>> abortion clinic in Birmingham in 1998. One police officer was killed.
>> In all, the bombings killed two people and wounded more
>> than 100 people, according to the FBI.
>>
>> Rudolph, a Florida native who moved to western North
>> Carolina in 1981, was believed to adhere to Christian Identity
>> a white supremacist religion that is anti-gay, anti-Semitic
>> and anti-foreigner. Some of the four bombs he is charged
>> with planting included messages from the shadowy
>> "Army of God." The search for Rudolph began a day
>> after the Birmingham blast. He was initially sought as a
>> witness: A gray 1989 Nissan pickup truck registered

>> in his name was seen near the clinic following the explosion.
>> He was tied to the bombings when authorities who searched
>> a storage locker he had rented in Murphy found nails
>> like those used in the clinic attacks.
>>
>> At its height, the search for Rudolph in the mountainous
>> region in western North Carolina, just over the
>> Tennessee border, included more than 200 federal agents.
>> In 2000, it was scaled back to less than a handful of
>> agents working out of a National Guard Armory just outside Murphy.
>>
>> Pockets of western North Carolina have had a reputation
>> as a haven for right-wing extremists. Some there mocked
>> the government's inability to find Rudolph with bloodhounds
>> infrared-equipped helicopters and space-age motion detectors
>> and some said they would hide him if asked.
>>
>> The FBI had said it believed Rudolph was somewhere in the Nantahala National
>> Forest, living on his own, breaking into vacant vacation cabins, stealing
>> from local gardens.
>>
>> Jeff Lyons, whose wife, Emily, was critically injured in the women's clinic
>> attack in Birmingham, said they had never given up hope that Rudolph would
>> be caught. Saturday morning, a friend called after hearing the news.
>>
>> "I turned to Emily, and I said 'What news would be worth being woken up
>> for?'" he said. "This is indeed one of the best days we've had in quite some
>> time."

Freedom is self-explanatory. So is Democracy. The United States has a history of unexcelled freedom, so much so that thousands of immigrants are crying to come to this country every day. Some even die trying.
Look at the 750,000 deaths Saddam inflicted...and this is a conservative estimate. Ask the recently freed Iraqis.
One step at a time....
...and what did YOU do on 9-11? Wring your hands and wonder what WE did to cause the nutcases to hate us?

By the way...we are the strongest militarily. Thousands of brave men gave their all for this. We have no gulags, we don't gas our citizens to death, we don't cut off the hands of women who wear nail polish and we are not governed by a bunch of hot-headed religious extremists. After all, you Liberals won't even allow, or try to disallow, our school kids saying the Pledge Of Allegiance because it has, "Under God" in it.
You Liberals would have whined that the reason we freed the Jews from the prison camps of WWII was to get at the gold the Nazis extracted from their victims' teeth.

LIberals are programmed to be hand-wringers and whiners. They are a cancer.
...

--
Its not that Liberals are stupid. Its just that they know so much that isn't
so.

The Iraqis aren't free, they are occupied and will be for a very long time. If they are so so happy that we "freed" them then why are they still killing our soldiers?

>One step at a time....
>...and what did YOU do on 9-11? Wring your hands and wonder what WE did to
>cause the nutcases to hate us?

In your first paragraph you state that people are dying to come to our country to be free. If this is so then why on earth would anyone want to destroy the twin towers?

There is no "wondering" what we did to cause 9/11. We armed Israel to the teeth and back them so that they can do to the Palestinians what the Germans did to them. There is no "wondering" why people hate us. We have stepped on many toes on our way to Mid East domination.

>
>By the way...we are the strongest militarily. Thousands of brave men gave
>their all for this. We have no gulags,

Yes we are the strongest militarily because we have a Weapons of Mass Destruction program that we use to preemptively destroy those we don't agree with.

You should have said we have no Gulags on the mainland. Have you been to Guantanamo lately? Oh, I forgot, Guantanamo isn't under US jurisdiction so technically the US isn't responsible for anything that goes on there.

>we don't gas our citizens to death,
>we don't cut off the hands of women who wear nail polish

How could they work to support the war machine if we cut off their hands or gassed them?

It makes more economical sense to keep them around and slowly bleed them.

> and we are not
>governed by a bunch of hot-headed religious extremists.

You're right there. They aren't religious.

> After all, you
>Liberals won't even allow, or try to disallow, our school kids saying the
>Pledge Of Allegiance because it has, "Under God" in it.

Would you have a problem with the Pledge of Allegiance if the words were "Under Allah"? Would you recite it? If we are a free society then why should school children be subjected to reciting something that they may not agree with or believe in and has no place in that Pledge? Would you want to be forced to recite Under Allah?

>You Liberals would have whined that the reason we freed the Jews from the
>prison camps of WWII was to get at the gold the Nazis extracted from their

>LIberals are programmed to be hand-wringers and whiners. They are a cancer.
>...

Our main objective of WWII was not freeing Jews from prison camps. That was a side effect of victory. There was no logical reason to keep them locked up any longer once the war was over.

You are programmed to accept whatever is spoon fed to you by the government and the media. without questioning it. There is no hope for you. You are a drone.

Where are those tons and tons of Iraqi Weapons of Mass Destruction that the US government claimed could be activated within 45 minutes and posed a real and dangerous threat to the US?
Where is Saddam Hussein?
Where is Osama Bin Laden?
Where is all that intelligence we have in the Mid-East when we need it?

They come for the money.
Some even die trying.
> Look at the 750,000 deaths Saddam inflicted...
Are you meaning the people that gorge sr told we would back them up if they
revolted aganst saddam, who we employed, and then left hanging?
and this is a conservative
> estimate. Ask the recently freed Iraqis.
Ah yes, why don't you ask some of them?
> One step at a time....
> ...and what did YOU do on 9-11? Wring your hands and wonder what WE did to

> cause the nutcases to hate us?
>
Do you mean that you wonder why people would hate the us gov?

> By the way...we are the strongest militarily. Thousands of brave men gave
> their all for this. We have no gulags,
You have proof that we do not?
we don't gas our citizens to death,
We use injections and such. Oh yes, and utah.....
> we don't cut off the hands of women who wear nail polish and we are not
> governed by a bunch of hot-headed religious extremists.
So..... why did they cover the bare brass boobs of the statue of justice?
After all, you
> Liberals won't even allow, or try to disallow, our school kids saying the
> Pledge Of Allegiance because it has, "Under God" in it.
Some folks do not believe in "god".
